490, 1131, 1381.
typo printers, Montreal, 1379; Victoria,
215.

Manufacturing—pulp, paper and paper products—

paper box manufacturing industry (cor-
rugated paper), Province of Quebec,
88, 490, 1529; (uncorrugated paper),
Province of Quebec, 88, 989, 1702.
paper mill workers, Beauharnois, 636;
Georgetown, 987.
pulp and paper mill workers, Three Rivers,
Gatineau, Temiskaming, and Hawkes-
bury, 1528.
pulp mill workers, Chandler, 1251; La
Tuque, 1379.

Manufacturing—rubber products—

rubber factory workers, Toronto, 1698;
Welland, 1527.

Manufacturing—shipbuilding—

blacksmiths and helpers, Vancouver, 808.
boilermakers, etc., Vancouver, 217, 218, 809;
Victoria, 217, 218, 488.
carpenters and joiners, Vancouver, 809;
Victoria, 217, 218, 488.
electrical workers, Vancouver, 217, 218, 809;
Victoria, 217, 218, 488, 638.
foundry workers, Victoria, 489.
labourers, etc., Vancouver, 217, 218, 810;
Victoria, 217, 218, 488.
machinists, Vancouver, 809; Victoria, 217,
489.
operating engineers, Vancouver, 217, 218,
809.
painters, etc., Vancouver, 217, 218, 810;
Victoria, 489.
patternmakers, Vancouver, 810.
plumbers, Vancouver, 810.
plumbers and steamfitters, Vancouver, 217,
218; Victoria, 489.
sheet metal workers, Vancouver, 217, 218,
810.
shipbuilding workers, Halifax, 1700; Na-
naimo, 1380; Quebec, 1252; Sorel, 86.
shipwrights, etc., Nanaimo, 217; Vancouver,
217, 218, 809; Victoria, 217, 218, 488.
shipyard riggers, Victoria, 1252.
storemen, etc. (shipbuilding), Vancouver,
1252.
tug and barge workers, Owen Sound, 217.
welders and burners, Vancouver, 810.

THE LABOUR GAZETTE

PREPARED AND EDITED BY

THE DEPARTMENT OF LABOUR, OTTAWA, CANADA

Minister—HON. HUMPHREY MITCHELL

Associate Deputy Minister—ARTHUR MACNAMARA

VOLUME XLIII]

JANUARY, 1943

[NUMBER 1

Notes of Current Interest

A. MacNamara appointed vice-chairman of National War Labour Board

former Deputy Minister and Board vice-chairman.

In addition, Mr. MacNamara has been appointed Chairman of the Interdepartmental Committee on Labour Co-ordination. This Committee includes a representative from each of the government departments concerned with Canada's war effort, and, together with the National War Labour Board, now forms the advisory committee for National Selective Service.

Mr. MacNamara succeeds Elliott M. Little as the representative of Selective Service on the Wartime Information Board.

V. C. MacDonald Canada's representative on Governing Body of I.L.O.

The Minister of Labour, Hon. Humphrey Mitchell, has announced that with concurrence of the Secretary of State for External Affairs and Cabinet approval he has nominated Vincent C. MacDonald, K.C., Assistant Deputy Minister of Labour,

to Dr. Stewart's place as Canada's representative on the Governing Body of the International Labour Office, the head office of which is now in Montreal, where it located after commencement of the war when it was found desirable to leave Geneva.

Charles F. Needham appointed Associate Director of National Selective Service

Appointment of Charles F. Needham, executive of the Canadian National Railways, to the post of Associate Director of National Selective Service (Civilian) is announced by Honourable Humphrey Mitchell, Minister of Labour.

Mr. Needham has held numerous executive positions with the Canadian National Railways, that which he occupied immediately prior to his present appointment with the Department of Labour being Assistant to the Vice-President and General Manager, Canadian National Railways, Central Region, with headquarters at Toronto.

At the same time as he announced the appointment of C. F. Needham, Mr. Mitchell also stated that A. E. Pequegnat, who had held the post of Associate Director of National Selective Service (Civilian), has returned to his duties as Assistant General Manager of the Mutual Life of Canada at Waterloo. However, the Minister added that Mr. Pequegnat had consented to become a general consultant in regard to National Selective Service, and that it is proposed to make use of his services in that capacity from time to time.

Production ideas bring awards to Canadian aircraft workers

Workers in Canada's aircraft industry who think up production or material saving ideas which can be shared by the industry as a whole will be eligible for Merit Awards issued by the Director-General of the Aircraft Production Branch of the Department of Munitions and Supply.

This announcement was made by the Aircraft Industry Relations Committee in an article which further continues:—

"The Merit Awards announced at Ottawa will go annually for the best 25 suggestions from workers in aircraft plants throughout the country. They will be chosen by a committee of judges from the hundreds of employees' suggestions submitted through their individual plants. Each of the 25 will receive a handsome engraved certificate issued by the Director-General of the Aircraft Production branch of the Department of Munitions and Supply. Each will also receive a \$25 cash prize. This money is in addition to the cash awards (ranging from \$2 to \$500) which the worker-inventor may win through his own company's adoption of his practical scheme for either saving material or speeding up a job. And the 25 grand prize winners will have the further and inestimable satisfaction of knowing that their bright ideas are helping the entire production front."

(As indicated in the LABOUR GAZETTE for October, 1942, p. 1116, the Executive Committee of the National War Labour Board recently stated that small awards to employees who may advance worthwhile ideas would not appear to contravene the Wartime Wages Control Policy; but it expressed the opinion that there should be a maximum as well as a minimum amount stated in any such scheme for the reason that if a precedent were established some employers might make such a scheme the indirect means of increasing wages.)

Many ingenious ideas have come to light since the industry inaugurated the company plan last May, and awards of varying amounts have been paid.

Suggestion boxes are maintained in the plants. By the use of posters, and folders in pay envelopes workers are invited to turn in their ideas, using numbered forms provided. The coded suggestions may enable the inventor to remain anonymous until the scheme has been considered on its merits. For judging, each plant is asked to set up a committee of employees. Ideas accepted by this group are passed on to a joint production committee which makes the awards. Plant awards are usually made on a percentage basis of the labour or material saving. If the plan eliminates an accident hazard or does not lend itself to a percentage computation, the prize may be arbitrarily set.

Under the national plan, the 25 winners may receive from 6 to 15 per cent of the saving

achieved through their scheme, within the limits stated.

Strikes and lockouts during December

For the month of December the number of strikes reported, the numbers of workers involved and the time loss in man working days were the lowest recorded for the year. During the month there were 13 strikes, involving, 1,434 workers, with a time loss of 6,016 man working days, as compared with 27 strikes in November, involving 20,490 workers and showing a time loss of 103,770 days. In December, 1941, there were nine strikes, involving 5,688 workers with a time loss of 54,545 days. During the month under review one dispute affecting asbestos miners at East Broughton, P.Q., caused about 50 per cent of the time loss.

Of the 13 strikes during December, 1942, 12 were terminated during the month. Two resulted in favour of the workers, six in favour of the employers, one was a compromise settlement and three were indefinite in result. One strike involving 120 workers was recorded as unterminated at the end of the month.

Canadian trade unionists accompany British shipbuilders on tour

The Minister of Labour announced that Ernest Ingles, of London, Ont., Vice-President of the International Brotherhood of Electrical Workers, and R. D. Patterson, of Victoria, B.C., President of Local 2 of the Boilermakers and Iron Shipbuilders Union of Canada, had been appointed to travel with a group of British shipbuilders in their tour of Canadian shipyards (LABOUR GAZETTE, Dec. 1942, p. 1369). The two union officials are the nominated representatives of the Trades and Labour Congress of Canada and the Canadian Congress of Labour, respectively.

Mr. Ingles and Mr. Patterson, appointed to the present tasks by Order in Council, met the British party on its arrival in Canada and travelled with it as representatives of the Minister of Labour. The British party, whose tour was arranged by the Minister of Labour and National Service in Britain and the first Lord of the Admiralty through the High Commissioner for Canada in London, was made up of representatives of the principal shipbuilding trade unions for the purpose of studying both Canadian and United States shipbuilding methods.

Business statistics

The latest statistics available reflecting industrial conditions in Canada are given in the table below.

The index of the physical volume of business in November was slightly higher than in the previous month and about 13 per cent higher than for November, 1941. Minor recession was indicated for mineral production and in the production of electric power in November as compared with the preceding month, but these were more than offset by advances in manu-

facturing, construction, and in the distribution of goods.

Continued expansion in industrial activity was indicated by the figures for employment. The index advanced only slightly in November as compared with October, but was about 9 per cent higher than in November, 1941, and about 54 per cent higher than at the beginning of September, 1939.

For the first eleven months of 1942 the business index averaged 23 per cent higher than for the corresponding period in 1941. Manufacturing was 39 per cent higher in the same comparison.

Report on Japanese inquiry at Vancouver, B.C.

His Honour Judge J. C. A. Cameron, of Vancouver, was appointed on October 24, 1942, as a Commissioner under the Inquiries Act to report upon statements carried in the *Vancouver News Herald* in September and October last, which claimed that the Royal Canadian Mounted Police or the British Columbia Security Commission had made use of the services of a naturalized Japanese named Etsuji Morii, who, it was alleged, was not only racketeering at the expense of other Japanese, but was closely allied to the Black Dragon Society of Japan.

The *News Herald* was represented by Senator J. W. de B. Farris, K.C., and C. L. McAlpine, K.C.; the British Columbia Security Commission and the Royal Canadian Mounted Police by C. H. Locke, K.C.; and A. Bull, K.C. appeared on behalf of Etsuji Morii while he was giving evidence.

Present at the hearing throughout, but not represented by counsel, were several members of the "Consultative Council for Co-operation in War Time Problems of Canadian Citizenship."

Forty-five witnesses appeared before the Commissioner and the report, 98 typewritten pages, now filed with the Hon. Humphrey Mitchell, Minister of Labour, gives in some detail the evidence received.

Judge Cameron sums up his findings as follows:—

1. That evidence was not adduced to prove that Morii was affiliated with an association connected with the Black Dragon of Japan, nor that he was racketeering;
2. Although recommending that Morii be further investigated, evidence available did not indicate that the R.C.M.P. should have caused his internment on the basis of known activities, as had been suggested in some quarters;
3. That the R.C.M.P. have not been guilty of complacency in regard to Morii and that they "have lived up to the high standards which the Canadian public expects of that force";
4. That the British Columbia Security Commission was not at any time influenced in the conduct of the Japanese evacuation by Morii or any of his associates, but a committee to which Morii belonged gave valuable advice.

The Commissioner points out that while the statements in the *News Herald* were aimed specifically at Morii, they constituted a very definite attack on the manner in which the British Columbia Security Commission was

conducting the evacuation, and on the vigilance of the Royal Canadian Mounted Police in protecting the public interest. His Honour, in regard to the Commission, stated "that sufficient evidence was produced from many quarters to establish that through its Commissioners and officers it had undertaken and practically completed a very difficult task in a most efficient and humane manner".

The British Columbia Security Commission was appointed by Order in Council of March 4, 1942, to supervise and direct the evacuation from the defence areas of British Columbia of persons of the Japanese race, and to supervise their subsequent care. Austin C. Taylor is Chairman of the Commission, with J. N. Mead, Royal Canadian Mounted Police, and John Shirras, B.C. Provincial Police, as the other two commissioners. In carrying out its duties the Commission has been given much assistance by the Royal Canadian Mounted Police. The offices of the Commission are at Vancouver.

Vocational Training Advisory Council appointed

The establishment of a Vocational Training Advisory Council was recently announced by the Hon. Humphrey Mitchell, Minister of Labour. This Council is a new body set up to advise the Minister on the operation of trade and vocational training courses throughout Canada, including the War Emergency Training Program. The members of the Council have been selected to represent employers, trade unions, war veterans, agricultural industry and vocational educational authorities, including representation of women.

Membership on the Council, the Minister of Labour explains, requires only part time service. Meetings will be held from time to time, and it is expected that the first meeting will take place in Ottawa during February. The Council is provided for by legislation passed at the last Session of Parliament.

Decision of umpire in regard to 37 Ford female employees

The decision of Mr. Justice C. P. McTague, appointed by the Hon. Peter Heenan, Ontario Minister of Labour, as special umpire in the dispute between the Ford Motor Company of Canada, Limited, and Local 200, United Automobile Workers of America, was made public on December 31, 1942.

The dispute concerned the status of 37 female employees hired to perform clerical work in a factory department. The union claimed that the 37 employees were subject to the provisions of the collective bargaining

agreement signed with the company; that they were doing work formerly done by men; and hence that they should receive equal pay for equal work.

The company contended that the girls were office workers, and hence not subject to the terms of the collective agreement.

Some 14,300 employees went on strike on November 24, to enforce their claim. The Company then applied for a Board of Conciliation and Investigation under the provisions of the Industrial Disputes Investigation Act (LABOUR GAZETTE, December, 1942, page 1375) but withdrew its application when the men returned to work on November 30, following an agreement to have the dispute arbitrated by Mr. Justice McTague.

In his decision Mr. McTague agreed with the union contention that the work done by the girls was of a character formerly performed by male factory employees.

However, he declared that when the clerical work had been done by men it had been "merely incidental to other work which brought them into the class of factory workers, as contrasted with office workers"; whereas the girls' work, he decided, was "purely clerical and analogous to that being done by the office workers".

The union further contended that since men who had formerly done the work and other men who were still doing some of it were on the seniority lists provided for in the agreement, the company had in effect admitted that the jobs in question were covered by the agreement. Mr. McTague declared: "It is a perfectly logical contention, but I think it is a somewhat narrow basis on which to decide an issue such as this."

Mr. McTague ruled in favour of the Company's contention.

New Year's message of Minister of Labour

In a statement issued in the holiday season and published in the *Hamilton Spectator*, the Honourable Humphrey Mitchell, Minister of Labour, outlined the responsibilities of civilians in regard to the war effort, declaring that only by the fullest co-operation of all can victory be finally won.

"Never before", the Minister stated, "has such weight of responsibility rested upon the shoulders of the workers of Canada, and never before have the workers of Canada had so much at stake. Not only are our soldiers, sailors and airmen confidently relying upon the men and women in Canadian war industries to supply them with ever-increasing quantities of the materials of war, but the whole future well-being of the workers of the Dominion is dependent upon a successful

outcome of the battle being waged for the preservation of free institutions.

"Labour has a tremendous task before it," continued the Minister. "A half-hearted effort is not enough; nothing short of a whole-hearted effort can avail us.

"The workers of Canada have put their backs into the job. For their past performances they have earned the gratitude of their brothers in arms. But the task is not yet done; it is actually only commencing. Even greater efforts are necessary if sure and overwhelming victory is to result.

"In times of great stress it is not always easy to retain our sense of proportion, but one thing should be abundantly clear to every Canadian. Any individual who shirks his responsibilities, or who takes advantage of the fact that his country is engaged in a life and death struggle to seek his own personal advantage, is breaking faith with the men who unquestioningly and unhesitatingly are offering their life blood in the service of their country and humanity.

"This is no time for selfishness. It is no time for allowing personal interest to supersede the greater, all-important things for which we are fighting. The workers, by turning a deaf ear to all subversive suggestions, by concentrating all their efforts on the job in hand, can rest assured that they are playing a vital part in assuring victory.

"Labour in past years has achieved many social and economic gains. It is these very gains which are endangered by the forces of Nazism. Labour has had the privilege and responsibility of being in the vanguard of every fight for social reform. It now has the privilege and responsibility of being in the vanguard in the fight to ensure that social and economic gains, dearly won, are not wiped out as the result of an axis victory."

New Year's messages of Canadian labour leaders

Canadian trade union leaders in their New Year's messages reaffirmed the determination of organized labour in Canada to carry out a vigorous war effort.

"The one duty which has been before the people at all times is the winning of the war," declared Mr. J. A. D'Aoust, Secretary-treasurer of the Trades and Labour Congress of Canada.

"The Trades and Labour Congress of Canada has," he continued, "since the outbreak of the war, demonstrated by word and deed its determination to support in every way possible all measures essential for the winning of victory over the enemies of our country and of the United Nations and for the achievement of this victory at the earliest possible time."

Mr. D'Aoust stated that labour was "desirous of co-operating and assisting the Government in its war effort," but declared that "so far places where they could have been of the utmost value, such as being given representation on bodies set up to deal with war production, have been denied them."

He charged that "many misunderstandings and mistakes could have been avoided had the Government recognized labour's request for recognition as an equal partner in industry," and that "while the principle has been on numerous occasions agreed to by the Government, actual practice has fallen far short of making it effective."

In regard to the securing of improved labour standards in the post-war world, Mr. D'Aoust asserted: "Workers through their trade union organizations should be brought into closer consultation with Government both when new laws are being formulated and in the administration of these laws. If the sacrifices called for by war are not to be in vain, then the errors of 1919-1939 must be avoided and plans prepared on which at the termination of the war, a permanent peace founded on justice can be established."

The results achieved by Canadian industry in producing the weapons of war were praised by Mr. A. R. Mosher, President of the Canadian Congress of Labour, who also called for adequate recognition of labour on government bodies, "particularly those dealing with policies regarding production, price control and selective service," and for managements to adopt the principle of labour-management production committees, which, he said, had been highly successful in the United States and Great Britain.

He considered that "we are probably no better prepared for the outbreak of peace than we were for the outbreak of war, and in some respects the changeover will be more difficult because of the enormous number of workers who are now employed for the first time, and who will demand employment at peacetime occupations, as well as because of the large amount of new war-plants which have been established, and which will have to be transformed to other uses or abandoned."

"The war has proven beyond any doubt," he declared, "that financial barriers to industrial development are artificial, and that what is physically possible is financially possible. The same nation which, in the depths of the depression, was forced to maintain hundreds of thousands of people on relief now finds it necessary to organize its manpower in order to utilize the services of every able-

bodied adult, and this is a lesson which surely will not be readily forgotten. When the war ends.....there ought to be work available for all who are able and willing to perform it. By a realistic approach to the problem, forgetting ancient economic myths, Canada will be able to produce in peace-time on a scale quite as great as that required in war-time."

Mr. Alfred Charpentier, President of the Canadian and Catholic Confederation of Labour, declared that the Confederation could be proud, in spite of certain trials, of its year's work. Its progress, he said, without being phenomenal, had been steady, and would, he hoped, prove durable. He called attention to the co-operation which the Confederation had given the federal Government in the war effort.

As no other workers' movement, said Mr. Charpentier, the C.T.C.C. has urged its members, working in war industries, to give honest effort, without loss of time, to prove to the country their true patriotism in the present ordeal. "The patriotism of the C.T.C.C.," he continued, "is not composed merely of vain words, but of action."

Mr. Charpentier expressed the wish that employers would be persuaded that their interests, like those of the workers, would be best served by free collaboration with Christian trade unionism.

Cost of living index

The cost of living rose slightly during the month of November. The official index of the cost of living calculated by the Dominion

Bureau of Statistics (based upon prices during the period 1935 to 1939 as 100) was slightly higher at 118.8 at December 1, as compared with 118.6 at November 1, due to advances for foods, clothing and miscellaneous items.

Since the outbreak of war the index has advanced 17.9 per cent; this compares with an increase of 39.3 per cent for the comparable period during the last war, that is, between July, 1914, and November, 1917. Since the introduction of price control the increase in the cost of living has been less than one-seventh of that during the corresponding period of the last war.

Industrial Disputes Investigation Act

During the month of December, five applications were received for the establishment of Boards of Conciliation and Investigation under the Industrial Disputes Investigation Act. One board submitted its report, two Boards were established, and the constitution of two Boards was completed. Eleven disputes were referred to Industrial

Disputes Inquiry Commissioners for investigation and seven reports were received from Commissioners during the month. Eight applications for the establishment of boards were withdrawn, the disputes being recorded as settled.

Full particulars with regard to recent proceedings under the Industrial Disputes Investigation Act will be found in this issue in the article commencing on page .

Wearing of caps by women factory workers

The following circular letter dated January 4 has been sent out to employers by the British Columbia Workmen's Compensation Board:

Many women have suffered serious scalp injuries through getting their hair entangled in moving machinery.

The Board consequently directs that no female employee shall be permitted to enter or work in any part of any plant where there is any moving machinery unless such employee is wearing and continues to wear a cap or other approved head apparel which completely covers and confines her hair so that it cannot become entangled in moving machinery.

The question of the wearing of caps by women factory workers is one that has received widespread attention in the press in Great Britain, where women are not at present required by law to wear them. The *Annual Report of the Chief Inspector of Factories* declares that "caps can only come in as a secondary precaution after the machine has been securely fenced as required by the Factories Act."

An article appearing in the November-December, 1942, issue of *Industrial Welfare and Personnel Management* stresses the human side of the problem. It suggests that "caps used in the factory must be attractive according to the ideas of the girls employed," and that "it is no use trying common sense as the basis of appeals to girls about covering the hair completely Common sense and clothes do not necessarily go together, but if the complete covering of hair at work can once be accepted as the fashion we shall hear no more about caps being hot and uncomfortable."

Hours of young persons in construction in Great Britain

The hours of young persons in construction work in Great Britain are regulated by the Building and Engineering Construction (Young Persons) Order which came into force on

November 29. The Order covers all youths who have not reached the age of 18 and are engaged in work carried on by private con-

tractors, municipal or other public authorities or the Crown. Its provisions are in addition to and do not overrule the provisions of any existing Act, order or regulation relating to the employment of young persons.

The weekly limit on hours is 54 for youths who have reached the age of 16 and 48 for those who have not reached that age. No youth may be employed continuously for more than five hours without a half-hour interval for lunch or rest, and if he works on Sunday he must receive a whole holiday during the course of either the preceding or following week. Employers may obtain permits exempting them from the provisions of this Order if the Minister of Labour and National Service is satisfied that the young persons employed by them are engaged in work which is not essential to the defence of the realm or the efficient prosecution of the war.

Employee suggestion systems in United States

During the first year of United States participation in the war over 1,400 employee suggestion systems were established in American industry, the U.S. War

Production Board reports. Of these, 1,150 are functioning under the direction of plant management-labour committees sponsored by the U.S. War Production Board.

Early in December the WPB distributed merit awards to fifty-eight workers for suggestions that have helped to speed war production. This was the fourth group of workers to be thus recognized by the WPB since the establishment of its merit award system for war workers last June (*LABOUR GAZETTE*, September, 1942, p. 1039). Ten workers whose suggestions have proved particularly useful were further honoured by being presented to the President at the White House and feted at a luncheon attended by high military, naval and WPB officials, cabinet officers and members of Congress. Six of the ten received citations of individual merit, the highest WPB award, and the other four, certificates of individual production merit, at the hands of the President.

U.S. War Labour Board adopts plan to speed action on labour disputes

The United States National War Labour Board has announced a new plan intended to speed action on labour dispute cases and to simplify procedure for handling wage and salary adjust-

ment requests.

The first part of the plan calls for the establishment of panels representing management, labour and the public in the major cities of the country, to which all labour disputes not settled by the United States

Conciliation Service will be referred. Decisions of the panels will be subject to review by the previously established regional advisory boards.

This new program for speeding up the handling of dispute cases will make the twelve-man War Labour Board in Washington almost exclusively a supreme court which would hear only appeals from the regions and from its industry commissions. The Board would, however, retain the right to review any decision on its own motion. Moreover, it would reserve the right to assume original jurisdiction over cases of national significance or those which involve consideration of major policy.

The second part of the plan concerns requests for voluntary wage adjustments and confers on the Board's regional directors authority to make final decisions in all such cases except those involving employers of more than 100 employees. The regional directors had previously been given authority to grant only certain kinds of increases in twenty-nine specified industries.

An adverse ruling by a regional director on a request for wage adjustments may be appealed to a tripartite regional panel and decisions of both the regional directors and the regional panels are subject to review by the WLB on its own motion.

There is a Regional Advisory Board in each of the War Labour Board's ten regions, with headquarters at Boston, New York, Philadelphia, Atlanta, Dallas, Kansas City, Cleveland, Chicago, Denver and San Francisco.

Each of these Regional Advisory Boards is composed of four representatives of the public, four of management and four of labour—the same composition as the War Labour Board in Washington.

Minimum wage increases approved in U.S.A.

In a General Order issued a short time ago the United States National War Labour Board gave blanket approval to increases in wage and salary rates made in compliance with State minimum wage statutes and orders. The authority for this action is contained in the Executive Order setting forth the wages policy, one section of which provides that increases may be made if they are "necessary to correct maladjustments or inequalities, to eliminate sub-standards of living, to correct gross inequities, or to aid in the effective prosecution of the war."

The Board acted on the principle that since minimum wage laws are designed to establish living wages, increases in the required rates to meet increased living costs are necessary to eliminate sub-standards of living. The

Women's Bureau of the United States Department of Labour realized that the work of the States might be greatly delayed if proposed minimum wage orders had to be approved individually before issuance and it therefore requested the Board to make a general ruling. The State administrators are now free to issue orders without referring them to the Board.

U.S. conference suggests principles for wartime employment of young persons

The Ninth National Conference on Labour Legislation, held at Indianapolis in November, 1942, adopted a resolution setting forth certain basic principles which, in its view, should govern employment of children and young persons under 18 years of age. The Conference is an annual meeting of the federal and state Departments of Labour together with representatives of organized labour appointed by the State Governors.

In 1941, twice as many employment certificates were issued for persons under 18 as were issued in 1940 and the increase was continuing in 1942. If these young people were to play an effective part in the war effort, the Conference considered that there must be careful planning and guidance, with due regard for established child labour and school attendance laws and for safeguarding their health, safety and educational opportunities. The following were the principles adopted by the Conference:

No child under 14 as part of any hired labour force;

No child under 16 in any manufacturing, processing or mining occupation;

No minor under 18 in any occupation declared to be particularly hazardous to young workers under State or Federal laws;

Guidance of youth 16 to 18 years of age, whose work is essential to the war effort, into occupations suited to their age and capacity and in which they can make the greatest contribution with the least hazard to their health and well-being;

Available women and men over the age to be utilized before youths under 18 are recruited.

The Conference also recommended that special attention should be given by the appropriate State agencies and community groups to plans for employing boys and girls of school age in emergency work in agriculture. State Departments of Labour were urged to co-operate with other groups in insuring proper safeguards for the health and welfare of children employed in wartime agriculture and to enforce those provisions of the State child labour laws which are applicable to agriculture.

The Conference stressed the importance of using the untapped reserve of adult labour before requiring boys and girls to leave school or to carry a double burden of school and work. It also commended Federal and State

agencies for their efforts to protect children and young persons during the war emergency period and urged full co-operation in carrying out such policies.

Minimum age for girls employed on public contracts in U.S.A.

The United States Secretary of Labour issued an Order on November 11, 1942, fixing 16 years as the minimum age for girls under the Public Contracts Act. This corresponds with the minimum established

under the child labour provisions of the Fair Labour Standards Act. The former minimum age under the Public Contracts Act was 18 years for girls, with provision for exemption when necessary to prevent injustice or to serve public interest. The new Order was made, with a view to assisting war production, at the request of the Secretary of War, the Secretary of the Navy and the Chairman of the Maritime Commission, and was supported by written findings.

The Order sets forth the following conditions governing employment of girls 16 and 17 years of age:—

No girl under 18 may be employed for more than 8 hours in any one day, or between 10 p.m. and 6 a.m. or in any way contrary to State laws governing hours of work.

No girl under 18 may be employed in any operation or occupation which, under the Fair Labour Standards Act or under any State law or administrative ruling, is determined to be hazardous in nature or dangerous to health.

For every girl under 18 employed by him the contractor shall obtain and keep on file a certificate of age showing that the girl is at least 16 years of age.

A specific and definite luncheon period of at least 30 minutes must be regularly granted any female workers under 18.

No girl under 18 may be employed at less than the minimum hourly rate set by or under the Fair Labour Standards Act for the industry Healey Public Contracts Act for the industry in which she is permitted by this Order to be employed.

I.L.O. Study on "Wartime Control of Employment"

This study, which was published in December, 1942, is a general summary of the manpower regulations in force in various countries. It is an up-to-

date version of the second chapter of the report on "Labour Supply and National Defence" which was issued by the International Labour Office in June, 1941 (LABOUR GAZETTE, 1941, p. 795). The countries covered are Australia, Canada, Great Britain, New Zealand and South Africa. Comparisons are made with the United States, but that country is not dealt

with separately because the measures "so far applied there are more in the nature of recommendation than of controls."

The study is divided into two sections: "Restrictions on Engagement" and "Control of Dismissal and Resignation." It is pointed out that restrictions on engagement have been introduced for several related purposes: (1) to prevent excessive labour turnover, (2) to protect the labour supply of essential industries, and (3) to prevent workers from entering relatively unessential employment and to direct them to the most essential work. "At any particular stage in the war effort, one or more of these purposes may predominate.... In the long run, however, the measures restricting engagement are necessarily directed to serve all of these purposes." Control of dismissal and resignation is a necessary complement to restrictions on engagement, for even when workers are diverted into the industries which are given priority, there must still be measures to keep them there and to permit transfers to take place in an orderly manner. The two policies together form "a unified effort to control the mobility and placement of the labour available for or in war industries."

Payment by results in Germany

According to the November bulletin, *Matters of Fact*, issued by the National Industrial Alliance, Great Britain, a new wages tariff

came into operation on September 1 in all branches of the building industry in Germany.

"Payment by results," according to the article, "is to be universal for all workers. According to the Regulations issued, payment will be according to performance for all work 'in order to make the wage system fair, and to increase output.' Additional payment will be made for work at night, for overtime and for work on Sundays and holidays.

"The work has to be done with the most economical use of materials and with the greatest possible care of implements and tools. 'Careless work,' it is laid down, 'must be made good by each group of workers without special recompense. A worker who takes more time than the average worker must receive payment only for his actual performance, unless his slower rate of work is due to conditions in which he works.' It is pointed out that as the Building Industry is in a key position, the introduction of this system of wage payments is of importance in the entire wages structure."

Absenteeism in Canadian War Industry

Causes of Absence—Absentee figures for 35 Canadian plants—Government Action Against Absenteeism in Great Britain—Control of Absence

WITH an increasing shortage in the supply of workers available for war industry, more attention is being paid in Canada to the reduction of absenteeism as an obvious method of achieving a more efficient use of existing manpower.

Indicating the significance of absenteeism in its relation to war production a British report prepared by *Mass Observation*, states: "some people make much of individual absentee percentages and say that they reflect inefficiency, poor worker morale, etc. This is partly true, but the reverse is also the case—they reflect to some extent the attempt of efficiency, the bringing in of more and more people into industry who would not ordinarily be there and who have other obligations, physical deficiencies and necessities which are not as yet sufficiently coped with; some absenteeism may even reflect the over-good morale of workers trying to work longer hours than are practicable. In fact, absenteeism includes practically all the human factors in industry."

Absenteeism is usually the result of a circumstance or combination of circumstances differing from case to case. In some instances it is the result of conditions of work which lie within the power of the employer to correct. In other instances the workers do not appreciate the consequences of their irregular attendance at work. Generally speaking one of the best methods of approach is to bring the representatives of the employer and of the employees together where the causes of the trouble may be discussed and a solution worked out. With this objective in view, the formation of joint employee-management committees has been encouraged. These joint committees once established not only deal with absenteeism but also with such problems as labour turnover, methods of increasing production, etc.

Absentee Figures for 35 Canadian Plants

A sample recently taken by the Department of Munitions and Supply of thirty-five Canadian plants engaged in war industry

gives an estimate of the degree of absenteeism in this country.

Included in the survey were representative firms selected from all across Canada and from different types of war industry. Their employees range in number from over 12,000 to under 100, the average being about 2,500.

The findings of the survey indicate that an average of 8.1 per cent of all employees were absent each day during September. This figure includes absence for all causes, including vacations. Of the 86,224 employees listed, about 7,000 were absent each day.

During October the rate of absence declined to 6.4 per cent; but rose slightly in November to a rate of 6.9 per cent.

ABSENTEEISM IN 35 CANADIAN PLANTS

September, 1942

Number of employees in 35 plants..	86,224
Average number absent daily.....	7,010
Average percentage absent daily....	8.1

October, 1942

Average percentage absent daily....	6.4
-------------------------------------	-----

November, 1942

Average percentage absent daily....	6.9
-------------------------------------	-----

The lower rate of absence occurring in the latter two months of the survey reflects partly the fact that September is a popular vacation month; and since the figures represent absence from all causes, a decline in the rate would be expected as the vacation season drew to a close. During the summer months, July and August, some individual firms reported a much higher rate of absence.

According to the survey, the amount of absenteeism varied substantially from plant to plant. One firm employing over 5,000 workers had an absentee rate of 18.7 per cent; while another, with approximately the same number of employees, had a rate of only 2.8 per cent. These variations may be partly due to different methods of keeping records used by different plants.

The survey indicates that absenteeism is generally less pronounced in long-established firms than in those of recent development.

Plants employing a large number of women also showed a high percentage of absenteeism. In one firm the absence rate for women was 24 per cent though it was only 8 per cent for male workers.

Causes of Absence

In the survey no breakdown of the figures is made to show the causes of absence. In fact it is difficult to make any estimate of the amount of absence in Canadian war industries due to legitimate reasons, such as illness and vacations, and the amount due to employees simply staying away from work for their own personal reasons.

Data obtained from various sources indicates that, although their relative importance is not definitely established, the principal causes of absence may be classified as follows:—

- (a) illness and accident
- (b) industrial fatigue
- (c) personal reasons
- (d) vacations and leaves of absence.

Of these four causes the last, vacations and leaves of absence, needs no comment. It is around the first three causes, illness and accident, industrial fatigue, and personal reasons, that efforts to improve attendance are concentrated.

Absence Due to Accidents and Illness

It was once thought that accidents and illness were an uncontrollable factor in causing absences. Evidence is beginning to appear, however that accidents and illness as a cause of absence are controllable. Many firms have established sickness prevention programs; and a survey recently made by the United States National Association of Manufacturers shows how effective such programs can be.

The N.A.M. survey of 2,064 industrial firms in the United States shows that sickness prevention programs have on the average brought about the following reductions:—

	Per cent
Occupational disease	62.8
Accident frequency	44.9
Absenteeism	29.7
Compensation cost	28.8
Labour turnover	27.3

The report of the survey also declares that a sickness prevention program more than pays for itself, the average saving in a 500-employee plant in the United States being computed at \$5,611 per year

Beneficial results have also been reported in Canadian plants, one factory employing

200 men announcing a reduction in lost time of almost 70 per cent after the inauguration of a health service program. Dr. C. F. Blackler, Acting Chief of the Division of Industrial Hygiene, Department of Pensions and National Health, gives the example of two companies both engaged in the same kind of work and employing approximately the same number of men, one with a health service program, one without. During a typical month in 1942, the company without a health program had five times as many compensatable accidents as the company which used preventive measures.

A health service program may include, in addition to full or part-time physicians and nurses, a safety engineer and a plan for improving working conditions so as to avoid unnecessary strain and fatigue. Adequate lighting, properly distributed and free from glare; good ventilation, with a system for removal of dust, vapours, fumes, and gases; adjustment of the hours of work to control undue fatigue; rest periods; control of unnecessary noise; provision for nutritious lunches—all these and other factors may play their part in reducing absenteeism.

Industrial Fatigue

On the borderline between absence due to illness and absence due to personal reasons may be classified absence due to fatigue. British experience has been that actual fatigue, in the sense in which the term was used in the last war, has so far been relatively infrequent in this. Long hours, the principal cause of fatigue, are less common now than they were in the last war. Many factors may contribute to industrial fatigue, which may be due as much to mental as to physical tiredness. Dr. Blackler lists, as related to industrial fatigue, the problems of hours of labour, monotonous tasks, rest periods, lighting, heating, ventilation, excessive noise, overcrowding, and "those fundamentals of comfort under which the working day is spent." Evidences of fatigue may consist of "symptoms which so frequently accompany tuberculosis—loss of appetite, loss of weight and tiredness, irritability, pallor, inability to sleep, and tremor of the outstretched hands." These symptoms may occur without any organic disease being present, but obviously render the individual more susceptible to illness. Another cause of fatigue is inadequate nutrition.

The relationship between long hours and absenteeism was indicated in the experience of British industry immediately after Dunkirk. A report of the Industrial Health Research Board in Great Britain (quoted in

an article appearing in *Bulletins from Britain*, April 8, 1942) describes the spurt in production which followed the increase of hours in munition factories to seventy and seventy-five per week. "But as the weeks dragged on," the article declares, "and long hours continued, there was a marked increase in loss of work. Absenteeism in the ordnance factories rose from ten to fifteen per cent. Requests for time off were more frequent, and in some cases the workers made their own arrangements for rest. Interviews with managers and workers in several factories showed that the outbursts of energy and patriotic enthusiasm which characterized the first phase of the emergency period were weakening under the strain of long hours of work. The workers began to feel bored and stale and were more easily irritated and annoyed, according to the report.

"The need for cutting down working hours was officially recognized on July 25, when the Minister of Labour and National Service, Rt. Hon. Ernest Bevin, issued a statement on hours of work and maximum output. He prefaced it with the following words: 'Owing to the situation in this country following the collapse of France it was necessary to call upon all those engaged on war production to make an intensive effort, by working long hours, to speed up production to the utmost extent. It is still of vital importance to maintain war production at the maximum. It is of equal importance, if this end is to be achieved, to relieve the strain caused by long and continuous hours of work, and for this purpose an adjustment in the present long hours of work is essential. This is a matter which must be dealt with by firms in accordance with their particular circumstances, and not by a general order. In order to assist them, I have drawn up some notes for guidance—*Hours of Work and Maximum Production*—in consultation with the British Employers' Confederation and the Trades Union Congress, and with the co-operation of the Supply Departments concerned.'

"First the statement sets forth the dangers of unduly long hours and at the same time the necessity of keeping up output. It points out that the optimum hours have proved to be about fifty-five or fifty-six, and that there must be a reduction to this point—the aim being to work the machinery as many hours as possible while not overworking the men. Some form of shift system is recom-

mended. The notes suggest, also, that ten minute breaks and the provision of suitable refreshment in each working period will help. A system of authorized holidays of from three to seven days was also started at this time, and the improvement in time keeping, as a result of these measures, was very marked."

In the United States eight government agencies, including the Labor Department, the War and Navy Departments, Maritime Commission, Public Health Service, Commerce Department, War Manpower Commission, and War Production Board, recently recommended the following standards in regard to hours:

1. For wartime production the 8-hour day and 48-hour week approximate the best working schedule for sustained efficiency in most industrial operations.
2. One scheduled day of rest for the individual, approximately every 7, should be a universal and invariable rule.
3. A 30-minute meal period is desirable.
4. Vacations are conducive to sustained production, and should be spread over the longest possible period.

Absence Due to Personal Reasons

Personal reasons for absenteeism may be extremely varied. In certain cases absenteeism may be frequent over week-ends. There seems to be some relationship between high earnings and absences. As previously stated, time lost among women is invariably higher than among men—there is probably at least twice as much female absenteeism as there is male. Married women are more often absent than single women; the problem of managing a home in addition to working in a factory being difficult to cope with.

A significant factor is local work tradition. Families raised in a factory atmosphere with industry talked in the home are likely to have higher standards of work, a better esprit de corps, than new workers recruited from the country and unused to city life.

New plants, using a large proportion of workers unaccustomed to industry, seem to have more of an absentee problem than old established companies, this in spite of the fact that Canada's new plants are generally good so far as working conditions are concerned. The difficulty is partly one of obtaining experienced foremen and work supervisors.

There has been indicated a slight reaction among some workers to Canada's new income tax assessments, involving an unwillingness to be placed in a higher income bracket due to increased earnings. In some cases workers were under the impression that they would lose money by working more than a certain length of time. In this connection good work has been done by some firms in explaining to their employees the income tax situation as it affects them. Some firms have published leaflets showing for individual cases the exact proportion of earnings taken by taxes when income is raised above a particular level. Such action has done much to clear up misunderstandings.

Those who dislike their jobs and who are misplaced in jobs are more likely to absent themselves on small provocation. Associated with this, factories where there are hold-ups and consequent frustrations are likely to have a higher absentee record.

Transportation difficulties are apt to contribute to absenteeism, in the case of employees living at a distance from their place of work. This is especially true when hours of work are over-long. When an unusual length of time in getting to and from work is added to an already lengthy working day an additional source of fatigue is created.

Weather too has its effect on steady attendance at work. Severe storms or extreme changes in weather are likely to be reflected in increased absentee figures.

One Canadian company which keeps a record of its absences reported recently that regardless of weather or other factors, payday absenteeism was 40 per cent less than the average for the week. Absenteeism was worst on the day following payday, and improved a little each day until the next payday.

The same company reported that over 60 per cent of its absences were caused by sickness, including "real, imaginary and fictitious" ailments. About two-thirds of these ailments were estimated by the company to be genuine, or severe enough to justify absence.

"Perhaps the most significant cause of all," declares a British Ministry of Labour and National Service report, is "the lack, due often to ignorance, of real interest in the job and of conviction of its importance and urgency. Experience shows that the workers in general respond in increasing degree to the incentive of interest when they are made aware of the part their particular job plays in the final product, and it is hoped that the new production committees will be useful in this direction. The Ministry of Labour and Na-

tional Service is convinced that a real effort by industrial management to attack the psychological causes of absenteeism is the greatest single contribution that can be made to a solution of the problem."

The importance of maintaining accurate and fair records of absence is stressed in most plans for combating absenteeism. When accurate records are kept and employees know that all absences are investigated, absence can usually be reduced. (Cf. Metropolitan Life Insurance Company plan, *LABOUR GAZETTE*, September, 1942, p. 1056.)

Experiences of some English firms in combating absenteeism reflect the complex nature of the problem. The article in *Bulletins from Britain*, previously quoted, mentions that in order to aid women employees, who tend to take extra time off for marketing and household duties, some firms have arranged with local stores for special shopping evenings after hours.

"Community shopping clubs have been instituted in some districts. Some firms arrange shifts to allow shopping time off during daylight hours; and experiments have been made with a system of priority cards for factory workers, which eliminate lining up.

"Some factories now have day nurseries near them where women may leave their children to be cared for during working hours. Factory canteens for men and women where they may eat at any hour of the day or night have done much to relieve the women of other household duties. But it is not only the women who find difficulty in keeping good hours. One firm found that owing to transport difficulties and decrease in the number of barbers, even the men were taking half days off for hair cuts. The firm installed its own barber on the premises and reduced hair-cutting leave from half a day to fifteen minutes.

"Besides these specific conditions which can be met directly there may be a loss of morale due to a combination of them all—boredom and discouragement may have to be combatted. An interest in and enthusiasm for the work is the best preventive of this state of mind. Here, Works Councils have proved invaluable. Talks given in the factories about the work itself, and the uses to which the product is put, have also proved useful. Experiments have been tried with visits for factory workers to battleships, tank units, etc., where they may see their product in action. Large charts are displayed in many factories, with target lines of production on which weekly progress towards the target is marked. The competitive spirit may be evoked by

competitions between teams or between factories.

"Actual boredom with the work has been eliminated in some cases by well-planned rest intervals with refreshment or exercises; by music—sometimes in intervals, but often during work. With certain types of very automatic work this has proved very successful. Absenteeism may also be tackled directly. Some firms give bonuses or badges for good attendance. One firm, at least, gives extra days off for good attendance. Some factories write up the names of persistent absentees on a board at the entrance. In stubborn cases there is the last resort of referring the matter to the National Service Officer."

Government Action Against Absenteeism in Great Britain

Under Great Britain's Essential Work Orders (LABOUR GAZETTE, August, 1942, p. 933) any specified person who absents himself from work or is persistently late may be reported to a National Service Officer (provided his firm has been classified by the Minister of Labour as engaged on essential war production, and also provided that the firm complies with certain standards as to conditions of employment and welfare). If, however, a joint production committee exists in the plant, the case must first be referred to this committee. The absentee is thus exposed to the opinion of his fellow workers, who can if necessary turn him over to the National Service Officer for prosecution, in which case he may be liable to a fine of \$400, or three months' imprisonment, or both.

A recent despatch from the London *Times* mentions a number of prosecutions of miners for absenteeism. The despatch quotes Mr. Bevin, Britain's Minister of Labour, as stating that up to the end of August, 1942, the number of miners prosecuted for absence from work without reasonable excuse or for persistent lateness was 572. Of these, 430 were fined, 115 sentenced to imprisonment, and 12 bound over. Fifteen cases were dismissed.

The view of the British Ministry of Labour and National Service has been declared to be, however, that "a solution of the problem of avoidable absence from work is more likely to be found by those establishments which look for that solution within themselves, than by those which tend to rely more on external powers of discipline or punishment." The Ministry suggests that the first step in the direction of control of absence is for one person of senior status in each factory (assisted as may be necessary) and capable of a tactful and understanding

approach to the individual, to be allocated specifically to deal with all absences, and for the existence of that arrangement to be made thoroughly known throughout the factory. That same person should be responsible also for establishing co-ordinated procedure for dealing with applications for leave of absence.

The next step, the Ministry states, is to ensure that the extent of absenteeism is known, together with its causes.

"It is of primary importance", the Ministry declares, "that in their efforts to deal with absenteeism and persistent lateness, whether culpable or not, managements should maintain close consultation with the representatives of the workers. The factory's record of absence and all relevant data in the possession of the management should be placed regularly before those representatives, so that they may be stimulated to co-operate intelligently and wholeheartedly in the task of reducing that absence to the lowest possible level. The workers' representatives have a special responsibility for convincing the thoughtless minority of their fellow-workers that absence from work, whether during normal or overtime hours, except for unavoidable reasons, not only interferes with the nation's war effort but is grossly unfair to the great majority, who do their part with diligence and enthusiasm in spite of the long hours and the personal and domestic inconvenience involved."

Campaign of a Canadian Firm

A vigorous drive against absenteeism was carried on recently by a large Canadian firm, which directed its campaign solely against the problem of absence, without considering lateness, loafing, or any other factor that could distract attention from the one objective, namely cutting down on absenteeism.

Realizing that the drive could not be a success without the co-operation of the workers themselves, the company enlisted the help of employees in organizing the details of the campaign and in stirring up interest. Plant co-operation committees played a prominent part.

It was decided to launch the campaign in the form of a contest between departments, with each department constituting a team regardless of the number of employees. Several very small departments, however, were grouped together as one team. Weekly contests were to be held between the teams in each of the three main divisions of the company, so as to produce three winners each week. The team in each division with the lowest percentage of absentees was to be the winner for that week. A "lap" winner for

each division would be named every four weeks, thereby maintaining sustained interest. Finally the "sweepstake" winner in each division would be the team with the lowest percentage of absences for the entire twelve weeks of the contest.

Posters were displayed all over the plant, and brightly-printed brochures were distributed to all employees. A huge 4 x 10 ft. chart was posted in each department, giving the number of persons absent week by week, and dividing the figures between men and girls and between those absent with permission and those absent without leave. The name of the winning department was placed on every chart each week, as well as the name of the department with the poorest record.

No monetary reward was offered to the winners. However large silk "Victory Flags" were awarded to the winning teams each week. These were presented by high officials in the army, navy and air force.

During the week prior to the opening of the campaign, absenteeism had reached a company total of almost 14 per cent in absence

from all causes. Steady progress was made, and by the end of twelve weeks the rate of absence had dropped to about seven per cent, where it has since remained.

Control of Absenteeism

In conclusion the application of the following general principles are considered important factors in the control of absenteeism:

- (1) Improvement of labour relations between employer and employee in particular plants.
- (2) Establishment of joint labour-management production committees.
- (3) Inauguration of a system of recording absences and their causes.
- (4) Establishment of safety and health programs.
- (5) Plant campaigns, intelligently conducted, to publicize the importance of individual responsibility in unnecessary absences in terms of lost production vital to the fighting front.

Survey of Absenteeism in New York State

A recent survey of absenteeism in war industry undertaken by the New York Regional Office of the War Manpower Commission indicated that six out of every hundred war workers were remaining away from defence plants daily, for a great variety of reasons which, in addition to illness, included nursing babies, "hangovers", attending a wedding or a wake, repairing the family car, cashing a salary check, and inability to shop at night.

The survey was conducted in eight plants employing a total of 40,000 men and women and representing a wide diversity of industry.

Mrs. Anna M. Rosenberg, Regional Director, declared that the loss of manpower from these largely preventable causes was "definitely far too great".

To remedy the situation, she recommended that management, labour and communities work together for readjustment of all everyday activities to meet the needs of the workers. Communities, she added, would have to readjust and expand the hours of all types of services and facilities.

The survey pointed to illness as the principal cause of absence from work, and found more absenteeism among women than among men.

It was also shown in the New York study that absenteeism is usually confined to a comparatively small group, averaging about 15 per cent of the workers employed in a plant.

The day after pay day proved to be the worst day for absentees, failures to report amounting to 50 per cent of the total number of employees in some cases. It was also found that only half the workers notified the plant of their intention to remain away from work.

Declaring that the problem was largely one of morale, the report recommended labour management committees as the best approach to a solution of the problem. It stressed the importance also of co-operative action on the part of labour, management and the community.

Mrs. Rosenberg also said, "A little incident which occurred while I was visiting one of the plants in which we made our study might carry a hint to employers. I asked one of the girls if she knew what the gadget she was working on was used for. She didn't know. I then took her to another part of the factory and she was very much surprised and pleased to learn that her gadget was a vital part of an aerial bombsight. That girl, I venture to say, will not lose any time from her job if she can help it."

Manpower

Consolidation of National Selective Service Civilian Regulations

Employers Required to Report Surplus Labour—Provision for Compulsory Employment Transfers of Those Rejected for Military Service—Selective Service Appeals to be Determined by Courts of Referees.

AT a press conference on January 21, Hon. Humphrey Mitchell, Minister of Labour, announced a consolidation of National Selective Service Civilian regulations under Order in Council P.C. 246 of January 19. This Order consolidates, with some amendments, the following previously existing regulations:

- (a) National Selective Service Regulations, 1942.¹
- (b) Regulations affecting technical personnel.²
- (c) Regulations affecting university science students.³
- (d) Labour Exit Permit Requirements.⁴

Principle of Selective Service

As explained in a press release, the new regulations enunciate a principle in Part I, namely, that utilization of manpower in the prosecution of the war effort shall be by voluntary placement in the first instance. This is simply in line with experience. The services of labour can be used to the greatest possible advantage by having agreement of the workers concerned in regard to the disposal of their services. However, the compulsory features provided in the regulations may be resorted to so that inconveniences and burdens will be suffered not alone by those willing to accept them, but by any persons whose skills or abilities are useful in the war effort. In other words, voluntary methods may always be supplemented by compulsion where necessary.

Amendments Now Made

Regulations affecting technical personnel, university science students and labour exit permits, except for their incorporation into the general civilian regulations, remain unchanged in principle.

The more important changes contained in the revision involve the former National Selective Service Regulations, 1942, contained in P.C. 7595 of August 28, 1942. However, in essential principle the regulations as in force from September 1 last still remain effective, including chiefly the restrictions on agricultural workers seeking employment at other than agriculture, permits to seek work or enter employment, 7 days' notice of separation from employment, restrictions on employment advertising and compulsory acceptance of employment in some circumstances.

The outstanding changes carried in the new regulations are:—

To prevent labour hoarding, employers must notify the employment service of any surplus workers in their employ.

Any person, between 16 and 65 years of age, must register for work if not gainfully occupied for 7 consecutive days (full time students, housewives and clergy are not included).

Persons in age groups subject to the military call-up may be compulsorily required to accept alternative employment if remaining in civilian life.

Employed persons may be authorized to leave present employment on 7 days' notice, to accept more important work.

Causes for waiving the 7 days' notice before separation from employment are clarified and enumerated.

Persons joining the Armed Forces voluntarily do not have to give 7 days' notice.

Persons normally employed in agriculture may now accept employment without permit in another industry, only to a total of 60 days in a year, and then only outside towns and cities with more than 5,000 population.

Appeals against selective service rulings will now go to Courts of Referees set up under Unemployment Insurance.

The new regulations are restricted to persons 16 to 65 years of age.

Practical nurses and workers in fish processing plants are added to classes exempt from the regulations.

¹P.C. 2254,—L.G., April, 1942, p. 415; P.C. 5083,—L.G., June, p. 676; P.C. 7595,—L.G., Sept., p. 1020; P.C. 7994,—L.G., Sept., p. 1058.

²P.C. 638,—L.G., April, p. 425.

³P.C. 9566,—L.G., Dec., p. 1369.

⁴P.C. 9011,—L.G., Nov., p. 1272.

Building construction workers will be exempt from the 7 days' separation notice requirement.

The Minister of Labour may request that persons failing to furnish evidence to their employer that they have not contravened military call-up regulations, may be dismissed from employment. Similarly, those seeking work and failing to furnish evidence on this point may be refused permits to work on instructions of the Minister.

Regulations in regard to enforcement are made somewhat more rigid.

The earlier Orders in Council, consolidated into the revision, are now repealed. Sections dealing with administration are combined for all regulations.

The Minister of Labour, through his representatives and officers, is to administer the new regulations. The Director of National Selective Service, Associate Directors, and the appointment of officers, clerks and employees, are provided for.

The revised regulations become effective immediately.

Purpose of Consolidation

The purpose of consolidation in the new Regulations is:

(1) To provide a set of consolidated and co-ordinated regulations in order to simplify administration and to harmonize, in so far as is practical, the several provisions;

(2) To correct defects in earlier regulations, which became evident through experience;

(3) To gain a greater measure of control over the employment market, necessary in prevailing circumstances.

The consolidation should result in the public requiring a knowledge of the regulations with greater ease, while without doubt officers whose duty it is to carry out the responsibilities of administration will find the new regulations more easily understood, and more readily carried out, when presented as a single, co-ordinated piece of legislation.

It is inevitable that in regulations of the necessary complexity of the present, experience would show up defects. For instance, while work permits and the 7 days' notice rule have acted to stabilize employment in some industries, in other cases their rigid enforcement was frequently discovered to work hardship on employees or injustice on employers. In building construction, to mention an example, the 7 days' notice was found ill-suited to the natural conditions of work in the industry: consequently, that industry is now exempt. Further, due to lack of clarity in regard to the application of the 7 days' notice to temporary lay-offs, differences between employers and employees frequently arose over whether employees were entitled to notice in a given case. Such disagreements do not make for harmonious working relationships, so that in the revision there has been an effort made to clarify the application of the 7 days' notice, to the point where differences over its application should be much less common.

The requirement that employers who retain in their employ persons whose services are not seriously needed at the moment, must report any workers actually surplus to their requirements, is designed to meet labour "hoarding". The new provision that persons must register after 7 days of unemployment, is necessary so that the employment service may be aware of every person who is available for work. Amendments to the provisions with respect to compulsory transfers will become increasingly important as labour shortages develop further. All in all, these added provisions should give an increasing control over employment.

It is hoped that the provisions in respect of enforcement, now spelled out in the Order in Council in additional detail, will make possible more nearly general compliance with Selective Service regulations. Denial of employment to male persons unable to show that they have complied with the military call-up should assist in the enforcement of National Selective Service Mobilization Regulations.

Summary of Regulations

PART I

General

This Part of the new Order in Council sets forth the methods by which the Minister of Labour is to carry out the Government's policies in relation to manpower.

Means cited for carrying the policies into effect place the following duties on the Minister of Labour:

- (1) Operation of an employment service;
- (2) To ensure the most efficient use of manpower by employers;
- (3) Surveys of manpower resources, as may be necessary;
- (4) Co-ordination of manpower demands of the armed services and departments of government, with available manpower resources, and the making of recommendations thereon to the services, to departments and to the Governor in Council.

PART II

Civilian Employment

This Part contains previous National Selective Service Regulations (P.C. 7595) with new amendments.

The essential features of previous regulations are preserved as follows:

- (i) Employers are required to advise Employment and Selective Service Offices of desire to engage or intention to lay off or discharge, employees;
- (ii) Generally speaking, 7 days' notice from employer to employee, or vice versa, of intention to separate from employment, unless a Selective Service Officer agrees to reduce the period;
- (iii) Permit to seek or enter employment covered by the order;
- (iv) Limitations on agricultural workers leaving agriculture to accept alternative employment;
- (v) Control of advertising for labour or employment;
- (vi) Right of local Selective Service Officer, under general instructions, to direct a person to report for interview, or direct an unemployed or partially unemployed person to accept employment;
- (vii) Supplementary allowances, including travel expenses, when a person is directed or requested by a Selective Service Officer to accept, or change, employment, if authorized by the Minister in the particular case;
- (viii) Compulsory re-instatement in former employment after transfer to other work on request or direction of a Selective Service Officer;
- (ix) Appeals against rulings of Selective Service Officers.

New features now added are:—

- (i) Every employer must notify the employment service of any surplus workers in his employ;
- (ii) Any person, from 16 to 65 years of age, must register for work if not gainfully occupied for 7 consecutive days (full-time students, housewives and clergy are not included);
- (iii) On order of the Minister, and after hearing the parties concerned, a person in an age class designated for the purpose of the military call-up may be compulsorily required to accept alternative employment;
- (iv) An employed person may be authorized by the Selective Service Officer to leave his present employment on 7 days' notice and accept other employ-

ment, when the worker agrees, even though the contract of employment or a law may ordinarily require longer notice.

Amendments made to the previous regulations are as follows:—

- (i) Causes for reducing the 7 days' notice prior to separation, are clarified, and are now chiefly included in the order;
- (ii) 7 days' notice is not to be required until after an employee is in employment for one month;
- (iii) Those volunteering for service with the armed forces will not be required to give notice before leaving employment;
- (iv) Agricultural workers may only accept temporary employment outside of agriculture without a permit, to a maximum of 60 days within a year, and then only outside urban municipalities of over 5,000 population (previously the rule was that an agricultural worker might take employment anywhere without permit, for 30 days at a time);
- (v) Appeals against rulings of Selective Service Officers will now go to Courts of Referees under the Unemployment Insurance Act, instead of to Mobilization Boards (formerly National War Services Boards). Appeal procedure is quite informal.

Previously regulations now contained in Part II applied to employed persons generally, except provincial employees; workers in agriculture and fishing; technical personnel; clergymen; registered nurses; school and college teachers; female persons in domestic science; part time workers; and persons in jobs of not more than 3 days' duration.

Coverage is now amended to restrict the regulations to those 16 to 65 years of age, and to exempt (in addition to classes previously exempt) practical nurses and workers in fish processing. Workers in building construction are now exempt in regard to the 7 days' notice but not from the need of permits to seek or accept employment.

PART III

Technical Personnel

Previous regulations gave authority to direct and control the employment of persons deemed to be "Technical Personnel"; this Part continues this authority, vesting in the Minister or his representatives the right to determine where the services of "Technical Personnel" may be used to the greatest advantage. Similarly, previously existing authority in regard

to "University Science Students" is continued to give the Minister control over their education and some authority to direct their activities after graduation.

PART IV

Labour Exit Permits

Previously existing regulations are unchanged. Generally speaking, it is provided by this Part that no one may leave Canada to work outside, without first receiving a Labour Exit Permit from a Selective Service Officer.

PART V

Administration

This Part provides for the Director of National Selective Service and Associate Directors of National Selective Service, as well as such National Selective Service Officers, clerks and other officers and employees as are necessary. It also makes provisions for the customary detail of administration incidental to such an order.

Text of P.C. 246

ORDER IN COUNCIL

AT THE GOVERNMENT HOUSE AT OTTAWA

Tuesday, the 19th day of January, 1943.

PRESENT:

HIS EXCELLENCY THE GOVERNOR
GENERAL IN COUNCIL:

Whereas the Minister of Labour reports that, by reason of the war, it is necessary for the security, defence, peace, order and welfare of Canada and for the efficient prosecution of the war, to amend and consolidate the various orders and regulations affecting manpower.

Now, therefore, His Excellency the Governor General in Council, on the recommendation of the Minister of Labour, and under the authority of the War Measures Act, Chapter 206, Revised Statutes of Canada, 1927, and the National Resources Mobilization Act, 1940, is pleased to make the regulations hereto attached and they are hereby made and established accordingly.

THE NATIONAL SELECTIVE SERVICE CIVILIAN REGULATIONS

SHORT TITLE

1. These regulations may be cited as The National Selective Service Civilian Regulations.

INTERPRETATION

2. In these regulations, unless the context otherwise requires:—

(a) "advertisement" includes any notice, announcement or information;

However, two new features are important: the Minister may require any employer to release all male persons failing to furnish evidence that they have not contravened the military call-up regulations; and he may also cause a permit to seek employment to be refused to any male persons failing to furnish similar evidence.

PART VI

Enforcement

This Part contains a consolidation of the regulations in respect of compliance and enforcement. Provisions in regard to enforcement are made somewhat more rigid than heretofore, and penalties are increased in some cases.

PART VII

Miscellaneous

This Part of the order provides for the repeal of Orders in Council now incorporated into the new regulations, as well as certain necessary general provisions. It also provides that the new regulations shall become effective immediately.

- (b) "agriculture" means the production on a farm or field crops, fruits, vegetables, honey, poultry, eggs, livestock, milk, butter or cheese;
- (c) "Associate Director" means an Associate Director of National Selective Service appointed under these regulations;
- (d) "Board" means a Mobilization Board established under the National Selective Service Mobilization Regulations and, with reference to any man, means the Board established for the Division in which he resides;
- (e) "dependent", when used with respect to any person, means some other person dependent for support on the income earned by such person in a business, occupation or employment;
- (f) "Director" means the Director of National Selective Service appointed under these regulations;
- (g) "Division" means a Division established by or pursuant to the National Selective Service Mobilization Regulations;
- (h) to "lay off" means to cease for a period to make use of the services of an employee under circumstances which relieve the employer from remunerating the employee in respect of such period;
- (i) "local office" means an Employment and Selective Service Office, formerly an Employment and Claims Office established by the Unemployment Insurance Commission, or any other office designated by the Minister as a local office for the purpose of these regulations; and in respect of any person, means the nearest local office to the place where he carries on business or is employed or, if he is not in business or employed, to the place where he resides;
- (j) "Minister" means the Minister of Labour;
- (k) "national" includes subject or citizen;
- (l) "peace officer" has the same meaning as in the Criminal Code;

- (m) "person employed in agriculture" means, except in section two hundred, a person who, on the twenty-third day of March, nineteen hundred and forty-two, was wholly or mainly employed or occupied in agriculture and includes any person who, on the said day, was employed or occupied on seasonal work in a primary industry and whose last employment or occupation immediately prior to such employment or occupation in a primary industry was wholly or mainly in agriculture.
- (n) "prescribed" means prescribed by the Minister;
- (o) "primary industry" means lumbering, logging, forestry, fishing and trapping;
- (p) "publish" means to communicate to any person or persons by any means whatsoever;
- (q) "Selective Service Officer" means a National Selective Service Officer appointed under these regulations and in respect of any person means a Selective Service Officer for the area in which such person carries on business or is employed, or if he is not in business or employed, for the area in which he resides;
- (r) "technical person" means a person described in Schedule "A";
- (s) a reference to a section, part or schedule by number only shall be a reference to such section, part or schedule in these regulations;
- (t) words importing the masculine gender include corporations as well as females; and
- (u) "year" means a year commencing on the first day of a month of January.

PART I

General

100. The Minister shall carry out the policies of the Government of Canada with reference to the utilization of manpower in the prosecution of the war by the voluntary placement of labour, if that is practical, and shall only exercise the powers of compulsion vested in him by these regulations when, in his opinion, such action is necessary to carry out the policies of the Government.

101. For the purpose of carrying out the policies of the Government, the Minister shall

- (a) maintain and operate an employment service in Canada;
- (b) take such steps as may be necessary to ensure the most efficient use of manpower by employers other than His Majesty in right of Canada;
- (c) make such surveys of the manpower resources and needs of Canada as he deems necessary;
- (d) after consultation with the armed services of Canada and the departments and agencies of the Government of Canada whose activities affect or relate to the demand for and the supply of manpower, recommend to each of them such action as, in his opinion, is necessary to co-ordinate such activities and carry out the policies of the Government; and
- (e) after consultation with the armed services of Canada and the departments and agencies of the Government of Canada whose activities affect or relate to the demand for and the supply of manpower, recommend to the Governor in Council

such action as, in his opinion, is necessary to co-ordinate activities of the armed services of Canada and of departments and agencies of the Government of Canada which affect the demand for or the supply of manpower and such further action as is necessary to achieve the manpower objectives laid down by the Government.

PART II

CIVILIAN EMPLOYMENT

Interpretation

200. (1) In this part, unless the context otherwise requires:

- (a) "court of referees" means a court of referees constituted under section fifty-three of The Unemployment Insurance Act, 1940.
- (b) "employee" means any person who has attained his sixteenth birthday and has not attained his sixty-fifth birthday and who is employed under a contract of service or apprenticeship, written or oral, expressed or implied; includes any person or group or class of persons not employed under a contract of service or apprenticeship when the Minister declares such person or group or class of persons to be an employee for the purposes of this part; but does not include—
 - (i) any person employed by His Majesty in right of any province;
 - (ii) any member of His Majesty's Naval, Military or Air Forces;
 - (iii) any person employed in agriculture, fishing, fish processing, hunting or trapping;
 - (iv) any technical person;
 - (v) any minister, priest or clergyman authorized to perform the marriage ceremony;
 - (vi) any registered nurse, any person undergoing training to become a nurse or any practical nurse in a private home;
 - (vii) any teacher in a school, college or university which, in the opinion of the Minister, is not carried on for gain;
 - (viii) any female person employed in domestic service in a private home where not more than one servant is employed;
 - (ix) any student when employed only after day classes or on holidays during the school or college term but not when employed during the long summer vacation;
 - (x) any person in respect of part-time subsidiary employment which is not his principal means of livelihood;
 - (xi) any person in respect of casual or irregular employment for not more than three days in any calendar week for the same employer.
- (c) "employer" means any person having one or more persons in his employ and includes His Majesty in right of Canada; any person acting on behalf of an employer, and in the case of a corporation which is an employer, any officer of the corporation;
- (d) "notice of separation" means a notice given by an employer or employee pursuant to section two hundred and two or a similar notice given under The National Selective Service Regulations, 1942;

- (e) "permit to seek employment" means a permit furnished by a Selective Service Officer pursuant to section two hundred and four or a similar permit furnished under The National Selective Service Regulations, 1942; and
- (f) "urban municipality" means an urban municipality whose population exceeds five thousand.

Supply and Demand

201. (1) When a person ascertains that he requires or will require to engage an employee or that he will be laying off or discharging an employee, he shall forthwith notify the local office of such requirement or supply the local office with such information as to the employee to be laid off or discharged as may be prescribed.

(2) Any person who has attained his sixteenth birthday and has not attained his sixtieth birthday and who, for a period of seven consecutive days, has been unemployed or not gainfully occupied shall, unless he is

- (a) a technical person, or
 (b) a school, college or university student, forthwith register with the local office and supply such information as may be prescribed.

(3) No person shall have in his employment more persons of any particular qualifications than are reasonably necessary for his immediate needs without notifying the local office that the persons whose services are not immediately necessary are available for employment.

Separation from Employment

202. (1) No employer shall lay off or terminate the employment of an employee without giving him in prescribed form in duplicate

- (a) seven days' notice of separation exclusive of the day on which the notice is given, or
 (b) such shorter notice as the Selective Service Officer allows,

unless

- (i) the employee is employed on building construction work,
 (ii) the employee has been in his employment for a period of less than one month,
 (iii) by reason of weather conditions or by reason of fire, explosion or other calamity, the employee's services cannot be utilized, or
 (iv) the employee has refused to accept a transfer under a collective labour agreement or practice in the industry in accordance with which employees have agreed or are accustomed to transfer from their usual employment to alternative employment with the same employer at a lower rate of remuneration.
- (2) Where
- (a) an employee is employed on building construction work,
 (b) an employee has been in an employer's employment for a period of less than one month,
 (c) by reason of weather conditions or by reason of fire, explosion or other calamity, an employee's services cannot be utilized, or
 (d) an employee has refused to accept a transfer under a collective labour agreement or practice in the industry in accordance with which employees have

agreed or are accustomed to transfer from their usual employment to alternative employment with the same employer at a lower rate of remuneration,

the employer shall give him notice of separation in prescribed form in duplicate before laying him off or terminating his employment.

(3) Except to undergo alternative service under the National Selective Service Mobilization Regulations or to enter service in His Majesty's Canadian armed forces, no employee shall terminate his employment without giving to his employer in prescribed form in triplicate

- (a) seven days' notice of separation exclusive of the day on which such notice is given, or
 (b) such shorter notice as the Selective Service Officer allows,

unless he is employed on building construction work or has been in the employment for a period of less than one month, in which event he shall give his employer notice of separation in prescribed form in triplicate before terminating his employment.

(4) The Selective Service Officer may, in accordance with principles and directions set out in instructions given by the Minister, allow an employer to give less than seven days' notice under this section; and without limiting the generality of the foregoing, he may do so if he is satisfied

- (a) that it is impossible by reason of
- (i) the absence from work of another employee or group of employees,
 (ii) a power shortage,
 (iii) conditions which might jeopardize the health of the employee,
 (iv) a shortage of materials, or
 (v) a breakdown of machinery, to give the seven days' notice before the employee's services become unnecessary and that the circumstances making it impossible was, in the opinion of the Selective Service Officer, beyond the employer's control; and
- (b) that the employer cannot use the employee's services in alternative employment;

but when the services are made unnecessary by reason of a shortage of materials or a breakdown of machinery he may not allow the employer to give less than two days' notice.

(5) Where an employer applies for a reduction in the seven days' notice affecting an employee who is a member of a trade union and such employer and the trade union have a collective labour agreement, the Selective Service Officer shall consult with the authorized representatives of the trade union before making his decision.

(6) Every employer shall, on request, furnish an employee with an adequate supply of forms containing the prescribed notice of separation.

(7) Where an employer gives an employee notice of separation under this part the employee shall forthwith acknowledge receipt thereof by signing one copy in the prescribed place and return such copy to the employer.

(8) Where an employee gives an employer notice of separation under this part, the employer shall forthwith acknowledge receipt thereof by signing one copy in the prescribed place and return such copy to the employee.

(9) Every employer who gives or receives a notice of separation under this part shall retain one copy thereof and shall, within forty-eight

hours of giving or receiving such notice, deliver a copy thereof to the local office.

(10) The provisions of this part with respect to the giving of notice of separation shall not supersede any law, statutory or otherwise, requiring a longer notice.

(11) No employer or employee shall be bound by this section insofar as it is inconsistent with any right or privilege of the employer or employee, as the case may be, under an existing collective labour agreement which was entered into prior to the first day of September, nineteen hundred and forty-two.

203. (1) Where an employer is of opinion that an employee is guilty of serious misconduct he may give him notice of separation pursuant to section two hundred and two and suspend him from duty forthwith.

(2) An employee may, within seven days of being suspended for serious misconduct, exclusive of the day on which he was suspended, apply in writing to the Selective Service Officer to review such suspension; and, if he does not make such an application, his employment shall be deemed to have terminated when he was suspended.

(3) Where an employee is a member of an association with which his employer has entered into a collective labour agreement which provides for review of a suspension of a member of the association from work, he may not apply under this section to the Selective Service Officer to review a suspension notwithstanding subsection two of this section.

(4) If, upon reviewing a suspension for serious misconduct, a Selective Service Officer finds that the employee was guilty of serious misconduct, the employee's employment shall be deemed to have terminated when he was suspended but if, upon such review, the Selective Service Officer finds that the employee was not guilty of serious misconduct, the employer shall reinstate the employee with full pay from the time the application for review was made and the notice of separation given prior to the suspension shall be of no effect.

Permits to Seek Employment

204. (1) The Selective Service Officer shall, on request, furnish a permit to seek employment in prescribed form to any employee who presents a notice of separation signed by his employer or to any person other than an employee, and he may, in accordance with principles and directions set out in instructions given by the Minister, insert therein restrictions as to

- (a) the place where employment may be obtained thereunder,
- (b) the employer from whom employment may be obtained thereunder,
- (c) the nature of the employment which may be obtained thereunder, or
- (d) the duration of the employment which may be obtained thereunder.

(2) The Selective Service Officer may, at any time, in accordance with principles and directions set out in instructions given by the Minister,

- (a) cancel a permit to seek employment by notice in writing to the employer and employee effective upon or after the expiration of seven days from the day such notices are mailed, or
- (b) extend the period of employment fixed by a permit to seek employment.

205. (1) Neither an employer nor a person acting or pretending to act on behalf of an employer shall

- (a) interview any person with regard to employment as an employee,
- (b) solicit any person to enter into employment as an employee,
- (c) offer any person employment as an employee, or
- (d) take any person into employment as an employee,

unless such person presents to him in duplicate a permit from the Selective Service Officer to seek such employment.

(2) No person shall apply for, accept or enter employment as an employee, unless he has obtained from the Selective Service Officer a permit to seek such employment.

(3) No permit to seek employment is necessary for the re-employment of an employee by an employer,

- (a) within fourteen consecutive days from the day on which the employee was last employed by the employer,
- (b) at the termination of a period of sickness or disability which occasioned the termination of a previous employment of the employee by the employer,
- (c) at the termination of a stoppage of work which resulted from an industrial dispute and terminated the employee's previous employment by the employer,
- (d) pursuant to a collective labour agreement providing preference in re-employment according to service or seniority, or
- (e) upon reinstatement in employment pursuant to this part or The Reinstatement in Civil Employment Act, 1942,

but in any such case, the employer shall, within forty-eight hours of the commencement of such re-employment, deliver notice of such re-employment in prescribed form to the local office.

(4) Where an employer takes an employee into employment, he shall, unless it is a case of re-employment under subsection three of this section,

- (a) record the prescribed particulars of the employment on both copies of the permit to seek employment presented to him by the employee,
- (b) retain one copy of the permit to seek employment on file, and
- (c) within forty-eight hours of taking the employee into his employment, deliver the other copy of the permit to the local office.

206. (1) No employer shall during any day retain in his employment an employee who was, contrary to law, taken into employment without having obtained and presented a permit to seek such employment.

(2) No employer shall retain an employee in his employment during any day if the permit to seek employment pursuant to which he took the employee into his employment has been cancelled pursuant to these or any other regulations or during any day after the period of employment authorized thereby expires.

(3) No employee shall, during any day, remain in any employment which he, contrary to law, entered without having obtained a permit to seek employment.

(4) No employee shall remain in any employment during any day if the permit to seek employment pursuant to which he entered such employment has been cancelled pursuant to

these or any other regulations or during any day after the period of employment authorized thereby expires.

Agricultural Employment

207. (1) No person employed in agriculture shall enter or remain during any day in employment outside agriculture except

- (a) active service in His Majesty's Canadian armed forces, or
- (b) seasonal or temporary employment outside an urban municipality for not more than sixty days in any year when such employment does not interfere with agricultural production,

unless he has first obtained from the Selective Service Officer a permit in prescribed form to enter or remain in such employment.

(2) No person shall take a person employed in agriculture into employment outside agriculture, or retain during any day a person employed in agriculture in employment outside agriculture except

- (a) active service in His Majesty's Canadian armed forces, or
- (b) seasonal or temporary employment outside an urban municipality for not more than sixty days in any year when such employment does not interfere with agricultural production,

unless such person presents to him a permit obtained from the Selective Service Officer in prescribed form to accept or remain in such employment.

(3) The Selective Service Officer on request may, in accordance with principles and directions set out in instructions given by the Minister, furnish a permit to a person employed in agriculture to enter or remain in employment outside agriculture and insert therein restrictions as to

- (a) the place where employment may be obtained thereunder;
- (b) the employment which may be obtained or retained thereunder;
- (c) the nature of the employment which may be obtained thereunder; or
- (d) the duration of the employment which may be obtained or retained thereunder.

(4) The Selective Service Officer may, at any time, in accordance with principles and directions set out in instructions given by the Minister,

- (a) cancel a permit furnished under this section by notice in writing to the employer and employee effective upon or after the expiration of seven days from the day such notice is mailed; or
- (b) extend the period of employment fixed by such a permit.

(5) No person shall retain a person employed in agriculture in his employment during any day if the permit pursuant to which he took the person employed in agriculture into his employment, or retained him in his employment, has been cancelled pursuant to this section or during any day after the period of employment fixed thereby expires.

(6) No person employed in agriculture shall remain in any employment during any day if the permit pursuant to which he entered such employment, or remained in such employment, has been cancelled pursuant to this section or during any day after the period of employment authorized thereby expires.

Advertisements

208. (1) No person shall publish an advertisement offering employment as an employee or seeking employment as an employee except pursuant to and in accordance with a permit obtained from the Selective Service Officer.

(2) Where an application is made to a Selective Service Officer for a permit to advertise under this section, the Selective Service Officer may, in accordance with principles and directions set out in instructions given by the Minister,

- (a) refuse the permit,
- (b) grant the permit subject to such conditions as he deems proper, or
- (c) with the applicant's consent, make such arrangements at the applicant's expense, as he deems proper.

Control of Employment

209. (1) A Selective Service Officer may, in accordance with principles and directions set out in instructions given by the Minister, by order in writing direct any person,

- (a) to report for interview at a local office at a time which will not interfere with his work or occupation; if any;
- (b) if the person is unemployed or not gainfully occupied, to apply forthwith for specified employment which, in the opinion of the Selective Service Officer, is suitable and to accept the employment when it is offered to him; or
- (c) if, for more than two consecutive weeks, the person has not been gainfully occupied during normal full time, to apply, within seven days from the time when the direction is given, for specified full time employment which, in the opinion of the Selective Service Officer, is suitable and to accept the employment when it is offered to him,

and every person to whom any such direction is given shall comply with the direction.

(2) An employee shall, for the purpose of this section, be deemed to be unemployed on the termination of a period of seven days from the day his employer gives him a notice of separation or he gives his employer a notice of separation.

(3) When a Selective Service Officer directs an employed person to accept employment under this section, he shall send a copy of the order to such person's employer.

(4) In deciding whether employment is suitable for a person, a Selective Service Officer shall consider such factors as he deems relevant including the person's physical condition, training, experience, prior earnings and personal responsibilities and the distance of the employment from his residence; and he shall not consider employment to be suitable if the wages are lower, or the conditions of work are less favourable, than either those fixed by collective agreement for the place where the work is to be performed or, if there is no such agreement, those observed by good employers.

(5) When a Selective Service Officer directs a person under this section to accept employment which necessitates changing his place of residence, he shall, in accordance with principles and directions set out in instructions given by the Minister, provide such person with financial assistance under section two hundred and twelve.

(6) Where a person accepts employment pursuant to a direction given under this section

he shall not terminate the employment or cease to perform his duties in the employment, nor shall his employer terminate the employment or lay him off, within six months from the day he enters the employment, without a written permit from the Selective Service Officer.

210. (1) When, after having, in his opinion, given all interested persons an opportunity to be heard, the Minister is of opinion that an employed person to whom The National Selective Service Mobilization Regulations apply and who belongs to an age class or part of an age class which has been designated by proclamation for the purpose of the said regulations can contribute more effectively to the prosecution of the war in employment other than that in which he is employed, the Minister may by order require the employer of such person forthwith to give such person two weeks' notice that his employment will be terminated.

(2) When the Minister has made an order under subsection one of this section, the Selective Service Officer may, after the expiration of the two-week period, by order in writing require the person whose employment is so terminated to apply forthwith for specified employment which, in the opinion of the Selective Service Officer, is suitable and to accept the employment when it is offered to him; and subsections three, five and six of section two hundred and nine shall apply *mutatis mutandis* as if enacted in this section.

(3) Within forty-eight hours of receiving an order from the Minister under this section, the employer shall give the notice therein required to be given and inform the local office as to the time when it was given.

(4) For the purposes of this section, "employer" shall include every person having any other person in his employ and "Minister" includes any senior officer appointed under these regulations and designated by the Minister to exercise the powers conferred on him by this section.

211. Where in the opinion of a Selective Service Officer, it is in the national interest that an employed person take employment other than that in which he is employed, the Selective Service Officer may request him to accept such employment at the expiration of seven consecutive days from service on his employer, either personally or by registered post, of a notice that such request is made pursuant to these regulations; and the person to whom such request is made may accept such employment at the expiration of such time notwithstanding his contract of employment or any law, statutory or otherwise, to the contrary.

Supplementary Allowances

212. (1) Where a Selective Service Officer has directed or requested a person to take employment and deems it necessary for the efficient placement of workers he may, in accordance with principles and directions set out in instructions given by the Minister

- (a) advance such person an amount not exceeding his necessary travelling expenses from the place where he was when he was requested to take the employment to the place of employment;
- (b) advance such person an amount not exceeding his necessary travelling expenses from the place of employment to the place where he was when he was requested to take the employment or to a place equidistant from the employment;
- (c) if, in his opinion, it is necessary to move such person's dependents, advance him

an amount not exceeding the necessary travelling expenses for his dependents and other necessary expenses arising out of his change of residence; and

- (d) pay him an amount substantially equivalent to the remuneration which, in the Selective Service Officer's opinion, he would receive from such employment during the period equal to the time necessarily spent travelling to the place of employment.

(2) A person to whom an advance is made under subsection one of this section shall repay the amount thereof to the Crown upon demand but he shall be deemed to have repaid to the Crown in respect of such advance five dollars for each week during which he remains in the employment which he accepted on the direction or at the request of the Selective Service Officer; and if he remains in the employment for the period which he was, pursuant to this part, directed or requested to remain, or if, for reasons beyond his control, he does not enter the employment which he was directed or requested to take, he shall be deemed to have repaid the full amount of the advance.

(3) Where a Selective Service Officer directs or requests a person to take employment which involves a change of residence and requires him to be separated from his dependents, and the earnings from the employment are not, in the opinion of the Selective Service Officer, sufficient to compensate him for the increased cost of living occasioned by the separation, the Selective Service Officer may, in accordance with principles and directions set out in instructions from the Minister, pay him a supplementary living allowance not exceeding five dollars for each week he is in such employment;

(4) Where a Selective Service Officer has, under this part, directed or requested on employed person to take employment at a lower rate of remuneration than he is receiving, the Minister may pay him or authorize the employer notwithstanding the Wartime Wages Control Order to pay him, a supplementary allowance not exceeding five dollars for each week he remains in the employment.

(5) Where a Selective Service Officer directs or requests a person to take employment, he may, in accordance with principles and directions set out in instructions from the Minister, advance him an amount not exceeding fifteen dollars to defray living expenses during the first week of employment, and the person to whom such advance is made shall repay the amount thereof to the Selective Service Officer within forty-eight hours from receiving his first normal wages or salary from the employment or within such further period as the Selective Service Officer may allow.

(6) Payments under subsections three and four of this section may be made to the person to whom the supplementary allowance is granted or to his employer on his behalf; and where any such payment is made to an employer, the employer shall pay it to the person to whom the supplementary allowance is granted within one month from the receipt thereof.

(7) Where an advance is made under subsection one of this section for travelling expenses, the Selective Service Officer may pay the amount thereof or any part thereof to a transportation company in payment of transportation for the person to whom the advance is made.

Reinstatement

213. (1) Where a Selective Service Officer directs or requests an employed person to accept other employment under this part and notifies the employed person's employer that such direction or request is made pursuant to these regulations and the employed person thereupon accepts such employment, the provisions of The Reinstatement in Civil Employment Act, 1942, shall apply *mutatis mutandis* to the reinstatement of such person upon the termination of the work which he has been directed or requested to accept.

(2) Where a person terminates the employment of another person pursuant to an order made under these regulations, the provisions of The Reinstatement in Civil Employment Act, 1942, shall apply *mutatis mutandis* to the reinstatement of the person whose employment has been terminated when the Minister certifies that such person is no longer required for other work.

Appeals

214. (1) Where the Minister makes an order under section two hundred and ten or a Selective Service Officer refuses to grant or cancels a permit, or makes an order, direction or ruling under this part, a person affected thereby, or a representative of a trade union or similar organization to which a person affected thereby belongs, may appeal therefrom to a court of referees by a notice in writing containing a statement of the grounds of the appeal filed in the local office within seven days from the time when the permit was refused or cancelled or the order, direction or ruling was made.

(2) The members of the court of referees to which an appeal is referred shall be chosen in the same manner as in the case of an appeal to a court of referees under The Unemployment Insurance Act, 1940.

(3) The court of referees to which an appeal is referred shall consider and determine the appeal as soon as possible after receipt of the notice of appeal and its decision thereon shall be final and conclusive.

(4) An appeal may, with the consent of the appellant but not otherwise, be proceeded with in the absence of any member or members of the Court other than the chairman.

(5) No person shall be a member of a court of referees during the consideration of an appeal.

(a) in which he is or may be directly interested;

(b) in which he is or has been a representative of the appellant or other interested person; or

(c) in which he has taken any part either as a witness or otherwise.

(6) The appellant when filing his notice of appeal may apply, by notice in writing filed in the local office, for a hearing; and the chairman of a court of referees may refuse an application for a hearing or he may, whether or not an application for a hearing has been made, direct that there shall be a hearing.

(7) If the number of members of the court of referees is an even number, the chairman shall have a second or casting vote.

(8) The procedure on a hearing shall be determined by the chairman of the court of referees.

(9) A court of referees shall not decide an appeal until a reasonable opportunity has been given to the claimant to make any representa-

tions which he desires the Court to consider in making its decision; and in any case where a hearing has not been directed, the claimant shall be given an opportunity of making representations to the court of referees in writing and if he fails to do so, he shall be deemed to have had such reasonable opportunity.

(10) Any person who appears before a court of referees shall do so at his own expense.

(11) The Minister may publish a decision of the court of referees if and as he deems proper.

(12) For the purposes of remuneration, a court of referees functioning under this part shall be deemed to be functioning under the unemployment Insurance Act, 1940.

PART III

TECHNICAL PERSONNEL

Interpretation

300. In this part unless the context otherwise requires

- (a) "employer" includes His Majesty in right of Canada and in right of any province;
- (b) "essential work" means work which is, in the opinion of the Minister, essential to the efficient prosecution of the war;
- (c) "minister" includes any person designated by the Minister to act on his behalf under this Part;
- (d) "science student" means a male person who has registered at a university as a full-time student during all or part of the academic year for a course the successful completion of which, in the opinion of the Minister, will qualify the person as a technical person; and
- (e) "University" means any person or group of persons, including His Majesty in right of any province, administering or operating a university or college which is, in the opinion of the Minister, properly equipped and staffed to train persons to be technical persons.

Supply and Demand

301. (1) When a person ascertains that he requires or will require to engage a technical person or that he will be laying off or discharging a technical person, and when a person discharges or lays off a technical person, he shall forthwith supply the Minister at Ottawa with such information as to his requirements or the technical person discharged or laid off or to be discharged or laid off as may be prescribed.

(2) When a technical person desires to obtain new employment or is, or knows that he is going to be, unemployed or not gainfully occupied full time on work of a kind for which he is especially qualified, he shall forthwith supply the Minister at Ottawa with such information as may be prescribed.

Control of Employment

302. (1) No person shall, without the approval of the Minister, enter into a contract or arrangement for the services of a technical person except a contract or arrangement in respect of part-time subsidiary employment which is not the technical person's principal means of livelihood.

(2) No person shall make use of the services of a technical person during any day and no person shall pay any remuneration or salary to a technical person in respect of any day if the

employment or arrangement under which he is employed came into operation without the approval required by these regulations or any other regulation.

Employment Changes

303. (1) Where, in the opinion of the Minister, any technical person, other than a member of His Majesty's Canadian armed forces, is capable of contributing more effectively to the war effort in essential work other than that, if any, upon which he is engaged, the Minister may request him to take employment in such work and notify his employer of such request.

(2) Where a technical person agrees to accept work pursuant to a request by the Minister under this section, the employer of the technical person may make representations in writing to the Minister at Ottawa but if the Minister does not withdraw his request within thirty days from the day notice thereof is sent by registered mail to the employer at his place of business, the employer's employment of such person shall be terminated at the end of such period.

(3) Where a technical person enters employment on work which is, in the opinion of the Minister, essential work and the Minister notifies the employer by whom the technical person was employed immediately before entering such employment that he approves the arrangements for such employment, the technical person shall be deemed to have entered into the employment at the request of the Minister.

Reinstatement

304. (1) Where a technical person has entered employment on essential work at the request of the Minister, the employer by whom he was employed immediately before entering the employment on such work shall reinstate him at the termination of his employment on the essential work in a position and under circumstances not less favourable than the position which he would have held and the circumstances which would have been applicable to him had he not entered such employment.

(2) No person is required, by reason of subsection one of this section, to reinstate a former employee who entered employment in essential work at the request of the Minister if

- (a) the former employee does not, within two weeks from the termination of his employment on essential work, apply to the employer for reinstatement;
- (b) the former employee fails without reasonable excuse to present himself for employment at a time and place notified to him by the employer after his request for reinstatement;
- (c) by reason of a change of circumstances, other than the employment of some person to replace him, it is not reasonably practicable to reinstate him;
- (d) his reinstatement in a position and under conditions not less favourable to him than the position which he would have held and the circumstances which would have been applicable to him had he not undertaken the essential work is impracticable and the employee refuses, within a reasonable time, to accept the most favourable position under the most favourable conditions in which it is reasonably practicable for the employer to reinstate him;
- (e) the former employee is physically or mentally incapable of performing the work available in the employer's service; or

(f) the former employee was originally employed to replace a person who had been accepted for service in His Majesty's Forces or to replace a person who entered employment in essential work at the request of the Minister.

(3) Where an employer has reinstated a technical person pursuant to this section, he shall not discharge him or lay him off without reasonable cause; and if he discharges him or lays him off within six months of the reinstatement, the onus shall be on the employer to prove that he had reasonable cause for so doing.

(4) Where an employer has entered into an agreement with his employees, some or all of whom are technical persons, that he will re-employ employees who leave his employment for employment in essential work, such agreement shall continue in force to the extent that it is not less advantageous to an employee than this section.

(5) No person is, by reason of this section, relieved of any obligation under a collective or other agreement.

(6) Where a person fails to reinstate a technical person who entered employment on essential work at the request of the Minister as required by this section or, contrary to this section, discharges or lays off a technical person without reasonable cause, he shall pay to the technical person an amount equal to three months' remuneration at the rate at which the technical person was being remunerated immediately prior to entering employment on essential work at the request of the Minister and, if he does not do so, the technical person may recover such amount as a debt in any court of competent jurisdiction.

University Science Students

305. (1) The armed forces of Canada, the departments and agencies of the governments of Canada and of the provinces of Canada, and all other persons employing technical persons from time to time, at the request of the Minister, shall supply him with such information as he may specify with reference to their present or future requirements of technical persons for essential work.

(2) Every university, from time to time, shall supply the Minister with such information as he may require with reference to science students registered with the university.

(3) If at any time, in the opinion of the Minister, the number of science students in the universities should be increased, he shall recommend to the universities the steps which ought to be taken to train the necessary number of technical persons.

306. (1) Before a person is permitted to commence or continue work as a science student he shall make a declaration in a form prescribed by the Minister indicating whether he wishes to volunteer for service in the armed forces of Canada as a technical officer.

(2) Every university, from time to time, shall at the request of the Minister, supply him with a list of the names of the science students who wish to volunteer for service in the armed forces as technical officers; and the Minister shall from time to time select therefrom the names of persons who, in his opinion, will fulfil the requirements of each branch of the armed forces and shall submit lists of such names for the consideration of the various branches of the armed forces.

(3) Every science student shall submit to such medical examination as the Department of National Defence may from time to time require.

307. (1) If at any time, the number of science students who wish to volunteer for service in the armed forces as technical officers is not adequate, in the opinion of the Minister, after consultation with the armed services of Canada and the departments and agencies of the Government of Canada whose activities affect or relate to the demand for and the supply of manpower, he may request any science student to accept such status in the reserve army and undergo such military studies and duties, whether during the academic year or not, as he may specify.

(2) No university shall retain any person in the university as a science student if such person refuses to accept status in the reserve army or to undergo military studies and duties as requested by the Minister pursuant to this section.

308. The Department of National Defence and the Department of Munitions and Supply shall provide such facilities for the training of science students as the Minister may from time to time require.

309. Every person who completes a course as a science student at a university and does not volunteer for service in the armed forces of Canada shall accept employment in such essential work as the Minister may require and remain in such employment during each day the Minister so requires.

310. No person, whether acting or pretending to act on behalf of any of the armed forces or any department or agency of government or not, shall

- (a) interview any science student, either before or after graduation, with regard to any employment, office or position;
- (b) solicit any science student, either before or after graduation, to enter any employment or to accept any office or position;
- (c) offer any science student, either before or after graduation, any employment, office or position; or
- (d) take any science student, either before or after graduation, into any employment or give him any office or position; except by or with the consent of the Minister.

PART IV

LABOUR EXIT PERMITS

400. No person who has attained his sixteenth birthday shall leave Canada with the intention of seeking or entering into employment outside Canada except pursuant to a Labour Exit Permit in prescribed form issued to him by a Selective Service Officer, unless such person is

- (a) leaving Canada to take employment in the service of the Government of Canada, the Government of a province of Canada, or the Government of any other country;
- (b) not a Canadian national and is proceeding to a country of which he is a national;
- (c) permanently resident in a country other than Canada, and is proceeding to such country or on transit through Canada to some other country;
- (d) a member of a dramatic, artistic, athletic or spectacular organization leaving Canada temporarily for the purpose of giving public performances or exhibitions of an entertaining or instructive character;
- (e) an actor, artist, lecturer, journalist,

priest, minister of religion, author, lawyer, physician, professor of a recognized educational institution, accredited representative of an international trade union, commercial traveller or undertaker, leaving Canada for the temporary exercise of his calling or office;

- (f) an officer or seaman proceeding to join a vessel in a United States port pursuant to authorization issued by or on behalf of the Director of Merchant Seamen;
- (g) the wife of a man who is leaving Canada pursuant to a Labour Exit Permit or who is exempt from obtaining a Labour Exit Permit; or
- (h) a farm labourer going to the United States for seasonal work under an arrangement between the Governments of Canada and the United States.

401. (1) A Selective Service Officer may, in accordance with principles and directions set out in instructions from the Minister, grant a Labour Exit Permit in prescribed form, either for a limited period of absence from Canada or for an indefinite period, to a person desiring to leave Canada to take employment or seek employment outside Canada, but no such permit shall be granted to a male British subject unless he has been authorized in writing by the chairman of the Board to leave Canada if he is prohibited by the National Selective Service Mobilization Regulations from leaving Canada without such authorization.

(2) The Selective Service Officer may, from time to time, in accordance with principles and directions set out in instructions from the Minister, renew a Labour Exit Permit which has been granted for a limited period.

(3) Labour Exit Permits shall not be valid for departure from Canada after the last day fixed therein for such departure.

(4) Where a Labour Exit Permit is endorsed with the words "right to cancel this permit is reserved", the holder shall, if the Minister cancels the permit, return to Canada within such period as the Minister may fix.

(5) Where any Labour Exit Permit is granted for a limited period of absence from Canada, the holder shall return to Canada before the expiration of such period or the expiration of an extension of such period set out in a renewal of the permit.

402. An application for a Labour Exit Permit shall be in prescribed form and no person shall give false or misleading information in such application.

403. No person shall, without lawful reason or excuse, the proof of which shall lie upon him, have in his possession

- (i) a Labour Exit Permit or document purporting to be such permit, which permit or document was not lawfully issued to him pursuant to this order; or
- (ii) a blank form of Labour Exit Permit or printed form purporting to be such blank form of permit.

404. No person shall, without lawful excuse, the proof of which shall lie upon him, print or make a Labour Exit Permit or any printed paper purporting to be a blank form of Labour Exit Permit.

405. Any person leaving or attempting to leave Canada may be accosted by a peace officer, an immigration, customs or excise officer, or any other person authorized by the Minister to exercise the powers conferred by this sec-

tion; and if, upon being so accosted such person fails to establish to the satisfaction of the person so accosting him that a Labour Exit Permit has been granted to him to leave Canada at that time or that he is not required by these regulations to have a Labour Exit Permit to leave Canada, any peace officer, any immigration, customs or excise officer, or any other person so authorized by the Minister, is justified in using such force as may be necessary to prevent such person leaving Canada.

PART V

ADMINISTRATION

500. (1) The Minister shall administer and enforce these regulations.

(2) There shall be an officer in the Department of Labour who shall be appointed by the Governor in Council, shall be called the Director of National Selective Service and shall hold office during pleasure.

(3) The Governor in Council may appoint such Associate Directors of National Selective Service as he deems necessary to assist in the administration and enforcement of these regulations.

(4) The Minister may appoint officers who shall be called National Selective Service Officers and he may designate the areas in which they shall perform their duties.

(5) Such other officers, clerks and servants as are necessary for the administration and enforcement of these regulations shall be appointed in the manner provided by law.

501. There shall be a National Selective Service Advisory Board of which the Minister and his deputy shall be chairman and vice-chairman, respectively, and which shall consist of the members of the Inter-Departmental Committee on Labour Co-ordination, established by Order in Council P.C. 5886 dated the twenty-second day of October nineteen hundred and forty-two, members of the National War Labour Board established by the Wartime Wages Control Order and such other persons as the Minister may designate, to advise the Minister with reference to the utilization of manpower in the prosecution of the war and the administration and enforcement of these regulations.

502. The Governor in Council shall determine the remuneration to be paid to the Director and Associate Directors, and the remuneration to be paid to such other officers, clerks, and employees as may be appointed under these regulations shall be determined in the manner provided by law.

503. The Minister may, in the manner provided by law, establish at any place in Canada such office or offices as are required for the administration of these regulations and may provide therefor the necessary accommodation, stationery, equipment and telephones.

504. The Minister may incur all expenses reasonably necessary for the proper administration and enforcement of these regulations and the cost thereof, including the remuneration of all officers and servants of the branch, shall be paid out of moneys provided for the purpose.

Minister's Powers

505. The Minister may—

- (a) prescribe anything which under these regulations is to be prescribed;
- (b) prescribe such forms as he considers necessary for the administration of these regulations;

(c) prescribe the manner in which notices delivered pursuant to these regulations must be executed;

(d) revoke, cancel or vary any instruction, order, direction or form made or prescribed pursuant to these regulations;

(e) for the purpose of acquiring general or specific knowledge with reference to any person or group or class of persons or the manpower situation in Canada or any part of Canada, require, by order, that any person or group or class of persons complete and return to him such returns of information as he may specify or report at such place and at such time as he may specify and complete such forms and give such information in such manner as he may specify;

(f) in consultation with the Department of Munitions and Supply and the Wartime Prices and Trade Board, classify, in such manner as he deems expedient, occupations, industries, firms or establishments according to essentiality in the prosecution of the war;

(g) by order, exclude any person or group or class of persons from the operation of Part II or Part III or qualify any of the provisions of Part II or Part III in its application to any person or group or class of persons;

(h) by order, require any employer or group or class of employers to keep such records as he deems necessary for the administration of these regulations;

(i) notwithstanding anything in any other law or regulation publish such notices and explanations as he may deem necessary for the proper administration and enforcement of these regulations;

(j) by order, require any employer or group or class of employers or all employers to terminate the employment of every male person in their employ who fails within a time specified in the order to produce such evidence as may be specified in the order that he has not contravened the provisions of The National Selective Service Mobilization Regulations; and

(k) by order, forbid the furnishing of a permit to seek employment to any male person who fails to produce such evidence as may be specified in the order that he has not contravened provisions of the National Selective Service Mobilization Regulations.

General

506. Every person to whom any order is issued or who is required to do or abstain from doing anything by or pursuant to these regulations shall obey such order or do or abstain from doing such things as required.

507. (1) Throughout each day the Minister so requires, every Postmaster, Sheriff, Clerk of the Peace and Clerk or other officer of a Municipality shall cause to be kept posted in prominent places in his office and such other public buildings throughout his district or municipality as the Minister may specify, and in such manner as the Minister may require, copies of any order, notice or announcement under these regulations.

(2) No person shall wilfully destroy, take down, tear or deface any copy of an order, notice or announcement posted under these regulations in any office or public place.

508. No person shall make any false statement or representation for the purpose of ob-

taining any permit under these regulations or of misleading any person engaged in the administration or enforcement of these regulations.

509. (1) No person shall by means of a written or printed communication, publication or article, or by an oral communication or by public speech or utterance,

- (a) counsel or advise any other person not to comply with any of the provisions of these regulations or of a notice or order given or made pursuant thereto; or
- (b) wilfully resist or impede, or attempt wilfully to resist or impede, or persuade or induce or attempt to persuade or induce any person or group or class of persons to resist or impede the operation or enforcement of these regulations.

(2) No person shall in any manner impede or prevent or attempt to impede or prevent any other person in the performance of his duties under these regulations.

510. No person shall, with intent to evade any provision in these regulations, destroy, mutilate, deface, alter, secrete or remove any book, record, or property of any kind.

PART VI

ENFORCEMENT

600. (1) Every Selective Service Officer, and every person authorized by the Minister to act as a Selective Service Inspector, may for the purpose of enforcing these regulations

- (a) enter at all reasonable times any premises or place, other than a private dwelling house not being a workshop, where he has reasonable grounds for supposing that any person is employed;
- (b) make such examination or inquiry as may seem to him to be necessary for ascertaining whether these regulations are being complied with;
- (c) examine orally, either alone or in the presence of any other person as he thinks fit, with respect to any matter arising under these regulations, every person whom he finds in any such premises or place or whom he has reasonable cause to believe to be or to have been in employment and may require every person so examined to sign a declaration of the truth of his statements on such examination; and
- (d) exercise such other powers as, in the opinion of the Minister, are necessary for enforcing these regulations.

(2) The occupier of any premises or place, other than a private dwelling house not being a workshop, any person having other persons in his employ, the servants and agents of any such occupier or person, and any employed person shall furnish to any Selective Service Officer or Inspector all such information, and he shall produce for inspection all such books, documents, papers and records, as the Selective Service Officer or Inspector may reasonably require.

(3) Every Selective Service Officer and Selective Service Inspector shall, on applying for admission to any premises or place under this section, have in his possession and produce if so required a certificate of his appointment signed by or on behalf of the Minister.

601. For the purposes of these regulations and of any proceedings taken thereunder, any notice or other communication sent through His Majesty's mails pursuant to these regulations

shall be presumed, until the contrary is proven, to have been received by the addressee within eight clear days of the posting thereof and a certificate of such posting purporting to be signed by a Selective Service Officer shall be *prima facie* proof thereof.

602. (1) A certificate purporting to be signed by the Minister or by any person authorized to act in the Minister's place or on his behalf that anything has been done or omitted pursuant to or contrary to these regulations shall be *prima facie* proof that such thing has been done or omitted.

(2) A certificate purporting to be signed by the Minister, the Director, an Associate Director or a Selective Service Officer that he has, pursuant to these regulations, served any document or caused any document to be served shall be *prima facie* proof of the statements contained therein.

(3) A certificate purporting to be signed by the Minister or any person authorized to act in the Minister's place or on his behalf that a document is a true copy of any other document which is or has been in the possession of the Minister or any of the Officers or employees engaged in the administration or enforcement of these regulations shall be evidence of the statements contained therein and the copy shall be accorded in all courts, the same probative force as the original document or part thereof, of which it is a copy.

603. (1) Every person is a party to and guilty of an offence under these regulations who

- (a) actually commits it;
- (b) does or omits an act for the purpose of aiding any person to commit the offence;
- (c) abets any person in commission of the offence; or
- (d) counsels or procures any person to commit the offence.

(2) If several persons form a common intention to contravene any of the provisions of these regulations and to assist each other therein, each of them is a party to every offence under these regulations committed by any one of them in the prosecution of such common purpose, the commission of which offence was, or ought to have been known to be a probable consequence of the prosecution of such common purpose.

(3) Every one who counsels or procures another person to be a party to an offence under these regulations of which that person is afterwards guilty, is a party to that offence, although it may be committed in a way different from that which was counselled or suggested.

(4) If a corporation is guilty of an offence under these regulations, any officer or director of the corporation who assented to or acquiesced in the commission of the offence is a party to and guilty of the offence.

604. (1) In any prosecution under Part XV of the Criminal Code for a contravention of these regulations or of any regulations repealed by these regulations, the complaint shall be made, or the information laid, within one year from the time when the matter of the complaint or information arose.

(2) Notwithstanding the provisions of Part XV of the Criminal Code, a complaint or information in respect of any contravention of these regulations or of any regulations repealed by these regulations may be heard, tried or determined by any Police or Stipendiary Magistrate

or any Justice or Justices of the Peace if the accused is found or apprehended or is in custody within his or their territorial jurisdiction although the matter of the information or complaint did not arise within his or their territorial jurisdiction.

605. Every person who contravenes any of the provisions of these regulations is guilty of an offence, and unless some penalty is expressly provided by these regulations for such contravention, liable on summary conviction for a first offence if an individual to a penalty of not more than five hundred dollars or to imprisonment for a term not exceeding twelve months or to both such fine and such imprisonment and if a corporation to a penalty of not more than two thousand five hundred dollars, and for any subsequent offence if an individual to a penalty of not more than one thousand dollars or to imprisonment for a term not exceeding two years or to both such fine and such imprisonment and if a corporation to a penalty of not more than five thousand dollars.

606. Every person is guilty of an indictable offence and liable to a fine not exceeding five thousand dollars and not less than five hundred dollars or to imprisonment for a term not exceeding five years and not less than six months or to both such fine and such imprisonment, who corruptly

- (a) makes any offer, proposal, gift, loan or promise or gives or offers any compensation or consideration, directly or indirectly, to a person concerned in the administration or enforcement of these regulations or having any duties to perform thereunder, for the purpose of influencing such person in the performance of his duties; or
- (b) being a person concerned in the administration or enforcement of these regulations or having any duties to perform thereunder, accepts or agrees to accept or allows to be accepted by any person under his control or for his benefit any such offer, proposal, gift, loan, promise, compensation or consideration.

607. Every person who, without lawful authority or excuse, makes any document purporting to be a notice of separation, a permit to seek employment or other document issued pursuant to the provisions of these regulations, or who, without lawful authority or excuse, alters a notice of separation, a permit to seek employment or other such document in any material part or makes any material addition, either by erasure, obliteration, removal or otherwise, is guilty of an offence and liable on summary conviction to a penalty of not more than one thousand dollars or to imprisonment for a term not exceeding two years or to both such fine and such imprisonment.

PART VII

Miscellaneous

700. (1) All persons appointed by or pursuant to Order in Council P.C. 2254 dated the twenty-first day of March, nineteen hundred and forty-two, Order in Council P.C. 2301 dated the twenty-third day of March, nineteen hundred and forty-two and Order in Council P.C. 10578 dated the nineteenth day of November, nineteen hundred and forty-two who are in the employ of His Majesty when these regulations come into force, shall be deemed to have been appointed pursuant to these regulations

and the Minister shall have the control and supervision of all such persons.

(2) All officers, clerks and employees of the Department of Labour and the Unemployment Insurance Commission whose services are used in the administration or enforcement of these regulations, shall, for the purpose of these regulations, be deemed to have been appointed pursuant to these regulations.

701. If the Engineering Institute of Canada, the Canadian Institute of Mining and Metallurgy and the Canadian Institute of Chemistry consent, the Minister may utilize the Wartime Bureau of Technical Personnel, which is operated pursuant to Order in Council P.C. 780 dated the twelfth day of February, nineteen hundred and forty-one, for the administration of Part III; and in such event the said Bureau shall, without affecting the said Order in Council, be subject to the control and supervision of the Minister.

702. The Essential Work (Scientific and Technical Personnel Regulations, 1942, The Selective Service Regulations, 1942, Order in Council P.C. 1445 dated the second day of March, nineteen hundred and forty-two, Order in Council P.C. 1955 dated the thirteenth day of March, nineteen hundred and forty-two, Order in Council P.C. 2254 dated the twenty-first day of March, nineteen hundred and forty-two, The Labour Exit Permit Order, Order in Council P.C. 9466 dated the sixteenth day of October, Nineteen hundred and forty-two and the University Science Students Regulations, 1942 are revoked.

703. All proceedings taken under any Order in Council or regulation revoked by these regulations shall, so far as consistently may be, be taken up and continued under and in conformity with the provision of these regulations, if any, substituted for the regulation or Order in Council so repealed.

704. (1) All permits, consents, instructions, directions, determinations, decisions, notices and orders granted, given, served or made under any Order in Council or regulation revoked by these regulations shall, as far as applicable, be deemed to have been granted, given, served or made, *mutatis mutandis* under these regulations and all forms which have been prescribed for use under any such Order in Council or regulation shall be deemed to have been prescribed for use in similar cases under these regulations until replaced by forms prescribed by the Minister.

(2) The forms annexed to the Labour Exit Permit Order shall be deemed to have been prescribed for use under Part IV until replaced by forms prescribed by the Minister.

(3) When a Selective Service Officer has, prior to the coming into force of these regulations, made an arrangement for any payment under section twenty-five of The National Selective Service Regulations, 1942, and such payment has not been made before these regulations come into force, it may be made in accordance with such arrangement.

705. These regulations shall come into force on the 19th day of January, nineteen hundred and forty-three.

SCHEDULE "A"

1. A person who is normally engaged in the engineering profession in a consulting, technical or supervisory capacity in design, construction, manufacture, operation or maintenance and who has had a regular professional training in practice and in theory as an engineer in any of the

following branches of engineering: civil, mechanical, electrical, chemical, metallurgical and mining.

2. A production, industrial or other engineer or chemist who normally holds in an engineering works or manufacturing establishment a position of authority involving responsibility for any phase of executive management or control of any technical function.

3. A person who has obtained a degree at any Canadian or other recognized university and who is normally engaged as a teacher of engineering science, or of any branch of science at a university or technical college.

4. A person who has been trained, or who is or has been normally engaged, in the practice of any branch of the science of chemistry but not including a registered pharmacist.

5. A research scientist, that is, a person who, by training or practice, is skilled in the inde-

pendent search for new knowledge of the properties of matter or energy.

6. A person, other than a teacher, who has obtained a degree at any Canadian or other recognized university in Engineering, Chemistry, Physics, Geology, Mathematics, Architecture or in any natural science, or who is a technically qualified member of the Engineering Institute of Canada, the Canadian Institute of Chemistry, the Canadian Institute of Mining and Metallurgy, the Royal Architectural Institute of Canada or of any provincial association of professional Engineers, Chemists or Architects.

7. A person, or a group or class of persons, not in the classes described above, possessing, in the opinion of the Minister, technical qualifications and skill which are needed in essential work.

Selective Service and the Universities

Canada's Manpower Policy Reviewed by A. MacNamara, Director of National Selective Service, at Universities Conference—Relation of Universities to Manpower Situation—Resolutions Adopted.

ON January 9-10, the Canadian Universities Conference was convened in Ottawa by its president, Dr. Sidney Smith, of the University of Manitoba, to consider the relation of the universities to the manpower situation.

Addressing the Conference, Mr. A. MacNamara, Director of National Selective Service, gave a concise review of the manpower situation in Canada, and of the Government's policy towards the problem. He made particular reference to those phases that touch the universities. The text of Mr. MacNamara's address is as follows:

As university teachers and administrators you are meeting to-day to discuss manpower. I say this, without knowing your agenda and without knowing the specific problems you intend to discuss, because the universities are one of the established manpower institutions of the community. By the selection of men and women of requisite qualifications, the training of them for jobs and the education of them for life, you are engaged in developing part of the manpower resources of the country. In time of peace you may describe your functions and responsibilities in other terms, but in this time of war, as the Director of National Selective Service charged with the administration under the Minister of Labour of the manpower policy of the Government, I think it useful to call attention to this obvious aspect of your work and to greet you as colleagues working in the same field. There are many phases of our total manpower problem on which your assistance to the Government is indispensable and there are many phases of Government policy which necessarily affect or

modify your normal operations. I welcome this meeting, therefore, as one which may be helpful in contributing to the solution of some of our mutual problems.

Before turning to a brief discussion of some of the particular ways in which selective service touches the universities I should like to give a quick over-all picture of selective service organization and policy.

Nothing is easier to state than the policy of selective service. It is simply a series of arrangements by which the services of every available or potentially available worker in Canada can be utilized to the greatest possible advantage in the war effort whether in the Armed Forces, in the production of munitions and other materials of war, or in the production of essential civilian goods.

Administrative Problems

Hardly anything, however, is more difficult of administration because it involves the welfare and even the very lives of men and women. It is particularly difficult in Canada for two reasons. The first is that in time of peace we had not developed, as they had over a period of thirty years in Great Britain, a period of twenty years in Germany and of nine years in the United States, the machinery of a well-established and experienced employment service necessary for the administration of any such policy. It is true that one of the early actions of the present Government was the passage in 1940, after securing the requisite constitutional amendment, of the Unemployment Insurance Act. This provided for the establishment of a national employment ser-

vice which got under way in the middle of 1941, before our manpower problems became very acute. The fact remains, however, that we have to develop a policy at the same time that we are creating the machinery for the administration of policy with no stock of experience and judgment on which to draw.

The other difficulty, perhaps less tangible, arises out of the position of Canada in the total war effort of the United Nations. Selective service implies planning, which is by its very nature difficult in a changing and uncertain war situation, but which is particularly difficult in Canada because our most useful contribution to the war effort depends so much on decisions for which the major responsibility necessarily rests upon the larger and more powerful of the United Nations. The changing requirements of Great Britain and the other United Nations for particular kinds of munitions of war and the fluctuating supplies of certain raw materials from the United States, to cite only two obvious illustrations, often modify our production program in such a way as to interfere with the continuous and complete utilization of every available Canadian worker. I mention these difficulties, not in any apologetic spirit, but simply to indicate realistically that the goal of selective service is one which we hope to approach ever closer and closer but which we realize we shall never completely reach.

Co-Ordination of Competitive Demands

The first phase of selective service is a co-ordination and correlation of the competitive demands for men and women for the Armed Forces on the one hand, and for civilian industry on the other. To secure a balance in this regard, Selective Service has co-operated with the Defence Departments and the Department of National War Services in so far as military needs are concerned, and with the Department of Munitions and Supply and the Wartime Prices and Trade Board in relation to industrial requirements. In order that Selective Service might be the authority responsible in a greater degree for the co-ordination referred to, the call-up for the Army was transferred to Selective Service as from December 1 last.

After a satisfactory correlation between military and civilian needs has been established, the next step in a manpower policy is that of apportionment of workers among civilian industries. For upwards of two years compulsion has been an accepted principle in drafting men for the Armed Forces. Likewise drastic compulsion has been applied with respect to civilian employment. The Government has compelled a revolutionary change in employment practices by requiring substantially

all employers to get their employees through employment offices and by requiring that no person seek employment except through the employment offices. Even under these arrangements considerable freedom of choice has been left to employers and employees and we rely upon the willing co-operation of our people to meet our prime necessities. But the authority to compel, used in only a small proportion of cases to date, is in reserve for whatever future use circumstances may require.

Labour Priorities

As a pre-requisite to proper distribution of civilian labour, a scale of labour priorities has been carefully drawn up, to be followed as a guide in diverting and directing workers to more essential employments—while trying to provide all industries with at least their minimum essential requirements. Application of labour priorities involves constant study and observation of shifts and tendencies, with regard to both labour supply and production requirements. Also, it involves a close co-ordination of working arrangements with Government agencies controlling and curtailing production in less essential industries, to see to it that the labour thus released is absorbed to the greatest advantage elsewhere.

To carry out the objectives already outlined, several devices have been employed. It will be observed that these devices are all aimed at control of the employment of the population, so that the priorities for labour may be recognized in practice. Each of the several phases of Selective Service regulations is a means to an end, not an end in itself.

Salient Features of Selective Service

The salient features of the policy may now be summarized:

To conserve our labour supply within the country, persons may leave Canada to work outside only after receiving permission from Selective Service.

To control the flow of labour into jobs in which workers will be most useful, permits are required to secure or enter employment in most lines of industry—and in the issue of these permits officers exercise judgment in order to ensure the application of the priorities.

To stabilize employment for both employers and employees, and to reduce the waste incidental to repeated labour turnover, employers and employees have been required to give notice prior to the release of employees or their separation from employment.

The relation of industrial needs to military service has been studied in several industries, with the result that more flexibility in deferment from military service has been given in cases where industrial needs have been proven.

Persons to be transferred from less essential to more essential work are given some guarantee of reinstatement after the war in order to facilitate the desired transfer.

In some few instances a measure of "freezing" has been found necessary in order to maintain essential services or production—and it should be added that these measures have been exceptionally well received.

The peculiar needs of the agricultural industry have been taken into account, both in relation to deferment from the military call-up and in relation to the needs of other industries for workers.

Mobility of labour has been increased by Government assistance in paying transportation costs, and in adjusting wages and living costs where otherwise the worker would lose by the move.

Unemployed persons and those employed less than full time can be compelled to accept suitable employment in essential work.

The foregoing are the main devices utilized to date; they will be constantly revised, amended and, no doubt, added to.

Centralization of Control

Most phases of selective service have been administered through the local employment offices of the Unemployment Insurance Commission which, because of their increasing responsibilities, have been more than doubled in number and trebled in staff. This necessarily follows from the nature of the problem of selective service which resolves itself into the recruiting of workers, the evaluation of their qualifications and the direction of them to that employment where their qualifications can best be utilized in available work of the highest labour priority. For engineers, scientists and other technical personnel a specialized employment agency, known as the War-time Bureau of Technical Personnel, has been established. To increase the supply of labour with special kinds of readily developed skills, the War Emergency Training Program has been administered, in co-operation with the provinces, through the Training Branch of the Department of Labour.

The call-up for compulsory military service, originally administered by the Department of National War Services, has been transferred to the Department of Labour and is administered through what are now known as the Mobilization Boards in a fashion with which you are all familiar but whose work is gradually being more closely integrated with that of the other branches of the Department which deal with relative manpower needs. The responsibility for all phases of our manpower policy, except that of voluntary enlistment, is now centralized in the Department of

Labour in the expectation that, with experience, this centralization of authority will develop a greater consistency in both policy and administration than would be possible if, as previously, several departments shared the responsibility.

The magnitude of the problem of selective service can be indicated by a few employment office statistics. In general the present volume of employment office activities is about five times that of a year ago. Every month employers now advise the offices of over 270,000 vacancies and over 250,000 applicants register for work, of whom over 160,000 are known to be definitely placed in employment. At the end of typical recent months about 100,000 applicants remain unplaced while nearly 200,000 vacancies remain unfilled. The discrepancy arises from the facts that the applicants and the vacancies are not always in the same place and that the vacancies are often of a type that the available applicants are not qualified to fill. When to this situation we add the known demands of the Armed Services for over 100,000 men and women during the next months, the quantitative problem of selective service becomes evident.

Universities and Selective Service

I turn now to the more specific relations between the universities and selective service. The first aspect of this is compulsory military training for students. I think it may be assumed that the present regulations in this respect are well understood and working to the reasonable satisfaction of all concerned.

It is in this connection that there have developed persistent rumours that the Government is planning to recommend or require the discontinuance, at least for physically fit male students, of courses in liberal arts which do not give specific training that can be of immediate use in the war effort. It may well be that such rumours have their origin in the example set in Great Britain where it has recently been decided not to defer the call-up of university arts students beyond June, 1943, and in the recently announced American program under which liberal arts education will be virtually suspended while the Army, the Navy and the War Manpower Commission assign about 350,000 students to selected universities and colleges for training as technical specialists.

"Rationing" of Liberal Education

So far as I have been able to determine, these rumours have no foundation in fact. They do not arise from official consideration of any such plan by the Government or any of its agencies. Their persistence, however, may indicate a growing feeling on the part, not only of the general public, but perhaps

even of educators, that at this time when all our institutions stand in peril, liberal education like some other necessities may have to be rationed. You will notice that I said rationed, not prohibited. If our two closest allies have felt it necessary to move in this direction, it may well be that we should consider following suit. The demands of the Armed Services and the war industries, both for untrained and for technically trained personnel, may possibly require some further restriction of and some further postponement of purely cultural studies. In suggesting this, personally, not officially, I am far from minimizing the value of non-technical education.

Earlier I spoke of the universities training men and women for jobs and educating them for life. Both are important. We need today, and we shall need even more after the war, not only men and women trained to do particular jobs competently, but men and women who have been educated—men and women, as Dorothy Thompson recently described them, in whom creative forces have been released and whose minds have been so disciplined that they are able to train and adjust themselves to new situations. We must therefore strike a balance and in determining that balance the Government needs your help. As the carriers of our cultural tradition, as the stimulators of much of our scientific and technical progress, I ask you to weigh the problem, as I know you intend to during this conference, and to give the Government your considered judgment about the manner in which this necessary balance may best be struck and the immediate and long-run interests of our nation best furthered.

Assistance to Students

One of our most immediate and pressing needs is the maintenance of the supply of doctors and dentists for military and civilian purposes and of engineers and scientists for the Armed Forces and the war industries. In this connection, through the Wartime Bureau of Technical Personnel and the Training Branch of the Department of Labour, in co-operation with most of the provinces, our program of assistance to students has helped, somewhat, to reduce future shortages in these critical occupations. Our current program is furnishing assistance by loans or grants to 400 students in medicine, 84 in dentistry, 805 in science and engineering, 432 training to become teachers and 178 in other faculties. The expenditures involved amount to about \$200,000 a year in outright grants, shared equally between the Dominion and the provinces, and nearly \$180,000 in loans, of which the Dominion furnishes about \$140,000. This

represents a notable development in co-operation between the Dominion and provincial governments and the universities which may contain promise of fruitful future development.

On one phase of this program we should very much appreciate your specific advice. Of the 805 students in engineering and science now being assisted, 537 are first-year students. While it is necessary to take a long view and to make provision for possible contingencies, the question has been raised whether the Government should continue, and if so, for how long, to extend assistance to first-year students whose training may not be completed in time for them to participate in the war effort. This is a minor illustration of one of the difficulties of selective service in that a program appropriate for a war that may last for ten years, would not be appropriate for a war which might end in two years. In this field of prophecy perhaps one man's guess is as good as any other's, but we should nevertheless appreciate your consideration of this specific question and your advice about the wisdom of continuing this assistance to beginning students.

Bureau of Technical Personnel

It may be useful to indicate to you the division of labour between the Wartime Bureau of Technical Personnel and the Training Branch in connection with this program of assistance to students. It is the responsibility of the Wartime Bureau of Technical Personnel to determine from the Armed Services, the war industries and the war departments of the Government their respective needs for different classes of scientific and technical personnel and to determine whether the present and potential supply of such persons is sufficient to meet these needs. If a deficiency is threatened, the Bureau will then determine in what classes and to what extent in each the training of such personnel should be increased or accelerated. The Bureau will also be responsible, when any special technical course is required, to determine the length and content of any such course in consultation both with the Armed Services, industry or the Government department concerned, and with the university or college where such a course is to be given. After determining the requirements, the Bureau will advise the Training Branch and in co-operation with it determine what action is necessary to meet the situation. It will then be the responsibility of the Training Branch to arrange for the co-operation of provincial governments and universities in developing the necessary plans and in negotiating with them the appropriate agreements for approval by the Government.

One of the ways in which the whole question of the utilization of manpower has most disturbed the student population and university official has been the competition of the three Armed Forces and the war industries for their services. Under these opposing pressures the students and their advisers have not known where their duty lies and have been kept in a state of uncertainty and unrest.

University Science Students Regulations

So far as students in engineering, science and technical courses are concerned this situation is on the point of being repaired by the recent passage of the University Science Students Regulations. These provide that no person, whether or not on behalf of any of the Armed Forces may interview or solicit any science or technical student before or after graduation with regard to service or employment, or offer him service or employment, except with the consent of the Minister of Labour. Each such student is required as a condition of entering or continuing his course to submit to medical examination and to declare whether or not he wishes to volunteer for active service in the Armed Forces as a technical officer. The names of those who so volunteer will be submitted to the various branches of the Forces who will make from them a selection of potential technical officers. Those who complete their course but do not so volunteer will be compelled to accept such essential employment as the Minister may require.

These Regulations will be administered in co-operation with the universities by the War-time Bureau of Technical Personnel and representatives of the Bureau will be available during this conference to discuss the application of these Regulations with you if you so desire. In summary, science and other technical students can now count on being officially directed, with due regard for their personal preferences, to the place where their training and education will be of the greatest national use and they will be freed from the competitive and inconsistent demands with which the Navy, the Army, the Air Force, Government departments and the war industries have heretofore been plaguing them.

You will also shortly be approached by the War-time Bureau of Technical Personnel which hopes again this year to develop a program of summer employment for university students that will be of the greatest usefulness both in meeting the needs of the war industries and furnishing the students practical training to supplement their formal education.

I referred a moment ago to the fact that assistance is being given to 432 students in training to become teachers. This suggests one of our manpower problems in which you are directly concerned. The quality of university education depends in part on the quality of elementary and secondary education, both of which are being seriously threatened by a growing shortage of qualified teachers.

In the field of elementary education it would appear that the shortage results very directly from the low scale of teachers' salaries compared to their possible earnings in other occupations and can be corrected only by a substantial increase in teachers' salaries which raises, of course, inevitable financial problems.

In the field of secondary education the difficulty seems to be less than of the competition of higher paid jobs than the competition of the Armed Services and of jobs that seem to be more directly related to the war effort.

Status of Secondary School Teachers

I welcome this opportunity of declaring that in my judgment secondary school teachers can best serve Canada by continuing in their teaching positions. The greatest asset of our nation is the growing generation. On its quality our whole future depends and we must make every effort to maintain our educational standards to ensure the maintenance of its quality. In a recent debate in the British House of Commons, Sir William Jowitt, the Minister in charge of reconstruction, gave education a place "at the root of reconstruction". We cannot afford under the stress of wartime problems to overlook the problems of post-war reconstruction in which, I am sure we all agree, education will play so vital a part. The passage in October, 1941, of the Post Discharge Re-establishment Order which provides, among other arrangements, for allowances to returned soldiers to enable them to resume their interrupted education and the passage this year of the Vocational Training Co-ordination Act indicate that the Government is already aware of the close connection between education and rehabilitation and reconstruction. But I am far from convinced that these two measures exhaust the field and we must look to you as the leaders in that field for guidance in the further development of educational policy to meet many of the immediate and long-run problems in this field at which I have only hinted.

There has not yet been any general complaint of a shortage of elementary and secondary school students to parallel the shortage

of teachers mentioned a moment ago but, although it does not concern you immediately or directly, it may not be inappropriate at this time to mention another very deep conviction which I wish were more widely shared.

Position of Students

There is some indication that the attraction of wartime wage rates on the one hand and of a genuine desire to help in the war effort on the other are leading many young people who would normally have continued in school to accept employment. Both from the individual and the national interest this is short-sighted and expensive and I have no hesitation in saying dogmatically that our needs are not sufficiently pressing to require any young person under the age of sixteen or perhaps even eighteen years, who can profit from continued education, to sacrifice it during these years. Students of that age can best serve their country, even in this emergency, by continuing wherever possible to complete their high school or technical school education. If by then they are still needed in the Armed Forces or war industry they will be better fighters or better workers. After the war they will be more useful citizens and will play a better part in rebuilding our peace-time life. Those who sacrifice their education to-day will handicap themselves for to-morrow. They will be those most liable to unemployment, most likely to be a burden rather than a help to their community.

The fact that this is obvious and trite has not deterred me from urging you to take every opportunity of encouraging a realization of its truth.

In conclusion I return for a moment to the question of the continuance of the courses in liberal arts. I have suggested that we may have to face the necessity of some further restriction. At the worst it may be hoped that male students not liable or not fit for military service, female students, and a steadily increasing number of discharged men, will maintain the student population at a level sufficient to permit the maintenance of staffs and educational standards. For the present, however, speaking quite unofficially, I venture the personal conviction that if the universities will ruthlessly weed out the incompetent and mediocre students, if we continue to require that all students take their military training while at the universities, and if it can be understood that, when the requirements of the Armed Forces or the industrial war effort so necessitate, National Selective Service would be

authorized to call up students even though that interrupts their courses, no immediate further restriction would be necessary. In any case, I can certainly assure you that no call-up in the middle of an academic year and no basic change in policy will be undertaken except in the common sense way after full consultation with university authorities.

Resolutions Adopted

As a result of its deliberations, the Conference passed the following resolutions:

The conference of Canadian universities wishes to express: (1) Its appreciation of the enlightened policy of the Government of Canada with regard to the maintenance of higher education in the prosecution of the war in cation. (2) Its desire to co-operate with the every possible way and to make any future adjustment of its work that the exigencies of the war effort may demand. (3) Its gratification with the statement of the Director of National Selective Service that the Government recognizes (a) the value for the war effort and national welfare of those creative forces which flow from sound education, and (b) the worth of the war service already rendered by the universities, and (c) that, if "the universities" will ruthlessly weed out the incompetent students, continue to require all students to take their military training at the universities, and that it can be understood that when the requirements of the armed forces or the industrial war effort so necessitates National Selective Service will be authorized to call up students even though they interrupt their courses, no immediate restrictions will be necessary.

This conference wishes to assure the Government that it will co-operate wholeheartedly with the effort to make higher education worthy of the name.

The committee recommends that the executive committee of the conference keep in close touch with the Government and that in the event of any emergency calling for a revision of the manpower policy of the Government in relation to the universities a special meeting of the conference be called.

The conference wishes to express also the appreciation of the recognition of the Government of the importance of adequately-trained teachers, especially with secondary schools, and would urge that students in liberal arts who wish to enter the teaching profession be encouraged to do so, and that those who do so be not called for military service.

The conference strongly commends the action taken by the Government in 1942 in granting financial assistance to students of high calibre who otherwise would have been unable to enter the universities and prepare themselves for special service in the Armed Forces or in war industry; the Conference strongly recommends that the Government continue this assistance to similar students entering the universities in 1943.

Military Call-Up Proclamations

Registration of Single Men—Extension of Draft to Include Married Men

IN a press statement issued on January 4 the Honourable Humphrey Mitchell, Minister of Labour, called attention to two proclamations appearing in the *Canada Gazette* of January 2, 1943, in regard to the military call-up.

The first proclamation required single men, born in any year from 1902 to 1923, who had not previously been served with a notice or order to report for medical examination under National War Services Regulations, to now report before February 1, 1943, to the nearest Postmaster or Registrar of a Mobilization Board. For this purpose a "single" man is one who either was unmarried and without children at July 15, 1940, or since that date has become legally separated, widowed or divorced, and is without children.

The Minister explained that when the various age groups among single men were being called up, there were several reasons why notices to report for medical examination failed to reach the small number now required to report by February 1. For instance, some had failed to register in August, 1940, or having registered, failed to file notice of change of address: actually these make up a considerable majority of the men who now have to register. Quite a number had enlisted with the Armed Forces or joined the Merchant Marine, and the small fraction of these since discharged have probably not realized that they must now report under the military call-up. Quite a number, having applied for voluntary enlistment, were rejected, but unless these men had earlier been medically examined on specific instructions of a Mobilization Board they must now register, so that they can be examined once more. Perhaps some of those in the Reserve Army, below the rank of Corporal, did not realize that they must report for medical examination under the military call-up, and possibly some in occupations regarded as essential and where deferments are fairly generally given, may not have thought it necessary to report for medical examination. The Mobilization Boards expect shortly to furnish a special identification form

to all men who have reported at any time for medical examination, but who either are in a low category or are on deferment, so that each man may be able to carry proof that he has not failed to comply with the military call-up.

Arthur MacNamara, Director of National Selective Service, in a statement on January 25 indicated that 18,757 single men had reported up to and including January 23 under this Proclamation.

The figures by Mobilization Board districts are as follows: Charlottetown, 53; Halifax, 1,177; Saint John, 117; Quebec, 1,277; Montreal, 2,176; Kingston, 933; Toronto, 3,978; Port Arthur, 531; London, 616; Winnipeg, 2,500; Regina, 1,907; Edmonton, 1,360; Vancouver, 2,132.

In a press release at the end of the month, the Minister announced that by an amending Order in Council the date for the registration of single men had been extended to March 1, but that further extension beyond that date would not be considered. The Minister observed that over 40,000 had registered by the end of January.

Married Men Now Subject to Call

The second proclamation authorizes the Mobilization Boards to call up married men born in the years from 1917 to 1923. In other words, the Boards may now direct these men to undergo medical examination, preparatory to joining the Forces.

The Minister pointed out that the proclamations are issued on the authority of Orders in Council passed during December, which were published at the time. Mr. Mitchell called attention to the fact that obviously the present proclamations do not refer to those who are already serving with the Armed Forces, nor does the proclamation in regard to single men require any re-registration by those already medically examined.

National Selective Service Offices were also added to Post Offices and Registrars of Mobilization Boards, as authorities to accept registrations.

Establishment of Manpower Survey

Running Inventory of Labour Supply Based on Quarterly Employers' Reports

IN order to plan and administer Canada's manpower program in the most effective manner, and to make available at National Selective Service headquarters a complete index of the national labour force, a new census of workers, maintained on a quarterly basis, became effective on January 30, 1943.

"The Department of Labour constantly needs up-to-date statistics on Canada's working population," Arthur MacNamara, Director of National Selective Service, pointed out. "The scope of the reports asked for has been most carefully considered. While not imposing a heavy burden on employers, the reports will give a good deal of information now needed so that National Selective Service can plan and administer Canada's manpower program."

Accordingly, all employers of insured and non-insured persons, with certain exceptions noted below, were asked to complete a report on employment as of January 30, 1943. The survey will provide essential information on manpower supply and demand and will be used as the basis for precise industrial classifications and a uniform labour priority system.

Employers who have not been asked to complete a report are:

- (1) Farmers and horticulturists;
- (2) Employers of domestic servants, except where the employed person is employed in a club, or in any trade or business for purposes of gain;
- (3) Governments, with respect to regular governmental activities. However, reports will be expected from Government Commissions, municipalities, etc., with respect to certain business activities operated directly or indirectly by them, including railroads, electric utilities, telephone systems, savings banks, etc.

Employers were required to send returns to the nearest Local Employment and Selective

Service Office by February 6. These reports are being checked at the Local Offices and forwarded to the Manpower Records Division of the Department of Labour in Ottawa for coding and analysis.

The registration is being studied carefully by Selective Service authorities and will become the basis for enforcing a policy of labour priorities to meet the needs of war industries as they arise.

Approximately 170,000 employers' establishments were required to complete this new report. Similar reports are to be required regularly for these employers every three months. The first report form required information on the number of employees as at January 30 or the nearest previous pay date, with specific totals to show age, sex and marital status.

There are 11 different age groups, and for each group the employer was requested to give the number of men and women employed and whether these persons were married or single. There are four annual age group categories for those born in the years 1923, 1924, 1925 and 1926 or later. Between 1922 and 1898 there are five separate categories each covering four-year spans.

Employers were also asked to state, on the basis of present plans, the expected number of employees on their payrolls as at April 30, 1943.

A consolidated report was used by certain types of organizations such as banks, insurance companies, utilities, contractors, retail chains, restaurant and service chains, etc., within the area served by a Local Employment and Selective Service Office.

A staff training school was held in Ottawa to train those who will be responsible for the statistics in the regional offices.

Harvest Assistance to Western Canada

Millions of Dollars Worth of Grain Saved by Prompt Response to Emergency Appeal

REFERENCE was made in the LABOUR GAZETTE of November, 1942, to the emergency assistance provided by the Dominion Department of Labour in organizing chiefly student help in Eastern Canada to prevent the loss of a substantial part of the abnormally heavy harvest in Western Canada.

On the basis of reports received, the eastern harvest expedition of over 5,000 students, together with such farm help as could be spared, resulted in saving several million dollars worth of crops.

In planning this quick campaign to relieve an emergent situation, several factors had to be considered.

The appeal from the Province of Saskatchewan for workers from Eastern Canada to assist in harvesting the field crops reached the Department of Labour at a very late date. When harvest excursions from Eastern Canada were carried to the Prairie Provinces back in the 1920's and before, the excursion trains normally left the East during the latter half of August, and at the latest during the first week or so of September. Arrangements would have been all completed several weeks in advance. However, due to abnormal conditions—including a very heavy crop, labour shortages, and adverse weather—it was not until early in October that Saskatchewan appealed for urgent assistance.

After a careful survey of the situation, certain decisions were taken, which may be summarized as follows:

- (1) Workers going from Eastern Canada should not be taken out of any high priority industry.
- (2) Farm workers to go from Eastern Canada should be those whose absence would not interfere with agricultural production, in so far as the East was concerned.
- (3) Certain high priority industries—steel, for example—were even then looking for farmers who could be spared from the farms in order to build up working forces in industrial plants in Eastern Canada.
- (4) Universities then starting their sessions, could be approached to see whether they would agree to release young men from non-science courses.
- (5) It was considered that unless fairly generous financial support were provided in connection with fares of persons going from the East to the West, the response would not be satisfactory.
- (6) Even given good weather, the period of work in the Western Provinces for eastern harvesters would be quite short, and few would be willing to undertake the move.

After careful consideration it was decided that those to go from the East would be drawn from two classes: university students in non-science courses; and farmers from farms in Ontario and Quebec who could be spared.

Organization of Plan

On October 3 the above opinions and decisions were reached at a meeting held in Ottawa, and on October 5 a meeting was held in Montreal with representatives of the railways. In the meantime, universities, including those in Ontario and Quebec, were approached (these included agricultural colleges). The

railways agreed to give the Department of Labour a single fare rate from points in Ontario and Quebec to points in Saskatchewan, and the final arrangement was that the Government would underwrite the cost of transportation (not including meals en route and expenses other than rail tickets) and that each individual would be required to pay \$10, refundable to the Department of Labour for the return journey.

On October 8, or a few days after the harvest help appeal was received, the first section of university students left Eastern Canada and this movement was completed on October 14 when the last train of harvesters left for the west.

While the great majority of harvest helpers were university students, there were a few hundred farm hands. The industrial areas of Ontario and Quebec were assigned quotas by districts to regulate the number of farmer workers to go. In Northern Ontario and Quebec quotas were not given to farmers but efforts were made to ensure that only farmers went.

In the recruiting of students for this emergency harvest work, instructions were issued that only physically robust youths were to be selected.

Altered conditions—chiefly due to an unforeseen seasonal release of farm workers in certain Manitoba areas—resulted in a surplus being entrained for Saskatchewan.

Alberta authorities were then asked if they could use some of these surplus eastern harvesters. Alberta requirements were met by the diversion of some assistance to that province.

A few unpredictable factors entered into the rapid organization and completion of the program. These may be summarized as follows:

(1) Admittedly the excursion was very late, but as already has been pointed out, the request for help came very late in the season and even at that the program was organized and put into operation within a few days of receipt of the appeal.

(2) The weather—most favourable in late September and early October—turned almost uniformly bad on the Prairies.

(3) A few farmers failed to appreciate labour shortages in Central Canada, and complained of the inexperience of some of the university students. At that, these complaints were relatively few. (But as has been stated, it was an emergency situation that had to be met with whatever residue of labour could be recruited without detriment to war priorities).

(4) Only a few of the harvesters were not able to furnish the \$10 for the return journey. Those who could not do so were looked after.

However, considering the urgency of the situation and all the factors involved, the scheme did accomplish its objective—the saving of millions of dollars worth of wheat that otherwise would have been lost. The cost to the public treasury was very small in proportion to the definite purpose achieved.

Newspaper editorials in the affected areas and messages received by the Minister of Labour and selective service officials, indicate that the results were satisfactory. Editorially,

the *Regina Leader-Post* said: "The plan has accomplished what it set out to do. It has tided the farmer over a tough spot, which he could not have got through otherwise." Hon. R. J. M. Parker, Acting Minister of Labour in Saskatchewan, said, that reports from all sections of the province indicated that the scheme had been a "decided success." In a letter to the Dominion Minister of Labour, the Alberta Minister of Agriculture, Hon. D. Bruce MacMillan, declared that the supply of men from the East had been a success and had "materially assisted" in getting the crop threshed.

Program for Relieving Farm Labour Shortage in Ontario

Farm Service Force of 50,000 Aided Ontario Farmers During 1942— Similar Farm Assistance Programs in Five Other Provinces —Plans for 1943.

THE shortage of experienced farm labour, in Ontario, heightened at the very time an increase in food production is an essential war requirement, was alleviated last summer by the efforts of thousands of volunteer workers, men and women, boys and girls, who gave what time they could in a patriotic endeavour to help in the war effort.

These volunteers were organized by the Ontario Provincial Government as part of its farm labour program. The Dominion Government, on the recommendation of the Minister of Labour, Hon. Humphrey Mitchell, provided the province with financial assistance under a Farm Labour Agreement to cover the cost of recruiting workers, transporting them to farms, and certain other expenses.

In the fiscal year 1942-3 the Dominion Government agreed to pay 50 per cent of the costs up to a maximum Dominion contribution of \$100,000.

Similar farm labour agreements were concluded between the Dominion Government and the provinces of Saskatchewan, Manitoba, Alberta, British Columbia, and Nova Scotia. With Federal aid, Ontario had already undertaken a plan for supplying farm labour the previous year.

During the summer of 1941 the interdepartmental committee in charge of Ontario's program, with an objective of 10,000 helpers for the farmers, had succeeded in registering 23,041. A report of its activities during 1942 has just been issued.

Report of Activities of Ontario Farm Service Force, 1942.

In order to get a picture of the farm labour resources that Ontario possessed for her share of the food production program and to arouse

public opinion to the need for greater effort in discovering, enlisting, and training help from every source that could be drawn on, a thorough survey of labour, live stock, farm crops and machinery was undertaken during the winter by the Ontario Department of Agriculture.

Survey forms were sent to 131,000 farmers in Ontario, of whom 64,157, or nearly 50 per cent submitted answers.

The answers revealed that 42 per cent of the farmers submitting returns had insufficient help to maintain production. Twenty-two per cent stated that they could increase production if help were available.

There were 100,000 farm hands in Ontario, of whom 22 per cent were hired by the year, 27 per cent by the month, and 51 per cent by the day.

Since the beginning of the war, 27,288 farm hands had left the farm. Of these, 23 per cent had enlisted, 34 per cent had gone into war industries, and 43 per cent had gone elsewhere.

More than 51,000 additional farm labourers were listed as required in 1942.

Organization of Farm Service Force

The Ontario Farm Service Force was organized with headquarters in the Parliament Buildings in Toronto. Its field staff consisted of twelve Placement Officers, each in charge of a district and three or four counties, two Placement Officers in charge of Japanese Camps, and three Women Placement Officers.

The duties of the Field Staff were:

- (1) To secure applications from farmers for help;

- (2) To investigate applications to determine suitability;
- (3) To visit schools, employment offices, towns, etc., to recruit helpers and interview them as to suitability;
- (4) Place these Farm Service Volunteers in suitable jobs on farms, in camps, or otherwise as the situation demanded;
- (5) Maintain supervision of placement to adjust difficulties in hours, wages, personality, exploitation, etc.

The report describes the Farm Service Force as follows:

"The Force consists of all those from 12 years of age up to 85 or more who are willing and able to help relieve the farm labour situation and who can give any time for a few evenings a week up to 12 months continuous service. It is made up of all kinds from inexperienced to fully experienced men and women. The members of the Force are known as Farm Service Volunteers.

"The basis of the appeal to boys, girls, men and women, to join the Ontario Farm Service Force is that of patriotic national service. It

is necessary to recognize that men cannot fight without tools and food. This basic fact is receiving increasing recognition in Canada and United States and farming is now being recognized as an essential war industry.

"The Force is divided into seven Brigades as follows:

"*The Children's Brigade*—enrolls all children over 12 years (boys up to 14 or 15 years and girls to 16 years of age).

"*The Farm Cadet Brigade*—enrolls all young men from 15 years of age up to military age and any of military age who have been rejected for any of the services and who are prepared to work on the farm. Their chief work is seasonal work on mixed and dairy farms. It will also enroll all male teachers.

"*The Farmerette Brigade*—enrolls all young women 16 years of age and upwards in school, college, university or other educational institutions, and women teachers in these institutions. Their chief work is fruit, vegetable and truck farming.

"*The Women's Land Brigade*—enrolls all young women who are not in educational

ONTARIO FARM SERVICE FORCE, 1942.

REPORT OF PLACEMENTS APRIL 1ST TO NOVEMBER 23RD, 1942

<i>Children's Brigade</i> —boys and girls under sixteen years of age—	Boys.....	5,490	
	Girls.....	3,452	
	Teachers ..	448	
			9,390
<i>Farmerette Brigade</i> —girls sixteen years of age and upwards in secondary schools, colleges and universities:			
Girls placed on own farms, friends' farms, etc.....		7,125	
Girls placed in 16 Government Camps.....		2,303	
Girls placed in 9 Private Camps.....		485	
Girls placed on individual farms.....		53	
Japanese Beetle Trap Attendants.....		33	
Members of Y.W.C.A. Camp Staffs.....		170	
Members of Red Cross Camp Staffs.....		15	
Number of Labour Secretaries.....		29	
			10,213
<i>Farm Cadet Brigade</i> —boys fifteen years of age and upwards:			
Boys placed on home farms, friends' farms, own choice.....		8,341	
Boys placed in Government Camps.....		260	
Boys placed on individual farms.....		1,694	
Members of Y.M.C.A. Camp Staff.....		20	
Teachers in Secondary Schools.....		275	
Members of Cooking and Care Staff.....		20	
			10,610
<i>Women's Land Brigade</i> —girls and women outside of educational institutions:			
Women's Land Brigade returning home daily.....		55	
Placed in Private Homes.....		49	
Women's Land Brigade Camps.....		680	
Women and girls day-by-day work.....		1,201	
Men and boys day-by-day work.....		580	
			2,565
<i>Farm Girls' Brigade</i>			902
<i>Family placements</i>			64
<i>Holiday Service Brigade</i>			239
<i>Farm Commandos Brigade</i>			12,750
<i>Experienced help through Employment Offices</i>			5,500
<i>Secured for canning industry</i>			1,500
<i>Japanese camps</i>			372
<i>Men for wineries</i>			300
			54,405

institutions and who volunteer for Farm Service. This Brigade emphasizes mixed farming and year round service.

"The Farm Girls' Brigade"—enrolls all farm young women up to 26 years of age, not in school or college, who undertake to help in various ways with farm operations.

"The Holiday Service Brigade"—enrolls all (men or women) who are prepared to give from a week up to two or three months of their holidays (away from their regular occupation) to service on the farm—either helping in the farm home and so relieving some farm women for outside work, or helping in regular farm work.

"The Farm Commando Brigade"—enrolls all who, unable to leave home, are willing to give evenings, half a day a week or one whole day a week to go out to help some nearby farmer and return home at night."

The members of the Children's Brigade, according to the report, work on their own farm, or neighbours' farms, with relatives or farmers known and approved of by the parents; or they live at home and go out day-by-day to nearby farms to do light work such as berry picking, etc.

Members of the other six Brigades work in one or other of the following ways:

(1) Live and work on individual farms as individuals.

(2) Live in small private camps on individual farms (10 to 40 in a camp) and all work on the same farm.

(3) Live in large Government camps (40 to 100 in each camp), girls under supervision of the Y.W.C.A. and boys under Y.M.C.A. These workers are taken out, in twos or more each morning to neighbouring farms and are brought back each evening. They take a lunch with them.

(4) Live at home and are taken out day-by-day by farmers who require their services and are brought back each evening.

(5) Work in canneries, live at home, or board away from home.

In addition, day-by-day work is conducted in suburban truck farming areas. Farmers come to a pre-arranged place on the outskirts of the city and pick up their help in the morning and return it to the same spot at night. It draws its help from all Brigades of the Force and is supervised by the Farm Service Force.

Placements Effected

The accompanying table shows that 54,405 placements were effected through the Farm Service Force during 1942. Moreover, the report declares that the publicity given to the plan created throughout Ontario a consciousness of the food problem that brought

hundreds, if not thousands, into participation in the program that were not recorded in the registration. No record is given of the number directly placed by County Agricultural Representatives.

The following types of farming were supplied with help: general mixed farming, dairying, beef stock, poultry, flax, sugar beets, vegetables, truck gardening, and fruit farming. Workers were also supplied to canneries and wineries.

The Department of Education made it possible for large numbers of entrance class and secondary school pupils to participate in the program for a period of thirteen weeks or more. Regulations were drawn up permitting secondary school pupils with a 50 per cent standing in their year's work to leave school after the Easter examinations without losing their year's standing in Departmental examinations, provided they worked on farms for at least thirteen weeks.

It was also arranged for pupils in entrance class to be given their entrance certificate under the same conditions.

Co-operation of Voluntary Agencies

Voluntary agencies co-operating with the Ontario Farm Service Force included:

(1) The National Council Y.W.C.A. which undertook the supervision and staffing of all Government camps for girls. They looked after food, discipline, housing, recreation, health of the Camp.

(2) The National Council Y.M.C.A. undertook the supervision of Government Boys' Camps for discipline, recreation, etc.

(3) Church Boards circularized all churches in Ontario urging all to do their part in the work.

(4) The Red Cross Society co-operated in finding, training and supervising cook-supervisors for private camps.

(5) Urban Boards of Education, school supervisors, inspectors and teachers co-operated, many of them to the extent of having close to 100 per cent of their pupils working on farms.

In many cases the worst hit sections of Ontario in respect to farm labour, were the areas close to some military establishment. As an offset to this labour drain, for which their presence was partly responsible, many Army and Air Force camps supplied hundreds of men on half days, evenings or week-ends for haying, harvesting and canning.

Camps for Girls and Boys

Government Camps were organized mainly in fruit or vegetable sections where a large number of workers were needed in a small area.

The first approach to the organization of a camp was to call a public meeting of all the growers likely to be interested in help to be secured. At this meeting there was discussed the general farm help situation in the district. Wages were discussed, both hourly and piece rates. Minimum hourly rates were agreed on and hours of work settled. Then each grower was asked to fill in a survey form telling in detail the amount of help he needed throughout the season, giving the numbers and dates. A committee to help run the camp was elected. Possible camp sites were then listed and an approximate date of opening decided.

The National Councils of Y.W.C.A. and Y.M.C.A. were invited to co-operate in selecting sites and to provide supervision of the camps for boys and girls respectively. Under their supervision questions of discipline, health, recreation and feeding were handled. In each camp a Boys' Camp Council or Girls' Camp Council was elected by the campers to co-operate with the camp officers in running the camp in a democratic way.

Each girls' camp had a staff of Director, Assistant Director and three Camp Assistants in a camp of 60 girls. There was also in each camp a young woman Labour Secretary who was responsible for seeing that every girl was kept employed every day as far as possible. Girls were called for each morning between 7.30 and 8 a.m. They took lunch with them to eat at the farm. Farmers brought the girls back to camp about 5.30 or 6 p.m.

Boys' camps had a staff of women to cook and serve meals and supervise the cleanliness in camp. There was also a staff of a Director and two or three Counsellors to organize the discipline, recreation and social life in camp.

Transportation of all Farm Service Volunteers who offered to serve three weeks or more was paid to the extent of one-way fare.

An unemployment insurance fund was set up. Each farmer paid into the fund 10 cents per day per girl or boy hired. This fund was used to pay board money on the following basis: all workers who had worked 32 hours or more in the week paid their full board of \$4.50 a week (girls) or \$5 a week (boys). If they were unable to get 32 hours work, due to rain or no work being offered, then 1/32 of their board money was paid on account of board out of the unemployment insurance fund for every hour less than 32 that they worked.

Wages were payable every Friday night for one week's work up to Thursday evening. Board was payable for the parallel period on the same night as wages were payable.

Camps were set up in a variety of ways. Two were under canvas with a central building for staff, kitchen, wash room, dining room, etc. One was housed in a public school, an-

other in a high school, one in a high school and church parish hall. One was erected in an orchard, another was in a refitted and furnished horse stable, a packing house provided another site, two were roadside tourists' cabin centres, three were in private residences, two were in bunkhouses, one in a barn and two in fall fair buildings.

Private camps to the number of fifteen were built, equipped, and staffed by individual farmers who needed from 10 to 40 or more workers on their own farms. The Ontario Farm Service Force undertook to help find staff and keep the camps filled with helpers, throughout the season.

Some Results

The report continues:

"One placement in our day-by-day work was that of a grandmother, daughter and granddaughter. The grandmother, on the first day, harvested 69 bushels of carrots, the second day 75 bushels, and 82 bushels the third day which would have been 100 bushels but the carrots gave out. On the fourth day she topped 120 bushels of beets.

"Mr. M. M. Robinson, Secretary of the Ontario Food Distribution Council in his annual survey said: 'Ontario's fruit and vegetable growers would never have completed their 1942 operations without the student labour organized by the Provincial Department of Agriculture and this source of labour even saved the day for many processors and others engaged in activities related to production and distribution.'

"Extract from letter re one of our boys at the Leamington Camp.

"Here is a record of one boy's work—fifteen weeks.

Number of hours worked.....	817
Wages earned.....	\$243
Board	75
Savings	150

Plans for 1943

According to the report, the plan for finding farm help for 1943 in Ontario will be worked out on the same lines as in 1942. The seven Brigades of the Ontario Farm Service Force will be continued and extended. New government camps for boys and for girls are being planned; and several new private camps have been proposed.

Two years of operation have provided valuable experience in regard to the organization of the Farm Service Force. Moreover those of the fifty thousand volunteers who again offer their assistance will be of improved skill and usefulness to the farmers for whom they work.

Wartime Controls Found Valid

Supreme Court of Canada Upholds Validity of Order in Council Delegating Power to Controller and of Order Issued by Controller under this Authority

THE authority of the Governor in Council to delegate to subordinate agencies the powers conferred on him by the War Measures Act was upheld in a unanimous decision rendered on January 5 by the Supreme Court of Canada.¹ The judgment has removed doubts as to the validity of the Government's system of wartime controls, a system which has been in operation since the beginning of the war and has been steadily extended in scope until it is now of basic importance to the entire war program.

It was first challenged when a charge of an offence against an order made by the Oil Controller was dismissed by the senior County Court Judge in the County of York on the ground that the authority vested in the Governor in Council could not validly be delegated to a Controller. A few days later, another charge, this time involving an infraction of the National Selective Service Regulations, was dismissed by a Kingston magistrate, and in other cases judgment was withheld. As a result, doubt was cast on the validity of a wide range of regulations under the War Measures Act, including the Defence of Canada, price control, wages stabilization, foreign exchange control and manpower regulations and the orders issued under them. A Reference was therefore made to the Supreme Court to determine (1) if an Order in Council relating to chemicals, which was considered to be representative, was ultra vires of the Governor in Council, and (2) if an order issued under that Order in Council was ultra vires of the Chemicals Controller who had issued it. The unanimous opinion of the Court was that neither the Order in Council nor the order were invalid except for one paragraph of the Order in Council which was held to be clearly in conflict with a section of the War Measures Act.

Act Itself Not Open to Challenge

It was pointed out that there could be no dispute as to the validity of the War Measures Act itself, this matter having been finally determined by the Privy Council in *Fort Frances Pulp and Paper Company v. Manitoba Free Press Company* (1923) A.C. 695. Moreover, it could not be suggested that the various sub-

jects dealt with by regulation and order, whether by the Governor in Council direct or by subordinate agencies under a delegated authority, were not within the powers vested in the Governor in Council by the Act. The question to be determined, therefore, related purely to the delegation of power to subordinate agencies, and this involved particularly the interpretation of Sec. 3 of the Act which provides that

The Governor in Council may do and authorize such acts and things, and make from time to time such orders and regulations, as he may by reason of the existence of real or apprehended war, invasion or insurrection deem necessary or advisable for the security, defence, peace, order and welfare of Canada...

and that

All orders and regulations made under this section shall have the force of law...

Legislative Powers Conferred on Governor in Council

Chief Justice Duff expressed the opinion of the Court when he stated that the decision in *re Gray* (1918) 57 Can. S.C.R. 150

involved the principle, which must be taken by this Court to be settled, that an Order in Council in conformity with the conditions prescribed by, and the provisions of, the War Measures Act may have the effect of an Act of Parliament.

That is, the Act confers law-making authority on the Governor in Council, and within the ambit of the Act he has powers as great as those of Parliament itself. Apart from conditions expressed in other sections of the Act, the validity of an order passed under Sec. 3 depends on a two-fold condition:

that it could be enacted as a statute by Parliament, in execution of its emergency powers, or otherwise; and furthermore, that Parliament is not precluded by the British North America Act, or by any later enactment concerning its legislative powers, from committing the subject matter of it to the Executive Government for legislative action.

At the same time, the risk of an abuse of power is avoided because Parliament still remains the ultimate authority:

Under the War Measures Act the final responsibility for the Acts of the Executive rests upon Parliament. Parliament abandons none of its powers, none of its control over the Executive, legal or constitutional.

Sec. 3 of the Act is couched in extremely comprehensive terms: the Governor in Council has power to do any act or pass any order

¹ In the matter of a Reference as to the validity of the Regulations in relation to Chemicals enacted by the Governor General of Canada on the 10th day of July, 1941, P.C. 4996, and an Order of the Controller of Chemicals, dated the 16th day of January, 1942, made pursuant thereto.

which he deems necessary for the security, defence, peace, order and welfare of Canada. These words, on their natural meaning, cannot be interpreted as precluding delegation of authority. In Britain in the last war wide powers were delegated to Boards and Controllers under authority of a statute whose language was less comprehensive than that of the War Measures Act, and in the Defence of the Realm Act of 1939 the necessity of this procedure was recognized by the fact that it was explicitly provided for. Actually, the imposition on the Governor in Council of the duty of safeguarding the supreme interests of the State in itself necessarily implies that he has the power to delegate his authority, for otherwise he would be unable to perform his duty adequately.

I find it impossible to suppose that the authors of the enactment did not envisage the likelihood of the Executive finding itself obliged to make use of such [subordinate] agencies.

The Governor in Council has been vested with full discretion in performing the duty imposed on him and he alone is competent to decide what it is necessary to do. Subject to the conditions expressed above it is not within the powers of any court to canvass the considerations which led him to believe that

any regulations he might pass are necessary or advisable.

The words are too plain for dispute: the measures authorized are such as the Governor in Council (not the courts) deems necessary or advisable.

Governor in Council not a Delegate

Mr. Justice Rinfret amplified this reasoning in certain particulars. Citing the case of *Hodge v. the Queen* (1883) 9 App. Cas. 117, he stated that the powers conferred on the Governor in Council

are "not in any sense to be exercised by delegation from or as agents of the Parliament."

Within the limits prescribed, the authority of the Governor in Council is as plenary and as ample as the Parliament "in the plenitude of its powers possessed and could bestow." The "devolution effected by the War Measures Act" (to borrow the expression of my Lord the Chief Justice in the *Gray* case) is not to be assimilated to a so-called delegation; and such a devolution has no analogy with agency.

The maxim *Delegatus non potest delegare* therefore does not apply as having no reference to legislative authority.

The Governor in Council within the ambit of the Act, is not a delegate. The Act constitutes a devolution of the legislative power of Parliament, and, within prescribed limits, it can legislate as Parliament itself could. Therefore it can delegate its powers whether legislative or administrative.

Price Control in Newfoundland

THE *Commercial Intelligence Journal* issued by the Department of Trade and Commerce, in a recent number provided a brief description of Price Control in Newfoundland as reported by Mr. R. P. Bower, acting Trade Commissioner in Newfoundland.

On December 29, 1941, under the provisions of the Emergency Powers (Defence) Act, 1940, the Newfoundland Commission of Government introduced the Defence (Prices of Goods) Regulations. These regulations empower the Commissioner for Public Health and Welfare to fix the maximum prices to be charged for specified commodities in the course of a business of any specified class and provide penalties for evasion or contravention. They also provide that control of prices can be effected by regulating the amount of mark-up imposed by the various intermediaries in the distribution chain.

Although these regulations have been in force since December 2, 1941, it was only recently decided to establish a comprehensive list of maximum prices. To determine these prices and secure enforcement, a Deputy Food Controller was appointed on November 3. According to recent press notices published by the Commissioner for Public Health and Welfare, the retail price of eggs should not exceed \$1.05 per dozen and maximum prices

have been established for certain brands of oleomargarine. Until these prices were set, prices for these products varied widely. In St. John's, for example, a certain brand of oleomargarine could be bought for 35 cents per pound in one store, while in another the price was 42 cents. The price of imported eggs ranged from \$1.25 to \$1.60 per dozen. In many cases, the retail selling price bears little relation to cost price and is determined largely by the scarcity of the commodity involved. In the case of an item of office equipment, where cost figures were recently examined, it was found that the landed cost amounted to \$1.82; retail selling prices ranged from \$2.75 to \$5.50, depending on the stock position of the various merchants, those with ample supplies charging the lower figure and those with small stocks the higher.

The cost of living under such circumstances has risen at a much greater rate than the higher landed costs of imports would justify. It is in an effort to control the cost of food and ensure its equitable distribution that the recent appointment of a Deputy Food Controller was made. If the program meets with success, its scope is likely to be extended to include control over other items entering into the cost of living.

Social Security

Social Security: A National Minimum Standard

Report of Sir William Beveridge Recommends Universal Freedom from Want in Britain—Declares Security Should not Stifle Incentive—Beveridge's Basic Principles—Outline of Plan

SIR WILLIAM BEVERIDGE in his report on *Social Insurance and Allied Services*¹ set forth a plan to provide a national minimum standard of social security in Great Britain.

The main feature of the plan is a unified comprehensive, contributory, scheme of compulsory insurance against interruption and destruction of earning power, and for special expenditure arising at birth, marriage and death.

In his report Sir William Beveridge stated that in only one respect of first importance—namely, limitation of medical service—does Britain's achievement in social insurance fall seriously short of what has been accomplished elsewhere. It has a further shortcoming in its inadequate provision for cash benefit for maternity and funerals and through the defects of its system for workmen's compensation. In all other fields British provision for security, in adequacy of amount and in comprehensiveness, stands comparison with that of any other country; few countries stand comparison with Britain.

Guiding Principles of Recommendation

The recommendations of the report are based on three guiding principles. The first is that while being proposals for the future, they should take advantage of experience gathered in the past, and should not be restricted by consideration of sectional interests. This is not the time for patching, but for clear revolutionary changes.

The second principle is that social insurance should be regarded as one part only of a policy of social progress. Social insurance fully developed may provide income security; it is an attack upon want, but want is only one of five giants on the road of reconstruction. The others are disease, ignorance, squalor and idleness.

The third principle is that security must be achieved by co-operation between the State and the individual. Security should be offered in return for service and contribution. In

organizing security the State should not stifle incentive, opportunity, responsibility: in establishing a national minimum, it should leave room and encouragement for voluntary action.

The plan for social security set out in this report is built upon these principles: it is a limited contribution to a wider social policy, but something that could be achieved now without waiting for the whole of that policy. It is a plan of insurance—of giving in return for contributions, benefits up to subsistence level, as a right and without means tests, so that individuals may build freely upon it.

Freedom from Want

Before dealing with the plan for social security the report investigates the causes of want—of the circumstances in which families and individuals in Britain lacked the means of healthy subsistence in the pre-war years. During those years impartial scientific authorities made social surveys of the conditions of life in a number of the principal cities in Britain. They determined the percentage of the people whose means were below the standard assumed to be necessary for subsistence, and analysed the extent and causes of that deficiency. The same broad result emerged from all these surveys. From three-quarters to five-sixths of the want, according to the precise standard accepted, was shown to be due to interruption or loss of earning power. The remaining portion was due to failure to relate income to the size of the family. Therefore, to abolish want there must be a double redistribution of income—through social insurance and by family requirements.

First there must be provision against the interruption and loss of earning power—in other words, social insurance. There are already schemes of social insurance covering sickness, unemployment, old age, etc., yet many people affected by these causes are found to be without adequate means, so it is evident that the benefits of the insurance are either insufficient or do not last long enough, or alternatively, are only available on terms which make men unwilling to have recourse to them. Hitherto, neither benefit nor assistance

¹The official summary of this report containing benefit and contribution tables appeared on page 1406 of the December, 1942, issue of the *LABOUR GAZETTE*.

has been designed with regard to the accepted standards of the social surveys, though unemployment benefit and assistance, and workmen's compensation since 1940 are not altogether out of relation to those standards.

Secondly, there must be adjustment of incomes to family needs, that is, allowances for children. Without these no scheme of social insurance against interruption of earnings can be adequate. But these allowances must be given during periods of earning as well as in interruption of earning, or there will remain a large measure of want among the lower paid workers as the accompaniment of large families, or, alternatively, income will be greater during unemployment than during work.

Beveridge's Fundamental Principles

The social insurance scheme which is the chief method proposed to achieve social security embodies six principles. The report states that these six principles and all that is implied in them are fundamental; the rest of the scheme can be adjusted without changing its character; all rates of benefit and all details are by nature subject to amendment.

Flat Rate of Subsistence Benefit.—The social insurance scheme provides a flat rate of insurance benefit, irrespective of the amount of the earnings which have been interrupted by unemployment or disability or ended by retirement; exception is made only where prolonged disability has resulted from an industrial accident or disease. This principle follows from the recognition of the place and importance of voluntary insurance in social security and distinguishes the scheme proposed for Britain from the security schemes of Germany, the Soviet Union, the United States and most other countries with the exception of New Zealand. The flat rate is the same for all the principal forms of cessation of earning—unemployment, disability, retirement; for maternity and for widowhood there is a temporary benefit at a higher rate.

Flat Rate of Contribution.—The second fundamental principle of the scheme is that the compulsory contribution required of each insured person or his employer is at a flat rate, irrespective of his means. All insured persons, rich or poor, will pay the same contributions for the same security; those with larger means will pay more only to the extent that as taxpayers they pay more to the National Exchequer and so to the State share of the social insurance fund. This feature distinguishes the scheme proposed for Britain from the scheme recently established in New Zealand under which the contributions are graduated by income, and are in effect an income-tax assigned to a particular service. Subject moreover

to one exception, the contribution will be the same irrespective of the assumed degree of risk affecting particular individuals or forms of employment. The exception is the raising of a proportion of the special cost of benefits and pensions for industrial disability in occupations of high risk by a levy on employers proportionate to risk and pay-roll.

Unification of Administrative Responsibility.

—The third fundamental principle is unification of administrative responsibility in the interests of efficiency and economy. For each insured person there will be a single weekly contribution, in respect of all his benefits. There will be in each locality a security office able to deal with claims of every kind and all sides of security. The methods of paying different kinds of cash benefit will be different and will take account of the circumstances of insured persons, providing for payment at the home or elsewhere, as is necessary. All contributions will be paid into a single social insurance fund and all benefits and other insurance payments will be paid from that fund.

Adequacy of Benefit.—The fourth fundamental principle is adequacy of benefit in amount and in time. The flat rate of benefit proposed is intended in itself to be sufficient without further resources to provide the minimum income needed for subsistence in all normal cases. It gives room and a basis for additional voluntary provision, but does not assume that in any case. The benefits are adequate also in time, that is to say except for contingencies of a temporary nature, they will continue indefinitely without means test, so long as the need continues, though subject to any change of conditions and treatment required by prolongation of the interruption in earning and occupation.

Comprehensiveness.—The fifth fundamental principle is that social insurance should be comprehensive, in respect both of the persons covered and of their needs. It should not leave either to national assistance or to voluntary insurance any risk so general or so uniform, that social insurance can be justified. For national assistance involves a means test which may discourage voluntary insurance or personal saving. And voluntary insurance can never be sure of covering the ground. For any need moreover which, like direct funeral expenses, is so general and so uniform as to be a fit subject for insurance by compulsion, social insurance is much cheaper to administer than voluntary insurance.

Classification.—The sixth fundamental principle is that social insurance, while unified and comprehensive, must take account of the different ways of life of different sections of

the community; of those dependent on earnings by employment under contract of service, of those earning in other ways, of those rendering vital unpaid service as housewives, of those not yet of age to earn and of those past earning. The term "classification" is used here to denote adjustment of insurance to the differing circumstances of each of these classes and to many varieties of need and circumstance within each insurance class. But the insurance classes are not economic or social classes in the ordinary sense; the insurance scheme is one for all citizens irrespective of their means.

Outline of Plan

The Beveridge plan covers all citizens without upper income limit, but has regard to their different ways of life; it is a plan all-embracing in scope of persons and of needs, but is classified in application.

In relation to social security the population falls into four main classes of working age and two others below and above working age respectively, as follows:

(1) Employees, that is, persons whose normal occupation is employment under contract of service.

(2) Others gainfully occupied, including employers, traders and independent workers of all kinds.

(3) Housewives, that is married women of working age.

(4) Others of working age not gainfully occupied.

(5) Below working age.

(6) Retired above working age.

Every person in Class (1) (2) or (4) pays a single security contribution by a stamp on a single insurance document each week or combination of weeks. In Class (1) the employer also contributes affixing the insurance stamp and deducting the employee's share from wages or salary. The contribution differs from one class to another, according to the benefits provided, and is higher for men than for women, so as to secure the benefits for Class (3).

Benefits

Subject to simple contribution conditions, every person in Class (1) receives benefit for unemployment and disability, pension on retirement, medical treatment and funeral expenses. Persons in Class (2) receive all these except unemployment benefit and disability benefit during the first 13 weeks of disability. Persons in Class (4) receive all these except unemployment and disability benefit.

As a substitute for unemployment benefit, training benefit will be available to persons in all classes other than Class (1), to assist them to find new livelihoods if their present ones fail.

Maternity grant, provision for widowhood and separation and qualification for retirement pensions are secured to all persons in Class (3) by virtue of their husbands' contributions; in addition to maternity grant, housewives who take paid work receive maternity benefit for thirteen weeks to enable them to give up working before and after childbirth.

The sixth of these classes receives retirement pensions and the fifth is covered by children's allowances, paid from the National Exchequer in respect of all children when the responsible parent is in receipt of insurance benefit of pension, and in respect of all children except one in other cases. All classes are covered for comprehensive medical treatment and rehabilitation and for funeral expenses.

Unemployment benefit, disability benefit, basic retirement pension after a transition period, and training benefit are at the same rate, irrespective of previous earnings. It was felt that this rate would provide by itself the income necessary for subsistence in all normal cases. Provision is made for a joint rate for a man and wife who is not gainfully occupied. Where there is no wife or she is gainfully occupied, there is a lower single rate; where there is no wife but a dependant above the age for children's allowance, there is a dependant allowance.

Maternity benefit for housewives who work also for gain is at a higher rate than the single rate in unemployment or disability, while their unemployment and disability benefit is at a lower rate; there are special rates also for widowhood. With these exceptions all rates of benefit are the same for men and for women.

Disability due to industrial accident or disease is treated like all other disability for the first thirteen weeks; if disability continues thereafter, disability benefit at a flat rate is replaced by an industrial pension related to the earnings of the individual subject to a minimum and a maximum.

Unemployment benefit continues at the same rate without means test so long as unemployment lasts, but is normally subject to a condition of attendance at a work or training centre after a certain period. Disability benefit continues at the same rate without means test, so long as a disability lasts or till it is replaced by industrial pension, subject to acceptance of suitable medical treatment or vocational training.

Pensions

Pensions (other than industrial) are paid only on retirement from work. They may be claimed at any time after the minimum age

of retirement, that is 65 for men and 60 for women. The rate of pension is increased above the basic rate if retirement is postponed.

Contributory pensions are raised to the full basic rate gradually during a transition period of twenty years, in which adequate pensions according to needs are paid to all persons requiring them. The position of existing pensioners is safeguarded.

While permanent pensions are no longer to be granted to widows of working age without dependent children, there is for all widows a temporary benefit at a higher rate than unemployment or disability benefit, followed by training benefit where necessary. For widows with the care of dependent children there is guardian benefit, in addition to the children's allowances, adequate for subsistence without other means. The position of existing widows on pension is safeguarded.

National Assistance

For the limited number of cases of need not covered by social insurance, national assistance subject to a uniform means test is available.

It must meet those needs adequately up to subsistence level, but it must be recognized

as something less desirable than insurance benefit. Assistance would therefore always be given subject to proof of needs and examination of means; it would be subject also to any conditions as to behaviour which may seem likely to hasten restoration of earning capacity. The cost of assistance is met directly by the National Exchequer; although distinct from social insurance national assistance is combined with it in administration.

Medical Treatment

Medical treatment covering all requirements is provided for all citizens by a national health service organized under the health departments and post-medical rehabilitation treatment is provided for all persons capable of profiting by it.

Unified Administration

It is proposed that the social security plan should be administered by a Ministry of Social Security under a Cabinet Minister. This Ministry would be responsible for social insurance, national assistance and encouragement and supervision of voluntary insurance and will take over, so far as necessary for these purposes, the present work of other Government Departments and of Local Authorities in these fields.

Planning for Peace in War

At the conclusion of his report on "Social Insurance and Allied Services", Sir William Beveridge emphasized the need of planning for peace in wartime.

He said in part that "Statement of a reconstruction policy by a nation at war is statement of the uses to which that nation means to put victory, when victory is achieved. In a war which many nations must wage together as whole-hearted allies, if they are to win victory, such a statement of the uses of victory may be vital. This was recognized by the leaders of the democracies east and west of the Atlantic in putting their hands to a charter which, in general terms, set out the nature of the world which they desired to establish after the war. The Atlantic Charter has since then been signed on behalf of all the United Nations. The fifth clause of the charter declares the desire of the American and the British leaders 'to bring about the fullest collaboration between all nations in the economic field, with the object of securing for all improved labour standards, economic advancement, and social security'." The proposals of this Report are designed as a practical contribution towards the achievement of the social security which is named in the closing words. The proposals cover ground which must

be covered, in one way or another, in translating the words of the Atlantic Charter into deeds. They represent, not an attempt by one nation to gain for its citizens advantages at the cost of their fellow fighters in a common cause, but a contribution to that common cause. They are concerned not with increasing the wealth of the British people, but with so distributing whatever wealth is available to them in total, as to deal first with first things, with essential physical needs. . . .

"Freedom from want cannot be forced on a democracy or given to a democracy. It must be won by them. Winning it needs courage and faith and a sense of national unity: courage to face facts and difficulties and overcome them; faith in our future and in the ideals of fair-play and freedom for which century after century our forefathers were prepared to die: a sense of national unity overriding the interests of any class or section. The Plan for Social Security in this Report is submitted by one who believes that in this supreme crisis the British people will not be found wanting, of courage and faith and national unity, of material and spiritual power to play their part in achieving both social security and the victory of justice among nations upon which security depends."

Social Security in New Zealand

Comprehensive Program Financed by Special Social Security Contributions and State Subsidies

THE announcement in Great Britain of the Beveridge Report proposing a unified and extended social security plan for that country focuses attention once again on social security in New Zealand. This Dominion, which has gained a reputation as a laboratory for social legislation, has had in operation for a number of years a social security program in many respects similar to that suggested in the Beveridge Report.

The basic philosophy which motivated the adoption of New Zealand's social security legislation in 1938 was embodied in the Prime Minister's statement at the time: "A new principle has been introduced by this Act: citizens of the Dominion are ensuring themselves against the economic hardships that would otherwise follow those natural misfortunes from which no one is immune." "This legislation," states the Hon. Walter Nash, New Zealand's Minister to Washington, "ensures that no individual need ever lack an income sufficient to provide the necessities of life. It recognizes more fully and completely, I believe, than has ever been recognized anywhere else, the need for the community, as a whole, to accept responsibility directly for the economic welfare of its members—that, against the hazards incidental to competitive struggle for private gain must be set the need for collective organization of security."

The New Zealand Social Security Act, passed in September, 1938, makes comprehensive provision against the financial loss occasioned by such misfortunes as invalidity, sickness, orphanhood, widowhood, occupational disease and unemployment. In addition, it also provides old age superannuation, family allowances and various health and medical services.

New Zealand's social security program endeavours to provide an adequate income for those citizens of the state who permanently or temporarily lose their earning power. At the same time, it is understood to be the obligation of the citizen to co-operate fully in restoring his earning capacity whenever this is possible.

The Social Security plan is financed by a special social security levy, known as the Social Security Contribution, and by Government subsidies. In effect, the Government subsidizes an amount equal to the difference between the contribution receipts and the total social security costs. The Social Security Contribution consists of two parts: (1) a "regist-

ration fee" paid quarterly for all men over 20, and annually for women, and for boys and girls between 16 and 20; and (2) a "charge" on salaries, wages and other income of 1 shilling per pound, i.e. an income-tax of approximately 5 per cent. This income-tax is deducted at its source in the case of income derived from wages and salaries and in other cases is payable quarterly on an annual declaration of income received. Social security benefits themselves and military pay and allowances are the only classes of income exempt from payment of the charge.

Administration

The Health provisions of the Social Security Act are under the jurisdiction of the Minister of Health, who delegates authority to the Director-General of Health. All the other benefits are administered by the Minister of Social Security through the Social Security Department. A Social Security Commission acts under the general direction and control of the Minister of Social Security. This Commission consists of three members who are the executive officers of the Department.

Health Program

A universal health scheme covers every man, woman and child in New Zealand. The benefits made available under the Social Security Act include full general practitioner services, hospital treatment, pharmaceutical benefits and maternity benefits. The principle was established whereby patients have free choice of doctor and the doctor has free choice of patient.

There is free treatment in public and mental hospitals and part-payment of private hospital fees.

All necessary medicine and drugs are provided without charge, as well as all prescribed appliances and materials.

Maternity benefits include free nursing and medical services at confinement, treatment and maintenance in maternity hospital for fourteen days, or the services of a midwife or maternity nurse in the patient's home for a similar period; ante-natal and post-natal treatment are given free by the doctor. Every woman has the right to choose the maternity home or midwife who attends her in her own home.

Another feature of New Zealand's health program is the provision made for systematic dental treatment for school children through school dental clinics.

Security Benefits

Universal Superannuation and Age-Benefits.—Superannuation benefits under the 1938 Social Security Act were made available to all persons reaching the age of 65, without regard to other income or property. Payments of superannuation began on April 1, 1940 with the amount of £10 for the first year. Each succeeding year this amount is increased by £2 10s until the maximum of £78 a year is reached in 1968. In effect, it means that all persons under the age of 37 when the Act was passed will get universal superannuation at 30 shillings a week at age 65.

In addition to superannuation benefits there are age benefits which are payable to both men and women at age 60. Persons between the ages of 60 and 65 who need the assistance are taken care of by age benefits. The age benefit, unlike the superannuation benefit, is on a means test basis.

The basic rate paid in age benefit is thirty shillings a week (£78 a year). This basic rate is reduced if the recipient has an income in excess of £52 a year or if both husband and wife are entitled to benefit. The age benefit is supplemented by a children's allowance paid in respect of any child of an age beneficiary.

Emergency Benefits.—Persons not qualifying for any other benefit but not able to provide adequate livelihood for themselves and their dependents by reason of age, or physical or mental disability, domestic circumstances or for any other reasons, can qualify for an emergency benefit, an amount which is determined by the special circumstances of the case.

Family Benefits.—The family benefit is a payment made to the mother of every child, provided the income of the home does not exceed £5/50 a week. If the income of the home does not exceed five guineas a week, then six shillings a week is paid to the mother in respect of every child. If the income of the home exceeds £5/5/0, the total benefit payable in respect of any family is reduced by the amount of the excess. These allowances are paid in respect of children under 16 but must be used exclusively for the maintenance or education of the children, and the benefit may be discontinued at any time if, in the opinion of the Social Security Commission, this stipulation is not observed.

Orphans' Benefits.—Another benefit under the Social Security Act is the orphans' benefit which is paid to guardians for every orphan under 16.

Unemployment Benefits.—Every person over 16 who is unemployed, is capable of working and willing to work, and has taken reasonable

steps to obtain suitable employment is entitled to apply for unemployment benefits. The Social Security Commission has the discretionary powers to reduce the rate of benefit in relation to the claimant's other income and property. This is a means test.

There is a seven-day waiting period before benefit is paid but this may be waived if it is deemed necessary by the Commission. Further, the Commission may postpone the commencement of unemployment benefit for as long as four weeks or terminate it altogether if the applicant lost his job through misconduct, left voluntarily without good reason, or failed to accept an offer of suitable employment. Unemployment benefit may be refused to a seasonal worker if, in the opinion of the Commission, his earnings for the season are sufficient for the maintenance of himself and his family.

The duration of benefit lasts as long as the recipient meets the qualifications and provided he does not become entitled to receive some other benefit under the Act.

Sickness Benefits.—Persons over 16 are entitled to receive sickness benefits if they are incapacitated for work through sickness or accident resulting in a loss of salary, wages or other earnings. The incapacity must be certified by a resident medical practitioner. Sickness benefits are paid at the same rate as unemployment benefits. The Commission may reduce the amount of sickness benefits if the applicant is in receipt of other income. As in the case of unemployment benefit, there is a waiting period of seven days for sickness benefit. However, this waiting period can be waived by the Commission for special circumstances.

Invalidity Benefits.—The Social Security Act provides that every person who has attained the age of 16 years and who is not qualified to receive an age-benefit is entitled to an invalidity benefit, if the person is totally blind or if the person is permanently incapacitated for work as a result of an accident or by reason of illness or any congenital defect. In addition to certain residential qualifications, invalidity benefits are conditional on the fact that the disability was acquired during residence in New Zealand and that it was not self-induced.

Social Security Fund

Social security contributions are collected by the Commissioner of Taxes but are transferred to a special account known as the Social Security Fund. The annual government subsidy from general taxation revenue is also paid into this fund to meet its budgetary requirements.

In the fiscal year 1941-2 Social Security expenditures for monetary and medical benefits

and for administrative expenses were £13,531-287. Payments in respect of universal superannuation, age, widows, orphans, family, invalids, miners, Maori war, unemployment, sickness and emergency benefits were £10,701-237 while medical and other benefits including medical, hospital, maternity, pharmaceutical and supplementary benefits amounted to £2,435,588. The administrative expenses for social security of the Land and Income Tax, the Health and the Social Security Departments were £394,462.

Receipts from social security registration fees in the same period were £605,222; those from the social security charge on wages and other income were £10,432,314; penalties, fines, interest and miscellaneous receipts amounted to £50,146. The other receipts included the balance of £1,867,440 in the Fund from the fiscal year 1940-1 and the grants from the Consolidated Fund of £3,600,000.

At March 31, 1942 there was a balance of £3,023,835 in the Social Security Fund. This sum is carried over for use in the current fiscal year, 1942-3.

System of State Medical Services Proposed in Great Britain

Report of British Medical Planning Commission Urges that Medical Services be made Available to Every Individual

A Commission, which consists of representatives of the British Medical Association, the Royal Colleges of Physicians and Surgeons and other medical societies, held its first meeting in May, 1941, and a year later published a Draft Interim Report. In September, 1942, the conclusions of the report were discussed by the Annual Representative Meeting of the British Medical Association and were for the most part approved.

The Commission made the following statement of its objects:

(1) To provide a system of medical service directed towards the achievement of positive health, the prevention of disease and the relief of sickness; and

(2) To render available to every individual all necessary medical services, both general and necessary medical services, both general and specialist, and both domiciliary and institutional.

Certain principles were outlined as basic to all proposals for reform. Such proposals should aim at improvement in the quantity, quality and availability of all types of medical services and should include measures for securing that each family or individual will be under the care of a medical practitioner who is concerned not only with diagnosis and treatment but also with the promotion of health and the prevention of disease. There should be as full a measure as possible of freedom of choice both by the patient of his doctor and by the doctor of his patients; co-operation among individual general practitioners in a locality is essential and implies some form of group practice; and the two existing types of general hospitals ("council" and "voluntary" hospitals) should be brought together in a unified system.

Outline of Plan

The Commission in its proposed plan favoured an intermediate scheme between a full-time salaried medical service and the present form of insurance medical practice. A central authority, preferably a Ministry, should be established to deal with all civilian, medical and ancillary health services, including general practitioner, hospital and public health services, industrial health services and the medical treatment of pensioners. The policies of the central authority would be carried out by special regional authorities responsible for a population which is considerably larger than that of most of the existing local authorities.

A State scheme of medical service should be provided for all persons whose incomes do not exceed the maximum prescribed as compatible with liability to compulsory insurance (at present £420 per year), i.e., about 90 per cent of the population. Health centres should be established which would be the local headquarters of the general practitioner service and each of which would serve an urban or mixed urban and rural area. Each centre would contain several consulting and waiting rooms, an operating room for minor surgery, a small X-ray department and a pathological room for simple diagnostic investigation. The person entitled to avail himself of the State scheme would choose his doctor from among those working at one of the nearby centres, subject to the doctor's right to reject him. Hospitals should be generally administered in each region by the regional health authority, but this authority would not interfere with the internal organization of the individual hospital.

Industrial Disputes and Conciliation

Introduction

THE *Industrial Disputes and Conciliation* section contains monthly articles dealing with Recent Proceedings under the Industrial Disputes Investigation Act, Conciliation Work of the Department of Labour, and Strikes and Lockouts in Canada, Great Britain and other countries.

Recent Proceedings under the Industrial Disputes Investigation Act.—This article gives an account of all applications for Boards of Conciliation and Investigation, and the disposition of these applications. In cases where Boards are established, the *LABOUR GAZETTE* publishes in due course the full text of their Reports, as submitted to the Minister of Labour.

Since the outbreak of war and the extension of the Industrial Disputes Investigation Act to cover disputes in war industries, the number of applications for Boards of Conciliation and Investigation has greatly increased. In recent months the majority of applications for Boards have been referred to Industrial Disputes Inquiry Commissioners for preliminary investigation, to determine whether the circumstances warrant the establishment of a Board. Reports of Commissioners appointed under the Act are summarized in this article.

Industrial disputes which concern wage demands are now administered by the National War Labour Board.

Conciliation Work of the Department of Labour.—Conciliation proceedings are carried

on by the Department of Labour for the most part under the provisions of the Conciliation and Labour Act which empowers the Minister to inquire into the causes and circumstances of a dispute, to take such steps as seem expedient for the purposes of bringing the parties together, and to appoint a conciliator or an arbitrator when requested by the parties concerned. In some disputes occurring in industries coming directly under the Industrial Disputes Investigation Act, namely, mines and public utilities, and war work, preliminary inquiries and mediation by officers of the Department result in the settlement of the matters in dispute without the necessity of the establishment of Boards of Conciliation and Investigation.

Strikes and Lockouts.—The latest information concerning strikes and lockouts in Canada is published month by month in tabular form, with a summary appearing once a year. The summary of strikes and lockouts in Canada and other countries during 1941 appeared in the *LABOUR GAZETTE* for May, 1942.

The latest available information as to strikes and lockouts in Great Britain and other countries appears from month to month.

Disputes in Steel Industry.—This month the *LABOUR GAZETTE* publishes the majority and minority reports of the Royal Commission appointed in regard to wages in the steel industry. Also published is a statement by the Minister of Labour giving the background of the dispute.

Steel Workers' Industrial Dispute

Statement by Minister of Labour—Decisions of Regional War Labour Boards—Majority and Minority Reports of Royal Commission

IN order that the background of the industrial dispute, affecting steel workers at Sault Ste. Marie, Ontario, and Sydney, Nova Scotia, might be understood, the following statement was issued by the Hon. Humphrey Mitchell, Minister of Labour.

On March 18, 1942, employees of the Algoma Steel Corporation, Ltd., at Sault Ste. Marie, members of the United Steel Workers of America, applied to the Ontario Regional War Labour Board for an increase in basic wages for unskilled labour to 55 cents an hour. On

March 31, 1942, members of the same union employed by the Dominion Steel and Coal Corporation, Ltd., at Sydney, made a similar application to the Nova Scotia Regional War Labour Board.

Order in Council P.C. 5963 of July 10, 1942 (superseding the earlier P.C. 8253) undertakes to stabilize wage rates throughout Canada, with a view to preventing a harmful cycle of price and wage increases which, through their inflationary effect, so increase the cost of living that actually the workers receiving nominal wage increases are worse off by reason of the very increases which they have obtained. This was demonstrated repeatedly during the last war. However, this wage control order provides for an examination into cases where it is claimed that special conditions exist—for example, that the wage rates in a given industry are less than those generally applying in a comparable district to others who are doing the same class of work. For consideration of such cases, some industries come within the purview of the National War Labour Board, others under the jurisdiction of the Regional War Labour Board for the province. In the case of both steel industries referred to, the cases come under the jurisdiction of the Regional Board for the province. Hence, the employees in both cases took the proper action in making their representations to the Regional Boards.

Actions of Regional Boards

After receiving submissions from the union and the employer, the Ontario Regional Board sent a special investigator to Sault Ste. Marie to secure a report on the wage situation. Next, both employer and union were given opportunity to have representatives present further particulars of their cases to the Board. Representations from the union and the Company were in conflict, the union urging an increased rate, with the Company opposing the application.

In Nova Scotia the representations submitted by the employees and by the Company were likewise at variance, the union arguing for, and the Company against, an increase in basic wage rates.

On July 17 the Nova Scotia Regional Board decided to refuse the application of the union on behalf of Sydney employees for increased rates, on the ground that existing rates were at least equal to rates current in the district for similar work.

About August 14 the Ontario Regional Board dealt with the application of the union

at Sault Ste. Marie, by recommending to the employees and the Company that they endeavour to come to agreement on suitable rates for particular classes, and then to present joint applications to the Board.

On August 10 the union, through its representative, asked the Department of Labour to conduct strike votes at both Sault Ste. Marie and Sydney. The union was verbally informed, however, that no legislation existed to warrant such action. It was pointed out that the dispute came under the Wartime Wage Control Order, not under the Industrial Disputes Investigation Act. On August 19 the employees at Sault Ste. Marie took the day off and conducted a strike vote, which resulted in 3,126 in favour of a strike, to 17 against.

Royal Commission Appointed

On August 29 the union requested a conference with the Minister of Labour, in reference to both disputes, and this was held within a couple of days. Immediately following the conference, and after consultation with the Honourable Peter Heenan, Chairman of the Ontario Regional Board, and Honourable L. D. Currie, Chairman of the Nova Scotia Regional Board, I recommended to Cabinet Council that a Royal Commission be appointed, as requested by the union, to investigate both situations.

The Commission was instructed to report as to what wage adjustments, if any, would appear justified under the wage control regulations, in the case of employees of the Algoma Steel Corporation Ltd. at Sault Ste. Marie, Ont., and of the Dominion Steel and Coal Corporation Limited at Sydney, N.S. The employees, members of the United Steel Workers of America, had put forward demands for increases in their basic rates of pay.

The Royal Commission was appointed by Order in Council of September 14, under the Inquiries Act, consisting of the Honourable Mr. Justice Barlow of Toronto, James T. Stewart of St. Thomas and J. King Gordon of Montreal.

The Royal Commission held hearings at Sault Ste. Marie, Toronto and Sydney, and both the union and the management appeared in order to make representations. The Royal Commission held extended hearings, made a lengthy study, and then reported.

A majority report was submitted by the Chairman, Mr. Justice Barlow, and James T. Stewart, while J. King Gordon submitted a minority report.

Majority Report

The majority of the Commission, reporting under date of December 28, 1942, recommended that there be no change in basic wage rates. The majority report states: "We cannot find that the basic wage rates in these two companies are lower than the generally prevailing wage rates with the exception of the wage rates of what are usually termed maintenance men." The majority report does, however, recommend overtime at the rate of time and a half for the seventh day where it is found necessary for employees to work a seven-day week; careful study of job re-classification and evaluation; continuation of management and employee committees; and the Commission majority report recommends against exemption of the steel industry at the two points in question from the wage control regulations.

"From a careful study of these rates which constitute a fair cross-section of the basic wage rates for unskilled labour prevailing throughout Ontario and Nova Scotia, it is quite clear that the basic wage rates for unskilled labour of 50½ cents an hour and 52½ cents (including cost of living bonus) paid by Algoma Steel Corporation Limited and Dominion Steel and Coal Company Limited respectively are not substandard but in fact above the average rates generally prevailing for that class of labour."

In the case of maintenance men, however, the majority report finds that the rates of pay are lower than would appear justified, and it is recommended that the management and the employees enter into negotiations to secure increases through the Regional War Labour Boards.

On behalf of the employees it had been represented to the Commission that the workers in the steel plants should be exempted from

the wage control regulations. The majority report finds that the conditions of the steel industry are not sufficiently different from those in other war industries to warrant this action being taken. On whether steel should be declared "a national industry", so that wage adjustments would be dealt with by the National War Labour Board, and not by the Regional Boards, the majority felt that this subject was beyond their terms of reference.

Minority Report

J. King Gordon, while concurring in other recommendations of the majority, in his minority report states that because of the peculiar arduousness and hazard of the work in the steel plants, and because of exceptionally long hours—conditions which he claims violate the Government labour policy—an increase in the basic wage rate, as requested by the employees, is justified. He recommends that the present basic rates of 50½ cents per hour at Sault Ste. Marie and 52½ cents per hour at Sydney (both including cost of living bonus) should be increased to 55 cents. Mr. Gordon suggests that steel should be declared "a national industry", and that, if necessary, workers in the steel industry should be removed from the field of the wage control regulations in order to secure adjustment of wage rates.

In announcing the report of the Barlow Commission, Mr. Mitchell said that, after conferring with the chairman of the Ontario and Nova Scotia Regional War Labour Boards, he had appointed special representatives to endeavour to bring the company and the union together in each case, in an effort to secure prompt action in carrying out those recommendations of the Commission acceptable to both parties. These special officers are immediately available for this purpose, the Minister said.

Report of the Royal Commission

Following is the text of the report of the Royal Commission appointed to report as to wage rates of employees in Algoma Steel Corporation Limited and Dominion Steel and Coal Corporation Limited, pursuant to Order in Council P.C. 5963, signed by the Honourable Mr. Justice Barlow, Chairman, and Mr. James Stewart, Commissioner, together with a minority report signed by Mr. J. King Gordon, Commissioner.

Majority Report

To: The Honourable Humphrey Mitchell,
Minister of Labour for Canada,
The Honourable Peter Heenan,
Chairman of the Regional War Labour
Board for Ontario,
The Honourable Lauchlin D. Currie, K.C.,
Chairman of the Regional War Labour
Board for Nova Scotia.

By Order in Council P.C. 8267 dated the 14th day of September, 1942, pursuant to the provisions of Section 65 of the Industrial Disputes Investigation Act, a Commission was appointed under the provisions of Part 1 of the Inquiries Act, Chapter 99, Revised Statutes of Canada 1927:

- (a) To enquire into the facts and circumstances of the representations made on behalf of certain employees of the Algoma Steel Corporation Limited, members of Local 2251, United Steel Workers of America, and certain employees of the Dominion Steel and Coal Corporation Limited, members of Local 1064, United Steel Workers of America, to the Regional War Labour Board for Ontario and to the Regional War Labour Board for Nova Scotia, respectively, for increases in basic rates of pay.
- (b) To report to the Minister of Labour and to the Chairmen of the Regional War Labour Boards for Ontario and Nova Scotia as to what adjustments, if any, in the wage rates of the said employees are justified under the terms of Order in Council P.C. 5963 dated the 10th day of July, 1942.

Your Commission has inspected the plants of Algoma Steel Corporation Limited and Dominion Steel and Coal Corporation Limited and has taken *viva voce* evidence at the City

9½c	increase	for all employees receiving 75c or less
8 c	"	" " " " from 75½c to 85c
7½c	"	" " " " " 86c to 95c
7 c	"	" " " " " 96c to \$1.05
6½c	"	" " " " " \$1.06 to \$1.15
6 c	"	" " " " " \$1.16 to \$1.25
5½c	"	" " " " " \$1.26 to \$1.35
5 c	"	" " " " " \$1.36 to \$1.45
4 c	"	" " " " " over \$1.45.

of Sault Ste. Marie, in the Province of Ontario, at the City of Sydney, in the Province of Nova Scotia, and at the City of Toronto, in the Province of Ontario. Some sixty-six exhibits were filed, also briefs by the United

The employees of Dominion Steel and Coal Corporation Limited, who are members of Local 1064 United Steel Workers of America, have presented to us an application for an increase in hourly wage rates as follows:

11½c	increase	for all employees receiving 50c or less
11 c	"	" " " " " from 50½c to 60c
10 c	"	" " " " " 60½c to 70c
9c	"	" " " " " 70½c to 80c
8c	"	" " " " " more than 80c.

Steel Workers of America on behalf of the employees and by both steel companies. Pursuant to the Order in Council under which your Commission was appointed, your Commission has conferred with the Minister of Labour for Canada, the Chairman of the Regional War Labour Board for Ontario and the Chairman of the Regional War Labour Board for Nova Scotia.

On the 18th day of March, 1942, certain employees of Algoma Steel Corporation Limited, members of Local 2251, United Steel Workers of America, made an application to the Regional War Labour Board for Ontario for an increase in the basic wage rate for unskilled labour to 55 cents per hour (Exhibit 4). This application, after having been duly considered by the Regional War Labour Board for Ontario, was refused on the 14th day of August, 1942 (Exhibit 8).

On the 31st day of March, 1942, certain employees of Dominion Steel and Coal Corporation Limited, members of Local 1064 United Steel Workers of America, made an application to the Regional War Labour Board for Nova Scotia for an increase in the basic wage rate for unskilled labour to 55 cents per hour. This application, after having been duly considered by the Regional War Labour Board for Nova Scotia, was refused on the 17th day of July, 1942.

Following the refusal of the applications to the Regional War Labour Boards for Ontario and Nova Scotia certain representations were made to the Minister of Labour for Canada and this Commission was appointed.

The employees of Algoma Steel Corporation Limited, who are members of Local 2251, United Steel Workers of America, have presented to us an application for an increase in hourly wage rates as follows:

The employees of Algoma Steel Corporation Limited on the basic wage rate for unskilled labour are now receiving 50½c per hour made up of a basic wage rate of 45½c and a cost of living bonus of 5c per hour. The following is a summary of the basic wage rate for unskilled labour at Algoma Steel Corporation Limited for 1914 to date showing the high and the low years during the period:

September	1914	16 c
June	1918	30 c
November	1918	35 c
April	1920	42½c
January	1921	35 c
June	1923	36½c
November	1931	33 c
April	1934	30 c
July	1935	33 c
March	1937	37½c
January	1938	41½c
September	1938	37½c
January	1939	41½c
August	1940	43½c
December	1940	45½c

For more particulars see Exhibit 14.

It is to be noted that the present rate is the highest basic wage rate for unskilled labour paid during the entire period and probably the highest in the company's history without taking into account the cost of living bonus.

The employees of the Dominion Steel and Coal Corporation on the basic wage rate for unskilled labour are now receiving 52½c per hour made up of a basic wage rate of 43½c and a cost of living bonus of 9c. The following is a summary of the basic wage rates for unskilled labour at Dominion Steel and Coal Corporation Limited from 1914 to date showing the high and low years during the period:

.....	1916	14 c
January	1920	34 c
May	1920	28 c
November	1921	24½c
July	1929	36 c
June	1932	28 c
April	1932	40½c
July	1937	43½c

(which is the present rate).

For more particulars see Exhibit 29.

The evidence shows that the present rate is the highest basic wage rate for unskilled labour in the company's history without taking into account the cost of living bonus.

We have been asked to report as to what adjustments, if any, in the wage rates are justified under the terms of Order in Council P.C. 5963 above mentioned.

After a careful perusal of Order in Council P.C. 5963, and particularly the sections of the said Order in Council dealing with wage rates, it is clear that the purpose is to prevent a general increase in basic wage rates. Any increase in the cost of living is taken care of by the cost of living bonus which is increased or decreased as the cost of living index rises or falls. It is, however, flexible in that it provides for a levelling up of wages in any industry where it is found that the wage rates paid for a job, position or occupational classification are lower than the wage rates generally prevailing in a similar or substan-

tially similar job, position or occupational classification in the locality or in a locality which in the opinion of the Board is comparable (Section 25 of the Order in Council). It does not mean that wage rates shall be raised to that of the highest wage rate paid in the locality for the same or a substantially similar job. The measure to be used is the wage rate generally prevailing in the locality or in a locality found by the Board to be comparable. The words "generally prevailing" in our opinion mean the wage rate in a particular job, position or occupational classification which it is found is being paid generally by employers of the particular type of labour.

ALGOMA STEEL CORPORATION LIMITED

If we find that the basic wage rate for unskilled labour of 45½c paid by Algoma Steel Corporation Limited is lower than the generally prevailing basic wage rate for unskilled labour paid for similar or substantially similar jobs at Sault Ste. Marie, then it should be raised to whatever is the generally prevailing basic wage rate for unskilled labour. We have carefully investigated the basic wage rates for unskilled labour at Sault Ste. Marie and cannot find that the prevailing rate is higher than the rate paid by Algoma Steel Corporation Limited. Evidence has been presented to show that the lowest rate paid by Abitibi Pulp and Paper Company is 56c and it is contended that this is the basic wage rate for unskilled labour. While it is the lowest wage rate paid by Abitibi Pulp and Paper Company, it is the rate paid not only to unskilled labour but also to semi-skilled and some skilled employees. About 41 per cent of all the employees are on this rate. We, therefore, are of the opinion that it cannot be said to be a rate of wages paid for similar or substantially similar jobs to those for which Algoma Steel Corporation Limited pays 45½c.

DOMINION STEEL AND COAL CORPORATION LIMITED

Applying the same measure to the basic rate for unskilled labour paid by Dominion Steel and Coal Corporation Limited, we are unable to find any generally prevailing wage rate for unskilled labour at Sydney, Nova Scotia, higher than the rate of 43½c paid by Dominion Steel and Coal Corporation Limited. In fact the evidence before us is to the effect that other employers at Sydney have raised their basic wage rate for unskilled labour to equal that paid by Dominion Steel and Coal Corporation Limited.

GENERALLY PREVAILING WAGE RATES

In addition to considering the particular application of Section 25 of Order in Council

P.C. 5963, we have given consideration to wage rates generally prevailing in Canada, and more especially to wage rates for unskilled labour. Mr. E. B. Jolliffe, counsel for the Union, in his examination of Mr. Eugene Forsey, Director of Research for the Canadian Congress of Labour, filed as Exhibit 58 a supplement to the LABOUR GAZETTE entitled *Wages and Hours of Labour in Canada 1929-1940-1941*. This publication contains a survey of wage rates and hours of labour paid in industries in various cities throughout the whole of Canada. In view of the fact that we are dealing primarily with basic wage rates for unskilled labour, we have confined ourselves to these labour rates. The names of the industries are not given, numbers having been substituted for the companies. The rates quoted are taken from the 1941 column and *include cost of living bonus*. No rates are given for Sydney, Nova Scotia. We have, therefore, taken Halifax and New Glasgow. In Halifax out of eight companies six paid a rate of 43 cents or less with a low of 37 cents, one paid 48 cents and one a range from 47 cents to 52 cents. In New Glasgow five companies show a low labour rate of 34 cents and a high of 45 cents. We do not find any rate for Sault Ste. Marie.

Under the various industries we find the following basic wage rates for unskilled labour at page 114. The pulp and paper industry shows 29 companies out of 41 with basic wage rates for unskilled labour ranging from a low of 25 cents to a high of 50 cents; 4 with rates from 51 cents to 55 cents; and 7 from 56 cents to 62 cents. At page 116 under manufacture of sash, doors, etc., 44 companies out of 46 show basic wage rates for unskilled labour from 25 cents to 45 cents and 2 companies with a 50 cent rate. At page 118 furniture manufacturing shows 23 out of 25 companies with a basic wage rate for unskilled labour from 25 cents to 50 cents. At page 120 crude, rolled and forged products show basic wage rates for unskilled labour in 14 companies out of 21 of from 30 cents to 50 cents. Page 122 foundry and machine shop products show basic wage rates for unskilled labour in 41 companies out of 47 of from 25 cents to 50 cents. At page 124 a continuation of foundry and machine shop products shows 14 companies out of 19 with a basic wage rate for unskilled labour of from 30 cents to 48 cents. At page 127 under manufacture of machinery 27 companies out of 31 show basic wage rates for unskilled labour ranging from 33 cents to 50 cents with 21 of the companies under 45 cents. At page 130 under manufacture of agricultural implements 13 out of 14 show basic wage rates for unskilled labour of from 30 cents to 49 cents with one with a range from 37 cents to 53 cents, ten of

the companies paying 45 cents or less. Page 133 under manufacture of steel products 12 companies out of 18 show a basic wage rate for unskilled labour of from 37 cents to 50 cents. Pages 16 and 17 of Exhibit 58 under building trades the basic wage rate for unskilled labour at Sydney, Nova Scotia, is shown from 35 cents to 40 cents and at Halifax from 35 cents to 40 cents. At Port Arthur 40 cents to 45 cents. At Fort William 40 cents to 45 cents. No figures are given for Sault Ste. Marie.

From a careful study of these rates which constitute a fair cross-section of the basic wage rates for unskilled labour prevailing throughout Ontario and Nova Scotia, it is quite clear that the basic wage rates for unskilled labour of 50½ cents an hour and 52½ cents (including cost of living bonus) paid by Algoma Steel Corporation Limited and Dominion Steel and Coal Corporation Limited respectively are not substandard but in fact above the average rates generally prevailing for that class of labour.

Evidence was presented showing that the lowest wage rate paid by General Motors Corporation at the City of Oshawa is 62 cents an hour, and it is contended that we should find that Oshawa is a locality which in our opinion should be found to be comparable to Sault Ste. Marie, Ontario, and Sydney, Nova Scotia. We are unable to come to this conclusion for the following reasons:

- (1) Oshawa is a locality built up around General Motors Corporation, an industry which operates on the assembly line principle. Throughout a period of years the seasonal character of this industry with the frequent lay-offs for long periods of time has created a wage structure that is in no way comparable to the steel industry.
- (2) The evidence before us shows that there are two principal centres of the motor car industry in Ontario, namely Oshawa and Windsor. The wages in this industry have been largely affected by the wages paid in the plants at Windsor which are contiguous to the City of Detroit and affected by the ebb and flow of labour between Windsor and Detroit.
- (3) The wages paid in these plants are affected by the wages paid in the parent companies in the United States of America.
- (4) Oshawa is within forty miles of Toronto, and considering the metropolitan developments in and around Toronto it is in no sense a locality comparable to Sydney or Sault Ste. Marie.
- (5) Except for some general labour, the basic wage rate paid in the motor in-

dustry are for quite different jobs, positions and occupational classifications than those found in the steel industry.

BASIC WAGE RATES FOR JOBS, POSITIONS OR OCCUPATIONAL CLASSIFICATIONS OTHER THAN UNSKILLED LABOUR

We have considered carefully all the basic wage rates paid for the various jobs, positions and occupational classifications other than unskilled labour of the employees of both companies. Rates for such occupational groups are fixed either on an hourly, daily or production basis, and in some cases on a minimum hourly rate with a production bonus. The monthly earnings of employees of Algoma Steel Corporation Limited working for a normal month of twenty-six days are shown in Exhibit 10. The weekly earnings of the employees of Dominion Steel and Coal Corporation Limited are shown in Exhibit 33. We cannot find that the basic wage rates in these two companies are lower than the generally prevailing wage rates with the exception of the wage rates of what are usually termed maintenance men. For the purpose of maintaining the plants there are a considerable number of employees known as maintenance men. These employees, such as pipe fitters, steam fitters, millwrights, electricians and carpenters, are in many instances skilled tradesmen or journeymen. Where such tradesmen are found working on a construction job their wage rates are very considerably higher than the wage rates paid to the same skilled employees who are working in the steel plants as maintenance men. It is true that the higher wage rates prevailing for these skilled employees on construction work arises from the fact that such employment is seasonal and dependent on the life of the particular contract on which they are employed while the maintenance men in the steel plants receive steady employment. This is a factor to which full consideration must be given. Consideration should also be given to the difference between fully skilled journeymen and an employee who is only skilled as to certain operations in a trade. We are of the opinion that the spread between the wage rates received by maintenance men who are fully skilled or semi-skilled tradesmen and what may be called the seasonal wage rate paid on construction work is too great and that a more equitable wage rate should be established, which will bring the wage rate paid to such maintenance men in line with rates generally prevailing for skilled and semi-skilled maintenance men. We have made a careful study of the evidence and the exhibits with a view to making a definite finding fixing a definite increase, but unfortunately the evidence submitted is not sufficient

to enable us to arrive at a decision. It would appear that a range of wages should be fixed for the semi-skilled tradesmen and a wage rate for the skilled tradesmen. We, therefore, recommend that the management and the employees enter into negotiations and that an application for an increase be made to the Regional War Labour Boards in the light of the above findings supported by complete information as to such wage rates.

COST OF LIVING BONUS

We have considered carefully the cost of living bonus presently being paid at Algoma Steel Corporation Limited and at Dominion Steel and Coal Corporation Limited and find that both companies are complying with Order in Council P.C. 5963 and that the full cost of living bonus in compliance with the said Order in Council is being paid.

TIME AND A HALF FOR THE SEVENTH DAY

The evidence discloses that both plants operate on a continuous process with the result that certain employees work seven days a week. The management of both companies express the opinion that every employee should have at least one day off in seven. This, however, by reason of the shortage in man-power is not possible at the present time. In that part of both plants which operates on a six day week time and a half is paid to all employees who are for any reason required to work on Sunday. This, however, does not apply to employees in the continuous process departments. We are of the opinion that it is only just and equitable that the same practice should apply to the employees in the continuous process. We, therefore, recommend that employees who work more than six days of eight hours each in any one week be paid time and a half for the seventh day.

JOB CLASSIFICATION AND JOB EVALUATION

We have heard considerable evidence with reference to job classification and job evaluation. This is a matter which requires very careful consideration and extensive study by experts. It is contended that in the two companies under consideration there are inequities as between employees in different parts of the plant who are performing jobs of the same or substantially similar value. It is also contended that there is not a sufficient spread or differential between the different jobs. We have not had the evidence, the time, or the opportunity, nor do we consider ourselves competent to form an opinion let alone attempt a reclassification or an evaluation of jobs. We are, however, of the opinion

that it is a matter which should be given careful consideration. Whether it should be proceeded with now or at the close of the present war, is a matter upon which we decline to express an opinion.

MANAGEMENT-EMPLOYEE CO-OPERATION

We strongly recommend the continuation and development of management-union-employee committees within the different departments of the industry.

STEEL A NATIONAL INDUSTRY

We have been asked to declare steel a national industry. It is our opinion that this is beyond the terms of our reference. We are asked to report as to what adjustments, if any, in the wage rates of the employees of the two corporations in question are justified under the terms of Order in Council P.C. 5963. We are unable to see how the question as to whether or not steel shall be declared a national industry can be imported into a reference requiring a report on wage adjustments. Furthermore, our reference is in the nature of a review of the decisions of the Regional War Labour Board for Ontario and the Regional War Labour Board for Nova Scotia, neither of which Boards has any power to deal with the question whether or not steel shall be declared a national industry. It is, in our opinion, a matter for the National War Labour Board under the terms of Order in Council P.C. 5963.

SHOULD SECTION 14 OF ORDER IN COUNCIL P.C. 5963 BE APPLIED?

Section 14 of Order in Council P.C. 5963 is as follows:

14. (1) The National Board may by order exclude from any of the provisions of this Order, in whole or in part, any employer or employee, or any class of employers or employees or employers and employees in any area designated by such Board, if in the opinion of the National Board it is impracticable to administer such provisions in respect thereof, or in any other case, if, in the opinion of the National Board, it is in the public interest so to do and if the Wartime Prices and Trade Board concur.

(2) No order shall be made under this Section by a Regional Board.

This section gives extraordinary powers and any ruling under it must have the concurrence of the Wartime Prices and Trade Board. Unless it can be shown that the two steel companies which are before us on this reference fall into the category of a very special case, these extraordinary powers ought not to be exercised. It is contended that the case of logging wage rates in the Queen Charlotte Islands off the northern coast of British

Columbia where wage rates were very considerably raised in order to obtain aeroplane spruce for the war effort is a precedent. We cannot agree. The steel companies in question are only two of many companies in industries which are equally important to the war effort and all of which come within the powers of the various sections of Order in Council P.C. 5963. It would be manifestly unfair to the other companies and industries if an attempt were made to exercise extraordinary powers under this Section 14 in so far as these two steel companies are concerned.

CONCLUSION

We, therefore, recommend with respect to both Algoma Steel Corporation Limited and Dominion Steel and Coal Corporation Limited:

1. That the management and the maintenance men enter into negotiations and that an application be made to the Regional War Labour Boards of the respective provinces for such increased wage rates or range of wage rates with respect to such maintenance men as pipe fitters, steam fitters, millwrights, electricians and carpenters as will bring their wage rates on a level with prevailing wage rates paid to maintenance men in such classifications.

2. That time and a half be paid for the seventh day to any employee working seven days in any one week.

3. That arrangements be made for the making of a careful study having in view a reclassification and an evaluation of jobs.

4. That management-union-employee committees be appointed in the different departments of each company.

Further than this we are of the opinion that it has not been shown that further adjustments of the wage rates of the employees involved are justified under the terms of Order in Council P.C. 5963 dated the 10th day of July, 1942.

APPRECIATION

We wish to thank Mr. J. C. McRuer, K.C., counsel for the Commission, for the courteous and impartial manner in which he has assisted in obtaining from the management and the employees all available material. We were much impressed with the painstaking and careful presentation of facts and exhibits made by Mr. E. B. Jolliffe, counsel for the Union, all of which was most helpful and much appreciated. We also wish to express our appreciation of the courtesy and assistance given us by Mr. E. G. McMillan, K.C., counsel for Algoma Steel Corporation Limited, and Mr. John MacNeil, K.C., counsel for Dominion Steel and Coal Corporation Limited.

All of which is respectfully submitted by the two undersigned Commissioners.

Dated at Toronto this 28th day of December, 1942.

(Sgd.) F. H. Barlow,
Chairman

(Sgd.) Jas. T. Stewart,
Commissioner

Minority Report

Steel is Canada's basic war industry. Upon it other great war industries depend—the industries that use steel for ships, guns and tanks. The maximum production of steel is a matter of national importance. For this reason, the members of the Royal Commission appointed as a result of a major crisis in the steel industry have carried a grave responsibility. A unanimous concurrence in the Commission's recommendations which might be of assistance to the Government in meeting the crisis was greatly to be desired. In certain positive recommendations unanimous agreement has been arrived at. These points of agreement will be mentioned later. Unfortunately, on some of the most important issues faced, this Commissioner has found it impossible to concur in the findings of his colleagues.

This Commissioner has been of the firm opinion that the broad purpose of the Commission, appointed pursuant to the provisions of Section 65 of the Industrial Disputes Investigation Act, and under Part I of the Inquiries Act, was to furnish the Government with recommendations which might be of assistance in bringing about a stable settlement in this important war industry. He believed that, in arriving at an opinion, full cognizance had to be taken of the Government's declared Labour Policy. He also believed that, in the interpretation of any single Order in Council, full consideration had to be given to the total war policy of the Government as outlined in the numerous Orders in Council issued from time to time to meet the constantly developing war needs.

These considerations have had an important bearing on two main points of disagreement between members of the Commission: the request of the steelworkers for an adjustment in the basic rates of pay, and their request that the steel industry be named a "national employer" under the terms of Order in Council P.C. 5963. In regard to the request for a wage adjustment, the majority felt that it was not justified under the terms of Order in Council P.C. 5963. This Commissioner feels that such a decision represents a strictly legalistic interpretation of the Order and leaves out of account important factors which came to light in the course of the hearings.

These factors, as will be shown later, have a relation to the declared labour policy of the Government and to the most efficient prosecution of the war effort. If Order in Council P.C. 5963 is seen in the full context of the Government's war policy, it is this Commissioner's firm belief that the request of the steelworkers for an increase in their basic wage rates is not only justified but actually required.

The request that steel be named a national employer is closely related to the request for adjustment in wage rates. For the granting of such a request would remove steel from a purely regional category and bring it under the jurisdiction of the National War Labour Board. This Commissioner is of the opinion, in the light of all the evidence presented, that a recommendation to name steel as a national employer and place it alongside of such industries as mining and shipbuilding falls within the Commission's terms of reference. If such a course of action were followed it would assist greatly in the stabilization of the entire steel industry.

THE CRISIS IN STEEL

The Royal Commission came into being in the midst of a major crisis in the basic steel industry in Canada. The employees of the Algoma Steel Corporation in Sault Ste. Marie, organized as Local 2251 of the United Steelworkers of America, had made certain representations to the Minister of Labour requesting a raise of their basic rates of pay and certain other adjustments in November, 1941. A similar request had come from the employees of the Dominion Steel and Coal Corporation of Sydney, Nova Scotia, organized in Local 1064 of the United Steelworkers of America. At the time of the original requests, the National War Labour Board was in process of organization. The steelworkers were asked to make their representations to the Regional War Labour Boards of Ontario and Nova Scotia respectively.

The representations of the Union came before the Regional Boards in March, 1942. Hearings and deliberations occupied several months and the findings of the Boards were handed down in August. The Boards decided that under Order in Council P.C. 5963 and within the terms of their jurisdiction the request for an increase in the basic wage rate could not be granted. Restlessness and dissatisfaction had increased among the steelworkers during the summer and, as a result of the Regional Boards' decisions, a work stoppage was threatened. In the face of such a menacing situation, representatives of both locals appealed to the Minister of Labour to have a

thorough investigation instituted. The Minister responded by recommending the appointment of a Royal Commission pursuant to the provisions of Section 65 of the Industrial Disputes Investigation Act, under Part I of the Inquiries Act.

The Commission, therefore, arose as the result of a major industrial crisis in probably the most essential of the nation's war industries. It was set up because of the failure of the Regional Boards to effect a settlement on a regional basis. It must be assumed that the main purpose in naming the Royal Commission was to discover, if possible, a way out of the crisis and the means of bringing into the basic steel industry that stability which would ensure the continuous, and indeed, the maximum production of steel for war.

WHAT THE COMMISSION WAS ASKED TO DO

The instructions given to the Commission are contained in Order in Council P.C. 8267. After reviewing the history of the case, the Minister of Labour stated that it seemed expedient "that an inquiry be made into all matters and circumstances" in connection with the applications made by the two steelworkers locals. He, therefore, recommended:

That, pursuant to the provisions of Section 65 of the Industrial Disputes Investigation Act, a Commission be appointed under the provisions of Part I of the Inquiries Act, Chap. 99, Revised Statutes of Canada, 1927,

(a) to inquire into the facts and circumstances of the representations made on behalf of the aforementioned employees,

(b) to confer with the Minister of Labour for Canada and Chairman of the National War Labour Board, and with the Chairman of the Regional War Labour Board for Ontario and with the Chairman of the Regional War Labour Board for Nova Scotia, and

(c) to report to the Minister of Labour and to the Chairman of the Regional War Labour Boards for Ontario and Nova Scotia as to what adjustments, if any, in the wage rates of the aforesaid employees are justified under the terms of Order in Council P.C. 5963, dated July 10, 1942.

It should be noted in the first place that the Commission is appointed under an Act of Parliament which provides that "where, in any industry, any strike or lockout has occurred, or seems likely to be imminent, and in the public interest or for any other reason it seems to the Minister expedient" the Minister of Labour may recommend that a Commission be appointed. The purpose of the Commission under the Act is therefore to discover a settlement where none could be arrived at through the normal processes of collective bargaining or negotiation. Its purpose, in the immediate issue, was not primarily to review the findings of the Regional Boards. It was not primarily to give a legal-

istic interpretation of the Order in Council later referred to. Its function was primarily one of investigation and, as a result of thorough investigation, to bring in recommendations that would be of assistance to the Government in finding a solution of an acute problem.

In the second place, it should be noted that the Commission was given instructions to inquire into all the facts and circumstances of the representations made on behalf of the steelworkers. No evidence could be excluded which might have any bearing on the situation in any of its aspects. It must be recalled at this point that not only are the Regional Boards limited in their jurisdiction but that most of their hearings are held in secret. In the case of the Commission, hearings are in public, and the fullest opportunity is given for presenting evidence and hearing argument on the main issue from all sides.

In the third place, it must be noted that special reference is made to Order in Council P.C. 5963—the Wartime Wages Control Order. The Commission is instructed to report what adjustments, if any, can be made within the terms of this Order. It is clear that some study of Order in Council P.C. 5963 is required to determine how broad or how narrow is the frame of reference within which the Commission was to operate in making its recommendations. The succeeding paragraphs will be devoted to such an examination. Here it must be pointed out that the whole of Order in Council P.C. 5963 is referred to, not just one section. Moreover, as has been indicated above, any Government Order in Council must be studied in the broad context of the whole scheme of Orders in Council which, taken together, spell out the Government's war policy.

ORDER IN COUNCIL P.C. 5963

At the outbreak of war, it was deemed necessary to assign to the Government extraordinary powers which, in time of peace, are reserved for Parliament. Few will question the necessity of this drastic step. The Government has exercised these powers through Orders in Council designed to further the maximum war effort of the Canadian people. They contain in outline the Government's policy in mobilizing Canada's fighting forces, in organizing Canada's industrial war effort, in controlling Canada's wartime economy so as to meet civilian needs and avoid inflation, and in providing machinery to settle industrial disputes which might lead to an interruption in Canada's maximum war effort.

The Government's war policy has been flexible and not rigid. It has undergone modification and change as immediate needs and objectives changed and as new conditions

arose. For example, the Government's wage control policy, first outlined in Order in Council P.C. 7440, December 16, 1940, underwent no less than seven changes before it emerged in its present form as Order in Council P.C. 5963, July 10, 1942. Moreover, the Government's war policy cannot be blocked off in watertight compartments. Since the promulgation of Order in Council P.C. 5963 important revisions have been made in the Government's manpower policy. Doctor Bryce Stewart, then Deputy Minister of Labour, in reviewing the Government's wage and manpower controls before the American Management Association in New York on October 5, 1942, said: "Controls of wage rates and manpower are two important units in a wartime economic policy. There must be adequate co-ordination between all agencies properly concerned with the development and administration of such a policy. Close relationships between wage and manpower controls is especially necessary." No Order, then, must be seen by itself but in the total context of the war policy of the Government.

The broad intent of Order in Council P.C. 5963 is to stabilize wages at the rate paid on November 15, 1942 (Sections 18, 19). This stabilization was not designed to be completely rigid. In a speech before the National Convention of the Canadian Congress of Labour, September 14, 1942, the Hon. Humphrey Mitchell, Minister of Labour, said: "Too often our policy is spoken of as wage freezing. Wages are not frozen. You know as well as I do that there is power to adjust wages given to the National and Regional Boards. A great many adjustments have been made. It is our aim to remove anomalies, to eradicate injustices." The adjustments provided for have to do with basic wage rates, with the reclassification of wage rates, with the conversion of wage rates and with the cost of living bonus. While the whole order is deserving of study, three Sections are of particular importance in emphasizing the Minister's contention that the Government's policy is "to remove injustices, to eradicate anomalies":

Section 25: If the National Board finds that a range of wage rates or a single wage rate forming part of a basic scale of wage rates paid by an employer on November 15, 1941, is low as compared with the ranges of wage rates or single wage rates, respectively, generally prevailing for the same or substantially similar jobs, positions or occupational classifications in the locality or in a locality which, in the opinion of the Board, is comparable, it may direct such increased range of wage rates or single wage rate to be paid as it finds fair and reasonable, having regard to all the circumstances deemed by it, in its discretion, to be material.

This section describes the normal basis of adjustment. It must be noted that the Na-

tional Board (or the Regional Board as the case may be), is given wide discretionary power. It has the power to decide (a) what is the same or a substantially similar job, position, or occupational classification; (b) what is the prevailing rate of wages for such a job in the same locality; (c) what is a comparable locality; (d) what is the prevailing rate of wages for the same or substantially similar jobs in a comparable locality; (e) what is a fair and reasonable wage rate; (f) what circumstances may be deemed material. It is quite clear that, even taken by itself, this Section admits of no narrow, legalistic interpretation. The Section gives the Board wide discretionary powers and trusts to the Board's good sense.

Section 4 (2): The National Board shall, as directed by the Minister of Labour, investigate wage conditions and labour relations in Canada and shall from time to time make such recommendations as it may deem necessary therewith, having regard to the principles enunciated in Order in Council P.C. 2685 of the 19th June, 1940.

In this Section the National Board is assigned wide powers of investigation in addition to its powers of interpretation and administration. Specifically, attention is called to the Government's war labour policy as set forth in Order in Council P.C. 2685, which outlines "certain principles for the regulation of labour conditions during the war, the acceptance of which by employers and workpeople would make for the avoidance of industrial strife and the utmost acceleration possible in the production which is so essential in the present circumstances." Among other things, it recommends that "fair and reasonable standards of wages and other conditions should be observed, that there should be no undue extension of hours but where necessary a shift system should be adopted, that every precaution should be taken to ensure safe and healthful conditions, that the right of workmen to organize and bargain collectively should be recognized and disputes settled by negotiation or with the assistance of Government conciliation services or under provisions of the Industrial Disputes Investigation Act, and that collective agreements should provide machinery for adjusting grievances."

These principles require little elaboration. The Government has declared that they should be carried out in practice and has made specific reference to them in Order in Council P.C. 5963 under the terms of which this Commission has been instructed to bring in its recommendations. Moreover, it is important to note that, with practical realism, the Government has linked together "the avoidance of industrial strife and the utmost

acceleration possible in the production that is so essential in the present circumstances." It is unthinkable that the decisions of any Board administering P.C. 5963 should neglect or in any way transgress these principles.

Section 14 (1): The National Board may by order exclude from any of the provisions of this Order, in whole or in part, any employer or employee, or any class of employers or employees, or employers and employees in any area designated by the Board, if, in the opinion of the National Board, it is impracticable to administer such provisions in respect thereof, or in any other case, if, in the opinion of the National Board, it is in the public interest so to do and if the Wartime Prices and Trade Board concurs.

(2) No order shall be made under this Section by a Regional Board.

This Section sets forth the extraordinary powers granted to the National War Labour Board under Order in Council P.C. 5963. With the concurrence of the Wartime Prices and Trade Board, if the provisions of the Order seem impracticable in a particular case or in any other case, if the public interest demands it, the National Board may set aside the provisions of the Order in the case of any employers or employees. Very clearly these are exceptional powers. But it must be noted that in the formulation of its wage policy the Government contemplated special situations arising where even the wide latitude of the Order would not permit of a satisfactory solution. In so many words Section 14 states that under no consideration must an Order, designed to control one aspect of the War Economy, be allowed to operate to the jeopardy of the public interest. For the Order is a wartime Order, and the public interest is the maximum war effort and all that contributes to it.

These are three important sections of Order in Council P.C. 5963, under the terms of which the Commission was instructed to bring in its recommendations. They indicate how wide is the scope of the Commission both in determining what evidence is relevant and in arriving at its findings. It is to be assumed that members of the Commission, being responsible individuals, will pay due regard to the underlying purpose of Order in Council P.C. 5963. But it is also to be assumed that the Commission has a larger responsibility to Canada's maximum war effort and will let no narrow interpretation of an Order in Council leave any injustice unredressed or the war effort in any way endangered.

WHAT THE STEELWORKERS REQUESTED

The representations made before the Regional War Labour Boards of Ontario and Nova Scotia by the Algoma and Sydney locals of the United Steelworkers of America con-

tained certain specific requests. These were amplified and supported by evidence and argument in the case laid before the Commission. The first and most important of the requests was that a national basic wage rate of 55 cents an hour be set in the Canadian steel industry. It was further asked that increases granted in bringing the basic rate to this level be made retroactive to the date on which the Union's applications were made to the Regional Boards in March, 1942. The second main request was that steel be named a national employer and so brought under the jurisdiction of the National War Labour Board. Other requests had to do with conditions of work, with the problem of job classification, with the standardization of the cost-of-living bonus between the two steel plants concerned, with measures that might be taken to improve union-management relations in the interests of greater production of steel and with other measures that might be taken to expedite the settlement of grievances and disputes.

On certain of the Union's requests, members of the Commission reached complete agreement. They will be referred to in the majority report. There was complete agreement in the recommendation that time and a half should be paid for overtime for the seventh day beyond the continuous six-day week of forty-eight hours. This is supported by practice in other industries and appears to be particularly called for in an industry where the work is arduous and where the hours are abnormally long. There was agreement that the Commission should recommend that a study be conducted in both plants which would lead to a more equitable and scientific classification of jobs. Such a study was clearly not within the province of the Commission itself but could best be carried out by committees representative of the Union and the management of each plant respectively. It was further agreed to recommend that Union-management co-operation, which has proven so beneficial in Sault Ste. Marie and which has been begun in Sydney be actively promoted in the interest of higher industrial efficiency. Attention was called to the need for the improvement in sanitary facilities and safety arrangements, particularly in the Sydney plant and it was felt that reference to these conditions should be included in the report.

The request of the Union that cost of living bonuses be standardized as between the two plants under consideration raises one or two interesting points. At present, the workers in Sydney are paid the full cost of living bonus of \$4.25 a week or about 9 cents an hour for a 48 hour week. The Algoma steelworkers on the other hand receive a weekly bonus of

\$2.53, or about 5 cents an hour. The reason for this differential is that after August 1939 and before November 15, 1942, the Algoma workers received a wage increase of 4 cents in their basic rate. The Order in Council P.C. 5963 appears to require that the cost of living bonus be counted from the date of the last wage increase after August, 1939. In spite of this apparent justification of the existing situation, there is the curious anomaly that a steelworker on the base rate of 43½ cents an hour in Sydney earns more for the same amount of work than the worker on the Algoma base rate of 45½ cents an hour. There was no indication in evidence that costs of living in Sydney were higher than in Sault Ste. Marie, in fact, workers in the Algoma plant are now faced with the necessity of purchasing coal at \$15 a ton this winter whereas previously it was possible for them to purchase coke at \$7 a ton. It is perhaps fair to relate this request to that for a standardized national basic labour rate of 55 cents an hour. It would appear equitable, that, if the request for the adjustment of the basic labour rate to 55 cents an hour were justified under the terms of Order in Council P.C. 5963, cost of living bonuses should be equalized so that a steelworker in Algoma earns as much as a steelworker in Sydney for the same work.

We pass, then, to a consideration of the Union's request for a national basic labour rate of 55 cents an hour which in this Commissioner's opinion, is not only justified but actually required under the terms of Order in Council P.C. 5963.

A NATIONAL BASIC WAGE OF 55 CENTS AN HOUR

The central issue in the case before the Commission was the question of the adjustment of the basic wage rate to 55 cents an hour. In the words of the Union's brief: "As a primary cause of unrest in the steel industry in this country we find first the substandard basic rate." At present, the rate in Algoma is 45½ cents an hour plus a cost of living bonus of \$2.53 a week. The Sydney rate is 43½ cents an hour, with a full cost of living bonus of \$4.25 a week.

Under Section 25 of Order in Council P.C. 5963 comparison is to be made with prevailing rates for the same or substantially similar jobs, positions, or occupational classifications in the locality or a comparable locality. The Commission encountered their first difficulty in attempting to discover what might be described as the same or substantially similar jobs. The only major manufacturing industries on which witnesses gave first hand evidence were the Abitibi Pulp and Paper Corporation in Sault Ste. Marie and the General Motors Corporation in Oshawa, Ont., which, in the opinion of the Union, might be judged a comparable locality.

Abitibi Pulp and Paper Corporation has a basic labour rate of 56 cents an hour. Beginners' rates for papermakers in the same corporation range from 68 cents to 71 cents an hour. The basic labour rate in General Motors in Oshawa is 62 cents an hour. The operational rate for assembly work in the lower semi-skilled category is 74 cents an hour with an incentive bonus which normally raises the rate to about a dollar an hour. The rates paid for maintenance work are proportionately high in both plants. It is interesting, and relevant, to note that the automobile industry is classed with steel as an "A" priority industry for purposes of labour allocations. In fact, the automobile industry, where the rates are so much higher, is dependent on the steel industry for much of the material that goes into trucks, tanks and armoured cars. The paper industry, on the other hand, where the rates are also higher, is in a "C" category.

Other labour rates in Sault Ste. Marie approximated the steel plant rates. These included rates for labour on the highways, rates of municipal workers, and rates for railway sectionmen and railway shopworkers. In Sydney it was quite apparent that the predominant character of the steel industry determined other labour rates. No establishment of comparable size exists in the locality. Rates compared were for a small woodworking establishment, for construction labour, for municipal labour, and for railway labour.

A strictly legalistic line of reasoning might arrive at the conclusion that the prevailing labour rate in Sault Ste. Marie and Sydney is such that no increase is justified under the terms of Section 25 of Order in Council P.C. 5963. The majority of the Commission has arrived at this decision. But such a line of reasoning gives no special weight to the character of the steel industry as a manufacturing industry and a war industry in "A" priority category. There is nothing in Section 25 to prevent the occupations in the steel industry being compared with occupations in Abitibi and General Motors, Oshawa.

But of vastly greater importance than any we have mentioned are considerations that have come to light as a result of the complete investigation which the Commission was instructed to carry out. These considerations are ruled out as irrelevant by a narrow interpretation of one section of the Order. They are of first importance in the light of the full meaning of the Order in Council P.C. 5963, in the light of the Government's war labour policy, in the light of the Government's total war policy, and in the light of the main purpose of this Commission—to provide the Government with such recommendations that may assist it to effect a settlement in the basic steel industry of Canada.

A simple fact, sometimes forgotten by the layman, is that steel is made not only out of ore and coal and limestone, processed by coke ovens, blast furnaces, open hearth furnaces and rolling mills, but steel is made out of the lives of men and women. How the steelworker and his family live, the conditions under which he works, the length of hours he works, his relationship with his employer—all these are vital factors in considering steel and its place in the war effort.

Evidence taken from steelworkers at Sault Ste. Marie and Sydney revealed quite unjustifiable conditions among the families of the low income group. This group constitutes a large proportion of the total number of steelworkers. In Algoma, more than 40 per cent of the steelworkers receive wages of less than 55 cents an hour. In Sydney, the proportion in this category is closer to 60 per cent. Testimony of many witnesses from this low income group told a story of hardship and privation, of overcrowding, of financial worry, of acute distress occasioned by illness against which there was no financial protection. A great many families in this group failed to receive the bare subsistence income set by the Department of Labour, The Dominion Bureau of Statistics, the Toronto Welfare Council and other competent bodies.

A special consideration in the case of steel is the peculiar arduousness of the work. In many occupations the workers encounter hazard and discomfort. They experience extremes of heat and cold. In certain parts of the plant, steelworkers carry on their labours in the midst of gas, fumes and dust. Insurance rates show an extra premium on policies taken out by steelworkers. With the increased production of the war years these features have grown more acute. Workmen's compensation rates for steel have risen from 60 cents per hundred payroll to \$1.10 in the last three years in the Province of Ontario. These special features in steelmaking should be reflected in the rates of pay throughout the plant. There is no indication that they are taken into account in determining the present steel wages.

Among the most shocking conditions revealed by the evidence were the length of hours worked by the majority of steelworkers. In the Algoma plant, it appeared from payroll sheets for the two week period ending September 30, 1942 that more than 60 per cent of the workers worked 56 hours or more in a week. In the Sydney plant, the payroll for the week ending October 17 indicated that the number who worked 56 hours or more constituted more than 50 per cent of the labour force. A great many worked sixty hours. Some worked 70 and 80 hours. A few had worked a hundred or more hours in

the week. Nothing can justify these hours. Many investigators think that a 48-hour week is the optimum length if efficiency is to be maintained. All agree that where longer hours are worked there should be a break of one day in seven. No investigator has ever justified a continuous 7-day week. Yet a large proportion of the workers in the plants visited are working week in, week out, with no respite.

What is the reason for these inhumanly long hours? The explanation seems to be twofold. On the one hand, many workers in the lower wage brackets are working the seventh day in order to supplement earnings of a six-day week that are insufficient to provide them with even a bare standard of subsistence. On the other hand, company spokesmen placed the blame for the seven-day week on the demands for high production and the impossibility of getting additional workers to permit a day of rest for workers on the continuous process operations. Neither reason affords a valid justification.

The continuation of substandard wage rates for a large number of steelworkers engaged in peculiarly arduous and hazardous occupations, and the prevalence of unduly long hours for the majority of workers appear to constitute a violation of the Government's labour policy set forth in Order in Council P.C. 2685 to which reference is made in Order in Council P.C. 5963 which governs this Commission. Insofar as these conditions can be redressed by wage adjustment it is imperative that appropriate action should be taken.

The length of hours in the steel plants has been definitely linked to the shortage of steelworkers. Evidence at Algoma revealed that the plant was short 400 to 600 men and that this shortage would be substantially increased when new units, now under construction, are brought into operation. So far from finding it easy to secure new workers, until Government action froze labour in steel, the steel plants were experiencing serious labour turnover. In the first nine months of 1942, the Algoma Steel Corporation lost nearly 20 per cent of the labour force at the beginning of the period. This percentage is exclusive of those who left for military service. Of those who left, more than 80 per cent were in the low wage group below 55 cents an hour. For Sydney, the story is essentially the same. The steel plant lost 18 per cent of its workers in the first nine months of this year. These figures are especially significant because of the comparative remoteness of both Sault Ste. Marie and Sydney from places where they might expect to secure more remunerative or less arduous work.

Commenting on such a condition, Doctor Bryce Stewart, in the speech already referred to, said: "If production in low wage plants is essential, the workers must be given higher wages to retain them. The injustice of freezing workers on jobs at lower pay than they could have elsewhere and especially forcing them to remain on substandard rates cannot be contemplated. In the absence of such freezing the workers would go on strike and the employers would have to capitulate."

This linking together of wage policy and manpower policy—which every great nation engaged in the war has had to face—is not only outlined in Governmental declaration, but is carried out in Governmental practice. Not only have there been special cases of drastic wage revision to meet critical war production needs, but in at least one Order in Council (Wartime Salaries Order P.C. 1549) provision is made against any "serious interference with and loss of production in war industries" which might result from inadequacy of remuneration. It would seem, therefore, that upward adjustment in wages in steel is called for by the serious manpower situation which now pertains and which is likely to grow more acute.

Under the terms of Order in Council P.C. 5963 it would, therefore, appear that increases in basic pay are not only justified but required. Section 25 of the Order permits them to be made since a case for comparison can be made out both with the basic rates prevailing in the Abitibi Pulp and Paper Company and with those in the General Motors plant in Oshawa. Substandard living conditions arising from inadequate income, the peculiar arduousness and hazard of the work in steelmaking, uncompensated for in the present rates, the inhumanly long hours, accounted for partly by inadequate income, partly by a shortage of workers—all these conditions violate the Government's labour policy set forth in Order in Council P.C. 2685. The manpower crisis, emphasized by the shortage of steelworkers at Algoma, the high turnover in the low-wage class before the freezing Order went into effect, and the unduly long hours resulting in diminished efficiency, call imperatively for upward wage adjustment. If necessary, Section 14 of Order in Council P.C. 5963 can be invoked making of steel a special case, freed from any restriction the Order might place upon it. However, the broad purpose of the Government's labour policy, "the avoidance of industrial strife and the utmost acceleration possible in the production which is so essential in the present circumstances," is quite sufficient to justify the adjustments in the basic rates of pay which have been requested.

THE NAMING OF STEEL A NATIONAL EMPLOYER

Under the by-law of the National War Labour Board, the Board may name any industry a national employer and by doing so bring the industry under the jurisdiction of the National Board. The discretion of the National Board in such matters appears to be broad; the nature of the industry and the public interest are obviously important determining factors. The Commission has been requested by the Union to recommend that the National Board take such action in the case of the steel industry.

The justification for the Commission bringing in such a recommendation is to be found in the crisis in steel which gave rise to the Commission's appointment, and in the situation in the steel industry which was revealed to the Commission in the course of its hearings.

The Commission was appointed owing to the failure of two Regional Boards to effect a settlement using a regional basis of wage comparisons and acting within the scope of their jurisdiction. The Commission was appointed on recommendation of the Canadian Minister of Labour and was given authority to bring in a report which had to do with two steel plants in two widely separated provinces. It was given scope in its investigation under Order in Council P.C. 5963 far exceeding that of the Regional Boards. In fact, it was requested to consider the steel industry in its true perspective as an industry of prime national importance.

The evidence brought before the Commission which so strongly supported the request of the steelworkers for a standard basic wage of 55 cents supports with equal force their request that steel be named a national industry. Acute problems relating to the well-being of the steelworkers and to the maximum efficiency of steel production may be beyond the scope of the Regional Boards' authority but are properly the concern of the National War Labour Board. The National Board is in a position to take steps to see that the Government's labour policy is carried out.

The National Board can take measures to eliminate those factors which at present are having a detrimental effect on steel production. The National Board might well see fit to call a conference of representatives of management and of the union, as was suggested in the steelworkers' brief, to discover ways to bring about greater stability and higher production through improved union-management co-operation.

On its production side, the Government is already treating steel as a national industry. Its production comes under the control of the Minister of Munitions and Supply. Its price is nationally controlled. For purposes of labour

supply, it is rated in "A" priority category. Mining, which supplies the ore and coal from which steel is produced, is listed as a national employer. Shipbuilding, which is supplied with steel plates by the steel industry, is a national employer. There is every reason why steel, in many respects an even more important industry in the national war effort, should be placed in the same national category.

CONCLUSION

It is the opinion of this Commissioner that the investigation carried out by the Royal Commission has indicated measures that the Government might appropriately take to solve the crisis in the steel industry which occasioned the appointment of the Commission. The payment of overtime wages, the reclassification of jobs, the improvements of facilities for the comfort and safety of the steelworkers are recommended in the majority report. With

these recommendations this Commissioner heartily concurs. If they are carried out they will lessen certain causes of grievance. But of much greater importance than such measures is placing steel in its proper category as a national employer and establishing for steelworkers a basic wage which will provide them with an adequate standard of living for themselves and their families and which will have an additional effect of promoting stability in an industry upon which so much depends. The steelworkers are bearing a large share of the industrial war effort. The carrying through of measures in true line with the Government's declared labour policy would lead to greatly improved co-operation between union and management and to an even greater contribution in the making of steel for war.

(Sgd.) J. KING GORDON,

Commissioner.

Recent Proceedings under the Industrial Disputes Investigation Act

During the month of December, the Minister of Labour received the report of the Board of Conciliation and Investigation appointed to deal with the dispute between Riverside Iron Works Limited, Calgary, Alta., and its employees, members of Local 360, International Moulders and Foundry Workers' Union of North America. The texts of the majority and minority reports submitted will be found at the conclusion of this statement.

Applications Received

Five applications* for the establishment of Boards of Conciliation and Investigation under the provisions of the Industrial Disputes Investigation Act were received in the Department of Labour during the month of December. These were:

1. From employees of the Dominion Glass Company, Limited, Wallaceburg, Ont., members of the United Automobile Workers of America. The dispute, which concerns union recognition and the negotiation of a collective agreement, was said to directly affect some 650 workers. On December 29, Mr. J. P. Nicol, Industrial Relations Officer, Dominion Department of Labour, was appointed an Industrial

Disputes Inquiry Commissioner, to investigate the dispute.

2. From employees of the Aluminum Company of Canada, Limited, Arvida, P.Q., members of the International Union of Aluminum Workers No. 22022. Ten thousand employees were said to be affected in the dispute which concerns union recognition. On December 14, Mr. Bernard Rose, K.C., Montreal, P.Q., was authorized, as Industrial Disputes Inquiry Commissioner, to make an investigation.

3. From employees of the Aluminum Company of Canada Limited, Kingston, Ont., members of the United Electrical, Radio and Machine Workers of America. The dispute, which concerns union recognition and the negotiation of a collective agreement, is said to directly affect some 2,300 employees and 500 indirectly. On December 15, Mr. F. J. Ainsborough, Industrial Relations Officer, Dominion Department of Labour, Toronto, was appointed an Industrial Disputes Inquiry Commissioner, to investigate the dispute.

4. From employees of the Canadian Bronze Powder Works, Limited, Valleyfield, P.Q., members of the International Bronze Aluminum Foundry Workers, No. 23235, A.F. of L. Some 72 employees were said to be affected in the dispute which concerns union recognition and the negotiation of a collective agreement. On December 21, Mr. Bernard Rose, K.C., Montreal, was authorized as Industrial Disputes Inquiry Commissioner, to make an investigation of the dispute.

* By P.C. 5963, the National and Regional War Labour Boards are specifically charged with the duty of adjudicating wage demands. Therefore all applications for the establishment of Boards of Conciliation and Investigation in which wages are the sole cause of the dispute are removed from the ambit of the Industrial Disputes Investigation Act and the applicants are referred to their respective War Labour Board.

5. From employees of the Hamilton Bridge Company, Limited, Hamilton, Ont., members of Local 2537, United Steelworkers of America. The dispute, which is said to directly affect 1,000 employees, concerns the union's request that the Company enter into negotiations with a view to signing a collective agreement. According to the employees' application, the Company has refused to enter into negotiations.

Boards Established

On December 11, a Board of Conciliation and Investigation was established to deal with a dispute between Geo. W. Reed and Company, Limited, Montreal, P.Q., and its employees, members of Local 2735, United Steelworkers of America. (LABOUR GAZETTE, December 1942, page 1374.) Following the receipt of the application for the establishment of a board, Mr. Bernard Rose, K.C., Montreal, was authorized, as Industrial Disputes Inquiry Commissioner, to make an investigation. Following the taking of a vote to determine the bargaining agency of the employees, the Commissioner recommended that the circumstances, in his opinion, warranted the establishment of a board. At the end of the month, Mr. R. L. Calder, K.C., and Mr. D. A. Paterson, both of Montreal, had been appointed members of the Board on the nomination of the employees and employer respectively, and were requested to confer respecting the nomination of a person to act as chairman.

On December 22, a Board of Conciliation and Investigation was established to deal with a dispute between the Manitoba Rolling Mill Company, Limited, Selkirk, Man., and its employees, members of the Selkirk Rolling Mill Employees' Federal Union No. 120. (LABOUR GAZETTE, November 1942, page 1247.) Following the receipt of the application, Mr. H. S. Johnstone, Industrial Relations Officer, Dominion Department of Labour, Regina, was appointed an Industrial Disputes Inquiry Commissioner to investigate the dispute. The Commissioner recommended that the circumstances warranted the establishment of a board. At the end of the month, Mr. Clifford W. Brock, K.C., Winnipeg, Man., had been appointed a member of the Board on the nomination of the employees.

Boards Fully Constituted

Reference was made in the December issue of the LABOUR GAZETTE, page 1374, to the establishment of a Board of Conciliation and Investigation to deal with a dispute between the Consumers' Gas Company of Toronto, Ont., and members of Local 12291, District 11, United Gas, Coke and Chemical Workers of America. During the month the personnel of the Board was completed and is as follows:

Honourable Mr. Justice J. G. Gillanders, Supreme Court of Ontario, Chairman, appointed on the joint recommendation of the other two members; Mr. Drummond Wren, appointed on the nomination of the employees and Mr. V. A. Sinclair, K.C., appointed on the nomination of the employer. All three reside in Toronto.

The constitution of the Board of Conciliation and Investigation established in November to deal with a dispute between Shawinigan Chemicals, Limited, Shawinigan Falls, P.Q., and its employees, members of Local 357, International Moulders and Foundry Workers' Union of North America (LABOUR GAZETTE, December 1942, page 1376), was completed during December. The personnel of the board is as follows: Mr. Walter S. Johnson, K.C., Chairman, appointed on the joint recommendation of the other two members; Mr. Gerald Almond, appointed on the nomination of the employees; and Mr. D. A. Paterson, appointed on the nomination of the employer. All three reside in Montreal.

Other Disputes Referred to Industrial Disputes Inquiry Commissioners

An application for the establishment of a Board of Conciliation and Investigation was received in November from employees of Canada Paper Company Limited, Windsor Mills, P.Q. (LABOUR GAZETTE, December 1942, page 1374). On December 10, Mr. Bernard Rose, K.C., Montreal, was authorized as Industrial Disputes Inquiry Commissioner to make an investigation of the dispute.

Mr. F. J. Ainsborough, Industrial Relations Officer, Dominion Department of Labour, Toronto, was appointed an Industrial Disputes Inquiry Commissioner on December 3 to investigate applications from the employees of Canada Packers, Limited, Toronto, Ont., members of Local 114, United Packinghouse Workers of America, and the Toronto Employees' Plant Council. (LABOUR GAZETTE, December 1942, page 1374). The Commissioner reported that the Company agreed to meet and enter into negotiations with a view to reaching a collective agreement with the group designated by the majority of the employees. A representation vote was taken on December 17 to determine the employees' bargaining agent and resulted in favour of the United Packinghouse Workers of America. The Director of Industrial Relations was subsequently advised by the president of Canada Packers Limited, Mr. J. S. McLean, that the Employees' Plant Council had been dissolved and that the Union had been formally advised that it would be recognized as the bargaining agent of the employees.

On December 10, Mr. Bernard Rose, K.C., Montreal, was authorized, as Industrial Disputes Inquiry Commissioner, to make an investigation of the dispute between Levis Ferry, Limited, Quebec, P.Q., and its employees, members of the Canadian Brotherhood of Railway Employees and Other Transport Workers. (LABOUR GAZETTE, December 1942, page 1375).

On December 14, Mr. F. J. Ainsborough, Industrial Relations Officer, Dominion Department of Labour, Toronto, was appointed an Industrial Disputes Inquiry Commissioner to investigate the dispute between Genelco, Limited, Peterborough, Ont., and its employees, members of the United Electrical, Radio and Machine Workers of America. (LABOUR GAZETTE, December 1942, page 1375).

Mr. Bernard Rose, K.C., Montreal, was authorized on December 8, as Industrial Disputes Inquiry Commissioner, to make an investigation of the dispute between the Johnson Woolen Mills Limited, Waterville, P.Q., and certain of its employees. (LABOUR GAZETTE, December 1942, page 1375).

On December 16, Mr. J. P. Nicol, Industrial Relations Officer, Dominion Department of Labour, Toronto, was appointed an Industrial Disputes Inquiry Commissioner to investigate the dispute between the Massey-Harris Company, Limited, Toronto, Ont., and its employees, Members of Local 2901, United Steelworkers of America. (LABOUR GAZETTE, December 1942, page 1375).

On December 15, Mr. J. P. Nicol, Industrial Relations Officer, Dominion Department of Labour, was appointed an Industrial Disputes Inquiry Commissioner to investigate the dismissal of an employee of Canada Illinois Tools Company, Toronto, Ont., allegedly for union membership and activity on behalf of the United Electrical, Radio and Machine Workers of America.

Other Reports of Industrial Disputes Inquiry Commissioners

On December 10, Mr. Bernard Rose, K.C., Montreal, who had been authorized to investigate, as Industrial Disputes Inquiry Commissioner, the dispute between Dominion Lime, Limited, Lime Ridge, P.Q., and its employees, members of the National Catholic Union of Dominion Lime employees (LABOUR GAZETTE, September 1942, page 1003) submitted his report. The Commissioner found that the Company is under an agreement with the International Brotherhood of Pulp, Sulphite and Paper Mill Workers and that when the agreement was signed, and at the present time, a majority of the employees of the Company were members of that organization and had given authority to it to conclude an agreement on their behalf. The Commissioner recommended that the application for the

establishment of a Board of Conciliation and Investigation be denied. The applicants were advised by the Department that a Board could not be established to deal with the dispute.

In October, Mr. Bernard Rose, K.C., Montreal, P.Q., was authorized as Industrial Disputes Inquiry Commissioner to investigate a dispute between the Imperial Tobacco Company of Canada Limited, Montreal, P.Q., and its employees, members of Local 234, International Union of Tobacco Workers. (LABOUR GAZETTE, November 1942, page 1248). Early in December, the Commissioner, following negotiations during which a delegation of the parties concerned made representations to the Quebec Regional War Labour Board, reported that he had been advised that satisfactory arrangements were being made with the Company looking toward a settlement of the dispute and that in so far as the Department was concerned the case could be considered closed.

An application was received in October for the establishment of a Board of Conciliation and Investigation in the dispute between W. C. Macdonald Incorporated, Montreal, P.Q., and its employees, members of Local 235, International Union of Tobacco Workers (LABOUR GAZETTE, November 1942, page 1248). On December 1, the Department was advised that steps were being taken toward the settlement of the matters in dispute and that in so far as the Department was concerned the case could be considered closed.

Report of Royal Commission

The report of the Royal Commission appointed to inquire into facts and circumstances pertaining to applications submitted on behalf of certain employees of the Algoma Steel Corporation Limited, Sault Ste. Marie, Ont., members of Local 2251, United Steelworkers of America and certain employees of the Dominion Steel and Coal Corporation Limited, Sydney, N.S., members of Local 1064, United Steelworkers of America, to the Ontario Regional War Labour Board and the Nova Scotia Regional War Labour Board, respectively, for increases in basic rates of pay, (LABOUR GAZETTE, October 1942, page 1123.) is printed in full elsewhere in this issue. Following the release of the Commission's Report, a strike of the employees concerned took place.

Settlements

During December, the Department was advised that an agreement had been signed by Peacock Bros., Limited, Ville La Salle, P.Q., and their employees, members of Lodge 631, International Association of Machinists. (LABOUR GAZETTE, October 1942, page 1121). The agreement between the Company and the Union is summarized in the article entitled "Recent Industrial Agreements and Schedules

of Wages" appearing elsewhere in this issue. Mr. Bernard Rose, K.C., Montreal, made an investigation of the dispute as Industrial Disputes Inquiry Commissioner, prior to the agreement being reached. On December 9, the applicant employees requested that the application for the establishment of a Board of Conciliation and Investigation be withdrawn.

On December 11, the Department was advised that an agreement had been reached between William Kennedy and Sons, Limited, Owen Sound, Ont., and its employees, members of Local 2460, United Steelworkers of America. (LABOUR GAZETTE, November 1942, page 1250). The application for the establishment of a Board of Conciliation and Investigation was also withdrawn by the employees. A summary of the agreement will be found in the article entitled "Recent Industrial Agreements and Schedules of Wages" to be found elsewhere in this issue.

The Department was advised on December 14 that following the taking of a vote to determine the bargaining agency of the employees an agreement had been reached between Marine Industries, Limited, Sorel, P.Q., and its employees, represented by the Metal Trades Council of Sorel (LABOUR GAZETTE, August 1942, page 883). The application for the establishment of a Board of Conciliation and Investigation was accordingly withdrawn. A summary of this agreement will also be found in the article entitled "Recent Industrial Agreements and Schedules of Wages" appearing elsewhere in this issue.

An agreement has been signed by Brunner Mond, Canada, Limited, Amherstburg, Ont., and its employees, members of Local 89, United Automobile Workers of America. (LABOUR GAZETTE, July 1942, page 762). The application for the establishment of a Board of Conciliation and Investigation has accord-

ingly been withdrawn. A summary of the agreement will be found in the article entitled "Recent Industrial Agreements and Schedules of Wages" appearing elsewhere in this issue.

In September, a report was received from Mr. Bernard Rose, K.C., who has been authorized, as Industrial Disputes Inquiry Commissioner, to investigate a dispute between the Quebec Asbestos Corporation Limited, East Broughton, P.Q., and its employees, members of the National Catholic Union of Asbestos Workers of East Broughton. (LABOUR GAZETTE, October, 1942, page 1124). At that time the Commissioner reported that the interested parties would enter into an agreement. An agreement was subsequently signed by the Company's representative and the representative of the union. The interested parties were advised, during December, that this dispute was considered closed by the Department.

Other Application Withdrawn

The Department was notified on December 23 that the application for the establishment of a Board of Conciliation and Investigation to deal with the dispute between J. Ford and Company, Limited, Portneuf Station, P.Q., and its employees, members of the National Catholic Union of Paper Workers of Portneuf Station (LABOUR GAZETTE, September 1942, page 1003), had been formally withdrawn by a resolution unanimously passed at a regular meeting of the union. Previously it had been ascertained through an investigation made by Mr. L. Pepin, Industrial Relations Officer, Dominion Department of Labour, Montreal, that the matters in dispute were solely concerned with remunerations and therefore the dispute did not fall within the ambit of the Industrial Disputes Investigation Act but was clearly within the jurisdiction of the Quebec Regional War Labour Board.

Report of Board in Dispute Between Riverside Iron Works Limited, and its Employees

During December, the Minister of Labour received the report of the Board of Conciliation and Investigation established to deal with a dispute between Riverside Iron Works Limited, Calgary, Alta.; and its employees, members of Local 360, International Moulders and Foundry Workers' Union of North America. (LABOUR GAZETTE, November, 1942, page 1248.)

The personnel of the board was as follows: His Honour Judge J. W. McDonald, District Court Judge, Chairman, appointed on the joint recommendation of the other two members; Mr. Gordon G. Cushing, appointed on the nomination of the employees; and Mr. C. S. Blanchard, K.C., appointed on the nomination of the employer. All three reside in Calgary.

The report of the board is signed by the Chairman and Mr. C. S. Blanchard, K.C.; and a minority report was submitted by Mr. Gordon G. Cushing.

Report of Board

In the matter of the Industrial Disputes Investigation Act, and in the matter of a dispute between Riverside Iron Works Limited, and its employees, members of Local 360, International Moulders and Foundry Workers' Union of North America.

This Board, consisting of His Honour Judge J. W. McDonald, Chairman; Mr. C. S. Blanchard, K.C., nominated by Riverside Iron Works Limited; and Mr. Gordon G. Cushing,

nominated by the members of Local Union 360, employees of the said Company, was appointed by the Acting Minister of Labour to enquire into a dispute which had arisen between the Company and the members of the Local Union. The Board was established as the result of an application to the Registrar, dated October 8, 1942, and signed by Charles Ogilvie, President of Local 360, and D. M. Lewis, Corresponding Representative of the International Union. These gentlemen were not employees of Riverside Iron Works Limited.

The grounds of the dispute, as set forth in the Application for a Board, are:—

- (a) Refusal of the Company to recognize the Union as the bargaining agent of the employees;
- (b) Refusal of the Company to consider or deal with a proposed agreement relating to working conditions and wages, which agreement was submitted to the Company's Manager, Mr. J. P. Carroll.

Copy of this proposed agreement is appended to this report.

The Board commenced its sittings on November 11, 1942.

The Representatives of Local Union 360 were:—

Mr. James Grimes—of Winnipeg, Representative of the International Union;

Mr. D. M. Lewis—of Calgary, Corresponding Representative of the International Union.

Mr. G. Walsh—of Calgary, a member of the Shop Committee, and an employee of the Company.

The Representatives of the Company were:—

Mr. J. P. Carroll—of Calgary, Manager of the Company.

Mr. Eric Avery—of Calgary, Plant Engineer of the Company.

Mr. James McGill—of Calgary, General Foreman in the Foundry of the Company.

Five sittings of the Board were held at which evidence and arguments were heard and four meetings of the Board were held at which the Board, in the absence of the parties, discussed and considered the evidence and arguments submitted by both sides to the dispute.

While the application refers to the questions of wages and working conditions in the plant, it became evident at an early stage of the proceedings that these were regarded by the complainants as matters of secondary importance and that the main object of the repre-

sentatives of the local union was to secure recognition by the Company of Local Union 360 as the bargaining agent of the employees. The Board, however, has considered it important to enquire into all questions raised by the terms of the application in an endeavour to ascertain whether any real causes of complaint existed between the Company and its foundry workers, apart from the question of union recognition, with a view, if possible, to bringing about an amicable settlement between the parties, and also with a view to determining whether or not recognition of the Union as the bargaining agent of the employees would be likely to improve relations between the Company and its employees, and eliminate future disputes without impairing the efficiency of the plant in the production of war supplies.

Working Conditions:

So far as working conditions in the plant are concerned, the representatives of the Union have conceded that there is no real ground of complaint and in inspection of the whole plant by the Board, accompanied by Representatives of the Union, confirmed this view. None of these representatives were able on that occasion to point to any adverse conditions of any importance whatever, and Mr. Grimes was frank enough to state as much to the Board. He thought the working conditions compared most favourably with those obtaining in other similar plants. In this connection, the supplementary brief filed by the Company, dated November 17, and attached to this Report, sets forth in some detail the efforts made by the Company to provide for the health, comfort and convenience of its employees. These statements were not challenged by the Union representatives, and the Board has therefore no hesitation in concluding that, with regard to working conditions, the employees of the Company had no just cause of complaint whatever.

Wages:

While the Board has no jurisdiction to deal with, and is not required to make any recommendations with respect to the scale of wages paid by the Company, we feel some reference should be made to this phase of the case, inasmuch as the question of wages is alleged to have been one of the causes of the dispute between the Company and its employees.

In the proposed agreement submitted by the Local Union, attached hereto, it is suggested that the basic rate of wages for journeymen shall be 97 cents per hour and for non-journeymen 70 cents per hour, plus cost of living bonus in each case.

A sliding scale of wages for apprentices is suggested, running from 40 cents per hour for

the first six months to 75 cents per hour for the eighth six months. The Local Union's proposal is that the period of apprenticeship be four years.

From information furnished by Mr. Carroll it appears that the present basic wage scale paid by the Company is 77 cents per hour for journeymen and 40 cents to 55 cents per hour for non-journeymen.

The apprenticeship period fixed by the Company is five years and the basic wage rate is 30 cents per hour for the first six months, with an increase of 5 cents per hour for each succeeding six months' period.

The Company has always paid the full cost of living bonus and no dispute arises under that head.

In addition, however, to the basic wages above mentioned, the Company, pursuant to an agreement reached with its Employees' Shop Committee in June, 1942, has been paying to its employees in the foundry an "incentive" bonus based on tonnage production. In the month of October the bonus paid under this heading amounted to \$47, or 24.6 cents per hour for each journeyman, and 12.3 cents per hour for each non-journeyman and apprentice.

The following is a summary of the wages paid by the Company in October as compared with the scale of wages proposed in the Local Union's draft agreement:—

Local Union Scale		Cents
Journemen:		
Basic wage.....	97	
Cost of living bonus.....	09.4	
		<hr/>
Gross wage.....	106.4	
Non-Journemen:		
Basic wage.....	70	
Cost of living bonus.....	9.04	
		<hr/>
Gross wage.....	79.04	
Apprentices:

		<hr/>

In the case of apprentices the Company has been paying the full cost of living bonus required by law.

The foregoing figures show that, for the month of October, the wages paid by the Company were substantially higher for

journeymen and apprentices than those demanded by the Local Union, but lower for non-journeymen.

The Local Union's demand is for a higher basic wage with no incentive bonus. Mr. Grimes, who was the chief spokesman for the Union representatives, stated that the Union was unalterably opposed to the incentive bonus as being in the nature of an undignified bribe to the workmen, or as he phrased it, "a piece of meat held out on a stick" to induce men to increase production. Mr. Carroll states that the proposal for the adoption of the incentive bonus came from a Shop Committee representing the foundry employees, and that the plan was subsequently accepted and later sanctioned by the Regional War Labour Board. A memorandum sent by the Company to the Shop Committee dated May 4, 1942, appears to support this statement, although Mr. Grimes asserts that the men were not satisfied with this policy. Copy of the said memorandum is appended hereto. The Board is inclined to the view that the incentive bonus plan was probably satisfactory to the men prior to the advent of Mr. Grimes, and since, in the opinion of the Board, any incentive designed to achieve greater production in wartime is desirable, the Board considers this feature of the Company's wage policy should be approved and that the Company should not be forced

to eliminate the bonus and substitute correspondingly higher basic wages.

Apart from the disputed question with respect to the incentive bonus, the Board does not anticipate that much difficulty will be experienced in bringing about an amicable

agreement between the Company and its employees as to the *quantum* of wages to be paid, and the door is still open, in any event, to discussion on this point.

Before leaving the question of wages, the Board directs attention to the provisions regarding wages contained in an agreement concluded between the Northwestern Brass Limited and its foundry employees, represented by Local Union 360. The agreement was entered into on October 8, 1942, and provides for the following scale of wages:—

- (a) All journeymen, moulders and core-makers a basic wage of 85 cents per hour.
- (b) Non-journeymen from 45 cents per hour to 60 cents per hour.
- (c) Apprentices, from 35 cents to 75 cents per hour, on a rising scale based on length of service.

The cost of living bonus provided for is to be paid on the adjusted index figure of 105.1 for August, 1940. No incentive bonus is paid by Northwestern Brass Limited. A comparison of these rates with those paid by Riverside under its incentive bonus policy affords fairly cogent evidence that the rates of wages now being paid by Riverside, which are substantially higher than those accepted by Local Union 360 in the case of Northwestern Brass Limited, are not unfair.

Having regard to the terms on which Local Union 360 was willing to enter into an agreement with Northwestern Brass Limited, the Board is inclined to the view that no serious cause for dispute with regard to wages really existed between the Riverside employees and the Company which justified the application for the establishment of a Conciliation Board, and we believe that an arrangement satisfactory to both sides could easily have been reached but for the intervention of Union officials who were not employees of the Company.

A copy of the Northwestern Brass agreement is appended hereto.

Draft Agreements Presented to the Board:

In order, if possible, to bring the parties to this dispute to an amicable settlement of any existing differences, both sides were invited to submit draft agreements containing their respective proposals. The draft agreement proposed by the Local Union had been presented at the first meeting of the Board. At a later stage the Company submitted its proposals, and both sides were then requested to consider the proposals of the opposite party and to report back to the Board.

Upon further hearing, it became clear that the Local Union 360 would not approve any agreement with the Company unless the Local Union was a party to the agreement and recognized as the bargaining agent of the employees. The Company stated that it was prepared to discuss the terms of an agreement with a Committee of its employees, but that it would not under any circumstances recognize the Local Union as their bargaining agent.

Notwithstanding this attitude on the part of each side, the terms of the agreements submitted by the Company and the Local Union respectively were discussed, clause by clause, with the result that, while there were many provisions to which the opposite side raised objection, the Board is satisfied that all such differences can be amicably adjusted without any great difficulty, provided the fundamental question as to recognition of the Union is settled.

Union Recognition:

Because the only real "bone of contention" between the parties to this dispute is the question of union recognition, the Board has given this matter a great deal of anxious consideration. Apart from this difference the Board is satisfied that there are no matters of dispute that cannot be easily and fairly adjusted between the Company and its employees. So far as wages and working conditions are concerned the Board is of the opinion that no substantial ground for complaint has existed. Certainly, if the Northwestern Brass agreement is to be taken as a criterion of fairness, Riverside has not been unjust to its employees with respect to wage scales.

In deciding the issue before the Board regard must be had to not only the demands of employees but also—and this is particularly so in time of war—to the efficient and continuous operation of the plant. In cases where it is shown that an employer has been paying unfair wages, failing to provide decent working conditions or otherwise indulging in unfair practices towards its employees, demand for union recognition to enable employees to present a solid front directed by men experienced in matters involving the relationship between capital and labour should not be rejected.

In the present dispute, however, these factors are absent and the Board is presented with a situation in which the Company, merely because it refused to meet and negotiate with an official of the International Union, was subjected to an illegal strike by its foundry workers for a period of a week, and this at a time when the Company was bending every

effort towards filling its war contracts. The Board is satisfied that there were no conditions existing that would have justified this strike even if it had not been illegal and we are further satisfied that the strike would not have occurred without the intervention of the officials of the International Union and the agitation inspired by the determination of these officials to bring Riverside into the Union fold. These remarks are not to be taken as any condemnation of the principles of trades unionism or a denial of the right of the men to be members of a union. Properly and fairly directed a union may exercise a most salutary influence in bringing about co-operation between employers and employees. In this case the Board has reluctantly come to the conclusion that the opposite was the case.

The sole purpose of the strike, in the opinion of the Board, was to force the Company to recognize the Local Union as the bargaining agent of the foundry employees, and it was precipitated by the refusal of Mr. Carroll to treat with Mr. Grimes. There were no other "grievances", so far as the Board has been made aware, that could possibly have justified the action taken by the men, and, if there were any, no attempt was made to present them to the Company for adjustment. The men were warned before they dropped their tools that a strike would constitute a breach of the law but, notwithstanding this, the Minutes of a meeting of the Local Union held two weeks after the men returned to work contains a resolution unanimously passed, "approving" the strike.

Under all these circumstances this Board considers that the Company should not be forced to recognize the Union as the bargaining agent of its employees. To do so would be to put the stamp of its approval on an unlawful act and create a precedent which would be very likely to encourage similar breaches of the law in other industrial plants throughout the Dominion.

In conclusion the Board desires to express its appreciation of the able and courteous manner in which both sides to the dispute presented their respective cases.

(Sgd.) J. W. McDONALD,
Chairman of Board of Conciliation.

(Sgd.) C. S. BLANCHARD,
Member of the Board.

Calgary, Alberta,
December 4, 1942.

Minority Report

The Honourable Humphrey Mitchell,
Minister of Labour,
Parliament Buildings,
Ottawa, Ontario.

Sir:

Re: *Dispute between Riverside Iron Works Limited, Calgary, and its employees, members of Local 360, International Moulders and Foundry Workers' Union of North America.*

Having had the honour of serving as a member of the above Board of Conciliation and Investigation on the recommendation of the employees of the said Company, and having had the opportunity of studying the evidence presented to the Board, I find myself in disagreement with the other members of the said Board and must therefore place before you a minority report.

The dispute arose through the refusal of the management of the Riverside Iron Works to meet a committee of the Local Union representing the employees to discuss wages and working conditions with a view to a collective agreement, and the dispute was climaxed by a strike of the employees on September 24.

Prior to this date, upon evidence submitted by the Local Union every effort was made to negotiate in a peaceful and legal manner. Copies of letters were filed with the Board showing that as early as July 28, 1942, efforts were made by the Local Union to arrange meetings with the management. These letters were never acknowledged by the management and in this I contend that through an act of courtesy alone these letters should have been acknowledged.

The Local Union requested the assistance of their International Representative and upon the arrival of Mr. Grimes in the city early in September efforts were again made to meet the management of the Riverside Iron Works. These efforts were at all times without success.

I am informed that the majority report in this dispute will be based upon the opinion that no employer or company should be requested or directed to negotiate with an organization who are responsible for, or a party to, an illegal act.

From the evidence submitted it is my opinion that the management of the Riverside Iron Works were as much responsible for the illegal act on the part of the employees, as the employees themselves, and from a report placed before the Board by Mr. F. G. Cope, Conciliation Officer, Province of Alberta, covering his efforts in conciliation prior to the appointment of a Federal Conciliation Commissioner my opinion is substantiated.

The opinion has also been expressed that if "union recognition" were granted in this dispute a precedent would be established whereby strike action on the part of workers would be the only necessary action in securing their demands of "union recognition" or other conditions. This in my opinion would set no precedent, as I believe in reviewing other disputes throughout our Dominion, strikes have preceded Board of Conciliation wherein the workers were granted their requests.

The management of the Riverside Iron Works have also expressed concern over being called upon to negotiate agreements with persons other than their own employees. This in my opinion is a very minor detail and could very properly be handled in the drafting of an agreement. Attached to this report as Appendix "A", I hereby submit a proposed agreement which in my opinion would alleviate this difficulty.

I must express keen disappointment in the Board as a whole in not being guided by Order in Council P.C. 2685, a copy of which was supplied to us for our guidance, wherein it definitely states:—

"That employees should be free to organize in trade unions, free from any control by employers or their agents."

"That employees, through the officers of their trade union or through other representatives chosen by them, should be free to negotiate with employers or the representatives of employer's associations concerning rates of pay, hours of labour and other working conditions with a view to the conclusion of a collective agreement."

I must therefore submit a minority report recommending recognition of the Union as the bargaining agent with the suggestion that an agreement be entered into between the Riverside Iron Works Limited, Calgary, and the Local Union representing the employees of the said Company as proposed in Appendix "A".

With the establishing of this initial agreement, I feel that the matter of wages could either be mutually agreed upon and a joint application made to the Regional War Labour Board of Alberta for approval, or an application could be made by either the Company or the Employees on the question of wages. When a decision had been rendered by the said Regional Board it could be attached to and become a part of this agreement. In this way a mutual agreement could be established for the duration of the war and six months thereafter and production of vital war needs would be efficiently carried on.

All of which is respectfully submitted.

(Sgd.) GORDON G. CUSHING,

Member.

Calgary, Alberta, December 4, 1942.

Appendix "A"

An agreement entered into:

Between: The Riverside Iron Works Limited, Calgary, Alta.,

Party of the first part, hereinafter called the "Company"

And:

The Employees in the Foundry Department, being members of Local Union 360, International Moulders and Foundry Workers Union of North America.

Party of the second part, hereinafter called "Employees"

For the duration of the war and six (6) months thereafter, until terminated as hereinafter set forth, and until the termination hereof, under the terms hereof, witnesseth that:—

1. Duration of the Agreement

This agreement shall become effective on the date of its signing and shall remain in effect until changed by mutual consent. Should either party desire to terminate the agreement six (6) months after the end of the war, thirty (30) days notice will be given to the other party and on the expiration of the said thirty (30) days notice the agreement will terminate. If no notice is given by either party, the Agreement shall be considered as automatically renewed for an additional period of one year from the termination of the war, and in like manner from year to year thereafter.

2. Joint Committee

A Committee of six members shall be formed to be known as the Joint Committee. Three members of the Joint Committee shall be elected annually by the Employees and shall be known as Elected Representatives. The three persons who sign this agreement for the employees shall be the first Elected Representatives, or in case the agreement is signed by more, the signatures of the first three in their order on the agreement shall be the first three Elected Representatives. The said first Elected Representatives shall hold office until the first election.

Three members of the Joint Committee shall be appointed by the Company to be known as Appointed Representatives and they shall hold office during the pleasure of the Company.

If any Elected Representative dies or leaves the service of the Company or is promoted to some position rendering him ineligible for office he shall automatically cease to hold office. In such case another Elected Representative shall be elected to take his place for the balance of the term.

The election of the Employees Representatives shall be handled by the Local Union as a part of their regular business and the Company shall be kept informed by the Union of the names of the Employees' Representatives.

3. Meetings of the Joint Committee

The Joint Committee shall meet as soon as convenient after the completion of this agreement and as soon as possible after this election and shall elect from its members a Chairman and a Secretary. The secretary will keep the minutes of each meeting and the Company will provide stenographic services and materials for the typing of the minutes.

The Joint Committee shall meet once each month on the Company's premises. It would be preferable for this meeting to take place in working hours, but owing to the necessity for production of vital war materials, the monthly

meeting will be held in the evening for the duration of the war.

The Chairman of the Joint Committee shall have the right to vote the same as any member, but shall have no casting vote in case of a tie. A quorum shall consist of four, including not less than two of the Elected Representatives and two of the Appointed Representatives.

An emergency meeting of the Joint Committee will be called by the Chairman if any representative of the Joint Committee considers that such a meeting is necessary and requests the Chairman to call it.

The Minutes of each meeting will be prepared by the Secretary as soon as possible after each meeting. They will be prepared in triplicate and the minutes of each meeting will be signed by at least one Elected Representative and one Appointed Representative as well as by the Secretary of the minutes so signed. One shall be posted on the Bulletin Board in the Foundry and left there for at least forty-eight hours. One shall be delivered to an Elected Representative and one shall be kept in the files of the Company.

4. Functions of Joint Committee

The Joint Committee will endeavour to arrive at a fair and equitable decision on any matters affecting any employee or employees of the Company.

The objects and purposes of this Committee shall be as follows:—

1. During the present war to act as a "war production committee" to obtain from the Foundry the maximum quantities of war material being produced in it.

2. To make working rules for the Foundry.

3. To consider suggestions from employees and to settle hereunder complaints and grievances of any employee.

4. To consider and improve the general welfare of the employees especially their personal safety and health.

5. To organize and carry on entertainment and sports for the employees and members of their families.

6. To provide a medium whereby the Representatives of the Company and its employees may discuss any matter relating to their employment and the work carried on in the Foundry.

5. Grievances

The Joint Committee comprised of the three Employees' Representatives and the three Company Representatives shall also act as a Grievance Committee. All grievances between the Company and the employees or any one employee arising out of general working conditions shall be settled in the following order.

- (a) The employee shall first take the question up with his foreman. The employee may or may not be accompanied by an Employee Representative.

- (b) If the case is not settled under (a) then the Employees' Representative with or without the employee may present the question to the General Foreman of the plant.

- (c) If the case is not settled under (a) and (b) above, such grievance shall be referred to the Joint Committee referred to above, composed of the three Employees' Representatives and the three Company Representatives. All grievances presented in this step shall be in writing and shall be given two full days before a meeting.

- (d) If the case is not settled under (a), (b) and (c) above, then such grievance shall be

submitted to the Industrial Disputes Inquiry Commission of the Province of Alberta for decision.

When a settlement is reached at any stage of the procedure described in paragraphs (a), (b) or (c) then in such case the decision shall be final and binding on the parties hereto.

Representatives of the Joint Committee may initiate discussion with the Company of any grievance which may come to their attention, but such grievances shall be presented and considered only with the consent of the employee or employees concerned.

This in no way prevents the employee from handling his own grievance by the method outlined in paragraph (a) hereof.

6. Strikes, etc.

During the currency of this agreement or while negotiations for a further agreement are in progress there are to be no strikes, stoppages or slow-down in work on the part of employees, members of the Union, nor any lockout of employees on the part of the Company.

7. Hours of Labour

The regular working week shall consist of forty-four (44) hours divided into five (5) and one-half regular working days.

The regular working day shall consist of shifts of eight (8) hours of employment to be performed on Mondays to Fridays inclusive and four (4) hours on Saturday forenoon.

All hours worked as above shall be classed as single time.

All hours worked in any shift in excess of those provided above shall be deemed overtime, and the first three (3) hours of daily overtime shall be paid at the rate of time and one-half, and any hours of overtime thereafter shall be paid for at the rate of double time.

8. Statutory Holidays

The following are recognized as Statutory Holidays:

1. New Years Day.
2. Good Friday.
3. First Monday in July.
4. Labour Day.
5. Thanksgiving Day.
6. Christmas Day.

Any work performed on these days shall be paid for at the rate of double time. Work performed on Sundays shall also be paid at the rate of double time unless the work performed is part of the regular work week, in which case the employee or employees shall be allowed one other day of rest in lieu of Sunday.

9. Apprentices

For the duration of the present war owing to the difficulty of securing journeymen moulders and coremakers, the Company shall be permitted to engage as many apprentices as necessary in order that the Foundry may co-operate 100 per cent in the War Effort.

After the end of the war one apprentice shall be allowed and one additional apprentice shall be allowed for the first six journeymen moulders and coremakers employed, and thereafter one apprentice shall be employed for every six additional journeymen moulders and coremakers employed.

The term of apprenticeship shall be four years.

An apprentice shall work a probationary period of three months. If he shows in that time that he will make a good tradesman, then

his apprenticeship agreement as laid down by the Alberta Government, Department of Industrial Relations, shall be completed, and handed to him by the Elected Representatives.

Failure on the part of the apprentice to complete the filling in of his apprenticeship agreement, when called upon to do so, shall constitute cause for his release.

It shall be understood that on the completion of his term of apprenticeship he shall be immediately paid at the rate prevailing for journey-men moulders or coremakers in the Foundry.

10. *Employment and Reduction of Staff*

Only the General Foreman shall have the power to employ new employees.

Nothing in this agreement shall effect or interfere with the right of the Company to lay off or discharge an employee for proper and sufficient cause as provided by law.

In the event of it being necessary to reduce the staff due to a reduction of work or for other reasons, all employees who have not been in the employ of the Company for a period of one year shall be laid off according to their seniority first. After this procedure is completed and it is still necessary for a reduction of staff, the Joint Committee shall confer in order that a mutual agreement may be made either to reduce the hours of work or to decide on the number of employees to be laid off. In all cases of lay off seniority shall prevail.

11. *Discrimination*

There shall be no discrimination of employees on account of membership or non-membership in any Union, Fraternity, Church or Society.

12. *Discipline of Employees*

Employees may be suspended or dismissed without advance notice for the following.

(a) Stealing or malicious mischief which results in loss of or damage to property either of the Company or of fellow employees.

(b) Carrying concealed weapons, fighting or attempting bodily injury to another, or drunkenness on the Company's premises while on duty.

(c) Illegal possession of intoxicating liquor on the Company's premises while on duty.

(d) Insubordination, neglect or refusal to perform work assigned or using profane or abusive language towards fellow employees or officials of the Company.

(e) Absence from duty without advance notice to the General Foreman (except in case of sickness or causes beyond the control of the employee, for which proof may be

asked by the General Foreman, and if so shall be provided promptly).

(f) Wilful neglect in the case of the Company's property.

(g) Sleeping while on duty.

(h) Harboring infectious diseases that may endanger the health of fellow employees.

13. *Wages*

It is understood that upon the signing of this agreement the Joint Committee shall meet to discuss the wage scale of the plant.

It is agreed where the Joint Committee is in agreement on wage schedules which include increases of the basic wage rate, a joint application, by the Company and the Local Union, to the Regional War Labour Board, will be made for same. If the Joint Committee is not in agreement in the matter of wage schedules it is then agreed, that either party may proceed with their application direct to the Regional War Labour Board in accordance with procedure laid down by that body.

When the wage schedule has received the approval of the said Regional War Labour Board, it shall then be attached to, and become a part of this agreement.

14. *Application of Agreement*

This agreement does not apply to any employee who holds an administrative or advisory position in the Company.

15. *Amendment of Agreement*

The Joint Committee will consider the amendment and improvement of this agreement as the result of their experience in carrying on the work of the Company under same. No such decision shall go into force until it is embodied in a written agreement signed by the Company and by the Elected Representatives.

In witness whereof:

The undersigned have and hereunto set their hands and seal this.....day of.....1942.

Conciliation Work of the Department of Labour During December, 1942

DURING December, some 50 disputes were referred to the Industrial Relations Branch of the Department. In a great number of these cases, and in other disputes carried over from the preceding month, Industrial Relations Officers were instrumental in bringing about an amicable settlement of the matters in dispute. The following statement, however, summarizes only those disputes of major importance and is not intended as a complete review of the activities of the Branch during the month.

Industrial Relations Officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal and Fredericton. The territory of the officers resident in Vancouver comprises British Columbia and Alberta; officers stationed in Winnipeg cover the provinces of Saskatchewan and Manitoba; the officers resident in Toronto confine their activities to Ontario; the officers in Montreal to the Province of Quebec, and the officer resident in Fredericton represents the Department in the Maritime Provinces. The

headquarters of the Industrial Relations Branch and the Director of Industrial Relations and staff are situated in Ottawa.

METAL WORKERS, TORONTO, ONTARIO.—Toward the end of November, the Department received a complaint from the International Representative of the United Automobile Workers of America that several employees had been dismissed by Wilson and Cousins Company, Toronto, allegedly for union activity and membership. The case was referred to Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto, who reported on December 12 that the events leading up to the dismissal of the employees concerned indicated that union affiliation was responsible, at least in part, for these dismissals. As a result of Mr. Ainsborough's efforts, the Company agreed to reinstate all of the employees in question except one who had been in their employ only about two weeks and whose work was not satisfactory. The union agreed to this settlement. The company maintained its denial that union affiliation was the cause of the dismissals, but carried out the terms of the settlement, without prejudice, in order to demonstrate its good faith.

OPTICAL GLASS AND INSTRUMENT WORKERS, LEASIDE, ONT.—By joint consent and by arrangement of the federal Department of Labour, Mr. J. Hutcheon, of the Provincial Conciliation Service supervised a vote among employees of Research Enterprises Ltd., Leaside, Ontario, on December 10. On two questions 5,825 employees voted as follows: In favour of the R. E. L. Employees' Cooperative Union, 1922; in favour of Local No. 1039, United Steelworkers of America, 3338; spoiled ballots, 25. At the end of December negotiations for a collective agreement between the Crown Company and the United Steelworkers of America, were actively proceeding.

STEEL WORKERS, WELLAND, ONTARIO.—In mid-December, a complaint was received by the Department from officials of the United Electrical, Radio and Machine Workers of America alleging that the Atlas Steel Company, Welland, Ontario, was endeavouring to force a "company union" upon its employees, and requesting the appointment of an Industrial Disputes Inquiry Commissioner to investigate the dismissals of several workers whom, it was charged, the Company had dismissed on account of union activity. On behalf of the Department, a Conciliation Officer in the service of the Provincial Government conducted an investigation. He concluded that the dismissals in question were for causes other than union activity and that a Commissioner should not be appointed. The management denied the charges that it was fostering the formation of any union. A move to have the name of the company's Sports Association

changed in order to allow it to act as bargaining agent for the employees failed to carry by a sufficient majority. At the end of the month, efforts were being made to organize an "Atlas Workers' Independent Union," while the complainant Union was also continuing its activities.

ARMATURE WORKERS, BRANTFORD, ONTARIO.—Early in December, an appeal was received from a representative of the United Electrical, Radio and Machine Workers of America for the appointment of an Industrial Disputes Inquiry Commissioner under the provisions of Order in Council, P.C. 4020, to investigate the dismissal of an employee of Robbins and Meyers, Limited, Brantford, Ontario. An Industrial Relations Officer, Mr. J. P. Nicol, was assigned to ascertain whether or not the appointment of a Commissioner was warranted. The officer found that the worker in question was dismissed because of his refusal to abide by Company rules and that the Union's allegations were without foundation in fact. Accordingly, no Commissioner was appointed. The Company expressed willingness to reinstate the workman under certain conditions, but, as there was considerable doubt as to whether there would be more than a few weeks' work for him and he had secured satisfactory employment elsewhere, this course was not pursued.

TRANSPORT WORKERS, MONTREAL, P.Q.—On December 5 a strike involving some 400 drivers and mechanics of the Provincial Transport Company, Montreal, P.Q., was reported to Mr. Raoul Trepanier, Industrial Relations Officer, Montreal. The dispute arose out of the Company hiring three buses from a Levis firm. The owner of the rented buses insisted that his employees operate the vehicles and be paid their usual rates of wages which were lower than those paid by the Provincial Transport Company. The employees, members of Local 1157, Amalgamated Association of Street Electric Railway and Motor Coach Employees of America, protested against this procedure and demanded a closed shop agreement. With the valuable assistance of an officer of the Montreal Trades and Labour Council, Mr. Trepanier persuaded the employees to resume work upon the understanding that the Company would not use the buses in question pending negotiations with a committee of employees. Consideration was given to adoption of a maintenance-of-membership provision in the contract rather than a closed shop, the results of which have not yet been reported. During the course of the brief strike about 100 buses, many of which served war factories and munitions plants in the Montreal zone, were tied up.

COAL HANDLERS, SAINT JOHN, N.B.—On December 14, the Department was advised that

a dispute which threatened to delay the loading of a freighter had arisen between the Parker D. Mitchell Coal Company, Limited, Saint John, N.B., and its employees, members of the Coal Handlers' Union chartered by the International Long Shoremen's Association. The dispute arose over the Company's allegations that the Union's interpretation of its agreement entailed unnecessary employment of coal handlers engaged in discharging cargoes of coal. In the unloading of coal at Saint John, the Union had an understanding with the Company providing for the use of two to four-man crews when clam cranes were used at its own docks. The Union refused to permit the use of two- to four-man crews when the Company entered into a contract to unload coal for the British Coal Corporation, Limited, at public docks. The Union held that its agreement called for the use of 12-man crews, but compromised and permitted 7-man crews to be used in view of the utilization of clam cranes. This situation continued until December when the Company complained to National Selective Service that a crew of seven men was more than sufficient for the operation. Further, the Company requested that, when unloading operations progressed to the point where clam cranes were replaced by half-ton tubs, ton tubs should be used in the interests of more expeditious handling of the cargo. The Union objected to the latter proposal. Mr. H. R. Pettigrove, Industrial Relations Officer, Fredericton, N.B., secured a settlement of the dispute on the basis of a proposal that 7-man crews should be used on clam cranes to break down the coal and when tubs were required, one-ton tubs should be utilized, the Union business agent to designate the number of men required on tubs.

LIME PLANT WORKERS, JOLIETTE, P.Q.—On December 14 the Department was informed of a strike of 180 male employees of the Standard Lime Company, Limited, Joliette, P.Q., which occurred on the evening of December 11. The strike was caused by a deadlock over the terms of an agreement covering wages and working conditions, negotiations for which commenced following a representational vote conducted by the Department of Labour on October 1. (By 145 to 0, the employees had voted in favour of being represented for the purposes of collective bargaining by the Canadian Union of Lime Products Workers, Local No. 1, C.C. of L.). Continuous consultation with the parties to the dispute was maintained by Mr. R. Trepanier, Industrial Relations Officer, Montreal, and on December 19, at a meeting in the Montreal Office of the Industrial Relations Branch, an understanding was reached between representatives of the management and union. Work was resumed on December 20 and on December 21 a collective agreement was signed

providing, among other things, for a union shop, time-and-one-half pay for overtime and a minimum of three hours' pay on reporting for work when none is available, these two latter provisions requiring the approval of the Quebec Regional War Labour Board.

ELECTRIC RAILWAY EMPLOYEES, WINNIPEG, MAN.—On December 10, the Department was advised by the Winnipeg Electric Employees' Federated Council that an unfavourable decision of the Manitoba Regional War Labour Board on an application made on behalf of Winnipeg Electric Company's employees would be rejected by the employees and that a 48-hour strike notice would be given. Mr. James Leslie of the Manitoba Department of Labour was requested to meditate and a joint meeting of representatives of the Company, the employees and the Regional War Labour Board was arranged. A joint application for further consideration was made to the Regional Board by the Company and employees, and additional evidence was presented. On the basis of this new material a wage increase of three cents per hour, retroactive to August 1, 1942, was granted to all employees in the seven departments involved. The award was accepted by ballot of the employees.

LEATHER WORKERS, NEWMARKET, ONT.—On December 16, the Department received a complaint relative to the action of the Davis Leather Company, Limited, in sponsoring and allegedly imposing upon the employees a "Factory Relationship Committee." The protest was made by the International Representative of the Fur and Leather Workers' Union. An investigation conducted by Mr. F. J. Ainsborough, Industrial Relations Officer of the Department indicated that the Employees Relationship Committee was sponsored by the Company. The investigation of the matters in dispute was still proceeding at the end of the month.

GLOVE WORKERS, WINNIPEG, MAN.—On December 18, the Department's Industrial Relations Officer situated at Winnipeg, Mr. Ronald H. Hooper, was requested to assist Local No. 90, International Glove Workers' Union of America, in negotiations with the J. L. Morton and Company, Limited, looking toward the signing of an agreement with the Union on behalf of the company's employees in the glove department. In order to decide the question of whether or not the employees wished to be represented by the Union, a ballot of the employees concerned was taken which resulted in a substantial vote in its favour. Negotiations followed which led up to the signing of an agreement providing for a closed shop, time-and-one-quarter for overtime and initiation of the Union schedule of wage rates.

Union Representation Votes

RESTAURANT WORKERS, CHERRIER, P.Q.—By joint consent of the parties, a vote was conducted on December 2 under Departmental supervision to determine whether or not the employees of Munitions Caterers Ltd., wished to be represented in negotiations with the Company by the Hotel and Restaurant Employees' International Union as bargaining agent. Out of 399 eligible workers, 262 voted in favour of the Union and 7 against. There were 18 spoiled ballots.

MUNITIONS INSPECTORS, CHERRIER, P.Q.—By joint consent a Departmental officer supervised an election on December 4 and 5 among employees of the Inspection Board of the United Kingdom and Canada in order to ascertain if they desired Local No. 1 of the Canadian Association of Inspectors of War Supplies (C.C.L.) to represent them as bargaining agent in negotiations with the employer. There were 1,262 eligible voters, of whom 337 voted in favour of the Union and 189 against. Seventeen of the 543 ballots cast were spoiled.

TOOL MAKERS, WINDSOR, ONT.—On December 2, Industrial Relations Officer H. Perkins supervised, by joint consent of the parties, a ballot to determine if the employees of the Colonial Tool Company wished to bargain collectively through a Windsor local of the U.A.W.A.-C.I.O. The vote resulted in the Union's favour by 85 to 9.

PACKINGHOUSE WORKERS, TORONTO, ONT.—A ballot was taken, under Departmental supervision, on December 16 and 17, among the employees of Swift Canadian Company, Limited, Toronto, Ontario, to determine their bargaining agency. The ballot read as follows: "Do you want to bargain collectively with your employer through P.W.O.C. (Packinghouse Worker Organizing Committee) as your collective bargaining agent." The result of the ballot, announced December 22, was as follows: Voting "Yes," 579; voting "No," 119; spoiled ballots, 1.

METAL WORKERS, WINDSOR, ONT.—On December 17, a vote was conducted among employees of the Canadian Motor Lamp Company, Windsor, to determine the following question: "Do you want to bargain collectively with your employer through a Windsor local of the U.A.W.A.-C.I.O." The result of the ballot was as follows: Voting "Yes," 482; voting "No," 568; spoiled ballots, 10.

MUNITIONS WORKERS, VALLEYFIELD, P.Q.—By joint consent of the parties involved, a ballot was conducted under Departmental supervision on December 16 among employees in the Salaberry Plant of Defence Industries, Limited, to determine their wishes on the following question: "Is it your wish that the Montreal Metal Trades Council (A.F. of L.) act as bargaining agent on your behalf in negotiations with your employer . . .?" The result of the ballot was as follows: Eligible, 2,570; Votes cast, 2,109; voting "Yes," 1,909; voting "No," 146; spoiled ballots, 54.

Strikes and Lockouts in Canada During December, 1942

FOR the month of December the number of strikes reported, the number of workers involved and the time loss in man working days were the lowest recorded for the year. During the month there were 13 strikes, involving 1,434 workers, with a time loss of 6,016 man working days, as compared with 27 strikes in November, involving 20,490 workers and showing a time loss of 103,770 days. In December, 1941, there were nine strikes, involving 5,688 workers with a time loss of 54,545 days. During the month under review one dispute affecting asbestos miners at East Broughton, P.Q., caused about 50 per cent of the time loss.

Two strikes involving 297 workers were carried over from November and 11 commenced during December. Of these 13 strikes 12 were terminated during the month. Two resulted in favour of the workers, six in favour of the employers, one was a compromise settlement and three were indefinite in result.

The following table gives information for November and December, 1942, and December, 1941:—

Date	Number of strikes	Number of employees involved	Time loss in man working days
*December, 1942	13	1,434	6,016
*November, 1942	27	20,490	103,770
December, 1941	9	5,688	54,545

* Preliminary figures.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees are not included in the published record unless ten days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review.

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

At the end of the month one strike was reported as unterminated, namely: asbestos miners at East Broughton, P.Q.

The record does not include minor strikes such as are defined in another paragraph, nor does it include strikes as to which informa-

tion has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. Such strikes are listed in this paragraph for a period up to one year after their removal from the table of current strikes.

STRIKES AND LOCKOUTS IN CANADA DURING DECEMBER, 1942*

Industry, occupation and locality	Number involved		Time loss in man working days	Particulars†
	Establishments	Workers		

(a) Strikes and Lockouts in Progress Prior to December, 1942.

MINING— Asbestos miners and grinders, East Broughton, P.Q.	1	120	3,000	Commenced November 24, 1942; against dismissal of a contractor and his employees; unterminated.
MANUFACTURING— <i>Textiles, Clothing, etc.—</i> Textile factory workers, Montreal, P.Q.	1	177	500	Commenced October 13, 1942; for union recognition and agreement; terminated December 5 (employment conditions no longer affected); return of workers and replacement; in favour of employer.

(b) Strikes and Lockouts Commencing During December, 1942.

MINING— Coal pier loaders, Union Bay, B.C.	1	15	23	Commenced December 4; for increased wages; terminated December 5; conciliation (federal); return of workers pending reference to the National War Labour Board; indefinite.
MANUFACTURING— <i>Boots and Shoes—</i> Sewing machine operators, Toronto, Ont.	1	(a) 10	60	Commenced December 3-9; re timing of new operations; terminated December 15; conciliation (provincial); compromise.
Shoe factory workers, Toronto, Ont.	1	39	351	Commenced December 11; re system of paying union dues (check-off); terminated December 22; conciliation (federal); in favour of employer.
Metal Products— Foundry workers, Brantford, Ont.	1	(b) 75	75	Commenced December 7; for increased wages; terminated December 7; conciliation (federal); return of workers pending reference to the Regional War Labour Board; indefinite.
Munitions factory workers, Toronto, Ont.	1	50	50	Commenced December 8; for reinstatement of a forelady; terminated December 9; return of workers; in favour of employer.
Machine operators, Longueuil, P.Q.	1	41	60	Commenced December 9; against reduced hours of work; terminated December 10; replacement; in favour of employer.
Non-metallic Minerals— Lime-kiln workers, Joliette, P.Q.	1	151	1,057	Commenced December 11; for increased wages and closed shop agreement; terminated December 19; conciliation (federal); in favour of workers.
Miscellaneous— Miscellaneous products workers (metal, felt, etc.), Windsor, Ont.	1	252	126	Commenced December 23; re union agreement; terminated December 23; return of workers; in favour of employer.
CONSTRUCTION— <i>Building and Structures—</i> Carpenters, Cornwall, Ont.	1	120	240	Commenced December 9; for increased wages; terminated December 11; conciliation (federal); in favour of workers.

STRIKES AND LOCKOUTS IN CANADA DURING DECEMBER, 1942*—*Con.*

Industry, occupation and locality	Number involved		Time loss in man working days	Particulars†
	Establishments	Workers		
(b) Strikes and Lockouts Commencing During December, 1942.— <i>Concluded.</i>				
TRANSPORTATION— Local and Highway— Bus drivers and mechanics, Montreal, P.Q.	1	339	339	Commenced December 4; for closed union shop; terminated December 5; conciliation (federal); return of workers pending settlement; indefinite.
SERVICE— Business and Personal— Elevator operators and bell boys, Montreal, P.Q.	1	45	135	Commenced December 9; against working with a certain supervisor; terminated December 11; conciliation (provincial); in favour of employer.

* Preliminary data, based where possible on direct reports from parties involved, in some cases incomplete; subject to revision for the annual review.

† In this table the date of commencement is that on which time loss first occurred, and the date of termination is the last day on which time was lost to an appreciable extent.

(a) 100 indirectly affected. (b) 200 indirectly affected.

Strikes and Lockouts in Great Britain and Other Countries

THE latest available information as to strikes and lockouts in various countries is given in the *LABOUR GAZETTE* from month to month, bringing down to date that given in the May, 1942, issue, in the review of "Strikes and Lockouts in Canada and Other Countries, 1941". The latter included a table summarizing the principal statistics as to strikes and lockouts since 1919, in the various countries for which such figures are available. Statistics given in the annual review and in this article are taken as far as possible from the government publications of the various countries concerned.

Great Britain and Northern Ireland

The British *Ministry of Labour Gazette* publishes statistics dealing with disputes involving stoppages of work and gives some details of the more important ones. An order under the Defence Regulations, effective July 25, 1940, provides for the settlement of disputes and the prevention of strikes and lockouts, as noted in the *LABOUR GAZETTE*, August, 1940, page 760.

The number of disputes beginning in October was 110, and 4 were still in progress from the previous month, making a total of 114 disputes in progress during the month; 58,500 workers were involved in the disputes in progress during the month and the time loss was 377,000 working days.

Of the 110 disputes beginning in October, 36 arose out of demands for increased wages and 33 over other wage questions; 4 over working hours, 14 over questions as to employment of particular classes or persons; 20 over other questions as to working arrangements; and 3 on questions of trade union principle. Final settlements were reached in 91 disputes, of which 19 were settled in favour of workers, 54 in favour of employers and 18 resulted in compromises; in 17 other disputes, work was resumed pending negotiations.

United States

The number of strikes beginning in November was 165, involving 55,000 workers in these new strikes. The time loss for all disputes in progress during the month was 175,000 man-working days.

Collective Agreements and Wage Schedules

Recent Collective Agreements

COLLECTIVE agreements received in the Department are outlined in the *LABOUR GAZETTE* from month to month. It is not always possible because of limitation of space to include all agreements received each month. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of the employers and workers are also included. Verbally accepted agreements are so indicated.

Agreements made obligatory under the Collective Agreement Act in Quebec and a schedule of wages and hours made binding under the Industrial Standards Act of Alberta are summarized in a separate article following this.

Manufacturing: Tobacco and Liquors

MONTREAL, QUEBEC.—DISTILLERS CORPORATION LIMITED AND THE DISTILLERY, RECTIFYING AND WINE WORKERS' INTERNATIONAL UNION OF AMERICA, LOCAL 64.

Agreement to be in effect from July 6, 1942, to July 5, 1943.

All employees must be union members and no discrimination to be shown employees on account of union activity. Hours: for distillery and dry house, 8 per day for 4 days, 12 per day for 2 days; for bottling, women, 8½ per day for 5 days, 5 hours on sixth day; for bottling, men, 9½ per day for 5 days, 5 hours on sixth day; for janitors, miscellaneous labour, warehousemen, coopers and maintenance men, 10 per day for 5 days, 5 hours on sixth day. Overtime at time and one half for work in any day beyond the normal working schedule as outlined above, and over 48 hours in any one week, except watchmen who receive time and one half for work over 60 hours in a week. Wage rates are not stated in the agreement. A one week's vacation with pay for all employees with one year's service. In addition, seven holidays are granted employees, with no deduction in pay. Provision is made for seniority rights and for the settlement of disputes.

Manufacturing: Printing and Publishing

CALGARY, ALBERTA.—A CERTAIN NEWSPAPER AND THE INTERNATIONAL PRINTING PRESSMEN AND ASSISTANTS' UNION, LOCAL 201.

The agreement which came into effect July 8, 1938, and was summarized in the *LABOUR GAZETTE*, December 1938, page 1407, was renewed for the period July 8, 1941, to July 7, 1944, with an increase in wages to 92 cents per hour (an increase of 7 cents per hour); hours are unchanged at 45 per week for day work and 42 for night work.

CALGARY, ALBERTA.—CERTAIN JOB PRINTING SHOPS AND THE INTERNATIONAL PRINTING PRESSMEN AND ASSISTANTS' UNION, LOCAL 201.

Agreement to be in effect from July 20, 1942, to September 30, 1944, and thereafter from year to year, subject to notice. Only union members to be employed. Hours: 44 per week for day work, 42 for night work. Overtime and work on holidays is payable at time and one half for the first three hours and double time thereafter. Weekly wage rates: cylinder and offset journeymen \$44, journeymen for 2 automatic or 3 and 4 hand-fed presses \$40, (\$3 per week extra for night work); cylinder feeders \$15 to \$26 after two years, platen feeders \$10 to \$18 after two years.

Manufacturing: Metal Products

VILLE LA SALLE (MONTREAL), QUEBEC.—PEACOCK BROTHERS LIMITED AND THE INTERNATIONAL ASSOCIATION OF MACHINISTS, LOCAL 631.

Agreement to be in effect from September 1, 1942, to August 31, 1943 (or 1944 if no notice given). This agreement was reached following an application for a board under the Industrial Disputes Investigation Act and the intervention of an Industrial Disputes Inquiry Commissioner, as noted on page 70 of this issue.

Hours: 48 per week. Overtime is payable at time and one half until 12½ hours have been worked on any one shift, and double time thereafter; double time for all work on Sundays and holidays. Minimum hourly wage rates: journeymen machinists and journeymen fitters 80 cents, production workers 52 and 65 cents, learners 45 cents, beginners 40 cents, labourers, sweepers and material truckers 45 cents, apprentices 30 cents to 80 cents, maintenance millwrights 80 cents, millwrights' helpers 52 cents; employees working on shifts other than regular day shifts, 5 cents per hour extra. Provision is made for the seniority rights and the settlement of disputes.

LONGUE POINTE (MONTREAL), QUEBEC.—CANADIAN CAR AND FOUNDRY COMPANY LIMITED, LONGUE POINTE PLANT, AND THE ASSOCIATION OF EMPLOYEES.

Agreement to be in effect from June 13, 1942, to June 12, 1943, and thereafter from year to year, subject to notice. (The report of a board under the Industrial Disputes Investigation Act with reference to this agreement was published in the *LABOUR GAZETTE*, November 1942, page 1258.)

Hours: 48 per week, in either 8 or 9 hour shifts at the option of the Company. Overtime at time and one half, with double time for all work on Sundays and holidays, except for power house employees, enginemen, sprinkler and heating system attendants for whom overtime is payable after 56 hours' work in any week. Minimum hourly wage rates for some classes: checkers 55 to 65 cents, chemical laboratory 40 to 80 cents, clerks 35 to 75 cents, inspectors 65 to 75 cents, labourers 45 cents,

metal pattern machinists 70 to 80 cents, pattern apprentices 35 to 70 cents, power house engineers 55 to 71 cents, tractor operator 60 to 70 cents; cleaning department—boring mill operators 65 and 70 cents, chippers 55 to 65 cents, chainmen 50 to 60 cents, cutters 70 and 75 cents, sandblast 65 to 75 cents, toolmen 60 to 80 cents, welders 65 to 75 cents; electrical department—crane operators 60 to 70 cents, electricians 70 to 80 cents, electricians' apprentices from 35 cents during first year to 70 cents during fifth year, labourers 45 cents; electrical furnace—heat pourers 63 cents, operators 65 cents, scalemen 49 cents, strippers 57 cents; forge department—automatic sandblast loaders 50 to 60 cents, billet chargers 65 cents, burner 70 cents, lathe hand 60 cents, operators 60 to 70 cents, toolman 65 cents; foundry department—chainmen 50 to 60 cents, corefinisher 70 and 75 cents, improver 55 to 65 cents, sand mill operators 50 to 60 cents, mould finisher 70 and 75 cents, apprentices 35 to 70 cents; frog and switch shop—driller 55 and 60 cents, fitter 60 to 70 cents, grinders 55 to 65 cents, punch and shear men 60 to 70 cents, riveter 60 to 70 cents, welder 65 to 75 cents, roll turners 70 to 80 cents; open hearth department—bricklayers 80 to 90 cents, apprentice bricklayers 35 to 70 cents, ladleman 65 and 70 cents, pitman 55 cents, shearmen 45 and 50 cents; machine shop maintenance department—blacksmiths 70 and 75 cents, steamfitters, machinists and millwrights 70 to 80 cents, apprentices to these trades 35 to 70 cents, carpenters and welders 65 and 70 cents; labourers 45 cents. Employees on night shifts to be paid 5 cents per hour extra. All adjustments in wages during the life of this agreement shall be made by a cost of living bonus in accordance with a federal government order in council. Provision is made for seniority rights.

MALTON, ONTARIO.—AN AIRCRAFT MANUFACTURER AND THE INTERNATIONAL ASSOCIATION OF MACHINISTS, LODGE 717.

Agreement to be in effect from December 19, 1942, to December 18, 1943, and thereafter from year to year, subject to notice. The Company agrees to bargain exclusively with this union as long as it represents a majority of the employees covered by this agreement.

Hours: 8 per day, 48 hour week. Overtime at time and one half for the equivalent of a further 8 hour shift and double time thereafter; double time for work on Sundays and holidays except Sunday work which is part of a regular shift. Minimum hourly wage rates: tool and die makers 80 to 95 cents, pattern makers 95 cents, journeymen 80 cents, production workers 40 to 75 cents, inspectors 55 to 85 cents, examiners 52 cents, maintenance journeymen 80 cents, engineers 65 to 85 cents, firemen and crane operators 65 cents, journeymen's helpers 66 cents, labourers 52 cents, oilers 55 to 65 cents. For each shift or part shift worked, involving a trip to the plant, employee to secure an allowance of 25 cents for transportation. Provision is made for seniority rights and for the settlement of disputes.

OWEN SOUND, ONTARIO.—THE WILLIAM KENNEDY AND SONS LTD., AND THE UNITED STEELWORKERS OF AMERICA.

Agreement reached following applications for a board under the Industrial Disputes Investigation Act and later settlement through an Industrial Disputes Inquiry Commissioner (see page 71 of this issue). Agreement to be in effect from November 1, 1942, to October 31,

1943, and thereafter from year to year, subject to notice. The company recognizes the union, and no discrimination to be shown employees either by the company or the union on account of union activity or lack of it.

Hours: 9 per day, 5 on Saturdays, a 50-hour week. Overtime is payable at time and one-half; double time for all work on Sundays and holidays. Wages: A proposed wage scale was agreed upon between the parties and was to be submitted to the Regional War Labour Board and to become effective as directed by the Board. Vacation: A one week's vacation with pay to employees with one year's service. Provision is made for seniority rights and for the settlement of disputes.

WINDSOR, ONTARIO.—AUTO SPECIALTIES MANUFACTURING CO. (CANADA) LTD., AND INTERNATIONAL UNION OF UNITED AUTOMOBILE, AIRCRAFT AND AGRICULTURAL IMPLEMENT WORKERS OF AMERICA, LOCAL 195.

Agreement to be in effect from March 31, 1942, to March 31, 1943, and thereafter from year to year, subject to notice. The Company recognizes the union; no discrimination against any employee on account of union activity, and union members are not to intimidate other employees into membership. Hours and overtime are to continue as prevailing when the agreement was made. While existing legislation remains in effect concerning wages, bonuses, etc., it is agreed that neither party will make application to the Regional or National War Labour Board before the matter is discussed between the parties. Provision is made for seniority rights and for the settlement of disputes.

WINDSOR, ONTARIO.—GAR WOOD INDUSTRIES OF CANADA LTD., AND INTERNATIONAL UNION OF UNITED AUTOMOBILE, AIRCRAFT AND AGRICULTURAL IMPLEMENT WORKERS OF AMERICA, LOCAL 195.

Agreement entered into following a report of a board under the Industrial Disputes Investigation Act (see LABOUR GAZETTE August, 1942, page 890). Agreement to be in effect from October 26, 1942, to October 25, 1943, and until notice given.

The Company recognizes the union as the bargaining agent for hourly-rated employees, but employees are free to join or not join any union or association. Hours: 44 per week with time and one-half for overtime. During the time existing legislation remains in force concerning wages, bonuses, etc., neither party is to make application to the Regional or National War Labour Board until the matter has been discussed between the parties. Provision is made for seniority rights and for the settlement of disputes.

MOOSE JAW, SASKATCHEWAN.—PRAIRIE AIRWAYS LTD., AIRCRAFT DIVISION, AND THE WORKERS' COMMITTEE.

Agreement reached with the assistance of an officer of the Department of Labour. Agreement to be in effect from November 27, 1942, to November 26, 1943, and thereafter subject to 30 days' notice. The Company agrees that the committee will be the sole bargaining agency for employees provided the members represent a majority of the employees.

Hours: 8 per day, a 48-hour week. Overtime is payable at time and one-half. Wage rates to continue as at time the agreement made until a joint application to the National War Labour Board is made and approved. A cost-of-living

bonus to be paid, as fixed by Dominion Government regulations. Vacation: All employees with one year's service to be granted two weeks' vacation without pay and without loss of seniority rights. Provision is made for seniority rights and for the settlement of grievances.

VANCOUVER, B.C.—A CERTAIN FORGINGS PLANT AND THE BLACKSMITHS AND HELPERS' UNION OF CANADA, LOCAL No. 1.

Agreement to be in effect from December 2, 1942, to June 1, 1943. Employees are free to join or not join the union, but the Company agrees to employ only union members if they are available and competent. Hours: 8 per day, 44 per week; on second shift, 8-hour shift including ½-hour lunch period, with pay for 8 hours; for third shift, 7½-hour shift including 25-minute lunch period, for which 8 hours to be paid. Overtime at time and one-half for first four hours and double time thereafter; double time for all work on Sundays and holidays. Minimum hourly basic wages: forgers \$1.10, blacksmiths 90 cents, forgers' helpers 75 cents, blacksmiths' helpers 67 cents. A cost-of-living bonus to be paid according to government decree.

VANCOUVER, B.C.—CERTAIN BOILER WORKS AND ENGINEERING ESTABLISHMENTS AND THE BOILERMAKERS' AND IRON SHIPBUILDERS' UNION OF CANADA, LOCAL No. 1.

Agreements to be in effect from November 16, 1942 (December 10, 1942, for one firm) for the duration of the war and wartime contracts. The company recognizes the union as the sole bargaining agency as long as the union holds a majority of employees in the shop.

Hours: 8 per day, 44 per week for day shift; if a second shift is employed, 7½ hours to be worked with pay for 8 hours, 3½ hours on Saturday, with pay for 4 hours; if a third shift worked, 7 hours to be worked with pay for 8 hours, 3½ hours worked on Saturday, with pay for 4 hours. Overtime: time and one-half for first four hours and double time thereafter; double time for work on Sundays and holidays.

Basic hourly wage rates; acetylene welders and burners, anglesmiths, boilermakers, electric welders, riveters, chippers and caulkers, fitters, drillers and tappers, 90 cents; ironworkers' helpers 67 cents; rivet heaters 68 cents, reamers and countersinkers 70 cents, punch and shearmen, holders-on 76 cents, planer operators 80 cents, flange fire work 95 cents, flange fire helper 72 cents, crane man 70 to 80 cents,

helpers 60 cents for first month and 67 cents thereafter. A cost-of-living bonus to be paid in accordance with the federal government 1941 Order in Council P.C. 8253. Time and one-quarter for all dirty work (outside work only) and work in confined places full of gas.

Manufacturing: Non-Metallic Minerals, Chemicals, Etc.

AMHERSTBURG, ONTARIO.—BRUNNER MOND CANADA, LTD., AND INTERNATIONAL UNION OF UNITED AUTOMOBILE, AIRCRAFT AND AGRICULTURAL IMPLEMENT WORKERS, LOCAL 89.

Agreement reached following application for board under the Industrial Disputes Investigation Act, which application was subsequently withdrawn (see page 71 of this issue). Agreement to be in effect from October 31, 1942 to October 31, 1943, and thereafter from year to year, subject to notice. The Company recognizes the union as the sole bargaining agent for its members, but employees are free to join or not to join any union or association. Hours and overtime: at the time of the signing of the agreement, the regular hours are 8 per day, a 48-hour week, with time and one-half for overtime. Vacation: one week with pay to employees with at least one and not more than five years' service; two weeks to those with five years' service or more. Provision is made for seniority rights and for the settlement of disputes.

Manufacturing: Shipbuilding

SOREL, P.Q.—MARINE INDUSTRIES LTD., AND THE METAL TRADES COUNCIL OF MARINE INDUSTRIES' EMPLOYEES.

Agreement to be in effect from November 25, 1942, to November 24, 1943, and thereafter from year to year, subject to notice. This agreement was reached following an application for a board under the Industrial Disputes Investigation Act and its subsequent withdrawal (see page 71 of this issue). No discrimination against employees on account of union affiliation. Hours for both day and night shifts: 48 per week; double time for work on Sundays and holidays. Wage rates are as provided in the federal government 1942 Order in Council 629 (see LABOUR GAZETTE, May, 1942, page 558). A cost-of-living bonus to be paid in accordance with federal government Orders in Council. Provision is made for seniority rights and for the settlement of grievances.

Collective Agreement Act, Quebec

Recent Proceedings Under the Act

THE Collective Agreement Act was assented to June 20, 1940, and was summarized in the LABOUR GAZETTE, August, 1940, page 812. It replaces the Collective Labour Agreements Act, 1938. Agreements and regulations under the "Collective Labour Agreements Act," the "Act respecting Workmen's Wages" and under the original Act, "The Collective Labour Agreements Extension Act, 1934," continue in effect for the period for which they were made or have been renewed or amended. Under the

Collective Agreement Act, any party to a collective agreement made between the representatives of an association of employees and the representatives of an association of employers or one or more employers may apply to the Lieutenant-Governor in Council through the provincial Minister of Labour to have those terms of such agreements which govern wages, hours of labour, apprenticeship, classification of operations, determination of classes of employers and employees and all

such provisions as the Lieutenant-Governor in Council may deem in conformity with the spirit of the Act made obligatory on all employers and employees in the trade, industry, commerce or occupation throughout the province or within the district determined in the agreement. Notice of such application is published and thirty days is then allowed for filing of objections and the Minister may hold an inquiry. After this period, if the Minister considers that the terms of the agreement "have acquired a preponderant significance and importance" and that it is advisable with due regard to economic conditions, an Order in Council may be passed granting the application and making the provisions of the agreement obligatory from the date the Order in Council is adopted. The Order in Council may be amended or revoked by a further Order in Council on the recommendation of the Minister of Labour after consulting the parties to the agreement and after the required notice has been published in the *Quebec Official Gazette*. A parity committee (formerly called a joint committee) must be formed by the parties to an agreement made obligatory under this Act and the Minister may add to such committee representatives nominated by employers and employees not parties to the agreement. The committee is to make its own by-laws and when these are approved by Order in Council and noted in the *Quebec Official Gazette*, the committee is constituted a corporation. A parity committee may require certificates of competency from workers within the scope of the agreement and such by-laws must be approved by Order in Council and published in the *Quebec Official Gazette*. Proceedings under the Collective Labour Agreements Extension Act were summarized in the *LABOUR GAZETTE* from June, 1934, to July, 1937. Proceedings under the Workmen's Wages Act were noted in the issues from July, 1937, to April, 1938. Proceedings under the Collective Labour Agreements Act are noted in the issues from May, 1938, to July, 1940. Proceedings under the Collective Agreement Act are noted in the issues beginning August, 1940.

Recent proceedings under the Act include the extension of a new agreement for the fur industry (wholesale) at Montreal and the amendment or extension of the period of eleven agreements, all of which are noted below. A request for the extension of a new agreement for the sheet metal industry at Montreal was published in the *Quebec Official Gazette*, December 5, and for a new agreement in the clock and watch making and repairing industry at Montreal, in the issue of December 19. Requests for the amend-

ment of the agreements for building trades at Sorel, St. John and Iberville, St. Jerome, Quebec, Hull, Joliette, Three Rivers, St. Hyacinthe and Chicoutimi, were published in the *Quebec Official Gazette*, December 5; for the amendment of the agreements for barbers at Hull, building trades at Hull and building trades at Sherbrooke, in the issue of December 12; for building trades at Joliette, in the issue of December 19.

In addition, Orders in Canada were published in the *Quebec Official Gazette* during December, approving or amending the constitution of certain parity committees, and others approving the levy of assessments, or amending previous Orders in Council in this connection, for certain parity committees.

Manufacturing: Fur and Leather Products

FUR MANUFACTURING (WHOLESALE), MONTREAL.

An Order in Council, dated November 27, and published in the *Quebec Official Gazette*, December 5, extended the term of this agreement (*LABOUR GAZETTE*, September, 1940, page 970; May, 1942, page 630, August, page 978, September, page 1097, and November, page 1348) to December 31, 1943.

A later Order in Council dated December 4, and published in the December 12 issue, makes obligatory the terms of a new agreement between the Fur Manufacturers' Guild, Incorporated, other employers and the International Fur Workers' Union, Locals 66 and 67, the agreement to be in effect from December 12, 1942 to April 30, 1944. This agreement is similar to the one previously in effect, as summarized in the *LABOUR GAZETTE*, September, 1940, page 970, with some exceptions:

After two years' apprenticeship, apprentices to be third class operators and paid at \$12.50 per week until promoted to second class operators. Retailers are permitted, for the duration of the war only, to have finishing done at home, provided that all finishers in the shop are working and that the names of employees doing work at home are submitted to the parity committee.

In accordance with a decision of the Regional War Labour Board, a cost-of-living bonus is to be paid and is to be varied in accordance with the general orders of the National War Labour Board, the first bonus to be based on the rise in the index number of the cost of living from July, 1940, to July, 1942 (a rise of 12.2 points).

FINE GLOVE MANUFACTURING INDUSTRY, PROVINCE OF QUEBEC.

An Order in Council, dated December 17, and published in the *Quebec Official Gazette*, December 26, extends the term of this agreement (*LABOUR GAZETTE*, April, 1941, page 472, July, page 854, October page 1314; January, 1942, page 110) to March 1, 1943.

WORK GLOVE CUTTERS, PROVINCE OF QUEBEC.

An Order in Council, dated December 17, and published in the *Quebec Official Gazette*, December 26, extends the term of this agree-

ment (LABOUR GAZETTE, March, 1940, page 282; March, 1941, page 333 and October, page 1314) to March 1, 1943.

WORK GLOVE BLOCKERS AND OPERATORS, PROVINCE OF QUEBEC.

An Order in Council, dated December 17, and published in the *Quebec Official Gazette*, December 26, extends the term of this agreement (LABOUR GAZETTE, September, 1940, page 971; March, 1941, page 333, October, page 1314; January, 1942, page 110) to March 1, 1943.

Manufacturing: Textiles and Clothing

TEXTILE AND JUTE BAG MANUFACTURING INDUSTRY, MONTREAL.

An Order in Council, dated December 17, and published in the *Quebec Official Gazette*, December 26, extends the term of this agreement (LABOUR GAZETTE, May, 1939, page 527; March, 1940, page 282, June, page 608; February, 1941, page 183; January, 1942, page 110) to December 31, 1943.

Manufacturing: Pulp, Paper and Paper Products

PAPER BOX (CORRUGATED PAPER) MANUFACTURING, PROVINCE OF QUEBEC.

An Order in Council, dated November 27, and published in the *Quebec Official Gazette*, December 5, amends the previous Orders in Council for this industry (LABOUR GAZETTE, April, 1942, page 483, and September, page 1097) by substituting a new wage scale which in some cases is the same and in others 5 cents per hour higher than the previous scale.

Minimum hourly rates for some classes of male employees after 6 months' experience: corrugating machine—operators 55 cents, other operators 45 and 50 cents, helpers 40 cents; printing machine—operators 50 cents, assistants 40 cents, box slotting machine operators 45 cents; box and sheet slitting machine operators 45 cents; operators of flap cutting machine, bar scorer machine and taping machine, 40 cents; stitching machine operators, die press machine operators, 35 cents; feeders and tailers for all machines 35 cents, general employees 32 cents; roll handlers 40 cents, shippers 45 cents, truck drivers 40 cents, maintenance machinists and millwrights 65 cents, boiler room stationary enginemen 49½ to 66 cents, firemen 38½ cents. Minimum hourly rates for some classes of female employees, after 6 months' service: operators of bar scorer machine, taping machine, stitching machine, partition slotting machine, feeders and tailers and box folding 22 cents, general employees 22 cents. The minimum hourly average wage for male employees is 40 cents and of female employees 28 cents, and the minimum average for both sexes, 32 cents.

PAPER BOX (UNCORRUGATED PAPER) MANUFACTURING, PROVINCE OF QUEBEC.

An Order in Council, dated December 4, and published in the *Quebec Official Gazette*, December 12, amends the previous Orders in Council for this industry (LABOUR GAZETTE, April, 1939, page 528; September, page 950; May, 1940, page 496; December, page 1310; April, 1941, page 473; June, page 704, and December, page 1572). Overtime is payable at time and one-half for all work over 55 hours in a week except for firemen and enginemen for whom time and one-half is payable only after 60 hours in a week. For all work on holidays, time and one-half is payable in zone I, double time in zone II.

Manufacturing: Printing and Publishing

PRINTING TRADES, MONTREAL.

An Order in Council, dated December 12, and published in the *Quebec Official Gazette*, December 19, extends the term of this agreement (LABOUR GAZETTE, June, 1941, page 704; April, 1938, page 452; June, 1936, page 546; December, page 1181; October, 1939, page 1065; February, 1941, page 183; April, page 473; December, page 1572; May, 1942, page 631; July, page 856, and November, page 1348) to March 31, 1943.

Manufacturing: Metal Products

CAN AND METAL UTENSIL MANUFACTURING, PROVINCE OF QUEBEC.

An Order in Council, dated December 12, and published in the *Quebec Official Gazette*, December 19, extends the term of this agreement (LABOUR GAZETTE, May, 1940, page 496; June, page 608; July, page 730; January, 1941, page 70, May, page 593; January, 1942, page 110) to December 31, 1943.

Construction: Buildings and Structures

BUILDING TRADES, ST. HYACINTHE.

An Order in Council, dated December 17, and published in the *Quebec Official Gazette*, December 26, amends the previous Orders in Council for these trades (LABOUR GAZETTE, August, 1940, page 867; December, page 1311; March, 1941, page 334; September, page 1160; September, 1942, page 1097). Demolishers are added to the wage scale at 40 cents per hour in zone I and 30 cents in zone II.

Service: Business and Personal

BARBERS AND HAIRDRESSERS, JOLIETTE.—

An Order in Council, dated November 27, and published in the *Quebec Official Gazette*, December 5, amends the previous Orders in Council for these trades (LABOUR GAZETTE, November, 1941, page 1426, and September, 1942, page 1098) by making some change in the arrangement of hours shops may be open.

Industrial Standards Acts, Etc.

Schedule of Wages and Hours Recently Approved by Provincial Order in Council, in Alberta

IN six provinces—Ontario, Alberta, Nova Scotia, Saskatchewan, New Brunswick and Manitoba—legislation provides that following a petition from representatives of employers or employees in any (or specified) industries, the provincial Minister charged with the administration of the Act may himself, or through a government official delegated by him, call a conference of representatives of employers and employees. This conference is for the purpose of investigating and considering the conditions of labour in the industry and of negotiating minimum rates of wages and maximum hours of work. A schedule of wages and hours of labour drawn up at such a conference, if the Minister considers that it has been agreed to by a proper and sufficient representation of employers and employees, may on his recommendation be made binding by Order in Council in all the zones designated by the Minister. The Minister may also establish an advisory committee for every zone to which a schedule applies to assist in carrying out the provisions of the Act and the regulations. References to the

summaries of these Acts and of amendments to them are given in the *LABOUR GAZETTE*, October, 1940, page 1077. A schedule of wages and hours recently made binding by Order in Council under these Acts are summarized below.

Alberta

BAKERS, CALGARY.

An Order in Council, dated December 28, and published in *The Alberta Gazette*, December 31, makes binding the terms of a new schedule of wages and hours for the baking industry in the Calgary zone, to be effective from January 10, 1943, for twelve months or thereafter during pleasure. This schedule is similar to the one previously in effect and summarized in the *LABOUR GAZETTE*, April, 1941, page 475 and January, 1940, page 71, with certain exceptions.

The Advisory Committee may fix a minimum rate lower than in this schedule for inexperienced females and males doing work formerly done by experienced employees. Indenturing of apprentices is not required during the war and three months after. Employees with over six months or less than one year's service may have one day's vacation for every month's service after six months.

Trade Union Membership in Great Britain

The publication *Labour Research* provides recent figures on Trade Union Membership in Great Britain which are of interest.

The increase in trade union membership from December, 1938, to December, 1941, is shown by the annual statistical statement submitted to the Trade Union Congress:

Membership in 000's.	
Year to December.	
	1938 1941
Men	4,116 4,509
Women	553 923
Total	4,669 5,432

This increase of 763,000, or roughly one in six, partly reflects the steadier employment due to the war; but it is also the fact that many who were previously non-unionists have felt the need of trade union organization to protect their interests in dealing with changing wartime conditions and regulations like the Essential Work and Fire-watching Orders.

Despite the effects of the call-up, it appears likely that the total numbers employed in industry have been kept roughly at the pre-war

level up to 1941, the numbers called up being roughly balanced by the numbers of women and fewer unemployed drawn into industry. The percentage organized in unions has therefore increased.

At the end of 1941 trade union membership represented somewhere about one-third of the wage and salary earning population, excluding the Civil Servants whose unions are forbidden under the Trade Union Act (1927) to affiliate to Congress.

The 1942 membership affiliated to Congress is the highest since 1921, though it still falls a million short of the peak membership of the 1920 Congress (which included some 75,000 Government employees and some teachers).

	No. of Members Represented at T.U.C.
1913	2,232,000
1920	6,505,482
1929	3,673,144
1934	3,294,581
1939	4,669,186
1942	5,432,644

Prices and Price Control

Price Control in Canada During December, 1942

Rationing of Butter—Reduction of Retail Food Prices—Action to Protect Tenants—Conservation and Simplification Activities of Wartime Prices and Trade Board

THE outstanding developments reported by the Wartime Prices and Trade Board during the month of December were:—

- (1) Consumer rationing of butter;
- (2) Price reduction with respect to tea, coffee, milk, oranges and butter;
- (3) Further price orders covering potatoes, eggs, bananas, figs, etc.
- (4) Rental regulations revised regarding new housing accommodation, time of notices to vacate and fixing of room rental rates;
- (5) Limitation on production of newsprint and plan for compensation within the industry; rationing of print paper;
- (6) Further simplification and conservation orders covering various items of clothing, jewellery and pottery ware and the packaging of certain products;
- (7) Further restrictions on the use and repair of automotive vehicles.

Rationing of Butter

Consumer rationing of butter became necessary toward the latter part of the month in order to ensure an equitable distribution of supplies. Acute shortages of butter had developed in certain areas owing to excessive consumer buying while stocks in general had been reduced by greatly increased consumption. The rationing plan came into effect on December 21 for consumers of butter and on December 28 for suppliers and producers. The ration was fixed at one-half pound per person per week.

The mechanics of the butter rationing system follow closely that of sugar, tea and coffee, the chief difference being that in the case of butter, ration coupons have an expiry date for use both by consumers and retailers. With the exception of coupons Nos. 1 and 2, the butter ration coupons become good in pairs on specified dates and cease to be valid two weeks later. Retailers supplying household consumers may use the coupons to replace their stocks for two weeks after the date on which they expire for consumers or if using them to support a replacement certificate, for three weeks. (Replacement certificates are used by retailers or whole-

salers when purchasing quantities in excess of one thousand pounds.) Householders owning surplus stocks of butter, that is, amounts over one pound per person, were required to report such supplies and surrender coupons to cover the surplus.

Public caterers and operators of institutions will be allotted quotas by the Administrator of Consumer Rationing for the period commencing March 1 and after this date they may purchase butter from only one registered supplier. In the meantime, only a signed requisition is necessary in purchasing butter. Public caterers are not allowed to serve more than one-third ounce of butter at a sitting and may serve it only on the customer's request. Operators of institutions must collect coupons from their residents once a week and forward them monthly to the Administrator. Records of purchase and use are to be kept and furnished on request.

Farmers producing dairy butter are required to collect coupons, permits or requisitions on all sales to consumers. They are not to use their own coupons to buy butter for home consumption unless the amount of their own butter which they consume is less than the ration allowance. Farmers may continue selling butter if they register by January 31 with their local ration board as producers of dairy butter. Producers of creamery butter are required to keep records of production, sales and transfers of butter and to collect ration documents on all sales. Transfer of butter by wholesalers or retailers requires special authorization. (Board Order No. 220, Dec. 15, effective Dec. 21.)

Price Reduction

Butter.—At the same time that butter rationing was introduced, maximum prices of creamery butter were reduced and provision made against any further increase. Under the former policy which allowed for seasonal increases in prices to wholesalers, increases had taken place on November 1 and December 1 and these had been reflected in advances in retail prices. On December 21 the maximum wholesale price of butter was reduced to the

level of October 30 (except in the Maritimes), and a week later, a corresponding reduction took place in maximum retail prices. In the Maritimes the maximum prices are $\frac{1}{2}$ cent above the October maxima. There are to be no increases above this level. Arrangements have been made to compensate the producer during the period (November to April) when he would otherwise have received the benefit of the seasonal price increases previously allowed. This will be done by increasing the subsidy, paid through the creameries to producers of butter fat, from 6 cents to 10 cents per pound. The increased subsidy will be paid during the period December 21, 1942, to April 30, 1943, after which it will revert to 6 cents. (Board Order No. 221, Dec. 15; effective Dec. 21.)

Milk.—During the month the prices of milk, oranges, tea and coffee were reduced in accordance with the government's policy of stabilizing the general cost of living. (LABOUR GAZETTE, Dec. 1942, p. 1417.) The reduction, effective December 16, in the price of all fluid milk sold to consumers amounted to 8 cents per gallon, or 2 cents per quart, etc., when sold at wholesale or retail. Sellers are to be reimbursed by the Commodity Prices Stabilization Corporation. The price reduction does not apply to sales by primary producers to distributors or manufacturers or to sales at retail in half-pint containers (Board Order No. 195, Dec. 11; effective Dec. 16, amending No. 124.)

Oranges.—In the case of oranges, a specified reduction or specific maximum was not set owing to the variety of grades and differences in cost to distributors. The method adopted was to remove the seasonal import duty and the 10 per cent war exchange tax on oranges and to limit distributors' markups. Provision has also been made to offset advances in producers' prices for the new crop by means of subsidy. Maximum prices are to be based on the actual price paid plus any transportation charges, exchange, brokerage charges, etc., actually borne by the distributors, and plus a normal basic period markup limited to 50 cents per case for wholesalers and 20 per cent of selling price for retailers. The purpose of the Order is to reduce prices to about the level of September-October, 1941. (Board Order No. 215, Dec. 7.)

Tea and Coffee.—Maximum prices for tea were reduced by 10 cents per pound, for roasted coffee by 4 cents per pound and for green coffee by $3\frac{1}{4}$ cents per pound, with appropriate reductions for smaller quantities. The reduction takes place all along the line of distribution and in cases where wholesale distributors of tea were allowed a rebate or discount of

7 per cent this must now be increased to 8 per cent. The original cost to suppliers will be kept at a level appropriate to these reduced selling prices by C.P.S.C. which controls all supplies of tea and coffee. All retailers, wholesalers and others who had stocks of tea and coffee were required to take an inventory as at the close of business on December 5, 1942, and make returns to C.P.S.C. as a basis for determining compensation for price reductions on these stocks. (Tea—Board Order No. 216; Coffee—Board Order No. 217, Dec. 7.)

New Price Schedules

Potatoes.—Specific price ceilings were established for potatoes, replacing individual ceilings which had been set back by a previous Order (November 11) at the levels of November 1-10, 1942. The new price regulations divide Canada into three marketing areas and fix maximum prices for the recognized kinds and grades of potatoes generally sold in each area. Maximum wholesale prices are specified in the Order and maximum retail prices are controlled by limiting the markup. Limited markups also apply to sales by primary producers to consumers. Seasonal price increases are allowed for the balance of the present crop year beginning in January and continuing to June to cover storage losses due to waste and shrinkage. In issuing the order the Board stated that while it regarded the seasonal increases indicated in the Order necessary to storers and producers, it might find it necessary in order to prevent the full effect of these increases from being reflected in prices to consumers, to take further action through Wartime Food Corporation Limited or some other agency. (Board Order No. 219, Dec. 15.)

Eggs.—Specific price differentials for various grades of eggs have been set by an amending Order of the Board. Under the original Order (Board Order No. 178), maximum wholesale prices were specified for Grade "A" eggs in eleven principal Canadian markets, while prices for other grades were to bear their normal relation. Under the amendment, specific price differentials have been fixed for each of the commonly marketed grades and sub-grades in relation to the maximum established for Grade "A" eggs. The method for determining retail prices remains unchanged, the retailer's markup being limited to his basic period markup or to 20 per cent of selling price or 8 cents per dozen, whichever is lower. (Board Order No. 212, Nov. 23.)

Bananas.—Maximum wholesale and retail prices have been fixed for bananas; the maximum retail prices per lb. are 14 cents in

Eastern Canada and 15 cents in other areas. These maxima are somewhat below the prices which have been recently prevailing, the reduction having been made possible by the Government's removal, effective December 16, of the customs duty, war exchange tax and special excise tax. Imports of bananas have been very light for some time owing to transportation difficulties but there has been a fairly constant flow to the West and several shipments have reached Montreal recently. (Board Order No. 218, Dec. 15.)

Beef.—The new schedule of maximum wholesale prices for cuts of beef for the period December 24, 1942, to February 10, 1943, inclusive, gives effect to the advance of 50 cents per cwt. in the price of beef carcasses authorized for this period under Board Order No. 194. This advance was tempered by a reduction in the cutting charges allowed to wholesale distributors of beef, which is reflected in the new schedule. (A-529, Dec. 22.)

Macaroni Products.—Markups of wholesalers and retailers were limited on sales of packaged macaroni products. This is one of the products in a list of grocery items for which manufacturers were required in April, 1942, to reduce their basic period prices to the level of June, 1941, in order that wholesale and retail prices might be maintained at basic period levels. The new Order will tend to level off the wide range of markups now existing and take care of wholesalers, particularly in Western Canada, whose maximum selling prices had been based on contracts entered into prior to June, 1941. (A-517, Dec. 12.)

Figs.—It has been necessary to fix prices for the different varieties and grades of California figs now coming on the market, since, in many instances, no basic period ceiling prices were established. An embargo was placed on the importation of figs from non-sterling countries in 1940, and this has only recently been lifted. The schedule lists f.o.b. California prices in terms of U.S. funds. To this cost, expressed in Canadian funds, may be added transportation, bank charges, customs duty, etc., and a markup not greater than the basic period markup and limited to 12 per cent of selling price for wholesalers and 30 per cent for retailers. (A-527, Dec. 18.)

Cashew nuts.—Maximum prices were also set on shelled cashew nuts. Prices are to be based on the maximum specified for importers and the principle of limited markups is applied as in the September Order governing prices of Brazil nuts. Allowances for storage and maximum processing charges are also specified. (A-518, Dec. 12.)

Fuelwood Prices.—Maximum prices were set for fuelwood in the province of Saskatchewan. On sales to dealers, maximum prices were specified f.o.b. railway cars or trucks at the point nearest the place of cutting. On sales to consumers, prices were increased by specific amounts over base period prices. (F-55, Dec. 9.) The Order applying to the town of Banff, Alta., was replaced by another which substituted bushwood for fuelwood and set the maximum price of mill wood at the basic period price. (F-57, Dec. 24.)

A general readjustment of fuelwood price schedules was put into effect for the whole of Southern Ontario and the principle of specific maximum roadside prices was dropped in order to encourage production. The order covering Central and Southwestern Ontario replaces former orders F-27, F-28 and F-35. Prices are progressively higher proceeding from the northern to the southern Ontario area, with the schedules for towns and cities within each area set at a level higher than that for the counties. (F-58, Dec. 29.) Another order applies to the Eastern Ontario counties and a portion of Quebec adjacent thereto. This area was divided into two districts with different price levels, and schedules were also given for several of the larger cities and towns and for the Ottawa-Hull area. (F-59, Dec. 29.)

Import Policy

Cotton and artificial silk fabrics in the higher priced ranges were added to the list of articles which will be subsidized only in cases approved in advance by C.P.S.C. Several finished textile articles were added to the list of goods completely ineligible for subsidy. These included: hats; manufactures of pure linen, tablecloths, towels, etc.; coats, suits or dresses of woollen or artificial silk fabrics; and a number of other articles. The Board's objective is to avoid subsidizing the importation of luxury or semi-luxury items while ensuring that an adequate supply of essential fabrics and textile manufactures continues to be available at ceiling prices. (Amendment effective Dec. 17.)

Rentals

Further action was taken by the Board to protect tenants against unfair eviction and against transactions designed to defeat maximum rental provisions. A 12 months' notice to vacate must now be given to a tenant in the case where a person buys accommodation after December 10, 1942, and seeks to obtain possession of it for his personal occupation. A landlord may no longer give a tenant notice to vacate for the sole reason of needing the

accommodation for occupation by a child, parent, dependent or employee. The order also provides that maximum rentals for any accommodation not previously rented or for accommodation which has been converted into two or more units must be fixed by a rentals committee either before making a lease or within 30 days after making it. (Board Order No. 211, Dec. 1, amending No. 108.)

A general order was passed outlining a system for controlling the rates charged for rooming accommodation. The regulations will apply to areas which may be designated from time to time by the Rentals Administrators. They set out the procedure to be followed in making application for a maximum rate card and the general rules which apply to rates according to the period of occupation and the number of people in the room. The Local Examiner in these areas will have power on his own motion or on application to fix or vary maximum rates in accordance with those generally prevailing on October 11, 1941. (A-488, Nov. 22.)

The Real Property Administrator added a number of other "congested areas," Winnipeg, Man., Sudbury, Ont., and several in B.C., to the list of municipalities in which barriers to subletting accommodation were suspended by Board Order No. 200. (A-520, Dec. 14.)

Conservation and Simplification

The Newsprint Industry.—The scheme for curtailment of the newsprint industry initiated in October, 1942, was extended during the past month with regard to 1943 production. During any quarterly period of 1943 no manufacturer may deliver to any persons in Canada or the United States a quantity of newsprint representing more than 90 per cent of three times his average monthly deliveries for the period October 1, 1941, to March 31, 1942. Manufacturers are not to include newsprint paper made to the order of other manufacturers in calculating this amount. In addition the order prohibits delivery or acceptance of newsprint in any quantity which would increase the buyer's stock beyond 75 days' supply, on the basis of current rate of consumption or sale. However, one car load or less may be accepted as long as it does not bring the buyer's inventory above two car loads. Manufacturers must continue to supply 1942 customers to the best possible extent under the terms of the order and on the basis of substantially equivalent treatment of customers. (A-547, Dec. 30, replacing A-454.)

Details of the *compensation plan for allocated newsprint* were announced. Each of the 25 newsprint manufacturers in Canada is assigned an established percentage of total

production which remains constant until changed by the Administrator of Newsprint. These percentages were determined by the Administrator after consultation with the industry's Advisory Committee. When in any calendar month a manufacturer invoices to his customers and to other manufacturers a quantity of newsprint manufactured by him in excess of his quota of the total output for that month, he will be required to remit a proportionate sum to the fund established by C.P.S.C. Conversely if he invoices an amount short of his quota, he is to receive from the fund a corresponding sum.

The order sets out the formula for determining contributions to and payments from the fund. Generally speaking, the compensation represents the difference between the cost of the extra tonnage and the revenue received from it. The Administrator is authorized to consider, in establishing amounts to be paid to or received by a manufacturer, gains or losses from other products manufactured on newsprint machines as compared to newsprint, and also any reduction in costs occasioned by operation at a rate below the established percentage.

With regard to newsprint which the Administrator orders transferred from one manufacturer to another for production, the manufacturer who produces or ships it is to invoice it at full price to the transferring mill which is to pay on or before the 25th of the month following the invoice date. Payments to adjust basic mill net price between the mills are to be made through C.P.S.C. (Board Order No. 222, Dec. 30.)

In line with this restricted production, *the distribution of print paper to newspapers and periodicals in Canada* has been rationed. The rationing order which went into effect January 1 parallels similar action taken in the United States and carries out plans forecast last October. To ensure equitable distribution of paper the rationing order authorizes a system of permits and quotas to be issued by the Administrator of publishing, printing and allied industries. Permits are hereafter required for the purchase and use of print paper for the publication of any newspaper or periodical. In determining quotas, the Administrator will take into consideration (1) overall supply and distribution factors, (2) use of paper and circulation changes prior to November 1, 1942, and (3) minimum requirements, total volume of use and potential economies. Several classifications of publications are exempted from the Order, including those published by the various governments, and by religious, educational, political, labour or other non-profit organizations, provided that advertising does not figure largely either in pur-

pose for publishing or in revenue. (Board Order No. 223, Dec. 30.)

Motor vehicle repairs, deliveries, etc.—A preference rating based in the use of vehicles has been established for *motor vehicle repairs*. The classes are roughly, (1) military, (2) commercial and those vehicles for which a gasoline ration of over "AA" has been issued, and (3) other vehicles. Repairers must give preference according to the classification of the vehicle and are to allocate available labour accordingly. Records of cost, time expended, etc., must be kept regarding all vehicles repaired. (A-528, Dec. 21.)

An amendment to the order on *wholesale deliveries* brought the delivery of automotive parts to repairers within the restrictions limiting deliveries to one a day. In addition, orders unless placed prior to 10 a.m. may not be delivered on the day ordered. (A-508, Dec. 7, amending A-292.)

In order to conserve automotive equipment, a permit system has been applied to the *trucking of milk and cream*. A general permit was granted for the month of January, but in order to continue operations all persons engaged in transporting milk and cream by automotive vehicles are required to make application for a specific permit by January 31, 1943. Granting of these permits comes under the Administrator of Services who may specify terms as to routes, rates, frequency and method of collection, etc. He has power also to cancel or vary any permit. To assist him in dealing with applications the Administrator may establish Provincial or Regional Advisory Committees. (A-533, Dec. 29.)

Clothing.—Amendments were made in several of the previous simplification orders respecting clothing. The order regarding the manufacture of *coats, suits and sport jackets for women, misses and children* was amended to bring the restrictions and eliminations into line with those applicable to other women's wear by a recent order. Specifically, certain kinds of formal wear and sports wear were eliminated and restrictions placed on sleeve styles and other features. Adjustments were made in the maximum measurements allowed for certain garments and measurements are now given for all size ranges in misses' and women's sizes. (A-525, Dec. 18, replacing, in part, A-276.) An accompanying order amended the restrictions regarding styling, sale and delivery. Manufacturers of these garments are not to make new cutting patterns and are to reduce styles to 50 per cent of the previous seasons. This number is not to exceed 50 styles for any one season and at least 20 per cent of the styles shown must be duplicates

of those shown for Fall, 1942 and Spring, 1943. After January 1, 1943 cost sheets must be approved by the Administrators before garments are offered for sale. (A-526, Dec. 18, replacing, in part, A-276.)

Recent orders applicable to *women's, misses' and children's wear* were amended by clauses allowing the Administrator to grant exemptions in special cases of individual hardship. The one concerned with manufacturing included certain clarifications and additional restrictions in the schedules. (A-511, amending A-475 and A-512 amending A-474, Dec. 9.)

Manufacturers of *uniforms* may not put pleats in any officer's service trousers and in making service dress jackets for army officers and W.O.'s Cl. I must conform to the routine order specifications as to pockets, buttons, sleeves, etc. Corresponding with the saving in material and labour, manufacturers and retailers are to reduce their maximum prices for jackets by \$1 and \$1.50 respectively. (A-515, Dec. 11.) Outside the domestic field an order was passed prohibiting the use of *cotton duck* or similar cotton fabrics to cover pipes, except where such a covering is specified in a contract with the Department of Munitions and Supply or its agencies. (A-532, Dec. 24.)

Also in the clothing and apparel field were amendments to orders on *leather footwear and ladies' handbags*. A wider retail purchasing range for footwear is given by allowing retailers to purchase outside of Canada and sell footwear not complying with the terms of the Order. The limitations regarding styles of heels of women's shoes have been lessened and restrictions applying to minimum orders have been extended. (A-524, Dec. 18, amending A-478.) Further limitations have been placed on *hangbag* styles applying now to higher priced styles as well as to the lower priced ranges. Manufacturers must file statements not later than 10 days before each style season begins, showing proposed styles and selling prices. Only approved styles may be sold and the prices approved may not be increased. (A-536, Dec. 29, replacing A-184.)

Jewellery.—The jewellery order restricting the range of designs and the use of certain metals in the manufacture of jewellery was designed particularly to conserve metals and to enable the industry to operate with present manpower. The kinds of costume jewellery and toileware and the sizes and designs of flatware which may be manufactured are also limited. Manufacturers are to file for approval statements showing designs proposed to be continued. (A-507, Dec. 7.)

Pottery ware.—Specifications have been laid down regarding types and sizes of pottery ware which may be manufactured after January 2. Certain usages, such as "decorating" and stamping of the crest or name of the user are prohibited as well as the acquisition and use of new mould designs. In addition, manufacturers may in the future only accept orders which have been submitted by the purchaser for the Co-ordinator's approval (A-521, Dec. 17.)

Electric Cords, Etc.—A more comprehensive order was issued regarding *flexible electric cords*, giving specifications for types, sizes and insulation to be complied with in manufacturing. (A-510, Dec. 8, amending A-282.) The quota on the production of *portable lamps* on a 1941 basis was extended on the same basis for the following 3 months' period, but an increase in the production of lamp shades is allowed compared to the last 6 months of 1942. (A-537, Dec. 30, amending A-413.)

Typewriters and other Metal-using Products.—In order to retain control over a larger number of *typewriters*, as no new machines are being made, the provision allowing unrestricted sale of typewriters more than 10 years old was changed to read typewriters "manufactured new prior to January 1, 1933," (A-534, Dec. 26, amending A-194, as amended.)

Listed specifications as to types and sizes were given for the manufacture of *portable chain hoists and trolleys*. (A-506, Dec. 7.)

An order regarding *heating specialties for hot water and steam heating systems* prohibited the addition of any new kind, model, quality or size, to the lines manufactured, assembled or imported during 1942. Specifications were given for the patterns and metals allowed and nickel, chromium or other metallic plating was prohibited. (A-522, Dec. 17.)

Packaging.—A number of orders passed during the month concerned the packaging of products. The quantities of *cigars or cigarettes* which may be packed in containers after

April 30, 1943, were specified and many of the smaller packages eliminated. Weights for plug or twist tobacco and for cut tobacco or snuff in packages were also specified. No new brands of tobacco products may be offered for sale and the size, labelling and pricing of brands now sold may not be changed. (A-513, Dec. 9.)

The range of sizes in which *household drug products* may be packaged for sale to retailers has been greatly reduced. The number of sizes and the maximum and minimum sizes which may be used have been given for some 46 items. On sales in bulk the minimum sizes of packages have been prescribed. (A-514, Dec. 9.)

After February 28, only two sizes of containers may be used by a manufacturer for packaging any brand or type of *toilet goods*, and the sizes to be continued must be approved. Containers of toilet goods are not to be attached to display cards. This order also prohibits the manufacture of several creams, sachets or face packs. (A-535, Dec. 29.)

Further simplification in *waxed bread papers* is to be achieved by allowing the base paper from which these are converted to be manufactured in one shade only and with two specified fibre contents, only one of which may be used by a single manufacturer. Manufacturers' maximum prices are specified and quarterly production is restricted to one quarter of average output during 1942. A further restriction limits purchasers' inventories to a 90 days' supply which is to be used for immediate conversion. (A-523, Dec. 18.)

An order covering *soft drinks* was concerned in part with ensuring a larger return of empties by prescribing deposit charges on all bottles supplied to customers. (A-531, Dec. 23.) Maximum prices of unwashed beer bottles were set in Nova Scotia and New Brunswick. The shipment of used beer bottles outside these provinces or sale to persons other than brewers within these provinces was prohibited except under permit. (A-505, Dec. 7.)

Prices, Retail and Wholesale, in Canada, December, 1942

Cost of Living, Prices of Staple Articles and Index Numbers.

THE official index number of the cost of living calculated by the Dominion Bureau of Statistics advanced from 118.6 at the beginning of November to 118.8 at the beginning of December. The increase was due to minor advances in the food, clothing and miscellaneous groups. The index for the food group rose from 132.4 to 132.8 because of higher prices for lard, butter, eggs, lamb, and potatoes which more than offset declines in the prices of oranges and lemons. Comparative

figures for the general index at certain earlier dates are 115.8 for December, 1941; 108.0 for December, 1940; and 100.8 for August, 1939, the last pre-war month.

Since the outbreak of war the index has advanced 17.9 per cent compared with an increase of 39.3 per cent for the comparable period during the last war. Since the establishment of the prices ceiling the increase has been less than one-seventh of that recorded for the corresponding period of the last war.

After adjustment to the base 100.0 for August, 1939, as required by Order in Council P.C. 5963, July, 1942, the index was 117.9 at December 1; 117.7 at November 1; 117.0 for July; and 114.6 for October, 1941.

Foods advanced 33.7 per cent between August, 1939, and November, 1942; clothing 20.1 per cent; home furnishings and services 16.7 per cent; fuel and light 13.9 per cent; rent 7.2 per cent; and the miscellaneous group, 5.8 per cent.

In compliance with Order in Council P.C. 6219, as amended, the prices of cigarettes and tobacco used in calculating the index do not include the tax imposed on June 24, 1942, under the special War Revenue Act.

The control of prices under an Order in Council of November 1, 1941, P.C. 8527, became effective on December 1, 1941. The text of P.C. 8527 which appeared in the LABOUR GAZETTE, for November, 1941, on page 1371 provided that no person should sell any goods or supply services at prices higher than during the period September 15 to October 11, except under the regulations of the Wartime Prices and Trade Board. In each issue of the LABOUR GAZETTE the activities of the Board in the operation of the price control policy are summarized. Prices of certain fresh fruits and vegetables and certain kinds

of fresh, cured and canned fish were exempted by the Board from the provisions of the maximum prices regulations. The order does not apply to sales by farmers and fishermen to dealers or processors of live stock, poultry, eggs, milk, cream, dairy butter, farm-made cheese, honey, maple syrup and fish, but does apply to sales by such dealers and processors and to sales by farmers and fishermen to consumers.

The index number of the cost of living was constructed on the basis of a survey of expenditure of 1,439 families of wage-earners and salaried workers with earnings between \$450 and \$2,500 in 1938. The average expenditure was \$1,453.90 divided as follows: food (31.3 per cent), \$443; shelter (19.1 per cent), \$269.50; fuel and light (6.4 per cent), \$90.50; clothing (11.7 per cent), \$165.80; home furnishings (8.9 per cent), \$125.70; miscellaneous (22.6 per cent), \$319.40.

The last named group includes health (4.3 per cent), \$60.80; personal care (1.7 per cent), \$23.90; transportation (5.6 per cent), \$79.30; recreation (5.8 per cent), \$82.10; life insurance (5.2 per cent), \$73.30. Other expenditure not directly represented in the index was \$40.

The Dominion Bureau of Statistics has issued an index number of retail prices of commodities included in the cost-of-living

COST OF LIVING AND WHOLESALE PRICES IN CANADA 1914-1922 AND 1939-1942

BASE: PRICES IN JULY, 1914 AND IN AUGUST, 1939=100

index excluding rents and services. The figures at certain dates since August, 1939, are: August, 1939, 100.0; September, 100.0; October, 103.8; November, 104.3; December, 104.3; January, 1940, 104.2; February, 104.3; March, 105.5; April, 105.5; May, 105.3; June, 105.3; July, 106.4; August, 106.8; September, 107.9; October, 108.4; November, 109.7; December, 110.0; January, 1941, 110.4; February, 110.1; March, 110.2; April, 110.7; May, 110.9; June, 112.7; July, 114.9; August, 117.7; September, 119.4; October, 120.1; November, 121.4; December, 120.6; January, 1942, 119.9; February, 120.3; March, 120.6; April, 120.6; May, 120.9; June, 121.8; July, 123.9; August, 123.5; September, 123.0; October, 123.7; November, 125.0; December, 125.2.

The accompanying chart shows the trend of the cost of living and wholesale prices since the beginning of the present war compared with the trend in the period of 1914-1922.

Wholesale Prices

The index number of wholesale prices advanced fractionally in December and was at the highest point reached during the year. The increase during the month was due to advances in the vegetable products group, the animal products group, and in the non-metallic mineral products group. The chemical products group declined and the other four principal groups were unchanged. This index calculated by the Dominion Bureau of Statistics and based upon prices in 1926, as 100 was at the highest point in December reached at any time since the spring of 1928 and was 34.4 per cent higher than in August, 1939. Comparative figures for the index at certain dates are 97.2 for December; 97.1 for November; 93.6 for December, 1941; 84.2 for December, 1940; and 72.3 for August, 1939. Consumers' goods rose 33.6 per cent between August, 1939, and December, 1942; producers' goods rose 34.9 per cent and Canadian farm products 49 per cent during the same period. The general index advanced 85.2 per cent between July, 1914, and November, 1917.

Explanatory Note as to Retail Prices

The table of retail prices and rentals shows the prices at the beginning of December of seventy-six staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotations are given is set forth in the case of each commodity and every effort has been made to ensure that the quotations in each case refer to the same class

of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city, except the following, are the averages of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers: milk, bread, shoulder of veal, leg roast of pork, unsliced bacon, dairy butter, evaporated apples, vinegar and coal oil. Information as to the prices of the foregoing, with the exception of milk and bread, is obtained by the correspondents of the *LABOUR GAZETTE*. The prices of milk, bread, fuel and the rates for rent are obtained by the Bureau of Statistics and by the correspondents of the *LABOUR GAZETTE*.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition, less desirably located but still fairly central, without modern conveniences.

By Order in Council P.C. 8965, dated November 21, 1941 (*LABOUR GAZETTE*, December, 1941, page 1462), the price ceiling established by P.C. 8527 (*LABOUR GAZETTE*, November, 1941, page 1371) was extended to rentals charged for all real property, the order to be administered by the Wartime Prices and Trade Board. Under authority conferred by Order in Council P.C. 5003 (*LABOUR GAZETTE*, October, 1940, page 995) the Board from time to time had fixed maximum rentals for housing accommodation in certain of the cities in the list on page 104. In these cities the maximum rentals already fixed continue unchanged, based in some cases on those in effect on January 2, 1940, and in the others on those in effect on January 2, 1941. The former are Halifax, New Glasgow, Sydney, Thetford Mines, Kingston, Ottawa, Windsor, Brandon, Calgary, Nanaimo, New Westminster, Prince Rupert, Vancouver and Victoria; the latter are Truro, Moncton, Brockville, Belleville, Fort William, Hamilton, Niagara Falls, Oshawa, Peterborough, Port Arthur, St. Catharines, Sault Ste. Marie, Regina, Edmonton, Medicine Hat and Lethbridge. In all other cases the maximum rental for any housing accommodation is the rental which was in effect on October 11, 1941. Provision is made under the orders of the Board for variation of the maximum rentals for any accommodation under certain special circumstances affecting the accommodation.

Retail Prices

Beef prices at the beginning of December were little changed from the levels of the

* For the period 1913 to 1934 the former series on the base 1926=100 was converted to the base 1935-1939=100.

The cost of living bonus provided for by the Wartime Wages Control Order, July 10, 1942, P.C. 5963, replacing P.C. 8253, must be based on the index shown in the left-hand column. For each rise of one point in the index the amount of the bonus or its increase shall be:—(1) twenty-five cents per week for all adult male employees, and for all other employees employed at weekly wage rates of twenty-five dollars or more, and (2) one per cent of their basic weekly wage rates for male employees under twenty-one years of age and female workers employed at basic wages rate of less than twenty-five dollars per week.

† The Dominion Bureau of Statistics issues reports on prices with comprehensive figures as follows:—monthly, Prices and Price Indexes (Canada); annually, Prices and Price Indexes (Canada and Other Countries).

* Prior to 1926 number of commodities was 236, 1926 to 1933 inclusive 502, and since January, 1934, the number is 567.

previous month but were considerably higher than at December 1, 1941. Sirloin steak averaged 38 cents per pound as compared with 38.1 cents for November and 33.8 cents for December one year earlier. Rib roast was 33 cents for December, 1942, the same as for November but was four cents per pound higher than for December, 1941. Lamb averaged 35.2 cents for December and 34.5 cents for November. The prices of fresh pork and bacon advanced slightly during the month, the former at 34.3 cents per pound for December and the latter at 44.7 cents; each averaged 1.6 cents higher than for December, 1941. The stocks of eggs in storage at December 1 were materially smaller than one month earlier and were about 50 per cent lower than for December 1, 1941. The price for fresh eggs at 56.3 cents per dozen was about one cent per dozen higher than for

November as compared with 47.4 cents at December 1, 1941. Creamery butter at 41 cents per pound was 2.5 cents higher than one year earlier. Stocks in storage were 28 per cent lower than at November 1, and 40 per cent lower than at December 1, 1941. Cheese at 34.1 cents per pound averaged the same as for the previous month but was 2.4 cents per pound lower than for December, 1941. Potatoes averaged 39.9 cents for 15 pounds at December 1, only fractionally higher than for November but about 10 cents higher than for December, 1941.

The following are the prices reported for Welsh coal "cobbles" and "French nut" at the beginning of December, 1942: Halifax, \$18.50; Charlottetown, \$17.90; Saint John, \$18.50; Quebec, \$16.50; Three Rivers, \$17.25; Sherbrooke, \$18.75; St. Hyacinthe, \$17.50; Montreal, \$17.75.

Prices in Great Britain and Other Countries

THE tables on pages 108 and 109 which appear quarterly give the official and certain other index numbers of the cost-of-living, retail and wholesale prices in Great Britain and certain of the principal commercial and industrial countries.

Since these tables are compiled from British and foreign sources the information contained therein usually deals with conditions prevailing some months previous to the date of publication in the *LABOUR GAZETTE*. In Great Britain both wholesale and retail trade are now subject to government control, the main objects of which are to conserve supplies of vital materials and to protect the public from unwarranted increases in prices. In order to achieve these ends the government of the United Kingdom has fixed retail and wholesale prices of some articles and is controlling the entire trade in some commodities, including importation and exportation.

Great Britain

WHOLESALE PRICES.—The Board of Trade index number, on the base 1930=100, was 161.0 for November, an increase of 0.6 per cent for the month. The principal changes for the month were an increase of 2.1 per cent in the "meat, fish and eggs" group, and of 1.9 per cent in the "other food and tobacco" group.

COST OF LIVING.—The index number of the *Ministry of Labour Gazette*, on the base July, 1914=100, was 200 at the end of October, showing no change, on the whole, from the

beginning of the month. Food was $\frac{1}{2}$ of one per cent higher, while clothing prices were one per cent lower.

Newfoundland

COST OF LIVING.—The index number of the Department of Health and Welfare, on the base October 1, 1938=100, was 150.2 at December 5, as compared to the corrected figure of 150.0 at November 7. There was a very slight increase in food prices, while other groups remained unchanged.

United States

WHOLESALE PRICES.—The Bureau of Labour Statistics index number, on the base 1926=100, was 100.3 for November, an increase of 0.3 per cent for the month. Farm products were 1.4 per cent higher; chemicals and allied products were 3.4 per cent higher, due to the rise of 28.4 per cent in "drugs and pharmaceuticals"; miscellaneous commodities were 1.7 per cent higher, due chiefly to the rise of 6.7 per cent in cattle feed.

COST OF LIVING.—The index number of the Bureau of Labour Statistics, on the base 1935-1939=100, was 119.8 at November 15, an increase of 0.7 per cent for the month. Food prices rose 1.2 per cent, clothing 0.1 per cent, housefurnishings 0.1 per cent, miscellaneous commodities 0.8 per cent, while rent was 0.1 per cent lower and the fuel, etc., group was unchanged.

Wartime Stabilization in United States

In his message to Congress on January 11, 1943, submitting a war budget of 100 billion dollars for the coming fiscal year, President Roosevelt made reference to wartime stabilization in U.S.

"In spite of a 100-billion-dollar war program, civilians can be supplied with an average of about \$500 worth of goods and services during the next year. This implies an average reduction of almost 25 per cent in civilian consumption below the record level of the calendar year 1941. . . .

"We must assure each citizen the necessities of life at prices which he can pay. Otherwise, rising prices will lift many goods beyond his reach just as surely as if those goods did not exist. By a concerted effort to stabilize prices, rents, and wages we have succeeded in keeping the rise in the cost of living within narrow bounds.

"Some would like to see the controls relaxed for this or that special group. They forget

that to relax controls for one group is an argument to relax for other groups, thereby starting the cost-of-living spiral which would undermine the war effort and cause grave post-war difficulties. Economic stabilization for all groups—not for just the other fellow—is the only policy consistent with the requirements of total war.

"Stabilization goes beyond effective price control. Under war conditions a rise in profits, wages, and farm incomes unfortunately does not increase the supply of goods for civilians; it merely invites the bidding up of prices of source commodities. The stabilization of incomes and the absorption of excess purchasing power by fiscal measures are essential for the success of the stabilization program . . .

"In the past wars have usually been paid for mainly by means of inflation, thereby shifting the greatest burden to the weakest shoulders and inviting post-war collapse. We seek to avoid both. Of necessity, the program must be harsh."

(h) Average for twelve months ending June.

War Emergency Training Program

Vocational Training Advisory Council Established—Training of Supervisors—Costs of Program, April 1 to November 30, 1942—Statistical Summary

THE total number of trainees who were receiving training at the end of December 1942, represented a decrease of about 700 persons as compared with the numbers who were receiving instruction under the Dominion-Provincial War Emergency Training Program on November 30. There was a sharp decrease in the number of new enrollees admitted to the full time industrial classes during December, as compared with the figures for the previous month. In the R.C.A.F. and Army classes, however, the December enrolments represented increases over the November totals.

Vocational Training Advisory Council

It will be recalled that the Vocational Training Co-ordination Act, 1942, which was passed at the last session of Parliament provided for the appointment of a Vocational Training Advisory Council to consist of a chairman and not more than sixteen members. The establishment of this Council was recently announced by the Hon. Humphrey Mitchell, Minister of Labour. Under the Vocational Training Co-ordination Act provision is made for a wide variety of training projects including the training of persons for employment in the prosecution of the war whether in industry or the armed forces, rehabilitation training of discharged members of the armed forces and the carrying on of such training projects as may be necessary to meet the post-war situation. The Vocational Training Advisory Council will advise the Minister on such questions relating to the operation of the Act as the Minister may from time to time refer to the Council for consideration.

Membership on the Council requires only part time service. It is expected that the first meeting will take place in Ottawa during February. The members of the Vocational Training Advisory Council, which was established by Order in Council, have been selected to represent employers, trade unions, war veterans, agriculture and vocational education authorities, including representation of women. They are as follows:

Dr. G. F. McNally, Deputy Minister of Education, Edmonton, Alberta, (Chairman); J. Pigott, Esq., Pigott Construction Company, Hamilton, Ontario; E. R. Complin, Esq., Personnel Director, Canadian Industries Limited, Montreal, P.Q.; Hugh Crombie, Esq., Assistant Manager Dominion Engineering Company, Limited, Montreal, P.Q.; D. S. Lyons, Esq., General Vice President, International Association of Machinists, 806 Keefer Building, Montreal, P.Q.; N. S. Dowd, Esq., Executive Secretary, The Canadian Congress of Labour, 230 Laurier Avenue West, Ottawa, Ontario; P. Girard, Esq., President, Central Council of National Catholic Unions, 1231 Demontigny East, Montreal, P.Q.; Lt.-Col. F. T. Fairey, Director of Technical Education, Department of Education, Victoria, B.C.; F. S. Rutherford, Esq., Director of Vocational Education, Toronto, Ontario; Dr. F. H. Sexton, Director of Vocational Education, Halifax, N.S.; Mrs. E. D. Hardy, President National Council of Women, 198 Second Avenue, Ottawa, Ontario; Miss B. Oxner, Director of Women's Work, University of Saskatchewan, Saskatoon, Sask.; Dr. W. V. Longley, Director of Extension, Nova Scotia Agricultural College, Truro, N.S.; N. C. MacKay, Esq., Director of Extension, Department of Agriculture, Winnipeg, Man.; Col. J. T. E. Gagnon, Veterans Welfare Officer, Department of Pensions and National Health, Montreal, P.Q.; J. C. Herwig, Acting General Secretary, The Canadian Legion of the British Empire Service League, Dominion Command, Ottawa, Ontario; Dr. E. A. Corbett, Director Canadian Association for Adult Education, 198 College Street, Toronto, Ontario.

"The Government has been particularly fortunate," Mr. Mitchell stated, "in securing the services of such a representative and informed group to make up the Vocational Training Advisory Council. At this time, with the pressing demands on the time of all leaders in community endeavours, it is most encouraging that those who have been chosen are willing to contribute their services to advise on trade training."

(1) Trainees in Part-time Classes consist largely of employed persons who are being given training at the request of employers in war production who wish to up-grade their employees.

(2) Includes those graduates who, though actually placed prior to December 1, 1942, were not so reported until after December 1, 1942.

(3) The numbers shown as completed but not reported placed in the Province of Quebec (137) includes all unplaced trainees who have completed their courses since the commencement of the War Emergency Training Program in that Province.

Training in Industry

Plant Schools.—In the statistical summary of the War Emergency Training Program for September* attention was drawn to the fact that Plant Schools, awarded the certificate of approval of the Department, numbered 48. This number has since been increased to 63.

The aim of the Department is to make progressive improvements in the quality of instruction given in these schools through the improvement of the curricula and the actual methods adopted in the training process. This objective is being realized through the close collaboration of the companies' instructors and the technical consultants or joint supervisors attached to the field staff of the War Emergency Training Program.

Training of Supervisors.—While the majority of the larger war production plants throughout the country are able to assign one or more of their personnel to the work of conducting foreman training sessions for their supervisory force in the program sponsored by the Department, (Job Instructor Training, Job Relations Training) there has been some difficulty experienced in arranging for the effective participation of the smaller companies. So that these smaller companies may not be excluded from the benefits to be derived from a study of the basic principles of good supervision practice, brought out in the sessions of these training units, arrangements are being made to provide a service through training selected members of the staffs of local vocational schools to act as conference leaders for the firms. This service will be offered in two ways:

- (a) by having the vocational school conference leader go from the school to the plant,
- (b) by having the supervisors from the plant go to the school for training sessions. Selection of the place and time where the sessions will be held will be at the discretion of the management of the plants concerned.

Costs of the Program

The total expenditures under the War Emergency Training Program for all purposes for the period April 1, 1942 to November 30, 1942, have exceeded five and a quarter million dollars. This includes expenditures for the following types of training:

- (1) Pre-employment training for industry;
- (2) Part-time classes for industrial trainees;

- (3) Training within industry in full-time plant schools;
- (4) Training of foremen and supervisors in industry;
- (5) Training of tradesmen for the Army, Navy and Air Force;
- (6) Provision of financial assistance to University students in medicine, dentistry, engineering, science.

The gross cost of the R.C.A.F. schools for the eight months up to November 30, was \$1½c per trainee day, as compared with \$1 for the fiscal year 1941-42. This gross cost includes 60 cents per trainee day for instructors and school supervisors and 8½ cents per trainee day for materials, supplies and hand tools.

The gross cost of the classes for industrial workers and tradesmen for the Army and Navy for the eight months period ending November 30, 1942 was \$1.96 per trainee day. This amount includes the subsistence training allowances to industrial trainees, ranging from \$5 to \$18 per week. The net cost per trainee day, i.e., the gross cost less expenditures for training allowances, machinery and other capital outlay is 98 cents per trainee day, as compared with 99 cents per trainee day last year. This cost includes 70 cents per trainee day for instructors and school supervisors and 16 cents per trainee day for materials, supplies and hand tools.

The cost varies considerably from one school to the other, depending on the size of the class and the kind of training. The classes for Army tradesmen, as a rule, are more expensive, owing to the smaller number of trainees in attendance for each instructor and to the high costs of work materials and supplies. Where schools are carried on in rented premises, the costs per day are higher than in the case of those classes carried on in the regular vocational schools where, through the co-operation of Provincial Governments and municipal school boards, the use of the shops and equipment has been placed at the disposal of the Government without any charge for rent or depreciation.

The cost of individual schools is constantly under review by the Regional Directors in each Province and by the Training Branch of the Department of Labour at Ottawa, and every effort is made to reduce the cost to the lowest limit consistent with the maintenance of efficiency in the instruction given.

*L. G., October 1942, p. 1163.

Activities of the Unemployment Insurance Commission

Training School on Statistics—Schools of Instruction on Claims Procedure —Insurance Registration—Unemployment Insurance Fund— Claims for Benefit

MR. Murdock M. Maclean, Director of Industrial Relations of the Department of Labour, was recently appointed as a member of the Investment Committee of the Unemployment Insurance Commission by Order in Council P.C. 11500. The appointment took effect on January 1, 1943. Mr. Maclean replaced Dr. Bryce M. Stewart, formerly Deputy Minister of Labour, who recently resigned to return to New York.

The Committee as at present constituted has the following members: Dr. W. G. Clark, Deputy Minister of Finance, Mr. Graham Towers, Governor of the Bank of Canada and Mr. M. M. Maclean.

The Investment Committee authorizes all investments of the fund made by the Commission. Reserves of the fund were invested in Dominion of Canada Bonds as required by the Unemployment Insurance Act.

Training School on Statistics

As a preliminary to the initiation of a quarterly report on employment to be obtained from employers by the Department of Labour, a Training School on Statistics was conducted in Ottawa on January 7, 8 and 9. It was under the personal supervision of Dr. E. P. Laberge, Supervising Inspector of the Employment Service and Unemployment Insurance Branch of the Department of Labour. It was attended by the Senior Training Supervisor from each of the five Regional offices of the branch and also by officers who are responsible for statistics in the regional offices. Advantage was taken of the opportunity offered by the school to discuss the compilation in the local employment and selective service offices of a revised report on employment statistics by industries, and the preparation of another report on occupational statistics.

Further details regarding this manpower survey are found on page 38).

Schools of Instruction on Claims Procedure

Claims procedure is of steadily increasing importance in the administration of the Unemployment Insurance Act. It is necessary for at least one or two of the officials in every local office throughout Canada to be thoroughly familiar with the benefit sections of the act and regulations thereunder, as well as with claims procedure and forms, so that all claims for benefit may be handled with expedition and uniformity in every region.

During December, therefore, seven schools of instruction, lasting from four and a half to five days, were held. The following table gives details of points where the schools were held, together with dates and registration.

The four western schools were organized and conducted by Major H. S. Relph, Chief Reviewing Officer, who was accompanied by Mr. R. V. Sladen, Inspector of Insurance Revenue at Head Office while a similar task for the three eastern schools was carried out by Mr. J. E. Beauvais, Head Office Insurance Officer. The latter executive was assisted by a number of Regional Officials at the points where the schools were held.

Place	Dates	Number in attendance	No. of Local Offices represented

Annual Report

The first annual report of the Unemployment Insurance Commission was made available to the public in December 1942. Copies were distributed from the Head Office of the Commission in Ottawa.

The report covers the activities of the Unemployment Insurance Commission for the fiscal year ending March 31, 1942. Part I of the report provides a brief introductory; Parts II, III and IV deal with Administration, Employment Service and Unemployment Insurance respectively. There are thirteen appendices providing statistical data on administrative costs, applications for employment, vacancies, placements, insurance registration, the Unemployment Insurance Fund, revenue inspections, claims for benefits, etc.

Insurance Registration

Reports from local offices of the Unemployment Insurance Commission showed that at January 1, 1943, 162,913 employers' establishments and 3,553,779 persons were registered. Of the persons registered, 2,813,843 were insurable and 739,936 were uninsurable.

The insurable group consisted of insurable employees of registered firms and unemployed persons whose last employment was insurable.

The other group of persons registered included employees of registered firms not coming within the coverage of the Act, and partners and proprietors of these firms. Also forming a part of this group were persons unemployed at date

of registration whose last employment was un-insurable, and women between the ages of twenty and twenty-four not engaged in insurable employment at the time of the recent registration.

Unemployment Insurance Fund

The Unemployment Insurance Act established a tripartite system of contributions whereby employers, employees and the state contribute to the Unemployment Insurance Fund. Insured workers and their employers make contributions according to a graded scale, but in the country as a whole, they pay approximately equal contributions. The Dominion Government adds one-fifth of the total amount contributed by employees and employers.

The total employer-employee contributions for the 17 months ended November 30, 1942, were \$73,957,412. The Dominion Government's contribution in the same period was \$14,791,482. The cumulative total of contributions and interest amounted to \$90,008,847, of which \$1,259,952 was received as interest on investments.

The total amount paid out in unemployment insurance benefit from January 27, 1942, the first date on which claimants could qualify for benefit, to November 30, 1942, was \$313,476.

The balance in the Unemployment Insurance Fund at the 30th November last, was \$89,695,370 (see page 120).

Claims for Benefit

The amount paid in claims for unemployment insurance benefit during the period from February 1 to November 30, 1942, was \$313,476. In this period 21,420 claims were received for adjudication at the nine offices of the Commission, of which 16,064 claims were allowed, 4,665 claims were not allowed, with 691 claims pending.

An analysis of the 4,665 claims not allowed by insurance officers reveals the following reasons for non-allowance: 1,635 claims under Section 28 (i) with insufficient contributions; 146 claims under Section 28 (ii) in which 92

applications were not made in the prescribed manner, and 54 of the claimants were not unemployed; 98 claims under Section 28 (iii) in which 63 claimants were not capable of work, and 35 were not available for work; 53 claims under Section 43 (a) for loss of work due to labour dispute; 37 claims under Section 43 (b) (i) for refusal of an offer of work; 35 claims under Section 43 (b) (ii) for neglect of opportunity to work; 1 claim under Section 43 (b) (iii) for failure to carry out written directions; 2,634 claims under Section 43 (c) in which 542 were disqualified because they were discharged due to their own misconduct and 2,092 were disqualified for voluntarily leaving without just cause; 6 under Section 43 (d) for being under 16 years of age; 2 under Section 43 (e) for being inmates of prison, etc.; 18 under Section 43 (f) for being in class "O" contributions (see page 121).

Appeals and References

During the period from February 1 to November 30, 1942, there were 370 references and 30 appeals made by claimants, to Courts of Referees. In addition, there were 11 references by insurance officers to Courts of Referees. Of the 411 references and appeals, 327 were heard, 46 have not yet been heard, and 38 were withdrawn. The Courts of Referees disallowed 265 claims and allowed 62 (see page 121).

Appeals to Umpire

Three claimants have sought permission from the Chairman of the Courts of Referees to appeal to the Umpire under Section 58 (c) (ii). Two requests to appeal were refused and one was granted. In the appeal that was granted the Umpire upheld the decision of the Court of Referees.

Proposed Unemployment Benefit in Great Britain

The Beveridge Report on Social Insurance and Allied Services made the following proposals for unemployment benefit:

Unemployment benefit will be a weekly payment continued without means or needs test throughout working age, so long as the insured person remains unemployed and available for work, but subject to the proviso that after he has drawn unconditional benefit for a limited period, the insured person, as a condition of remaining on benefit, will be required to attend a work or training centre. Receipt of indefinite unemployment benefit will be subject to being in full benefit. . . . Disqualifications, as at present, will apply to men refusing suitable employment, dismissed for misconduct or leaving their work voluntarily without just cause. Employees continuing to work after reaching the minimum pensionable age will be able to obtain unemployment benefit, but the period for which they can draw such benefit will be limited.

Limited Unconditional Period: The normal period of unconditional unemployment benefit will be six months, subject to the following adjustments:—

- The period may be increased generally by Order of the Minister for Social Security on the ground of a general depression of trade;
- A shorter period may be prescribed by Regulations for persons below adult age;
- Men of good contribution record who have made small claims may be entitled to additional days of unconditional unemployment benefit. (*Note.*—the Suggestion in para. (c) for carrying on the present arrangements for additional days of benefit under the general unemployment insurance scheme is provisional, subject to further enquiry as to its desirability under new conditions).

Unconditional benefit will be paid only to persons producing proof of unemployment by signature of a register or otherwise and of readiness to accept suitable employment.

Unlimited Conditional Benefit: Any person exhausting his claim to unconditional benefit, but otherwise in full benefit, will be able to continue to draw unemployment benefit without means test, subject to attendance, as required, at a work or training centre.

Employment and Unemployment

Summary

IN the Employment and Unemployment section of the *LABOUR GAZETTE*, information regarding the employment situation in Canada is based upon reports from the following sources:

The employment situation at the beginning of November, as reported by employers.

—The Dominion Bureau of Statistics receives each month reports from firms employing fifteen or more employees. These firms represent practically all industries except agriculture, fishing, hunting and highly specialized business operations.

The Bureau has been receiving these reports for many years; hence, although the figures given show considerably less than the total number of persons employed in Canada, they give a valid picture of the *trend* of employment in Canada over a period of years.

This month's article shows that employment at the beginning of November, 1942, was on the increase. Reports were submitted by 13,265 establishments. These firms employed a total of 1,835,933 persons, 19,946 more than in the preceding month. This increase in the number of persons employed was contra-seasonal in character, but repeated the movement indicated at the same date in each year since the outbreak of war.

The index number of employment (based on the average for the calendar year 1926 as 100) rose to a new high at the date under review, when it stood at 183.3, as compared with 181.3 at October 1, 1942. A year previously, at November 1, 1941, the index registered 167.6. At the outbreak of war it stood at 119.6.

The same employers also submit each month information regarding payrolls, which is incorporated in this article.

The per capita average wage in the Canadian industries submitting returns rose from \$29.51 a week in the last report to \$29.79 at November 1, 1942. The figure for November 1, 1941, had been \$27.02.

Employment conditions at the end of December as reported by Employment and Selective Service Offices.—Reports from the Employment and Selective Service Offices of the Unemployment Insurance Commission give a brief survey of the employment situation at the end of December. These reports describe employment conditions in the Maritimes, Quebec, Ontario, the Prairie Provinces, and British Columbia. This article, and the one following, were formerly included in the ar-

ticle, *Activities of the Unemployment Insurance Commission*.

Applications for employment, vacancies and placements, November.—From the Employment and Selective Service Offices of the Unemployment Insurance Commission come reports showing the number of positions reported as vacant across the Dominion, together with the number of applications for employment and the number of placements effected.

Reports received from Employment and Selective Service Offices during the month of November, 1942, showed increases from October, 1942, and also from November a year ago in the average number of placements recorded daily. All industrial groups, except agriculture and mining, indicated additions over the previous month's total, the largest being in manufacturing, trade and services. As compared with the situation a year ago, all divisions but agriculture listed gains, the most exceptional being in manufacturing, with outstanding advances in trade, construction, services, transportation and logging. The marked increase over last year was due to National Selective Service Regulations under which employers seeking workers, and persons desiring employment, must notify Employment and Selective Service Offices. Vacancies in November, 1942, numbered 241,204. There were 272,138 applications for employment; and 202,259 placements were effected in regular and casual employment.

Unemployment in Trade Unions.—The Department of Labour receives reports from the local trade unions throughout Canada, showing the number of their members who were unemployed during the period under review.

At the beginning of December, 1942, the percentage of unemployment among trade union members stood at 0.8, a slight increase over the November percentage of 0.7, but considerably less than the December, 1941, percentage of 3.3. The percentage for December was based on returns compiled from 2,241 labour organizations with a total membership of 398,224 persons.

It should be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

Building Permits issued in Canada.—Indicative of the employment situation in the building trades are the detailed statistics compiled by the Dominion Bureau of Statistics each month showing the value of building permits granted and the value of building materials.

Unemployment Insurance Registration.—The registration figures of the Unemployment Insurance Commission provide further data in regard to the employment situation in Canada.

During the 1942 registration conducted by the Commission, employers with insured persons in their employ registered their insured and non-insured employees. This nation-wide manpower inventory covered a large portion of Canadian wage-earners but it did not for the most part include employees engaged in

employment in agriculture, horticulture, forestry, logging, lumbering, hunting and trapping and a number of other excepted occupations.

The number of persons registered during the period April 1 to December 31, 1942, was 3,553,779 (see page 119). However the total of persons registered during this period is greater than the number of persons in registered employment at any one date. For instance, some of the registered persons may subsequently have joined the armed forces, or left their registered employment for other reasons.

Nevertheless, taking into consideration the occupations not covered in the registration, it may be assumed that the figure represents at least a minimum approximation of the number of persons employed in Canada.

The Employment Situation at the Beginning of November, 1942, as Reported by Employers

THERE were further substantial increases in employment and payrolls at the beginning of November, when the firms co-operating in the Dominion Bureau of Statistics' monthly survey reported the addition of 19,946 persons to their staffs, which aggregated 1,835,933. The weekly salaries and wages disbursed by the 13,265 establishments furnishing information at November 1 amounted to \$54,690,130; as compared with the sum of \$53,582,565 paid on or about October 1, there was an advance of 2.1 per cent. The contents of the average pay envelope of the persons in recorded employment rose from \$29.51 in the preceding period of observation to a new maximum of \$29.79 at the beginning of November.

The expansion in industrial employment, which was contra-seasonal in character, involved the addition of a rather larger number of persons to the working forces than that noted at November 1, 1941, when the percentage gain was the same. The latest increase took place in the non-manufacturing industries, the first occasion in a lengthy period in which the advance in employment in such classes has exceeded that indicated in manufacturing. There was a moderately upward movement in the latter, further important increases in iron and steel, non-ferrous metal, electrical apparatus and chemical plants being largely offset by reductions in vegetable food, lumber, pulp and paper and textiles. These changes were partly seasonal in character. Logging showed considerably greater seasonal activity, some 11,500 men having been taken on by the co-operating camps. As in recently-preceding months, this advance was on a scale somewhat below normal for the time of year. Con-

struction and trade also afforded substantially more employment; the improvement in the former was contra-seasonal, being mainly due to work on defence projects. The additions to the personnel in trade were slightly larger than usual for November; nevertheless, employment in this division continued in smaller volume than at the same date in 1941. Mining, communications, transportation and services reported lessened activity. Except in mining, the losses in personnel were seasonal.

Although employment generally continues in greater volume than in any earlier period, the effect of shortages of labour and materials is becoming evident in an increasingly large number of industries, in which the levels in more recent months have fallen below those established in 1941. The manufacturing divisions in which this situation prevails comprise most of those producing non-durable goods, with the notable exception of chemicals and miscellaneous manufactured products, both of which are largely engaged in war work. Logging, mining and trade, among the non-manufacturing industries, have likewise been adversely affected by the prevailing labour stringency. As compared with pre-war records, however, employment is greater in practically all lines of industry.

The general index number of employment at the beginning of November, 1942, was 183.3, the highest to date. The October 1 figure was 181.3, while that for November 1, 1941, was 167.6. There was thus an increase of 9.4 per cent in the latter comparison, which was accompanied by that of 20 per cent in the index number of payrolls. The seasonally-adjusted index number of employment rose

from 172.5 in the preceding month, to 175.4 at the beginning of November, 1942, when it was higher than in any previous month.

Payrolls

As already stated, the firms whose returns were tabulated reported the payment of \$54,690,130 in salaries and wages at November 1, a sum which exceeded by 2.1 per cent the amounts they had disbursed at the beginning of October. The latest figure is the highest yet recorded. The movement in payrolls

has, with one exception, been steadily upward throughout the whole period in which statistics have been collected, that is, from the spring of 1941. The only exception in these months was at the beginning of January, 1942, when the observance of the Christmas and New Year's holidays had lowered the reported aggregate. The weekly per capita earnings averaged \$29.51¹ at October 1 and \$29.79 at the beginning of November, 1942, being then considerably above the November 1, 1941, average of \$27.02.

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

If statistics for financial institutions are included, the latest survey of employment and payrolls shows that the number of persons in recorded employment was 1,899,988, as compared with 1,880,160 at the beginning of October. The amounts received as weekly earnings by these persons were stated as \$56,662,487 paid on or about November 1, and \$55,555,308 paid on or about October 1. The per capita average for the nine industries, including finance, was \$29.82, or 27 cents above the figure indicated at the beginning of October. These averages were slightly higher than those of \$29.79 at November 1 and \$29.51 at October 1 already given for the eight leading industries, for which records of employment are available for a lengthy period, and upon whose totals are based the general comparisons here used. These industries are as follows: manufacturing, logging, mining, transportation, communications, construction and maintenance, services and trade.

Table I summarizes the latest statistics of employment and payrolls for the leading industrial groups, the provinces and economic areas and the eight leading industrial cities, and gives comparisons as at October 1, 1942, and November 1, 1941.

The statistics of payrolls are based on the amounts disbursed by the co-operating firms at June 1, 1941, as 100. To facilitate comparisons of the trends of employment and payrolls, the index numbers of employment have been converted from their original base, 1926=100, to June 1, 1941, as 100. The table

shows that there has been an increase of 19.9 per cent in the number of persons in recorded employment in the eight leading industrial groups, while the weekly earnings of these persons have risen by 40.8 per cent. Including finance, the gain in employment from June 1, 1941, to November 1, 1942, amounted to 19.3 per cent, and that in payrolls to 39.7 per cent.

From November 1, 1941, to November 1, 1942, the increase in employment in manufacturing, logging, mining, communications, transportation, construction and maintenance, services and trade has amounted to 9.4 per cent, and that in the weekly payrolls to 20 per cent. The reasons previously given for the much greater rise in the latter than in employment may again be stated: (1) the growing concentration of workers in the heavy manufacturing industries, where rates of pay are above the average, and, in addition, there is a considerable amount of overtime work, and (2) the extension of the system of paying a cost-of-living bonus to the majority of workers; the rates at which this allowance has been calculated have been enlarged on more than one occasion since its institution. In certain cases, higher wage-rates have also been awarded. In spite of these main factors beneficially affecting the typical worker, the average weekly earnings, as a result of the continued dilution of labour, have not shown advances commensurate with those in the index of aggregate payrolls. Where the latter has risen by 40.8 per cent, the index of per

capita earnings has increased by 18 per cent since June 1, 1941.

The expansion in employment and payrolls in manufacturing in the period of observation has for obvious reasons been on a much greater scale than that in the non-manufacturing industries, the index in the former having risen by 30.1 per cent from June 1, 1941, and that of payrolls by 55.6 per cent. The increase in the weekly earnings of the typical individual engaged in factory work has amounted to 19.9 per cent, as compared with that of 18 per cent in the all-industries' average. The factors given above as influencing the all-industries statistics operate with greater force in the case of the manufacturing group.

Even more striking than the advance in personnel and payrolls in manufacturing as a whole in recent months is that which has taken place in plants producing durable goods. Thus, the index of employment in this class has risen by 43.6, and that of payrolls by 75.7 per cent from June 1, 1941, to the beginning of November, 1942. Despite curtailment in certain lines in the non-durable goods division, the index number of employment in this group was 18.4 per cent above that indicated at June 1, 1941, while in payrolls the increase amounted to 35.4 per cent.

In regard to the marked variations shown in the average earnings of workers in the different industrial classes, it must be borne in mind that the sex distribution of such persons is an important factor, frequently associated

with variations in the age groups. In general, the female workers tend to belong to the younger age classes, in which the earnings are naturally lower than among those of greater experience. The matter of short-time or over-time may also considerably influence the reported aggregates and averages.

The Course of Wartime Employment

Those wishing to measure the effect of the war upon industrial employment will be interested in the indexes given below for the larger industrial divisions at November 1 in the period 1939-1942, and as at September 1, 1939. The seasonal factor enters to some extent into a comparison of the situation as at September 1 and November 1, although it is of less importance between these two dates than in other parts of the year when climatic differences are greater.

The general trend in employment during the war has been almost continuously favourable, the rare interruptions to the generally upward movement having been due to seasonal causes. The greatest upswing took place in the period following the collapse of France. The more recent advances have in general, been above-average for the time of year, but have never-

theless been on a smaller scale than those indicated at the same dates in 1941. Thus, as the organization of the industrial war effort proceeds, and the supply of available labour diminishes, the rate of expansion in employment has appreciably slackened.

In the first 38 months of war, some 638,000 men and women were taken on by the co-operating establishments; the smaller firms may also have increased substantially the number of their employees, although it is probable that recent events have, on the whole, reacted less favourably upon the smaller businesses. The mustering of such a labour force, together with the enlistment of approximately 600,000 men in the armed forces in about three years, has resulted in many and far-reaching changes in the industrial and occupational distributions of the Canadian adult population. The principal sources from which these accessions to the industrial payrolls have been drawn are as follows:—(a) unemployed workers (b) the own-account and small-employer classes (c) agriculture (d) homemakers and other women (e) adolescents, who under normal conditions would probably continue at school for a year or two longer, or possibly for a lengthier period. At the other

Relative weight of Employment by Provinces and Economic Areas as at Nov. 1, 1942	100.0	7.7	0.1	4.7	2.9	31.6	41.0	10.3	4.9	2.0	3.4	9.4

NOTE:—The relative weight, as given just above, shows the proportion of employees in the indicated area, to the total number of all employees reported in Canada by the firms making returns at the date under review.

end of the scale, many older men and women are undoubtedly prolonging their period of service beyond the usual retirement age. The armed services, in addition to drawing upon most of the above reservoirs for recruits, have of course also taken very large numbers of persons from their former employment in industry.

Particularly striking is the extraordinary expansion in the production of durable goods, in which the number of employees has risen by 161.5 per cent in the 38 months. The gain in the iron and steel industries, which amounts to 241.1 per cent, is even greater than that in the production of durable goods as a whole.

* The relative weight shows the proportion of employees reported in the indicated industry to the total number of employees reported in Canada by the firms making returns at the date under review.

* Revised.

In the non-durable group, employment after 38 months of war was higher by 46.1 per cent at November 1, 1942, than at September 1, 1939; seasonal activity in these industries is ordinarily higher at the beginning of September than at November 1. It is significant that in many branches of the non-durable goods category the advance in employment between September 1, 1939, and November 1, 1942, is considerably smaller than that reported in November, 1941, indicating the increasing effect of shortages of labour, together in certain cases, with shortages of raw materials.

In several of the non-manufacturing industries, the situation is somewhat similar to that developing in the production of non-durable goods. Thus, mainly as a result of labour stringency, employment in logging and trade is rather quieter than in the same period of the intervening years, although it continues in greater volume than at the outbreak of hostilities. Activity in mining was less than in any previous wartime November, and was also below its level at September 1, 1939. In communications, transportation, services and construction, employment at the date under review was brisker than at the outbreak of war, or than in any other November since then. The relatively high position of the indexes in these groups largely results from wartime conditions.

Employment and Payrolls by Industries

Manufacturing.—Employment in factories at the beginning of November showed a further increase, repeating the movement indicated annually at November 1 since the outbreak of war. Prior to that, however, activity had ordinarily declined in the late autumn. The latest gain was smaller than at November 1 in any of the three preceding years. The volume of employment in manufacturing reached a new maximum at the date under review, when the index, at 218.6, was higher by 16.6 per cent than that of 187.5 at November 1, 1941. The October 1, 1942, figure was 218.3. The 1926 average equals 100 in calculating these index numbers. After correction for seasonal influences, the index showed a further gain, rising from 211.6 at October 1, to 216.7 at the beginning of November.

Data were received from 7,402 manufacturers, whose staffs included 1,139,054 men and women, 1,765 or 0.2 per cent more than they had employed at October 1. There was an accompanying increase of 1.8 per cent in the reported weekly payrolls, which aggregated \$34,913,221. The pay envelope of the typical individual in recorded employment in manufacturing at November 1 contained \$30.65, fifty cents more than the per capita average

earnings of those employed by the same firms at the beginning of October, and \$3.06 more than the average at November 1, 1941. The increase in the twelve months is partly due to the growing concentration of employment in the more highly-paid heavy industries, together with progressive upgrading of employees, factors which have offset the effect of the considerable dilution of labour rendered necessary by wartime conditions. The payment of cost-of-living allowances at rising rates has also contributed to the result.

The most noteworthy expansion at the beginning of November was in the iron and steel, non-ferrous metal, chemical and electrical apparatus divisions, in each of which employment was in unprecedentedly great volume. Within the iron and steel group, there were especially large additions to the working forces in shipbuilding, aircraft and fire arm plants. The production of ammunition accounted for the bulk of the increase in chemical works. Relatively small gains were indicated in leather, rubber, clay, glass and stone and miscellaneous manufactured products. On the other hand, there was important seasonal curtailment in the vegetable food group (from which some 9,800 persons were released), and in lumber and pulp and paper mills. Textiles were also slacker.

It is noteworthy that largely as a result of the wartime labour situation, employment in a growing number of plants producing consumers' goods is showing declines from the high levels established in the latter part of 1941. Thus where eleven industries or groups at July 1, 1942, reported declines as compared with a year earlier, nineteen divisions at November 1 showed a falling-off from the same date in 1941. Notable among these nineteen were the food, fur, leather, lumber, pulp and paper and rubber classes, in which, however, activity continued decidedly above the pre-war level. The slackening in many of the above-mentioned groups is the more remarkable in view of the fact that in a great many cases, plants in these categories are engaged in manufacturing commodities or parts directly required in the war effort. On the other hand, employment in important industrial divisions has reached successive new high levels in recent months; prominent among these are the chemical, tobacco, beverage and the various metal-using industries.

The index number of payrolls, based on the weekly salaries and wages disbursed by the reporting employers at June 1, 1941, as 100, stood at 155.6 at November 1, 1942, as compared with 152.8 at the beginning of October and 120.4 at November 1, 1941. There was thus an increase of 29.2 per cent during the 12 months which accompanied that of 16.6 per

cent in the index number of employment. The reasons previously given for the disparity in the rates of increase in employment and payrolls may again be stated: (1) the growing concentration of workers in the more highly-paid heavy industries, together with important amounts of overtime work in these classes, and (2) the general practice of paying a bonus to meet the increase in the cost of living, under the terms of P.C. 8253 of October 24, 1941. The cost-of-living bonus has shown increases since its institution. The upgrading of workers has also contributed to the greater expansion in the reported payrolls, a factor which has tended to counteract the effect of the large-scale dilution of labour resulting from the existing stringency.

The effect to which the changing industrial distribution of factory workers has contributed to the relatively larger growth in payrolls than in employment is emphasized by a comparison of the figures for the durable and the non-durable goods group. Thus, the payroll index in the former at November 1 was 42.8 per cent higher than at November 1, 1941, while that in the non-durable goods group was 14.2 per cent higher; over the same period, the index of employment in the durable goods has risen by 28.2 per cent, while that in the non-durable classes has gained by only 5.8 per cent.

In the period in which statistics of payrolls have been collected, there have been particularly great increases in the amounts disbursed in the chemical, iron and steel, non-ferrous metal, miscellaneous manufactured products, electrical apparatus and beverage industries. The advances in these industries have been associated with important though relatively smaller gains in employment. In practically every case, and notably in the industries just mentioned, the per capita averages in the various branches of manufacturing were substantially higher at November 1, 1942, than at the same date of 1941.

In comparing the figures of per capita averages in the various industries, it must be borne in mind that many factors contribute to the existing differences. Important among these is the sex distribution of workers in the various industries; with this factor is associated that of age, the women workers in general, tending to belong in the younger age groups, where earnings normally are less than among more experienced workers. The presence or absence of overtime also affects substantially the per capita average earnings.

Logging.—There was a further seasonal increase in logging at November 1, 1942, when the expansion was smaller than that reported at the same date in any other year in the decade. Returns were received from 451

operators having 56,467 workers, as compared with 45,005 at October 1. The index of employment at 190.3, was the lowest for November since the outbreak of war. As compared with November 1, 1941, there was a decline of 13.4 per cent in the index of employment; that of weekly payrolls was only slightly lower. The salaries and wages reported at the latest date amounted to \$1,204,124, showing an increase of 22 per cent over the payrolls indicated in the preceding period of observation.

The per capita average earnings fell from \$21.86 at October 1, 1942, to \$21.32 at the date under review; the decline is associated with the large increase in the number of employees. The average at November 1, 1941, was \$18.66. In considering the figures of aggregate and average earnings in logging, it must be recalled that they do not include the value of board and lodging, frequently a part of the remuneration of workers engaged in bush operations. The high labour turnover in many camps is also a factor in lowering the reported earnings.

Mining.—Continued curtailment was noted in mining at the beginning of November, when information tabulated from 433 operators indicated a combined working force of 76,251 persons, as against 76,831 in their last return. The greatest reduction was in the extraction of metallic ores, but the non-metallic minerals also showed a falling-off. The index of employment in the mining group at November 1 was 163.0, being 11.9 per cent below that of 185.0 at the same date in 1941. In the 12 months, the index of payrolls has fallen by 12 per cent.

The weekly payrolls reported at the latest date amounted to \$2,705,651, a sum which was not quite one per cent lower than the salaries and wages disbursed by the same firms at October 1. The per capita average earnings were also slightly lower, standing at \$35.48 as compared with \$35.52 in the preceding period of observation. The November 1, 1941, figure had been \$35.08.

Communications.—The trend in the communications division was again downward, as is usual at the beginning of November. The staffs of the co-operating establishments aggregated 27,959, a decline of 337 as compared with their last report. The loss was about normal in extent. There was also a falling-off in the payrolls distributed; these amounted to \$800,994, as compared with \$819,112 paid on or about October 1. The per capita average fell from \$28.95 at October 1 to \$28.65 at the first of November. Based on the 1926 average as 100, the latest index of employment was 104.7; this was 4.7 per cent higher than the November 1, 1941, figure, while

there was a gain of 9.8 per cent in the index of payrolls in the twelve months.

Transportation.—A seasonal contraction of about the usual proportions was noted in transportation as a whole at November 1. The reduction took place wholly in shipping and stevedoring, steam railway operation and local transportation showing moderate advances. Employment continued in greater volume than at the same date in any earlier year since 1929. The index stood at 110.6, 7.6 per cent higher than that of 102.8 at November 1, 1941; this gain has been accompanied by that of 9.5 per cent in the reported weekly payrolls. The staffs of the 565 firms and branches furnishing returns totalled 139,327, as compared with 140,729 at October 1. The weekly salaries and wages disbursed at November 1 were given as \$4,811,967; this was only slightly lower than that of \$4,831,156 recorded in the preceding period of observation. The average per capita weekly earnings rose from \$34.33 at October 1 to \$34.54 at the date under review. The November 1, 1941, figure had been \$33.90.

Construction and Maintenance.—There was further important expansion of a contra-seasonal character in the construction industries; building was decidedly more active, while highway and railway construction and maintenance released employees. Statements were tabulated from 1,523 contractors employing 195,334 men and women, 6,653 more than in the preceding month. The gain took place largely on defence projects. The weekly payrolls reported by co-operating employers amounted to \$5,571,246; this was an increase of 4.9 per cent over the October 1 total. There was also an advance in the per capita average earnings, which stood at \$28.52 at November 1, as compared with \$28.14 at the beginning of October. The November 1, 1941, figure was \$24.01.

The November 1 index in construction, at 154.9, was higher than that of 147.7 at the beginning of November of last year. This increase of 4.9 per cent was accompanied by that of 21.1 per cent in the reported payrolls.

Services.—Seasonal losses were reported in the service division, in which the 617 co-operating establishments released 557 persons, bringing their staffs to 40,680 at November 1. This reduction was rather below normal in the experience of other years. The salaries and wages distributed at the beginning of November amounted to \$741,437, compared with \$739,084 in the preceding period of observation.

During the last 12 months, there has been an advance of 5.1 per cent in the number of

persons in recorded employment, while the reported payrolls showed a gain of 14.2 per cent. The per capita averages were \$18.23 at November 1 and \$17.92 at October 1, 1942, as compared with \$16.75 at the beginning of November, 1941. Attention must again be drawn to the fact that in hotels and restaurants, as in logging, many of those employed receive board and lodging as part of their remuneration; the former division constituted some 61 per cent of the total reported in the service division as a whole at the beginning of November.

Trade.—Employment in trade showed expansion at November 1 which rather exceeded that usually indicated at the beginning of November. Data were furnished by 2,213 establishments, with a total personnel of 160,861 men and women, as compared with 157,919 at October 1. The sum of \$3,941,490 was paid at the date under review in weekly salaries and wages by the co-operating firms, whose payrolls at October 1 had aggregated \$3,881,983. The percentage gain in the disbursements was smaller than that in the employees, so that the per capita average slightly declined, standing at \$24.50, as compared with \$24.57 in the preceding report; the November 1, 1941, figure had been \$23.08.

The index number of employment in trade at November 1 was 156.5, as compared with 163.4 at the same date in 1941. The latest figure therefore showed a decrease of 4.2 per cent in the twelve months; the index of payrolls, however, was 1.3 per cent higher.

Financial Institutions.—Information from 753 financial institutions showed a personnel of 64,055, 118 fewer than at October 1. The weekly earnings paid at the date under review amounted to \$1,972,357, as compared with \$1,972,743 paid on or about October 1. The per capita weekly average was \$30.79, as compared with \$30.74 in the last report. The index of employment in financial institutions was higher by 1.3 per cent than at November 1, 1941, while the index number of payrolls was higher by 6.5 per cent.

Employment and Payrolls by Economic Areas

With the exception of Alberta, all provinces reported heightened activity at the first of November. Except in Quebec, the gains were not large; in most cases, they were contra-seasonal. The falling-off in Alberta was also on a small scale. In all provinces, the amounts disbursed in weekly payrolls at November 1 reached a new high.

Maritime Provinces.—Employment in the Maritime Area continued to expand; the in-

crease, which was contra-seasonal, was smaller than that indicated in the preceding report, or at the same date of 1941. All three provinces shared in the upward movement. The 948 co-operating establishments employed 141,526 persons, 2,823 more than at the beginning of October. This gain of two per cent was accompanied by that of 2.2 per cent in the reported payrolls. The index of employment stood at 189.0, as compared with 179.6 at November 1, 1941.

Manufacturing in the Maritime Provinces as a whole was quieter, most of the loss taking place in animal food and lumber mills. Vegetable food, textile and iron and steel plants, on the other hand, were rather more active. Among the non-manufacturing classes, logging, transportation and trade reported seasonal increases. Mining, construction and services, however, showed some curtailment.

The salaries and wages paid at November 1 for services rendered in the preceding week amounted to \$3,585,409, as compared with \$3,507,835 disbursed by the same firms at October 1. The per capita average rose slightly, from \$25.29 in the last report, to \$25.33 at the date under review. The average at the same date in 1941 had been \$23.51. In the last twelve months, the index of payrolls in the Maritime Provinces has risen by 11.1 per cent, while that of employment has increased by 5.2 per cent.

Quebec.—There was a considerable advance in Quebec at November 1, most of which took place in manufacturing, logging and construction; in the first-named, there was an especially large gain in iron and steel plants, with smaller but considerable improvement in the production of chemical, electrical apparatus and non-ferrous metal products. On the other hand, lumber, vegetable food, pulp and paper, textile and iron and steel factories released employees. Among the non-manufacturing divisions, communications, transportation and services showed a falling-off. There was a small increase in retail trade and mining. The general expansion in Quebec exceeded the average, and was also larger than that indicated at November 1, 1941. Statements for the date under review were furnished by 3,375 employers, whose staffs aggregated 579,382; this was higher by 1.8 per cent than the number reported at the beginning of October, 1942.

The sum of \$16,281,001 was distributed in weekly payrolls at November 1; as compared with \$15,866,818 paid on or about October 1, there was a gain of 2.6 per cent. The latest per capita average was \$28.10, as compared with \$27.88 at October 1, and \$25.08 at November 1, 1941. The index number of employ-

ment, at 198.1 at the date under review, was 11.9 per cent higher than at November 1 of last year, while that of payrolls was higher by 24.9 per cent.

Ontario.—Further moderate improvement was shown in Ontario; the gain was contra-seasonal, according to the experience of earlier years since 1920, but was smaller than in any other November during the war. Information was furnished by 5,724 firms with a working force of 751,939 men and women, as compared with 749,986 at October 1. The reported payrolls, at \$23,398,532, showed an increase of 1.4 per cent. The latest per capita average was \$31.12, as compared with \$30.77 at October 1, 1942, and \$28.48 at the beginning of November, 1941. The index of employment, at 185.2 at November 1, was fractionally higher than that of 184.7 in the last report, and 7.1 per cent above the November 1, 1941, figure of 173.0. The latest index of earnings was 16½ per cent higher than a year ago.

For the first time in many months, there was a shrinkage in employment in manufacturing as a whole in Ontario; this was mainly due to seasonal reductions in fruit and vegetable canneries. Lumber, pulp and paper and textile mills were slacker, and there was a decrease in central electric stations. Further substantial expansion was indicated in iron and steel plants, while gains on a smaller scale were reported in rubber, chemical and electrical apparatus factories. In the non-manufacturing groups, logging, building and retail trade afforded more employment, but mining, communications and transportation showed curtailment.

Prairie Provinces.—The trend at November 1 was upward in Manitoba and Saskatchewan, while activity declined in Alberta. Statistics tabulated from 1,816 establishments in the Prairie Area showed a combined staff of 189,703, as compared with 188,163 at the beginning of October. This increase of 0.8 per cent was contra-seasonal, there having been, on the average, a small decline in employment at November 1 in the period, 1920-1941. The weekly salaries and wages disbursed at the beginning of November were also higher, at \$5,647,835, as compared with \$5,550,190 at the beginning of October. The per capita average earnings showed a gain, advancing from \$29.50 at October 1, to \$29.77 at the date under review; at November 1, 1941, the weekly average had been \$27.85.

In the last 12 months, industrial employment in the Prairie Provinces taken as a unit has increased by three per cent, while there has been a rise of 9.8 per cent in the reported weekly payrolls.

The largest additions to the working forces in the Prairie Area at November 1, 1942, were in manufacturing, mainly in iron and steel, food and textile factories. Transportation, building and retail trade were also busier. Other branches of construction and services showed reduced employment, while little general change was indicated in mining, logging and communications.

British Columbia.—There was another considerable advance in employment in British Columbia, the ninth in succession; the 1,402 employers furnishing data at November 1 showed a personnel of 173,383 men and women, 3,279 more than in their preceding return. This gain of 1.9 per cent was accompanied by that of 3.5 per cent in the reported payrolls. The increase in employment was contra-seasonal, the trend at November 1 in past years having almost invariably been unfavourable.

Manufacturing showed a further increase. There was important expansion in iron and steel products, while lumber, vegetable food, pulp and paper and non-ferrous metal products reported moderate curtailment, partly seasonal in character. Logging, communications, construction, trade and services showed improvement, that in construction being substantial.

The sum of \$5,776,322 was distributed in weekly payrolls at November 1, when the reported salaries and wages exceeded by \$194,931, or 3.5 per cent, those disbursed at October 1. The latest per capita average was \$33.32, as compared with \$32.81¹ in the preceding period of observation, and \$29.17 at November 1, 1941. In the period since then, the index of payrolls has risen by 40.7 per cent, while that of employment, at 187.2 at November 1, 1942, was 25.3 per cent higher than at the same date of 1941.

Employment and Payrolls by Cities

Employment showed an upward movement at the beginning of November in seven of the eight cities for which statistics are currently tabulated. There were large advances in Montreal, Quebec City, Toronto, Hamilton, Winnipeg and Vancouver. Little general change took place in Ottawa, while activity moderately declined in Windsor. The amounts disbursed in weekly payrolls to those in recorded employment in each of these centres were greater than at October 1; the per capita averages were also higher.

Montreal.—There was a further substantial gain in Montreal, most of which took place

in the iron and steel division of manufacturing; chemical, electrical apparatus, non-ferrous metal and other plants were decidedly busier, while textile factories showed some curtailment. With the exception of trade (which was moderately brisker), the non-manufacturing industries were quieter. Transportation recorded the greatest decline.

The 1,953 firms furnishing data at November 1 had 271,097 employees, an increase of 3,825, or 1.4 per cent over their working forces at the beginning of October. The amount disbursed in weekly payrolls at the date under review was \$7,995,148, exceeding by 2.2 per cent the sum of \$7,826,878 reported at October 1. There was also an advance in the per capita average, which stood at \$29.49 at November 1, 21 cents higher than the average of \$29.28 at the beginning of October. The November 1, 1941, figure had been \$26.30.

The latest index of employment, at 178.6, was 12.9 per cent above that of 158.2 at the same date of last year, while the payroll index has risen by 25.9 per cent in the 12 months.

Quebec City.—The movement in Quebec was again favourable; the 232 co-operating employers had a staff of 36,315 men and women at November 1, as compared with 35,516 at the beginning of October. The reported salaries and wages rose by 4.2 per cent to \$918,838 at November 1. The weekly per capita average stood at \$25.30, as compared with \$24.83 at October 1, 1942, and \$22.15 paid on or about November 1, 1941. There were important increases in employment at the date under review in manufacturing, mainly in the chemical group, while iron and steel plants were slacker. Transportation and trade also reported heightened activity.

The index of employment at November 1, 1941, had stood at 190.7, as compared with 254.1 at the date under review. This increase of 33.2 per cent was accompanied by that of 55.3 per cent in the recorded weekly payrolls in the 12 months.

Toronto.—There was continued, important expansion in Toronto, according to data tabulated from 2,001 establishments employing 245,305 men and women, as compared with 239,866 at October 1. The increase of 5,439 persons, or 2.3 per cent, was seasonal in character, but greatly exceeded the gain indicated, on the average, at November 1 in the years since 1920. Most of the improvement at the date under review was in manufacturing, notably in iron and steel. Rubber, textile, electrical apparatus and non-ferrous metal plants also showed greater activity. Construction, trade and services likewise reported addi-

¹ Revised.

tions to the working forces, those in construction being considerable.

The co-operating firms reported that their weekly payrolls aggregated to \$7,577,696, as compared with \$7,349,106 paid on or about October 1, 1942. The per capita average was then \$30.64, rising to \$30.89 at the date under review. The index of employment at the latest date stood at 190.9; this was almost 14 per cent higher than that of 167.6 at the beginning of November of last year. The reported payrolls have risen by 25 per cent in the 12 months.

Ottawa.—Little general change was noted in Ottawa. Retail trade was busier, and there were small gains in services and in manufacturing, but construction released employees. Information was received from 250 employers, whose personnel included 21,471 men and women, 47 more than at October 1. The weekly salaries and wages reported at November 1 aggregated \$564,508. The per capita average was \$26.29, as compared with \$26.24 at October 1, 1942, and \$25.40 at November 1, 1941.

The index of employment in Ottawa, at 162.6, was slightly lower than that of 164.4 at November 1, 1941; however, the index of payrolls showed an increase of 2.2 per cent in this comparison.

Hamilton.—The trend continued upward in Hamilton, where the 354 reporting establishments had a working force of 63,006 persons; this was higher by 593, or one per cent, than the number they had employed in the preceding month. The sums paid in weekly salaries and wages on or about November 1 amounted to \$2,027,716. As compared with \$2,000,439 disbursed at October 1, there was a gain of 1.4 per cent. The per capita average earnings advanced, rising from \$32.05 in the preceding period of observation to \$32.18 at the date under review. At November 1, 1941, the weekly average had been \$29.42.

Further improvement was noted in manufacturing, mainly in the iron and steel and electrical apparatus divisions. Construction and trade were also more active, while little general change was shown in other classes.

In the period from November 1, 1941, the index of employment, has advanced by 10 per cent to 192.9, while that of payrolls has risen by over 20 per cent.

Windsor.—For the first time in many months, employment in Windsor showed a slackening, 124 workers having been laid off by the 207 co-operating firms, whose staffs aggregated 42,165. The weekly payrolls, however, were slightly higher, at \$1,712,267, as compared with \$1,703,458 distributed by the same employers at October 1. The per capita average was

then \$40.28¹, rising to \$40.61 at the beginning of November. The November 1, 1941, figure had been \$35.71.

The falling-off in employment at the date under review took place mainly in the manufacture of vegetable foods. Iron and steel plants showed greater activity, while there was little change on the whole in the non-manufacturing classes.

The index of employment stood at 310.3, slightly lower than that of 311.2 at October 1; however, it was higher by 26.8 per cent than the November 1, 1941, figure of 244.7. In the 12 months, the index number of payrolls has risen by 43.9 per cent.

Winnipeg.—Employment in Winnipeg at the beginning of November showed its ninth consecutive advance. Manufacturing, construction and trade were decidedly busier; the gain in the first-named took place mainly in food factories. A combined working force of 57,608 men and women was reported by the 561 establishments furnishing statistics, who had employed 56,632 in the preceding month. There was thus an increase of 1.7 per cent, which was accompanied by that of 3½ per cent in the reported salaries and wages. These were given as \$1,616,226 paid on or about November 1 for services rendered in the preceding week. The per capita average rose from \$27.57¹ at October 1, to \$28.06 at the beginning of November; that at November 1, 1941, was given as \$26.17.

The index number of employment, at 138.2 at the date under review, was higher by 3.8 per cent than at the first of November in 1941; the accompanying increase in the weekly payrolls has amounted to 11.1 per cent.

Vancouver.—Further large additions to the personnel were reported in Vancouver at the beginning of November. Most of the advance was in the manufacture of iron and steel products. Trade and services were rather busier, while transportation and construction released some workers.

Statistics were received from 611 employers having a staff of 85,453 persons, as compared with 84,452 at October 1. The index reached a new maximum, standing at 241.4; this was higher by 48.1 per cent than that of 163.0 at November 1, 1941. The persons in recorded employment at the date under review were paid the sum of \$2,779,216 in weekly salaries and wages, as compared with \$2,723,581¹ in the preceding period of observation. The index of payrolls has risen by 72.7 per cent since November 1, 1941. The per capita average at the beginning of November, 1942, was \$32.52 comparing favourably with those of \$32.25¹ at October 1, 1942, and \$27.88 at November 1 1941.

¹Revised.

Employment Conditions at the End of December as Reported by Employment and Selective Service Offices

REPORTS from Employment and Selective Service Offices of the Unemployment Insurance Commission indicate that employment conditions in Canada at the end of December were as follows:—

MARITIME PROVINCES

Agricultural operations in the Maritime Provinces were virtually at a standstill and there was practically no demand for farm help. Many of the farm workers in Prince Edward Island were finding employment in the woods of Nova Scotia and New Brunswick. Fishing operations were fairly normal but a few fishermen were securing employment in the woods. Forestry and logging operations were slowed down during the holiday season when many of the men returned to their homes. However, several large logging operations were under way at different centres but the demand for skilled woodsmen was far from satisfied. The coal mines were operating full time, with the exception of two or three that had met with temporary set-backs owing to fire and flooding in the mines. Skilled underground men were in demand in the Minto and New Glasgow coal areas and experienced men were required for the salt mines at Amherst. Power shortages slowed up pulp and paper production at Campbellton, New Brunswick, but sawmills, steel plants and plants producing war materials were working normally, with the exception of a few brief shut-downs for repairs. The labour supply in these lines was adequate. Construction labourers were in some demand in Halifax, but these were generally obtained locally or by clearance. In most sections however, construction work was practically at a standstill. Transportation companies reported brisk holiday business and exports and imports through the port of Saint John were heavy. The demand for workers by the transportation and express companies was being met. The Christmas trade was generally good, but temporary help was being laid off. Experienced salesmen to call on the trade were being asked for at Halifax. Domestic help was required in several centres, but there were very few applicants.

QUEBEC

Farming operations in Quebec were slowed down for the winter season. There was a widespread and heavy demand for bushmen throughout the province. Attempts to obtain such labour through clearance were unsuccessful. In Quebec City alone more than 1,600

could have been placed, but there were no applicants. A steady demand existed for miners, muckers, mine electricians and smeltermen in the Rouyn area. There was but little turnover reported in the base metals industry and it was expected that the demand for labour would be satisfied before the end of January. On the whole, industrial activity showed some decline. Lay-offs were in prospect in one of the larger meat packing plants, but there were a few openings for trained workers in the vegetable food factories. It was expected too that some of the pulp and paper mills would reduce their staffs. However, the sulphite mill at Chandler was operating seven days a week and the paper mills at St. Jerome were taking on some additional help. Furniture establishments were also adding to their staffs. The severely cold weather was causing some shipyard workers to give up their jobs and the companies were seizing the opportunity to make necessary repairs to their machinery. Skilled pipefitters, welders, coppersmiths and electricians for shipyard work were in some demand. Textile mills were working full capacity with but slight labour turnover. There were some enquiries for millwrights' assistants, and other skilled workers, as well as labourers in the non-ferrous metal industry and several hundred potmen and labourers will be required at Chicoutimi early in February. These will likely be obtained locally. A considerable number of semi-skilled and unskilled men were laid off and others placed on part time at the locomotive works in Montreal and some war industries were reducing their orders for workers. The campaign to provide 2,500 women workers for munition plants in Quebec was meeting with indifferent success only. Chemical plants reported a record year of production, but no help was required. The rubber industry at Granby closed the year with a production record below that of the preceding year, but was showing improvement in recent weeks. Lay-offs were also made at the war plant at St. Jerome. The trend was upward in the tobacco processing industry, following local seasonal declines. The supply of workers appeared to be adequate. Construction was slowed up seasonally in most centres and workers were finding their way into other lines. Work on wartime housing and power industry projects was proceeding at a reduced tempo. There was little demand for construction labour, the most important being for stationary engineers and electricians at Montreal. The retail trade had a very busy

holiday season and in one or two instances stocks were somewhat depleted. There was still some demand for draughtsmen, cost accountants, time study men and other specialized office workers in wartime plants in Montreal but these were being drawn from non-essential industries. A shortage of hotel and restaurant help and domestics was general throughout the province.

ONTARIO

There were a number of enquiries for farm workers at several points in southern and western Ontario but in almost all instances few or none were available. In some sections fear was expressed that the shortage would become serious with the approach of spring. In only one or two cases was a surplus of farm labour reported. There was a heavy demand for bush workers from almost every part of the province, with comparatively few men offering their services. Orders for medically-fit, experienced miners could not be met in the Sudbury area. The gold mines would have taken on more workers, but the lowered priority of gold prevented them doing so. A sufficient supply of miners seemed to be in prospect locally, for the new iron mines soon to be opened at Steep Rock. Industrial operations slackened to some extent, due to the holiday season, the taking of inventories and the making of plant repairs. Others were affected adversely because of shortage of materials and industrial priorities. In a few instances night shifts were being discontinued. For this and other local reasons, minor lay-offs occurred, but the workers were being absorbed in other industries. In the main, however, plants were working full time and labour shortages were largely confined to skilled craftsmen. Flour mills were active, some of them working three shifts, but the supply of labour seemed to be adequate. Tanneries on the other hand were generally short-handed, owing chiefly to the difficulty of getting men to accept that class of work. The pulp and paper industry was able to obtain sufficient help, but there were minor shortages of workers for sawmills, furniture factories and other wood-working plants. There was an almost general shortage of skilled labour in the textile industry; weavers, twisters, spinners, knitters and power sewing-machine operators being in demand. Some plants were meeting this difficulty in a measure by establishing evening shifts of women who were occupied in their homes during the day. Plants working on war orders for clothing were also short of skilled workers. In the metal industries there was a steady demand for machinists, moulders and die makers, machine designers, draughtsmen, drop forge operators,

welders and bench workers. The supply of semi-skilled workers and labourers in the metal industry was nearly sufficient in most centres, although a few hundred labourers will probably be taken on in the Hamilton area early in the New Year. A few openings were available for laboratory workers and technicians in the chemical industry, and a limited number of men and women were required by manufacturers of abrasives. Construction work was being held up in many areas by the severe weather and at a few points carpenters and other workers were being transferred elsewhere. On the other hand there were urgent demands for carpenters, bricklayers, electricians and heavy labourers in a number of areas, notably at Kingston and Ottawa. There were prospects of increased building activity at several points early in the New Year when a number of new projects would be undertaken. Work on highways was at a standstill. Water transportation was tied up for the season, but the men laid off were finding work elsewhere. The railways experienced perhaps the heaviest passenger traffic in their history. The movement of freight was steady and at a few points required extra temporary help. Truck and bus drivers and maintenance of way men were in some demand and enquiries were made at one or two points for locomotive firemen and motor mechanics. The retail trade through the holiday season was unusually heavy, but by the end of the month most of the temporary sales staffs had been released. There was generally an active demand for domestics and to a lesser extent for hotel and restaurant help, stenographers and bookkeepers which was not being fully met.

PRAIRIES

In spite of the seasonal decline in farm operations on the Prairies, there was a small but fairly general demand for farm helpers, chiefly choremen and dairymen. The response was fair in some districts, but for the most part, few men were obtainable for this work. In a few areas threshing operations will not be completed until spring. Over one million pounds of fish were reported to have been taken in Reindeer Lake in Northern Manitoba. These will be hauled to the rail-heads by caterpillar tractors early in January. Reports from Edmonton and Red Deer indicated that there was a rather acute shortage of bushmen in those areas. Elsewhere the demand was not so great and in a few cases workers were being transferred by clearance. The urgent need for miners that existed in the coal mining areas earlier in the season had been relieved considerably, but there were a number of vacancies for certificated miners at Lethbridge, Drumheller, Edson and Edmonton. A few miners

were being transferred by clearance from other centres. The hard rock mines at Edmonton and Flin Flon were able to obtain sufficient labour locally. Prairie industries were not being greatly handicapped by lack of labour. Some of the meat packing plants were operating steadily and absorbing additional help, still others were reducing their staffs because of restrictions in canning and the low run of livestock. Sugar factories were still operating and their labour situation seemed fairly well in hand. A few men were required by saw-mill operators and there was a shortage of skilled mechanics at Winnipeg, but at least one war industry was releasing workers on the completion of its existing contracts. The brick and pottery industries in the Medicine Hat area required a few additional helpers. Several minor labour shortages in industry were being corrected through clearance. Construction work was practically at a standstill except at Edmonton, where there was a heavy demand for tradesmen both locally and in northern points. The transportation companies were active and experienced railway men were being asked for at a number of points. The holiday trade was good throughout the Prairies. Temporary sales staffs employed for the Christmas season were being laid off. Teachers and clerical help were required in a few districts and there was a fairly widespread demand for hotel and restaurant help and domestics which could not be fully supplied.

BRITISH COLUMBIA

As elsewhere in Canada, farming operations in British Columbia were greatly curtailed. A small number of experienced workers could have been placed on dairy farms on Vancouver Island and on mixed farms on the mainland, but there were very few applicants. Work in the logging camps was slowed down due in part to the holiday season and also to the

heavy snowfall and bad weather. However, there were several enquiries for good bushmen and in some areas, notably at Kamloops, the demand was fairly urgent. Certificated miners were badly needed for the coal mines at a number of points on the mainland and several were brought in from outside points. The industrial situation was fairly normal with minor layoffs offset by increased staffs at other places. The holiday season reduced production in the canneries and sawmills, but these seemed certain to pick up again early in the New Year. Skilled lathe hands, tool makers, tool designers and pattern makers were in demand in Vancouver and there was an upward trend in the shipbuilding industry at Vancouver and Prince Rupert. Construction work was greatly retarded in some areas owing to bad weather conditions and shortage of materials. Activity in the building trades was slight, therefore, and a few workers were being transferred elsewhere. The defence works to be proceeded with early in the year will absorb much of the surplus supply of labour. Transportation by bus, boat and railway was very heavy and the new improved airway plant at New Westminster will require more workers very soon. Extra gangs for maintenance work were being requisitioned by the railways. Trade was comparatively good following the busy holiday season and surplus staffs were being reduced. Domestics and hotel helpers were urgently needed at many points but the need was not being fully met in most instances. Reports from Whitehorse, Yukon Territory, indicate that cold weather and the holiday season were slowing up industrial activity of all kinds. American companies there were having trouble getting men from the United States owing to transportation difficulties. They have, as a result, been endeavouring to obtain Canadian carpenters and labourers. However, there were no Canadians available.

Applications for Employment, Vacancies and Placements, November, 1942

REPORTS received from Employment and Selective Services Offices during the month of November, 1942, showed a gain in business transacted, both when compared with the preceding month and with the corresponding month a year ago, the latter comparison being most pronounced, due, as in the two previous months, to the National Selective Service Regulations passed under authority of Order in Council P.C. 7595, which made it obligatory for employers seeking workers, and persons desiring employment, to notify Employment and Selective Service Offices. Manufacturing, trade and services were mainly

responsible for the increase under the first comparison, and manufacturing, trade, construction, services, transportation and logging under the second, the advance in manufacturing being most pronounced in both instances. All industrial divisions except agriculture and mining showed increased placements over the previous month and all apart from agriculture reported a gain over November, 1941.

The accompanying chart shows the trend of employment since January, 1941, as represented by the ratios of vacancies notified and of placements effected for each 100 applications for work registered each month at Employment

*123 Placements effected by offices now closed.

NOVA SCOTIA AND PRINCE EDWARD ISLAND

During the month of November, 1942, Employment and Selective Service Offices in Nova Scotia and Prince Edward Island received orders for nearly 4 per cent more workers than in the preceding month and 370 per cent more than the corresponding month of the previous year. There was an increase of over 4 per cent in placements when compared with October and 227 per cent in comparison with November, 1941. With the exception of small decreases in services and agriculture, all industrial groups participated in the increase in placements over November, 1941, that in manufacturing being the most pronounced. Industrial divisions in which the majority of placements were effected included: manufacturing 2,665; construction 2,226; services 1,330; trade 1,073; transportation 395 and logging 262. Placements in regular employment numbered 5,972 of men and 2,130 of women.

NEW BRUNSWICK

Employment opportunities, as indicated by orders received at Employment Offices in New Brunswick during November, were over 4 per cent fewer than in October, but 857 per cent above those of November a year ago. Placements were 29 per cent in excess of the preceding month and 603 per cent more than November, 1941. When comparing placements by industrial divisions during the month under review with November a year ago, the most pronounced gains were recorded in manufacturing, logging, trade and construction, with a small decline in agriculture. Placements by industrial divisions included: manufacturing 1,170; logging 1,159; services 1,066; construction 1,044 and trade 1,039. During the month 4,220 men and 1,470 women were placed in regular employment.

QUEBEC

Orders listed at Employment Offices in the Province of Quebec during November called

for 9 per cent fewer workers than the preceding month, but 427 per cent more than the corresponding month of the previous year. Placements were 59 per cent higher than in October and 414 per cent above those of November, 1941. The increase in placements over November a year ago was due to substantial gains in manufacturing, construction and trade with somewhat smaller increases in services, transportation, logging and mining, although all other groups showed improvement, except agriculture, in which a nominal decrease was reported. Industrial divisions in which most of the placements were effected during the month were: manufacturing 37,284; construction 8,877; services 7,399; trade 7,197 and logging 3,659. There were 45,042 men and 23,221 women placed in regular employment during the month.

ONTARIO

Positions offered through Employment Offices in Ontario during November were nearly 13 per cent fewer than in the preceding month, but 437 per cent above the corresponding month a year ago. Placements were 14 per cent higher than in October and 426 per cent above November, 1941. A substantial increase in the manufacturing industries was mainly responsible for the gain in placements over November a year ago, although all other industrial groups, except agriculture, participated in the improvement under this comparison, the most important of which were in trade, services, construction, logging and transportation. Placements by industrial divisions included: manufacturing 35,045; services 11,268; trade 8,093; construction 6,632; logging 4,200 and transportation 2,563. Placements in regular employment numbered 42,291 of men and 25,779 of women.

MANITOBA

The demand for workers as indicated by orders listed at Employment Offices in Manitoba during November was nearly 4 per cent less than in October, but 516 per cent more than during November, 1941. Placements showed an increase of 26 per cent over October and were 212 per cent in excess of the corresponding month a year ago. Except for moderate declines in logging and agriculture, all industrial divisions showed gains in placements over November, 1941, the most noteworthy increases being in trade, manufacturing, construction and services. Industrial divisions in which most of the placements were effected included: manufacturing 2,643; trade 2,184; services 1,894; construction 1,238; logging 680 and transportation 463. There were 5,313 men and 3,676 women placed in regular employment.

SASKATCHEWAN

There was a decrease of 45 per cent in the number of positions offered through Employment Offices in Saskatchewan during November when compared with the preceding month, but an increase of 301 per cent in comparison with the corresponding month of the previous year. Placements were over 7 per cent higher than in the preceding month and 244 per cent in excess of the number reported during November, 1941. With the exception of agriculture, in which a moderate decline occurred, all industries participated in the increased placements over November, 1941, the most marked improvement being in trade, manufacturing and services. Placements by industrial divisions included: trade 1,668; services 1,592; manufacturing 1,527; logging 440; construction 360 and transportation 340. During the month 3,429 men and 2,562 women were placed in regular employment.

ALBERTA

Orders received at Employment Offices in Alberta during November called for 11 per cent fewer workers than in October, but 339 per cent more than in the corresponding month a year ago. There was an increase of 6 per cent in placements when compared with the preceding month and 333 per cent in comparison with November, 1941. With the exception of a minor decline in agriculture, all industrial divisions showed gains in placements over November a year ago, the most important advances being in manufacturing, trade, construction, services, transportation and mining. Placements by industrial groups included: manufacturing 2,070; services 1,932; trade 1,570; construction 1,356; transportation 968; logging 924 and mining 896. Placements in regular employment numbered 6,880 of men and 2,626 of women.

BRITISH COLUMBIA

During November, orders received at Employment Offices in British Columbia called for over 7 per cent fewer workers than in October, but 771 per cent more than during November, 1941. There was an increase in placements of 10 per cent when compared with the preceding month and of 764 per cent in comparison with the corresponding month of the previous year. All industrial divisions participated in the increase in placements over November, 1941, the most noteworthy gains being in manufacturing, construction, services, trade and logging. Industrial divisions in which most of the placements were effected during the month were: manufacturing 9,671; construction 3,729; services 3,687; trade 2,498; logging 1,631; and transportation 1,407. Placements in regular employment numbered 15,269 of men and 7,542 of women.

Unemployment in Trade Unions at the Close of November, 1942

UNEMPLOYMENT in the following report has reference to involuntary idleness due to economic causes. Persons who are engaged at work outside their own trades, or who are involved in industrial disputes are excluded from these tabulations. As the number of unions making returns varies from month to month with consequent variations in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only, to the organizations reporting.

Reports were tabulated at the close of November from 2,241 labour organizations having an aggregate membership of 398,224 persons, of whom 3,129, or a percentage of 0·8 were reported as unemployed, in comparison with percentages of 0·7 in October and 3·3 at the end of November, a year ago. Union members who were without work at this time were for the most part temporarily laid off. The very slight contraction in available work which was indicated in November was due principally to the moderate increase in unemployment for members in the building and construction trades and to the somewhat lower employment level reflected in reports received from unions of steam railway employees. As will be seen in table II, the percentage of unemployment among building and construction workers was up from 2·2 to 3·2 and for the steam railway group from 0·8 to 1·2. These employment declines, although very moderate, were sufficient to offset the somewhat better conditions which were apparent for union members in mining and in the manufacturing industries. The percentage of those who were without work at the close of November was the lowest for any corresponding period in these records, which were published on a monthly basis for the first time in January, 1919. Prior to that date, the trade union report appeared quarterly.

In table I the unemployment percentages are shown for each province. It will be seen that these ranged from 0·4 in British Columbia to 1·5 in New Brunswick. Provinces, in which less than one per cent of the membership were reported as without work, were Nova Scotia, Ontario, Saskatchewan and British Columbia. In comparison with the previous month a very slight improvement was manifested in Quebec. In Ontario and Nova Scotia, the percentages of unemployed members re-

mained unchanged at 0·5 and 0·7 respectively. In the remaining provinces there were slight employment declines. In comparison with conditions in November, 1941, very much higher employment levels were observed in Quebec, Manitoba, Saskatchewan and British Columbia. In Ontario and Alberta, likewise, there were substantial increases in activity, while in Nova Scotia there was a moderate improvement. On the other hand, in New Brunswick there was a slight employment contraction.

A separate compilation is made each month of unemployment among trade union members in the largest city in each province, with the exception of Prince Edward Island. The percentages of unemployed members ranged from 0·3 in both Toronto and Regina to 1·7 in Saint John. Cities, in which less than one per cent of the union members were unemployed were Montreal, Toronto, Winnipeg, Regina, Edmonton and Vancouver. The percentage of those without work in Edmonton was 0·7, which was appreciably lower than in October, while in Montreal there was a very slight employment expansion. Slightly less work was apparent in Saint John, Toronto, Winnipeg, Regina and Vancouver while a more appreciable decline occurred in Halifax, where the unemployment percentage increased from 0·6 to 1·4. In comparison with the situation in November a year ago, much higher employment levels were reflected in reports received from unions in Halifax, Montreal, Toronto, Winnipeg, Edmonton and Vancouver. In Regina, also, there was improvement, although to a somewhat lesser degree, while on the other hand, in Saint John there was a very slight lessening of available work.

The chart which accompanies this article shows the trend of unemployment from January, 1936, to date. The curve in November, 1942, rested at a very slightly higher level than in October, indicating a minor employment recession, and was considerably lower than in November, 1941, thus indicating a noteworthy employment expansion.

In the manufacturing industries 760 reports were received, having a combined membership of 217,682 persons of whom 782, or a percentage of 0·4 were without work, in comparison with percentages of 0·5 in October and 2·7 in November a year ago. In comparison with October, papermakers reported an appreciable betterment; the unemployment percent-

age among these members declined to 0.6 from 1.3. Unions in the printing trades indicated that a percentage of 0.9 was without work and for unions of woodworkers the percentage was 0.4; in each of these cases the employment level was slightly higher. Conditions, likewise, were somewhat better for unclassified manufacturing workers, although the unemployment percentage was still rather high at 7.7; among leather workers there was a minor expansion in work. Little unemployment prevailed among bakers and confectioners and clay, glass and stone workers; there were, however, fractional increases in work for these members. Although but few were involved, as the membership reporting was very small, chemical workers indicated a note-

month, adequate work was available, were soft drink, cigar and tobacco, electric current, etc., textile and carpet, fur and rubber workers, metal polishers, etc., jewellery, aluminum and mineral products workers. On the other hand, butchers, meat and fish packers were not quite as busy. In comparison with the situation at the end of November, 1941, pronounced expansion in work was observed for leather workers; the unemployment percentage for these members dropping from 25.3 to 2.0. A much higher employment level prevailed also among garment workers, while union members in the printing trades, in woodworking and in the iron and steel trades, indicated moderate improvements. Organizations in which the members were reported as employed

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADES UNIONS

worthy increase in activity; the percentage of those shown as without work in October was 17.6 compared with full employment in the month under review. The percentages of unemployed members in the garment trades, which organizations include men's and women's clothing workers, and for members in the iron and steel trades stood, in each case, at 0.1; this was identical with that shown in October. Among the smaller memberships, the unemployment percentage for hat, cap and glove workers, likewise, remained unchanged, at 0.1. Trades in which, as in the previous

at both dates were cigar and tobacco, electric current employees, etc., textile and carpet, rubber, jewellery and mineral products workers. In contrast, a fractionally lower employment level was apparent among papermakers while among butchers, meat and fish packers there was a minor recession, as the unemployment percentage for these workers increased from full employment to 1.6.

For coal miners returns were tabulated from 56 unions, having a membership of 20,249 persons, of whom 87, or a percentage of 0.4 were without work, in comparison with per-

centages of 0.5 in October and 0.9 in November, a year ago. The percentage of unemployment in Nova Scotia remained, as in the previous month, at 0.7; in Alberta there was a decline from 0.2 to 0.1 per cent. New Brunswick and British Columbia did not report any unemployment at either date. In comparison with reports received for November a year ago, British Columbia members reported substantial betterment. A slightly higher employment level prevailed in Alberta. Among New Brunswick members there was no unemployment at either date, while in Nova Scotia the percentage of members without work, as in the previous comparison, remained unchanged at 0.7.

Reports were tabulated from 8 unions of members in the non-metallic minerals group. The total membership was 4,399 persons, of whom 46, or a percentage of 1.0 were unemployed, in comparison with 2.7 per cent in October and 8.7 per cent in November, 1941.

Unions in the building and construction trades returned 217 reports in which the combined membership was 34,653 persons, of whom 1,120 or a percentage of 3.2 were unemployed, in comparison with 2.2 per cent in October and 8.6 per cent in November, a year ago. Fractionally better conditions were observed among plumbers and steamfitters and electrical workers, when compared with October; little unemployment prevailed among these members. The small memberships of steam shovel men and wood, wire and metal lathers showed no unemployment, as compared with small unemployment percentages in the previous month. The unemployment percentage of 4.2 among granite and stonecutters remained unchanged. Bridge and structural iron workers and painters, decorators and paperhangers reflected slight contractions in work, although there was very little unemployment. Among unions of carpenters and joiners, in which 2.7 per cent of the members were without work, there was a minor employment decrease, while among bricklayers, masons and plasterers and hod carriers and miscellaneous building workers the unemployment percentages stood as 8.5 and 7.7, respectively. These were considerably higher, thus reflecting an appreciable decline in activity. In comparison with reports tabulated in November, 1941, a marked employment expansion was observed for carpenters and joiners, while among plumbers and steamfitters also, the employment level was considerably higher. Among unions of

bricklayers, masons and plasterers, in which 8.5 per cent of the members were reported as unemployed, conditions were much better than a year ago, as the percentage of those without work at that time was 16.4. Although comparatively few members were involved, steam shovel men, bridge and structural iron workers, granite and stonecutters and wood, wire and metal lathers were much busier.

In the transportation industries there were 880 returns tabulated having a combined membership of 80,958 persons, of whom, 850, or a percentage of 1.0 were out of work, in comparison with 0.8 in October and 2.6 in November, 1941. The percentage of those without work among navigation workers was 4.3, which was a minor improvement. No change was shown in the street and electric railway percentage, while teamsters and chauffeurs indicated a fractional employment recession; little unemployment was apparent in either

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

Month	N.S. and Prince Edward Island	New Brunswick	Quebec	Ontario	Manitoba	Saskatchewan	Alberta	British Columbia	Canada

June 1942.....	1.3	4.7	4.6	1.6	1.1	0.9	2.6	0.9	2.5
July 1942.....	0.8	1.0	3.8	0.9	2.2	0.8	1.3	0.3	1.8
Aug. 1942.....	0.4	2.3	1.4	0.7	1.6	0.8	0.9	0.2	0.9
Sept. 1942.....	0.8	1.1	1.3	0.5	0.5	0.9	0.9	0.3	0.8
Oct. 1942.....	0.7	1.2	1.2	0.5	0.4	0.5	0.9	0.2	0.7
Nov. 1942.....	0.7	1.5	1.1	0.5	1.0	0.6	1.3	0.4	0.8

of these groups. Steam railway employees, whose returns constituted over 79 per cent of the entire group membership in the transportation industries, manifested a slight contraction in work, as the unemployment percentage was up from 0.8 to 1.2. In comparison with the situation in November, a year ago, noteworthy expansion in activity was observed among navigation workers; among steam railway employees, also, there was a substantially higher employment level, while fractional employment recessions were noted among street and electric railway employees and teamsters and chauffeurs.

From unions in the wholesale and retail trade 7 reports were received comprising 2,360 members. As in October, no unemployment was reported. In November, a year ago, the percentage of those without work was 0.1.

There were 105 unions of civic employees from whom reports were tabulated, having a combined membership of 9,910 persons, of whom, 16, or a percentage of 0.2 were unemployed. This percentage was identical with that recorded in October; in November 1941, the percentage of those reported as without work was 0.1.

In the miscellaneous group of occupations, reports were secured from 148 unions, in which the total membership was 12,325 persons, of whom, 47, or a percentage of 0.4 were idle; this percentage remained unchanged from October; in November, 1941, the percentage of unemployed members stood at 2.4. In comparison with the previous month, fractional gains in work were shown by hotel and restaurant and

theatre and stage employees, while on the other hand, barbers and stationery engineers and firemen reported very slight recessions. Unclassified workers were fully employed at both dates. Very little unemployment was observed in any of the occupations. In comparison with the situation in November, a year ago, substantial improvement took place among unclassified workers, while employment levels for hotel and restaurant and theatre and stage employees likewise, were much higher. A minor advance occurred for stationery engineers and firemen and in contrast, barbers indicated a very slight employment contraction.

Reports were received from 3 unions of fishermen whose aggregate membership was 2,418, of whom, 10, or a percentage of 0.4 were unemployed, in comparison with 1.0 per cent in October and 14.5 per cent in November, 1941.

Returns were tabulated from 2 unions of lumber workers and loggers. These comprised a total of 3,701 members, all of whom were employed, as in October. In November, a year ago, the unemployment percentage among these workers was 6.9.

Table I shows by provinces the average percentage of union members, who were unemployed each year from 1931 to 1941 inclusive, and also the percentage of unemployment for November of each year from 1931 to 1940, inclusive, and from November 1941, to date. Table II summarizes the returns in the various groups for the months included in table I.

Building Permits Issued in Canada, November, 1942

THE November report of building permits, compiled by the Dominion Bureau of Statistics, includes returns from 164 of the 204 municipalities in Canada which have systems for issuing such permits and of this number 136 reported detailed operations. The remaining 28 advised that no permits had been issued during the month of November, while 40 municipalities had failed to report at the close of December 12.

The total value of permits reported as issued in the month of November is \$7,624,195. Revised values for the month of October include returns from 202 municipalities and aggregate \$8,432,251. Reports were received from 57 of

the 58 original municipalities and show a value of \$5,485,935 for November. The corresponding revised value for October, includes 58 returns and is \$6,277,620, while the November, 1941, value was \$8,575,989.

The total value of permits issued by all municipalities during the eleven elapsed months of the current year is \$97,257,153. The value of the 58 municipalities for the same period is \$70,237,650, while their corresponding value in 1941 was \$94,469,739.

During the month of November new construction of all types amounted to 74.9 per cent of the total value, while the percentage of new residential construction was 34.3.

Employment and Unemployment in Great Britain and the United States

Great Britain .

THE British *Ministry of Labour Gazette*, November, 1942, summarizes the September-October employment situation in Great Britain as follows:—

The number of men and boys registered at Employment Exchanges in Great Britain as wholly unemployed at October 12 (exclusive of 22,883 men who had been classified by interviewing panels as unsuitable for ordinary industrial employment) was 60,769; those registered as on short time or otherwise temporarily suspended from work on the understanding that they were shortly to return to their former employment numbered 1,357; and those registered as unemployed casual workers

(being persons who normally seek their livelihood by jobs of short duration) numbered 2,746. As compared with September 14 the numbers wholly unemployed showed a decrease of 2,934, those temporarily suspended from work showed a decrease of 175, but unemployed casual workers showed an increase of 149.

The corresponding figures for women and girls at October 12 were 35,248 wholly unemployed (exclusive of those, numbering 990, who had been classified by interviewing panels as unsuitable for normal full-time employment), 839 temporarily stopped, and 121 unemployed casual workers. Of the 35,248 wholly unemployed, 1,013 had been classified as un-

able for good cause to transfer to another area. As compared with September 14, the numbers wholly unemployed showed an increase of 289, those temporarily stopped showed a decrease of 338, and unemployed casual workers showed a decrease of 19.

The number of applicants for unemployment benefit or allowances included in the foregoing totals for October 12 was 65,907, as compared with 66,022 at September 14, and 119,695 at October 13, 1941.

United States

The total number of employees in non-agricultural establishments declined by 41,000 between mid-October and mid-November, according to the official report issued by the United States Secretary of Labour. The number at work in November was 38,437,000, which exceeded all previous levels except that of the preceding month and was 2,511,000 larger than in November a year ago.

Construction employment fell more than 10 per cent during the month—218,000—due largely to declines on federally-financed projects. Small employment declines were also reported for the finance—service—miscellaneous group (32,000), the transportation—public utility group (22,000), and the mining group (9,000). Manufacturing employment increased contraseasonally by 123,000, and trade employment expanded seasonally by 76,000. Government civilian employment increased by 41,000.

The increase of 1,873,000 in manufacturing employment since November 1941 was about three fourths of the total gain in non-agricultural establishments during this period and reflected to a great extent the shift from peace-time production to war production. The Federal, State, and local government group had about 25 per cent more workers on its rolls, due largely to expansion in the War and Navy Departments and in other war agencies such as the OPA and the WPB. Transportation and public utility companies had 135,000 more workers than a year ago. The finance—service and miscellaneous group also showed a small gain—66,000—while the remaining groups showed declines as follows: Trade, 373,000, construction, 281,000, and mining 87,000.

About two thirds of the 152 manufacturing industries surveyed by the Bureau of Labor Statistics reported employment and pay-roll gains over the month interval, reflecting the mounting tide of production in war industries.

For all manufacturing industries combined the increase was 0·8 per cent or 106,000 wage earners in contrast to a seasonally expected decline of 1·7 per cent or 216,000 wage earners. The corresponding gain in weekly wage disbursements was 3·8 per cent or 17·8 million

dollars as against a normally expected decline for this time of the year of 3·2 per cent or 15·1 million dollars.

The November indexes stood at 156·6 per cent of the 1939 average for manufacturing employment and 270·8 per cent for pay rolls. Compared with November 1941, the gains were 13·1 per cent in employment and 46·4 per cent in pay rolls. The greater gain in pay rolls than in employment was due to increases in basic wage rates, to longer hours worked, to overtime premiums, and to continued expansion in war industries, where relatively higher wage scales prevail.

Since June 1940, when the United States actually shifted to a war economy, factory employment had increased 53 per cent (4,427,000 wage earners) and corresponding weekly pay rolls had risen 152 per cent or \$294,700,000.

The gains in the durable-goods group of manufacturing industries were even more marked, reflecting the concentration of war work in these industries many of which had converted their facilities from peace-time to war production. The October-November gains for this group were 1·7 per cent or 123,000 in number of wage earners and 4·9 per cent or \$15,400,000 in weekly wages. The corresponding increases between November 1941 and November 1942 were 22·7 per cent or 1,348,000 workers and 61·2 per cent or \$124,500,000. The gains between June 1940 and November 1942 were 83 per cent (3,292,000) in number of wage earners and 212 per cent (\$223,100,000) in weekly wage disbursements.

The non-durable goods group, which has been most seriously affected by war-time restrictions, curtailments, and shortages, showed a decline of 0·3 per cent in employment and a gain of 1·5 per cent in pay rolls over the month interval with corresponding increases over the year interval of 2·6 per cent and 23·2 per cent, respectively.

Among the many war industries showing substantial employment gains over the month were shipbuilder, aircraft, engines, automobiles (largely converted to the manufacture of war equipment), radios, electrical equipment, shell loading, ammunition, and explosives. Among industries reporting declines largely because of material shortages coupled with Government restrictions were hardware, agricultural implements, typewriters, clocks, silverware and plated ware, sawmills, planing mills, furniture, and tin cans. Seasonal declines were reported by firms manufacturing brick, tile and terra cotta; men's clothing; millinery; ice cream; beverages; canning; and cotton-seed oilcake-meal.

In anthracite mining employment increased only slightly over the month—0·3 per cent—but payrolls advanced sharply—

2.4 per cent—as average weekly hours increased. Over the year interval employment fell off 7.5 per cent while pay rolls rose 18.5 per cent, reflecting a labour shortage on the one hand and a longer work week on the other. Relatively small employment declines over the month and large losses over the year interval were also reported in bituminous-coal mining, metal mining, and quarrying and non-metallic mining, reflecting a similar situation with respect to the labour supply.

Metal mining was the only one of those three industries to show a pay-roll gain over the month, but all of them showed large pay-roll gains over the year interval due to wage-rate increases and more hours worked. The Government order closing gold mines resulted in a 30.1 per cent employment decline between mid-October and mid-November in this branch of metal mining. The hiring of some of the gold miners and of furloughed soldier-miners by copper mine operators contributed to the gain of 7.8 per cent in the number of copper miners at work. Lead and zinc mines increased employment by 3.9 per cent while iron mines reduced their forces seasonally by 1.9 per cent.

Employment decreases over the month, largely seasonal, were reported in all of the service industries, the most pronounced being in dyeing and cleaning (4.2 per cent) and laundries (1.6 per cent). In the electric light and power industry employment was down 1.6 per cent, continuing the uninterrupted series of monthly declines which began in August, 1941. The decline since November a year ago amounted to 12.9 per cent. Telephone and telegraph companies reported a slight employment decline since October, and street railway and bus companies a slight employment increase. Corresponding pay rolls were up 0.5 and 2.7 per cent respectively, reflecting increased overtime, particularly in the latter industry where the demand for public transportation continued.

In retail trade the employment and pay-roll gains over the month of 2.1 per cent and 2.8 per cent, respectively were better than the average November increases. Department stores increased employment seasonally by 9.5 per cent; variety stores, 7.3 per cent; men's and boys' clothing, 4.2 per cent; family clothing, 3.6 per cent, and women's clothing, 2.3 per cent. Jewellery stores increased their employees by 5.4 per cent in preparation for Christmas business. Retail automobile dealers continued their employment curtailment by 0.7 per cent, while tire and battery shops took on 0.9 per cent more employees. Electric appliance stores and radio dealers, and also lumber yards decreased employment by 3.0 per cent, and fuel and ice dealers lost 7.2 per cent of their employees over the month interval.

Since November, 1941 retail trade as a whole showed an employment loss of 6.2 per cent. Among the more important retail groups showing pronounced employment and pay-roll decreases over the year, due to Government restrictions, were furniture and house furnishings, 25.6 and 13.8 per cent respectively; automotive 40.7 and 32.0 per cent; and lumber and building materials, 17.2 and 3.6 per cent.

In wholesale trade, employment decreased slightly over the month (0.2 per cent), but pay rolls increased by 1.5 per cent. Small employment decreases were reported by all of the important wholesale groups, except farm products, which reported a marked percentage loss (12.6 per cent). Sharp employment declines over the year were shown by wholesale trade as a whole and by the various important wholesale groups, but they were coupled for the most part with large pay-roll gains. The automotive group reported the largest employment decline over the year (19.8 per cent) coupled with a pay-roll decrease of 10.4 per cent.

Hours of Work in the United States

Hours of work in war industries in the United States rose during November, 1942, to a scheduled average of over 48 per week, according to a report from the United States Department of Labor. The average weekly hours actually worked in these industries were only 46, however, the report declares, absenteeism and labour turnover depressing the length of the work week by at least two hours.

The increase over the preceding month's average of hours worked in war industries amounted to 0.7 per cent. The increase since

November, 1941, amounted to 10.3 per cent, reflecting the increased tempo of war production.

For all manufacturing industries combined, the average number of hours actually worked per week by workers were 44.0, a gain of 1.0 per cent since October, 1942, and 9.3 per cent since November, 1941. Nondurable-goods workers, engaged chiefly in producing goods for civilian consumption averaged 41.1 hours per week, the gains being 1.2 per cent over the month and 6.9 per cent over the year.

Co-operation in Canada in 1941

Annual Report of National Executive of Co-operative Union of Canada

THE Co-operative Union of Canada, in its 1941 annual report, announces a considerable growth both in membership and in the volume of business transacted among its affiliated societies. An increase in retail sales of 37·3 per cent is noted in the report; while 205,533 persons are listed as members, compared with the previous year's total of 184,992.

The Canadian Co-operative Union, which was founded in 1909 at a conference of representatives of Canadian co-operative societies, was formed as an educational body similar to the Co-operative Union of Great Britain. It is governed by a congress made up of delegates from affiliated organizations, which represent a large proportion of the co-operative societies in Canada. It publishes a monthly magazine, *The Canadian Co-operator*, in the December 1942 issue of which appears the 1941 report.

For the year under review, 125 societies sent in statistical information to the national executive of the Union. Of these, 110 were retail societies operating stores, gasoline stations or warehouses. The aggregate sales for 1941 of the retail societies, as reported to the Union, amounted to \$8,438,657. This represents an increase in retail sales over the previous year of \$2,294,983 or 37·3 per cent.

In addition to the ordinary distributive societies, three dairy societies reported aggregate sales of almost three million dollars, compared with a million and a half the previous year. Two of these societies sell direct to consumers, and the third to the retail dairy trade.

The three provincial wholesale societies affiliated with the Union—Alberta, Manitoba and Saskatchewan—all showed trade increases; as did the wholesale distributive department of the Maritimes organization, Canadian Livestock Co-operative. These societies did a total business of close to seven million dollars. In its first year of operation, the Co-operative Wholesale Society of British Columbia showed a surplus of \$1,600.

A turnover of close to two million dollars was reported by consumers' co-operative refineries affiliated with the Union. A Toronto students' co-operative which provides room and board accommodation for its members did a business of \$9,000 in 1941.

The total volume of business, retail and wholesale, reported by affiliates of the Union amounted to \$19,909,641, an increase of 46·8 per cent over the previous year's total. Such volume is exclusive of the turnover of two large grain marketing associations in Manitoba and Saskatchewan, both members of the Union, which are not reported, and also of the marketing transactions of large co-operative livestock producers in Saskatchewan and the Maritimes, and of a co-operative transportation society.

The share capital of the reporting retail societies amounted to \$884,941, an increase of \$200,361 during 1941. The loan capital increased by \$66,985 to \$383,566. The combined investments in share and loan capital were thus \$1,268,507, an increase of \$267,347. The aggregate net surplus of the retail societies for 1941 was \$523,441, an increase of \$193,152.

Ninety-seven retail societies, fifty-four more than for the previous year, reported the declaration of purchase dividends.

Membership

The aggregate membership of the reporting retail societies was 32,262, or 12,164 more than was reported by forty-eight societies in the previous year. Including those of the marketing organizations 147,458, the dairy societies 20,379, the co-operative residence 47, the educational organizations 4,452 and the transportation society 935, the total individual membership of the reporting affiliated societies was 205,533.

In commenting on progress made by the co-operative movement in Canada, the report points out that the organization of autonomous provincial or regional sections has been desirable for the more intensive development of co-operation throughout Canada, but has been difficult to achieve owing to the great area over which the respective provinces extend, and the small and scattered co-operative development in some of them.

In conclusion, the Union's report urges its affiliates to co-operate with the Government and its agencies in the successful prosecution of the war, and to make adequate preparation in advance for post-war conditions.

Labour Law

Recent Regulations Under Dominion and Provincial Legislation

Military Call-up—Officers' Qualifications in Merchant Navy—Engineers' Certificates and Old Age Pensions in Alberta—Hours of Work and Weekly Half-Holiday in British Columbia—Minimum Wages in British Columbia and Quebec

THE regulations relating to compulsory military service have been re-issued in revised form and under a new title. Minor regulations have been passed relating to officers' qualifications in the merchant navy. In Alberta the regulations under the Boilers Act governing engineers' and firemen's certificates have been amended and regulations have been issued for the first time under the Old Age Pensions (Supplementary Allowance) Act, 1942. Quebec Minimum Wage Order 4, governing all workers not covered by other Orders, has been amended, as has By-Law B-1 relating to the levy on employers, while three Orders have been renewed. In British Columbia the annual Orders governing wages and hours in shops during the Christmas season were issued and a slight change was made in the regulations under the Weekly Half-Holiday Act.

National Selective Service Mobilization Regulations

New Regulations relating to compulsory military service were established by an Order in Council of December 1 (P.C. 10924) passed under the War Measures and National Resources Mobilization Acts. An amending Order in Council was issued on December 11 (P.C. 11240). These new Regulations have the above title and were issued on the recommendation of and are administered by the Minister of Labour. They replace the National War Services Regulations (Recruits) which were first issued in 1940 and were amended and consolidated from time to time.

They apply, with certain specified exceptions, to such age classes or parts of age classes as the Governor in Council may designate by proclamation. As before, the country is divided for administrative purposes into thirteen Divisions, in each of which there is a Registrar who is responsible for detailed administration. There is also an appeal board in each Division, now called a Mobilization Board, which adjudicates on applications for

postponement orders under these and the Reserve Army (Special) Regulations and on appeals under the National Selective Service Regulations from the rulings of Selective Service Officers. Special provisions continue to be made with regard to students as well as Doukhobors, Mennonites and conscientious objectors.

Applications for postponement orders will be considered from persons whose reporting for military training would cause extreme hardship for their dependents, persons employed in seasonal occupations or in industries essential to the prosecution of the war and those employed in agriculture. All postponement orders are subject to cancellation at any time, and, except in the case of persons employed in agriculture, none may be for an indefinite period. In the first instance they may be granted for up to 12 months and one or more extensions of not more than six months each may also be granted.

Officers' Qualifications in Merchant Navy

Under an Order in Council of December 29 (P.C. 11679) passed under the War Measures Act, merchant seamen who have joined the Royal Canadian Air Force and are serving in His Majesty's Ships during the present war may count the time so served as qualifying service for examination for Certificates of Competency as Masters or Mates Home Trade.

Another Order in Council under the War Measures Act (P.C. 11406 of December 19) amends an Order in Council of April 14 (P.C. 2892) which empowered the Minister of Transport to grant temporary Master's Certificates for harbour communication service (LABOUR GAZETTE, 1942, page 796). The original Order provided that applicants would not be qualified to operate boats of more than 40 tons or carrying more than 35 passengers, but the passenger limitation has now been removed.

Alberta Boilers Act

The consolidated regulations governing engineers' and firemen's certificates (LABOUR GAZETTE, 1942, page 584) were amended by an Order in Council gazetted December 15. The following qualifications are now established for a candidate for a Third-Class 100 horsepower Engineer's Certificate: he must not be less than 19 years of age and he must furnish proof that, for a period of not less than 12 months during which he held a Provisional Engineer's Certificate, he has acted as a fireman or engineer operating a boiler carrying a pressure of not less than 50 pounds per square inch and with a capacity of not less than 25 horse-power.

Alberta Old Age Pensions (Supplementary Allowances) Act

This Act which was passed in 1942 (LABOUR GAZETTE, 1942, page 589) provides for the payment of an additional allowance of \$5 per month, as a cost-of-living bonus, to all old age and blind pensioners in the province. Two sets of regulations under it were gazetted on December 15.

When a pensioner to whom a supplementary allowance has been granted transfers his residence to another province the allowance may still be paid for not more than one month. If a supplementary allowance is paid to a pensioner who is not entitled to it because of absence for more than a month or for other reasons, the Pension Authority will suspend payment until the amount paid erroneously is made up. If a pensioner dies, the amount of the supplementary allowance due to him up to the date of his death may be paid to his estate and no claim may be made against his estate for payments under this Act.

Effective on a date to be agreed upon by the Lieutenant-Governor in Council of Alberta and the Government of British Columbia, the Pension Authority is authorized to pay the supplementary allowance to Alberta pensioners who take up residence in British Columbia after December 1, 1942. The Lieutenant-Governor in Council is authorized to execute an agreement with British Columbia providing for a reciprocal arrangement whereby the pensioners of one province who are resident in the other will be paid the supplementary allowance.

British Columbia Hours of Work Act

The annual Order relaxing hours provisions for shops during the Christmas season was gazetted December 3. It was identical to that issued last year (LABOUR GAZETTE, 1941, p. 1502) except that the number of days on which

the eight-hour daily maximum might be exceeded was reduced from three to two. On the Saturday before Christmas and on Christmas Eve two hours overtime was permitted in retail establishments in Vancouver and Victoria and their suburbs; elsewhere in the province, three hours overtime was allowed on these days. As last year, employees could not work more than 48 hours in the week ending the Saturday before Christmas. The provision of last year's Order permitting overtime for persons employed in mail-order, shipping and delivery during December was omitted this year.

British Columbia Minimum Wage Acts

The annual supplementary minimum wage Orders governing payment for Christmas overtime permitted under the above Order and fixing wages of temporary employees for the Christmas season were also gazetted December 3. Order 24, Supplementary (1942) applied to women and Order 59, Supplementary (1942) to men. The Orders were the same as those issued last year (LABOUR GAZETTE, 1941, p. 1502) except that they were applicable only from December 3 to December 31 instead of for seven weeks as last year.

British Columbia Weekly Half-Holiday Act

An Order gazetted December 3 declares that the City of Duncan is no longer covered by the Order of 1931 (LABOUR GAZETTE, 1931, p. 1285) exempting automobile service stations from the Weekly Half Holiday Act.

Quebec Minimum Wage Act

An amendment of By-law B-1 (LABOUR GAZETTE, 1942, p. 61) reduces the levy to which employers governed by minimum wage orders are subject from one-sixth to one-eighth of one per cent of their payroll. The new rate is retroactive to July 1, 1942.

An Order amending the general Order 4 (LABOUR GAZETTE, 1942, p. 586) was gazetted and became effective on December 12. It is now specifically stated that Order 4 applies to all workers covered by any special Order except where the provisions of the special Order are inconsistent. For overtime, workers are now entitled to one and one-half times the minimum rate. There is no longer any provision that if a worker receives a rate higher than the minimum he must receive the agreed rate plus half the minimum for overtime. The deductions permitted for board and lodging have been reduced and are now as follows (the three rates given refer in each case to Zone I, Zones II and III, and Zone IV respectively): 20, 15 and 12 cents for a single

meal, \$4, \$3, and \$2.50 for a week's meals, 25, 20 and 15 cents for a day's lodging, \$1.50, \$1.25 and \$1 for a week's lodging, \$5, \$4 and \$3.50 for a week's complete board and \$20, \$17 and \$14 for a month's board. In the case of teachers it is now provided that no deduction may be made from wages on account of lodging. There is no longer a lower learning rate for carters' helpers and delivery boys or for garage employees. A number of other

changes have also been made, mainly in wording.

The following Orders have been renewed until February 1, 1944, by Orders gazetted and effective on January 2: Order 8 Revised, Cotton Textile Industry (LABOUR GAZETTE, 1941, p. 31), Order 22 Revised, Manufacture of Bricks and Building Blocks (LABOUR GAZETTE, 1940, p. 22), and Order 27, Canning Industry (LABOUR GAZETTE, 1940, p. 123).

Labour Legislation in New Brunswick, Prince Edward Island and the Yukon in 1942

New Brunswick

THE New Brunswick Legislature, which was in session from February 17 to April 1, 1942, amended the Industrial Standards Act and laws relating to mining, school attendance, housing and credit unions.

Mines

The Mining Act was amended to require an underground foreman in a coal mine to be at least 21 years of age and either to have had two year's experience in underground mining or to be a graduate in engineering of a University and have had one year's experience underground. At least 5 per cent of the men employed underground in any mine must hold First Aid Certificates issued to them by the St. John Ambulance Association. The section requiring the operator to appoint a man to check the names of employees at the close of each day or shift to ascertain that none remain in the mine, was replaced by a section requiring the operator to install a system, satisfactory to the Deputy Inspector of Mines, for checking employees on entering or leaving the mine, and charging underground employees with the duty of checking in and out in accordance with the system. Two safety rules were added to the Act. The first requires explosives to be fired electrically in all hand pick operations, except where a succession of shots is to be fired in development work or under special circumstances where it is expedient to use fuse and in such cases fuse may only be used with the approval of the Deputy Inspector. The second rule requires crosscuts or aircuts to be laid out at such distances apart as may be approved by the Deputy Inspector.

Industrial Standards

Amendments in the Industrial Standards Act will come into force on Proclamation. The Lieutenant-Governor in Council may declare a schedule of wages and hours, agreed upon by representatives of employers and employees

in any industry, to be in force during pleasure or for the period stipulated in the agreement. Formerly such period might not exceed twelve months. A new section requires employers to keep complete records showing the name, address and age of each employee, the class of work he performs and his rate of pay.

School Attendance

The section of the School Attendance Act, 1941, dealing with appointment of school attendance officers was amended and now requires, instead of permitting, the appointment of such officers by school boards of cities and towns, constituted under the Schools Act, and by such other school boards as the inspector with the approval of the Minister of Education may determine. Formerly the Minister alone had authority to require these boards to appoint attendance officers.

Housing

A number of amendments were made in the New Brunswick Housing Commission Act. All five members of a housing commission are now to be appointed by the municipal council instead of, as formerly, three being appointed by the council and two by the Governor-General in Council. The requirement that one member shall be a representative of the municipal council, one of labour interests, and one a representative of the real estate owners, is omitted, but, as heretofore, all members must be residents of, and domiciled in, the municipality. Each commission is to be financed entirely by the municipality instead of by the municipality and Lieutenant-Governor in Council equally, as formerly. In carrying out its duties a commission is no longer required to secure the approval of the Lieutenant-Governor in Council. In addition to dealing in lands and buildings, it may build, repair, or rehabilitate houses and fix the rentals. Regulations made by a commission must be published

in a newspaper circulated in the municipality, as well as in the *Royal Gazette*. For failure to obey an order of a commission for the closing of a house a fine of \$5 per day may be imposed or, in default of payment, a prison term not exceeding three months. A commission may make a loan for the erection of a house on any land which it considers suitable and not merely on land upon which it has demolished a house.

Credit Unions and Co-operative Societies

A new Act incorporates, as the New Brunswick Credit Union League, the credit unions which at the time of the passing of the Act were members of the organization of the same title and which are listed in the Appendix to the Act. The League is empowered to promote the organization and development of credit unions, encourage co-operation among them; to co-operate with the Registrar under the Credit Union Societies Act in improving the internal management of credit unions and co-ordinating their methods with a view to maintaining a uniform system of bookkeeping; to purchase bookkeeping and office supplies for resale to credit unions and use any profits for the purposes of the League; to administer moneys, to make loans to credit unions and invest in trustee securities. The League may associate with any other Credit Union League in Canada, and, if its own membership includes at least 50 per cent of the credit unions in the province, it may become a member or affiliate of any National or International Credit Union or Co-operative Association. It may also promote the organization of member credit unions into district federations or chapters,

make by-laws, subject to the approval of the Lieutenant-Governor in Council, for their administration, arrange for group bonding of employees, draw negotiable instruments, deal in real and personal property, and make by-laws, subject to the approval of the Lieutenant-Governor in Council, for the conduct of its affairs or for any incidental purpose. Membership in the League is open to credit unions existing at the commencement of the Act and to those organized after that date and the League may fix the admission fee and the amount of dues and assessments. At the first meeting, which must be held within six months of incorporation, each credit union holding membership is to be represented by two delegates and at subsequent meetings representation is to be determined by the Regulations. The management of the League is to be vested in a board of directors appointed by the credit unions who are members in the manner provided by the Regulations. Funds of a credit union deposited with the League are to bear interest at a rate fixed by the general meeting on recommendation of the board of directors. A credit union, member of the League, is not liable for the debts and liabilities of the League to a further extent than its unpaid fees and assessments.

The New Brunswick Credit Union Societies Act was amended to provide that the nature and amount of the security bond to be required of an officer or employee handling money of a society shall be subject to the approval of the Registrar. Minor amendments were also made consequent upon incorporation of the New Brunswick Credit Union League.

The New Brunswick Co-operative Associations Act was amended to enable an association to fix its own fiscal year.

Prince Edward Island

The Prince Edward Island Legislature which met on March 16 and was prorogued on April 2, 1942, amended the Public School Act to charge boards of school trustees with the duty of appointing truant officers to enforce attendance of children at school. Sections added to the Credit Union Societies Act authorize any member of a credit union not under 16 years of age to nominate in writing a person to whom his shares and deposits are to pass on his death. The nominee may not be an officer or employee of the credit union unless he or she is the husband, wife, parent, child, brother, sister, nephew or niece of the person making the nomination. If a member dies intestate and without having made a nomination his interest in the union is to be transferred, without let-

ters of administration, to the persons who appear to the majority of the directors to be entitled to it by law. Where a member is mentally incapable and no trustee has been appointed for him, the credit union may pay the amount of his shares, loans and deposits to any person whom they judge proper to receive them. A credit union may, by a majority vote of the members present at an annual or special meeting, provide for the payment of fees to an organization of credit unions either from earnings of the union or by a direct levy upon its members.

Under an amendment in the Co-operative Associations Act annual returns are to cover the period up to January 31 instead of December 31, as formerly.

Yukon

Legislation of interest to labour passed by the Labour Council during the year consisted of a revision of the sections of the Judicature Ordinance relating to garnishment of wages. Wages and salaries are not subject to seizure or attachment except as to such amount as is in excess of \$3 per day for the period in respect

of which such wages or salary are owing at the date of service of the garnishee summons. This sum of \$3 is to be reduced by the daily cost of any board supplied by the employer in addition to cash wages. An endorsement to the above effect is to be made on the face of every garnishee summons.

Apprenticeship Legislation in the United States

DURING 1941 five states, New York, Massachusetts, Washington, Montana and Arizona passed apprenticeship laws and established State Apprenticeship Councils. By the end of that year a total of 26 states had Apprenticeship Councils, 15 established under Acts administered by State Departments of Labour and 11 set up under other legislative authority. Prior to 1933 only Wisconsin and Oregon had established state apprenticeship schemes. The Councils have played an important part in developing training programs for defence workers during the past two years.

This increase in apprenticeship legislation in the United States can be attributed in considerable measure to the activities of the Federal Committee on Apprenticeship first appointed in 1934 as part of the N.R.A. program. Employers, labour and Government agencies connected with labour and education are represented on the Committee which was established as a permanent agency and placed under the Secretary of Labor by an Act of 1937. Its functions are largely educational and advisory. It draws up model apprenticeship standards for state and local agencies to adapt to local conditions, carries on research, disseminates information and supervises the operations of Federal field representatives who assist states, employers, trade unions and other groups in planning apprenticeship schemes based on approved standards. In June, 1940, only 22 firms were operating apprenticeship systems approved by the Federal Committee, but by March, 1942, the number had increased to 1,447.

The Federal Committee encourages States to pass apprenticeship laws embodying its standards and based on the draft apprenticeship bill prepared by a special federal committee appointed at the request of the third National Conference on Labor Legislation in 1935. In the committee's opinion, regulation of apprenticeship is a function of State Departments of Labor rather than of Education Departments, and employers' associations and trade unions should be consulted in drawing up standards and applying them to industry.

Most states with apprenticeship laws have modelled them on the draft bill which contemplates a system of voluntary apprenticeship agreements conforming to minimum standards set forth in the law. It defines an apprentice as a person at least 16 years old receiving training under a written agreement which provides for not less than 4,000 hours of reasonably continuous employment annually, and for an approved training program including at least 144 hours of supplemental instruction each year. It requires written apprenticeship agreements which specify the processes in which the apprentice is to receive training, the conditions of work, scale of wages, length of probationary period, allocation of time between work and instruction, arrangements for transfer from one employer to another, and method of settling disputes over the interpretation of the agreement.

The draft bill also provides for a State Apprenticeship Council appointed by the State Commissioner of Labor and consisting of two representatives each from employers' and workers' organizations, with the State Directors of Vocational Education and the Employment Service as ex officio members. The Council would establish and approve standards for apprenticeship agreements in conformity with the standards in the bill, act as an advisory body and issue regulations. Administration of the Act and supervision of agreements would be through a Director of Apprenticeship and local joint committees for each trade or district. The Director would have power to approve, register and cancel agreements and issue certificates on completion of apprenticeship. Arrangements for supplemental instruction for apprentices would be the responsibility of state and local vocational education authorities.

Some of the states depart from the terms of the draft bill by varying the composition of the Apprenticeship Council or the method by which it is appointed. In 1941, only eight states had appointed full-time Directors of Apprenticeship to administer the Act, two had part-time directors and two combined the

office with that of Director of Vocational Education. New York's apprenticeship statute and council which were described in the *LABOUR GAZETTE* for February, 1942, p. 195, may be regarded as fairly typical.

Apprenticeship agreements conforming to the approved standards are not compulsory under the state Acts but both federal and state apprenticeship agencies urge their adoption

and are ready to assist workers and employers in agreeing on special standards for their industry. Under the Fair Labor Standards Act and the Public Contracts Act only employers who have signed agreements with their apprentices which are approved by state agencies, or in their absence by the Federal Committee, may pay apprentices less than the minimum rates specified in the Acts.

Government-Employer-Worker Collaboration in India

Government-employer-worker collaboration in India in the field of labour legislation and industrial relations has been put on a permanent basis with the establishment of an organization of tripartite structure (similar to that of the International Labour Organization), according to an article in the January issue of the *International Labor Review*.

The purpose of the new organization, the article says, will be three-fold:

1. To promote uniformity in labour legislation.
2. To lay down a procedure for the settlement of industrial disputes.
3. To discuss "all matters of all-India importance as between employers and employees".

The organization is to be composed of an annual plenary conference and a standing committee, each of which will include representatives of the Central Government, the Governments of the provinces and the Indian States, employers and workers. In both the conference and the committee, representation will be on the basis of two Government members to one member for each of the employers and the workers.

The organization was established on the initiative of the Central Government at a conference of Government, employer and worker representatives held at New Delhi in August under the chairmanship of Dr. B. R. Ambedkar, Member for Labour of the Viceroy's Executive Council.

Among the chief reasons prompting the Government to propose establishment of the organization, the article makes clear, was the desire to avoid the diversity in labour legislation which was made possible by the granting of provincial autonomy by the constitution of 1935. In addition, the article says, the Indian Government felt it desirable to formulate a procedure for the settlement of industrial disputes in the post-war period. Thirdly, it was felt desirable to have an organization which could make proposals for social welfare, and thus increase labour morale in the conditions of wartime.

"The new organization", the article comments, "contains within it great possibilities for the future and may in time be of considerable influence in moulding the social and industrial structure of the whole of the Eastern world."

Healthful Eating

Recent scientific studies indicating the importance to health of eating the correct foods have rapidly been gaining acceptance with the Canadian public. The Department of Pensions and National Health has issued a 34-page booklet, *Healthful Eating*, designed to furnish Canadians with a practical guide to the subject of nutrition.

The booklet describes the kinds of food necessary for health, and explains why they are needed. It points out that satisfying appetite, or "hollow hunger," is not in itself enough to maintain health and fitness. There exists also a "hidden hunger," or need for certain important food substances, which is not satisfied merely by filling the stomach.

Surveys carried on in 1939 and 1940, the booklet declares, show that six out of every

ten persons studied then ran the risk of chronic fatigue, vague aches and pains, undue nerve strain ("jittery" nerves) and a greater tendency to disease by eating too little of the important food elements.

The booklet lists "Canada's official food rules," which set forth the health-protective foods, and the amounts of these foods that are necessary for each individual daily. It discusses these foods, explaining their vitamin content, and gives a great many practical suggestions for preparing them and methods of economizing safely on the food bill.

Copies of the booklet may be obtained free by writing to the Publicity and Health Education Division, Department of Pensions and National Health, Daly Building, Ottawa.

THE LABOUR GAZETTE

PREPARED AND EDITED BY

THE DEPARTMENT OF LABOUR, OTTAWA, CANADA

Minister—HON. HUMPHREY MITCHELL

Associate Deputy Minister—ARTHUR MACNAMARA

VOLUME XLIII]

FEBRUARY: 1943

[NUMBER 2

Notes of Current Interest

Power of Minister of Labour to appoint Inquiry Commission extended

The Minister of Labour has been given the authority under P.C. 496 of January 19, 1943, to appoint an Industrial Disputes Inquiry Commission for the purpose of investigating any situation which in his opinion appears to be detrimental to the most effective utilization of labour in the war effort. The Commission reports its findings and recommendations to the Minister of Labour who may take such steps as he deems necessary and desirable to effect such recommendations.

Under Order in Council P.C. 4020 of June, 1941, as amended, provision was made for the appointment by the Minister of Labour of an Industrial Disputes Inquiry Commission only when a lockout or strike had occurred or seemed to be imminent. Under the new Order in Council P.C. 496 the Minister of Labour is authorized to appoint such a Commission or Commissioner to investigate the situation which, while not likely to lead to a strike or lockout, nevertheless, tends to interfere with the most effective utilization of Labour in the war effort.

Labour- management committees in Canadian plants

Minister of Labour, Hon. Humphrey Mitchell, stated the number of such committees to be 631, and that the number of employees engaged in plants where such committees are in operation is 327,395.

The Minister indicated that labour-management committees were operating in the plants

of the following Crown companies: Small Arms Ltd., Toronto, Toronto Shipbuilding Co., Toronto, and Research Enterprises Ltd., Toronto, and that others are at the formation stage.

Dominion- Provincial Conference on industrial welfare

The welfare of industrial workers was the subject of a two-day conference between Dominion and provincial authorities in Ottawa on February 8-9, which was presided over by Mrs. Rex Eaton, Associate Director of National Selective Service, and Mr. M. M. Maclean, Director of Industrial Relations, of the Dominion Department of Labour. All provinces were represented. The conference was called by the Hon. Humphrey Mitchell, Minister of Labour of Canada, who emphasized in the letter of invitation the vital interest of the Dominion Government in the matter, since satisfactory conditions of employment were an important factor in encouraging an adequate supply of labour, particularly female labour, and in bringing about and maintaining efficient production of war materials. The regulation and inspection of conditions of employment were recognized as within provincial jurisdiction, but the Dominion Government stood ready to assist in any way possible where war contracts had imposed a heavy burden on the provincial inspection services.

Introductory addresses were given by the Hon. Mr. Mitchell and Mr. A. MacNamara, Associate Deputy Minister of Labour and Director of National Selective Service, which outlined the object of the conference, emphasized the importance of achieving as great a degree of uniformity in provincial regulations as possible and indicated the willingness of the Federal Government to give financial assistance where needed to enable the extension of inspection services to cope with the problem of enforcement.

Special consideration was given to hours of work, time for meals and rest pauses, safety regulations, medical services and first aid, occupations unsuitable for women, healthful conditions of work, lunch rooms, cafeterias and canteens, rest rooms and cloak rooms, recreation, housing, transport, and the place of a personnel or welfare department in the factory organization. There was also some discussion of the farm labour problem, and of absenteeism in industry.

Hours of work were considered to be too long in some cases and it was recommended that the Dominion Department of Labour should appoint a committee to study the problem with a view to determining some standards which could be applied by the provinces and which would permit satisfactory production while safeguarding the health of the workers.

The appointment by the Dominion Department of Labour of a standing committee on safety in war industries was also recommended, its findings to be made available to the provincial authorities and, where relevant, to industry and labour.

In addition to representatives from the Dominion Departments of Labour, Health and Transport, the following attended the conference: Alberta, E. S. Clarry, Alberta Trade Commissioner; British Columbia, Chas. Pearce, Acting Assistant Deputy Minister of Labour; Manitoba, R. K. Finlayson, Acting Assistant to the Minister of Labour; New Brunswick, Hon. André Doucet, Minister of Health and Labour; Robert Irving, Chairman, Workmen's Compensation Board; Nova Scotia, T. D. A. Purves, Deputy Minister of Labour; Ontario, J. F. Marsh, Deputy Minister of Labour, J. R. Prain, Chief Inspector; Prince Edward Island, Hon. Horace Wright, President of the Executive Council; Quebec, Hon. Edgar Rochette, Minister of Labour, J. O'Connell-Maher, Associate Deputy Minister of Labour, Clovis Bernier, Chief Inspector, W. Beaulac, Director of Factory Inspection for Quebec District; Saskatchewan, Hon. R. J. M. Parker, Minister of Labour, C. A. Scott, Commissioner of Health and Labour.

Silicosis prevention in British Columbia

The British Columbia Workmen's Compensation Board has issued a circular letter to employers outlining precautions they must take to prevent silicosis,

which is a compensatable disease under the Act. Mine Inspectors and the Silicosis Inspector are to see that these directions are carried out. The Board places the main responsibility for prevention work on management but adds that workers must be taught to co-operate in eliminating dust.

Methods of ventilating mines are described in the letter and the installation of exhaust

systems in crushing plants, as well as the wetting of steel before sharpening and of rock after blasting operations and before it is handled in any way. Blasting operations are to be confined to the end of shifts wherever possible and several hours permitted to elapse before the following shift begins work. The wearing of respirators is considered only a secondary precaution to be taken when other means fail to reduce the dust hazard sufficiently.

Absence from work during December

Statistics have been prepared by the Department of Munitions and Supply dealing with the extent of absenteeism in Canadian war industry. Figures for the month of December were received from a sample of twenty-seven plants across the Dominion, having a total of 73,297 employees. During the month, the average number of workers absent daily totalled 5,770 in these plants, the rate of absence being 7.9 per cent.

These figures refer to absence from all causes, including vacations and illness.

Similar statistics collected by the Department of Munitions and Supply during previous months showed an absence rate of 6.9 in November, 1942; 6.4 in October; and 8.1 in September. (L.G., Jan., 1943, p. 10.)

As in previous months, the absence figures varied substantially from plant to plant, ranging from as low as 1.3 per cent to as high as seventeen per cent.

Strikes and lockouts during January

During the month of January, 1943, the number of strikes reported, the number of workers involved and the time loss in man working days increased sharply as compared with the previous month when the time loss was the lowest recorded since March, 1941. This increase was accounted for largely by strikes of steel mill workers at Sydney and Trenton, N.S., and Sault Ste. Marie, Ont., (see page 191), which caused 88 per cent of the time loss. During January, 1943, there were 34 strikes, involving 19,857 workers and causing a time loss of 166,707 man working days, as compared with 13 strikes in December, 1942, involving 1,434 workers, with a time loss of 6,016 days. In January, 1942, there were 13 strikes, with 2,715 workers involved and a time loss of 46,606 days.

Of the 34 strikes during January, 1943, 29 were terminated during the month. Twelve resulted in favour of the workers, seven in favour of the employers, five were compromise settlements, one was partially successful and four were indefinite in result. Five disputes, involving 2,634 workers, were recorded as un-terminated at the end of the month.

Strikes and lockouts during 1942

Preliminary figures on strikes and lockouts in Canada in 1942, issued by Hon. Humphrey Mitchell, Minister of Labour, show

a total of 455,964 man working days lost last year through work interruptions arising out of labour disputes. In the comparable year of the last war, 1917, the time lost through these work stoppages was 1,123,000 man working days, or about two-and-one-half times as great as in 1942. This figure, while about 4 per cent greater than the corresponding total for 1941, was exceeded in 21 years of the 42 years over which existing records extend.

The average annual loss in man working days during the 10 years ending 1942 was 386,894, 15 per cent less than the number for 1942. It is pointed out, however, that the number of workers engaged in industry in 1942, based on the index of employment, is estimated to be about 47 per cent higher than the annual average of 1933 to 1942.

Two strikes caused almost one-third of the total 1942 loss, the strike of gold miners in the Kirkland Lake district and a strike of the employees of a motor car company in the Windsor district. Strikes in the manufacturing industry caused about two-thirds of the total, while the mining industry contributed 30 per cent; in other words, industries other than the two mentioned made up only about 4 per cent of the total loss in working time.

Increased by a considerable number of small strikes, the 348 strikes across the country in 1942 is a larger total than for any other year of the record, which runs back to 1901. Two other factors undoubtedly contribute to this result: wartime legislation brings within Dominion jurisdiction certain strikes previously under Provincial control, which results in an improved reporting system in so far as Dominion records are concerned, so that several small strikes now reported might not have been notified under earlier conditions. The second factor, already mentioned, is that the working forces throughout Canadian industry reached peak figures for all time during 1942, so that industrial relations as between employer and employee now affect a substantially increased number of Canadians.

Since 1925 the time lost due to strikes exceeded that for 1942 in two years, namely, 1934 and 1937. In 1937 the time lost was almost double that for 1942.

Industrial Disputes Investigation Act

Fifteen applications for the establishment of Boards of Conciliation and Investigation were received during the month of January.

Three boards submitted their reports; three boards were established and the constitution of three boards was com-

pleted. Eleven disputes were referred to Industrial Disputes Inquiry Commissioners and reports were received from Commissioners in six cases. The settlement of three disputes was reported, in each case an agreement having been reached between the parties to the dispute. Four applications were withdrawn during the month.

Full particulars with regard to recent proceedings under the Industrial Disputes Investigation Act will be found elsewhere in this issue on page 194.

Cost of living bonus remains unchanged

The cost of living index at January 2 was 117.1. This represented a decline of eight-tenths of a point since July 2, 1942, the date of

the last general order of the National War Labour Board requiring a change in the amount of the cost of living bonus. As the decline was less than a full point, no change in the amount of the bonus was ordered.

An order of the National War Labour Board dealing with the cost of living bonus for workers in industry was made public on February 3. Such an order is issued every 3 months. The present order reads:

"The Dominion Bureau of Statistics has found that the cost of living index number for January 2, 1943, is 117.1 (adjusted index 116.2) as compared with the cost of living index number for July 2, 1942, of 117.9 (adjusted index 117).

"The Wartime Wages Control Order, P.C. 5963, provides in Section 48 (iv):

"The amount of the bonus shall not be changed unless the cost of living index number has changed one whole point or more since the last general order of the Board requiring an increase or decrease in the amount thereof."

"The index number not having changed by one whole point or more since July 2, 1942, pursuant to the provisions of P.C. 5963 as stated, the National War Labour Board orders that the terms of its General Order dated August 4, 1942, shall continue to apply for the period February 15, 1943, to May 15, 1943, subject to the right of employers or employees to apply to a War Labour Board for authorization of payment of such an amount of cost of living bonus as a Board may determine to be 'fair and reasonable', under the provisions of the Order."

As is indicated in the order, no change in the amount of the bonus will be made as from February 15, 1943.

Business statistics

The table below gives the latest statistics available reflecting industrial conditions in Canada.

Productive operations as indicated by the index of the physical volume of business were greater in 1942 than in any preceding year. In December the index was 221.2 compared with 207.8 in November, an increase of about 6.5 per cent. Four of the principal groups in-

cluding mineral production, manufacturing, electric power production, and distribution recorded advances during the month under review. The index of construction was lower. The general index for December was 14 per cent higher than for December, 1941.

The index of employment also indicated important expansion at the beginning of December, being at the highest level in the record and 10.5 per cent above December, 1941,

(8) MacLean's Building Review.

while the index of aggregate weekly pay rolls increased 20·8 per cent in the same comparison.

For the twelve months of 1942 the business index averaged 22·2 per cent higher than for 1941. Manufacturing production was 38·5 per cent higher in this comparison and mineral production 2 per cent higher. Cumulative figures for the twelve months period show steel production to be 15·6 per cent greater than in 1941, factory cheese production 36·3 per cent greater, and the number of cigarettes released 19·3 per cent greater. The number of tons of freight carried by the railways increased 10 per cent and the index of the value of retail sales 9·6 per cent. The value of construction contracts awarded declined 28·2 per cent in 1942 as compared with 1941, and the production of newsprint 7·3 per cent.

Cost of living index

The decline of 1·7 points recorded by the official index of the cost of living at the beginning of January

as compared with the previous month was due entirely to a decline in the index of the food group. Among the items accounting for the reduced food index, milk, coffee, tea and oranges were subject to price reduction under action taken by the government last December. Provision was made for the reduction in the price of tea by ten cents a pound, coffee, four cents, milk two cents a quart and oranges to about the September-October, 1941, level by subsidy payments and tax remissions. (L.G. Dec., 1942, p. 1417). Comparative figures for the general index on the base 1935 to 1939 as 100 at certain dates are 117·1 at January 2, 1943; 118·8 at December 1, 1942; and 115·4 at January 2, 1942.

At the beginning of January an increase in the cost of living of 16·2 per cent since the outbreak of war was recorded as compared with an increase of 40·4 per cent for the comparable period during the last war. Since the introduction of price control in the autumn of 1941 the advance has been only about 1·4 per cent (the index at October 1 of that year standing at 115·5) whereas the increase between October, 1916, and January, 1918, the comparable period during the last war, was 21·7 per cent.

Release of manpower from banking and insurance in Great Britain

Measures for securing the greatest possible release of manpower from banking and allied businesses and insurance undertakings are suggested in the report of a committee appointed by

the Chancellor of the Exchequer in Great Britain, under the chairmanship of Lord Kennet.

The report as a whole shows that the scope for further release of manpower from these occupations in Great Britain is relatively limited. However, the three sub-committees through which the committee carried on its investigations have made various recommendations. Thus, the sub-committee dealing with banking and allied businesses recommends the further closing down of branch banks, and makes certain suggestions for the reduction of services to customers and for notification of methods of work. It is suggested that clearing banks be required to operate with 85 per cent of their pre-war staff. The sub-committees dealing with insurance recommend that no staff should be employed wholly or mainly in obtaining new business.

The need for a regular review of deferments from military service granted to men of military age is emphasized. The committee also states that hours of work in these undertakings cannot be exactly regulated by the clock, as in manufacturing undertakings. Work has to be adapted to special times and seasons, involving longer hours on some days than on others. Forty-six hours (excluding meal-breaks) should however, be taken as a standard for reference and the industries should seek to attain it as an average.

As regards part-time work, particularly the part-time employment of non-mobile women, the committee consider that full use has not been made of this as a means of releasing labour. There are opportunities for its further development, especially for homogeneous blocks of simple clerical work in large centres, of which use should be made in the manner recommended by the sub-committees, and consideration should be given to the establishment of a special register of persons available for the purpose.

Pit production committees in Great Britain

Nearly all collieries in Britain now have pit production committees to stimulate coal production and enlist the co-operation of the workers. Such committees are part of the general wartime scheme of joint production committees which the British Government officially recognized in its Essential Work Orders by assigning certain disciplinary functions to them. (L.G., 1942, pp. 700, 931).

The Minister of Fuel has encouraged the establishment of pit production committees and has drawn up a model constitution which local committees adapt to their needs. The standard committee consists of eight or ten members equally representing management and labour, and has two chairmen, one from each side, who preside alternately. Commit-

tees usually meet weekly to examine the previous week's output in relation to the standard set for the district and to discuss means of bettering production. Their minutes and reports are sent to the Regional Coal Controller to whom they have direct access.

The Committees are debarred from discussing wages. They discuss the technical side of production and have recommended improved methods of extraction, investigated deficiencies of supplies and made suggestions for more effective use of the labour force. They have been relieved of responsibility for dealing with individual cases of absenteeism due to the tendency to degenerate into absentee tribunals, but they discuss factors producing absenteeism and discontent such as transport difficulties, housing shortages, civil defence duties, and general welfare conditions such as pit-baths and canteens.

Opposition to pit production committees came from some employers who were sceptical of labour's ability to understand complex production problems without special training, and from workers who were reluctant to collaborate with management during the war without assurances of a post-war future for the industry. To overcome opposition many committees have undertaken educational campaigns through the publication of pithead leaflets and newspapers, the appointment of "section stewards" and the election of production officers to act as liaison between the committees and the workers in the mines.

Plant protection against enemy air raids

The formation of labour-management committees on plant protection to safeguard war and essential civilian production against enemy air raids, accidents

and fires is being urged by the United States Office of Civilian Defence, which has issued the following statement:

"Although the primary responsibility for plant protection rests with management, a labour-management committee on plant protection composed of representatives of both management and workers should be formed in each plant. In those plants or departments where the workers belong to a labour organization, the union representatives should constitute the labour half of the joint committee."

A booklet entitled *Passive Protection for Industrial Plants*, recently issued by the United States Office of Civilian Defence, describes the training and organization of the five services needed for proper plant protection, including firemen, air raid wardens, police, medical, and operations and maintenance. It

describes the duties of the plant defense coordinator and the problems of plant communications, protective construction, protective concealment, and blackouts.

Pointing out that plant protection covers more than preparation against air raids, the booklet declares:

"Not only do air raids threaten American industry, but fire, sabotage, and industrial accidents do as well. Every week industrial accidents kill an average of 425 American workers, cripple or blind 2,200 others, incapacitate more than 45,000 and lose for industry and the nation 6,000,000 man-days of essential war and civilian production. Comprehensive safety programs will reduce these losses."

Extended school services for children of working mothers in United States

A scheme is being developed in the United States for the extended use of the facilities of schools in providing day-care for the children of working mothers. The War Manpower Commission last spring established a Day-Care section in the Office of Defence Health and Welfare Services to co-ordinate Federal, State and local activities in this field and in August \$400,000 was allocated for this purpose. An advisory and supervisory staff is being built up in the U. S. Office of Education, and States which can show evidence of need for child-care programs may receive Federal grants to assist them in administering such schemes. By January 15 seven States, Michigan, New Jersey, New York, North Carolina, Oregon, Virginia and Washington had received grants of this nature.

The statement of policy on Young Children and the War issued last March by the U. S. Commission on Children in Wartime (L.G., 1942, p. 1117) included recommendations that schools be used more extensively to provide day-care for children in order to protect their health and welfare and to make more women available for employment. The program recommended by Federal officials includes before- and after-school care for children of school-age, nursery schools and kindergartens for two to five-year-olds, training schools for professional and voluntary child-care workers and the provision of information to working mothers concerning local facilities for child-care, shopping assistance, etc. It is suggested that school lunch-rooms, gymnasias, work-shops, music and art rooms and playgrounds be kept open longer hours, that recreation be arranged for after-school hours and that older pupils be trained to assist in looking after the younger children.

Regional representatives of the Federal Office of Education have been appointed

to assist State departments of education and local school officials in developing such a program in areas where the problem is acute. The U. S. Children's Bureau will co-operate with State welfare departments in arranging foster-home and nursery school care for children under two.

State schemes are planned by Child-Care Committees of State defence councils. These Committees include representatives of State departments of education, health, public welfare and labour and the Federal Employment Service, Work Projects Administration and Office of Civilian Defence and other interested agencies and groups. The New York State Committee includes representatives of the Congress of Industrial Organizations and the American Federation of Labor. Under the supervision of these Committees, State departments of education administer the programs. The seven States receiving Federal grants have used the funds to add a State Director of Child-Care and one or more field assistants to the staff of their education departments. The field assistants in co-operation with the U. S. Employment Service determine which areas need extended school services, survey existing facilities and assist local officials in developing day-care programs.

An article on *The Place of Day Nurseries in the War Effort* in Canada, appears on page 175 of this issue.

U.S., Canadian officials discussed manpower at I.L.O. meeting

United States and Canadian Government officials and representatives of the workers and employers of the two countries met in New York on February 13 and 14 at the invitation of the International Labour Office.

The purpose of the meeting, the seventh in a series held under I.L.O. auspices in the past two years, was to provide an opportunity for an exchange of views and information on problems connected with allocation of manpower to meet war needs.

The meeting had been originally scheduled to be held in New York last November 28 and 29, but was postponed at the request of the Canadian Government. The sixth meeting of the series had been held in Montreal late last August.

The agenda of the gathering covered two points. The first was a discussion on developments in labour supply problems and policies since the August meeting, and the second was listed as "labour-management co-operation in organizing labour supply for war production."

More than 60 Americans and Canadians who are intimately involved in problems of

labour supply attended the meeting. Americans invited included officials of the Department of Labour, the War Manpower Commission, the War Production Board, National Selective Service, United States Employment Service and the National Resources Planning Board. Canadians attending included officials of the Department of Labour, Department of External Affairs, Department of National War Services and Department of Munitions and Supply.

Worker and employer members of the Labour-Management Policy Committee of the United States War Manpower Commission and the Canadian National Selective Service Advisory Board were also present. The Governing Body of the I.L.O. was represented by its Canadian and American members. Carter Goodrich of New York, chairman of the Governing Body, presided. E. J. Phelan, acting director of the I.L.O., was present with other officials of the I.L.O.

Family allowances

Family Allowances for Canada? is the title of a recent pamphlet published by the Canadian Institute of International Affairs. The brochure advocates the study of a system of family allowances in Canada, regarding it as a step towards the goal of freedom from want.

"The system," the pamphlet states, "simply means the payment of a certain amount of cash to parents for each dependent child. The money is intended to represent only a contribution towards the child's maintenance. Recent opinion, however, is that it should be large enough to cover subsistence needs: food, clothing, light, and fuel."

The pamphlet describes systems of family allowances that have been in effect in other countries, including France, Belgium, Australia and New Zealand (L.G., April, 1941, p. 439). It outlines the proposals for children's allowances in the Beveridge Report, (L.G. Dec., 1942, p. 1406; Jan., 1943, p. 46) and discusses the problems relating to the introduction of such a system in Canada, including the constitutional question, and an estimate of the cost of allowances. Emphasis is laid on the relation of such a system to nutrition and national health.

Pointing out that Canada's birth rate has been on the decline, the pamphlet suggests family allowances as a means of removing the penalties imposed on large families in the cities. Allowances to the agricultural population, where the birth rate is higher than in the cities, are also considered essential, however, and it is further intimated that the farmer would benefit because of the additional money that would be spent on farm products by low wage families.

Reorganization of National War Labour Board

Appointments Announced—Emphasis on Judicial Character of New Board —Proceedings to be Held in Public

A REORGANIZATION of the National War Labour Board in certain fundamental particulars was announced by the Prime Minister of Canada, Rt. Hon. W. L. Mackenzie King, in the House of Commons on February 12.

As reconstituted, the Board will be composed of three members: a chairman, a representative of employers and a representative of employees. It will partake more than previously of the nature of an industrial court, and is expected gradually to build up a jurisprudence to apply to its proceedings. The new chairman of the Board is Mr. Justice C. P. McTague; the employers' representative is Senator J. J. Bench; and representing the employees is Mr. J. L. Cohen.

Proceedings of the Board will hereafter be carried on in public.

Appointment of Mr. Justice McTague

On February 3, the Prime Minister had announced the appointment of Mr. Justice McTague as chairman of the board, succeeding in this position the Hon. Humphrey Mitchell, Minister of Labour. (Previously the Prime Minister had stated that Mr. Mitchell had requested being relieved of the chairmanship of the National War Labour Board owing to the pressure of other urgent duties).

In announcing the new appointment the Prime Minister declared: "I am happy to be able to say the Government has secured the services of Mr. Justice McTague as Chairman of the Board. I need not tell the house that Mr. Justice McTague has had long experience in dealing with industrial problems. He has been on many conciliation boards and, I believe, is the best person that could be found to fill this position."

Mr. Justice McTague is a native of Guelph, Ontario. He graduated from Toronto University in 1915, and served overseas with the Canadian Field Artillery from April, 1915, to March, 1919.

He was called to the Ontario bar in 1920 and became a King's Counsel in 1933. Two years later he was appointed a Justice of the High Court of Ontario, and in 1938 was appointed to the Appellate Court of Ontario. Since 1940, Mr. Justice McTague has acted as chairman of the War Contracts Depreciation Board.

Original Constitution of Board

In his later statement respecting reorganization of the Board, the Prime Minister gave the

following outline of the functions of the Board as originally constituted:

"The National War Labour Board was appointed on October 24, 1941. At that time its membership was that of a chairman, a vice-chairman, five gentlemen representing employers and five representing employees. When originally formed, the chairman was the present Minister of Labour, Mr. Humphrey Mitchell. When the Board was formed Mr. Mitchell was neither a member of the house nor a minister of the crown. Upon Mr. Mitchell's becoming a minister of the crown he continued to perform the duties of chairman of the Board, largely because of the special knowledge he had of its proceedings, and also because he believed it his duty to hold the position at least so long as he was able to help carry out the duties of the Board along with the other duties attached to his new position. However the Minister found, as everyone would expect, that with the heavy duties resting upon him in the Department of Labour it would be impossible for him to continue as chairman of the Board. Some time ago he advised me to that effect, and in consequence of the Minister's representations the Government has made certain changes. Mr. Mitchell's retirement from the chairmanship of the Board left the vacancy which has since been filled by Mr. Justice McTague's acceptance of the position."

The Prime Minister then listed the twelve members of the Board as originally constituted, including five representatives of employers, five representing employees, in addition to the chairman and vice-chairman, which latter position was filled by the Deputy Minister of Labour.

"As a matter of fact," the Prime Minister continued, "in the actual functioning of the Board the work, in the main, was carried on by an executive committee. That executive was composed of the chairman, vice-chairman, one representative of the employers and one representative of the employees. The representative of the employers on the executive was Mr. George Hodge, and the representative of the employees was Mr. J. McClelland. The gentlemen constituting the executive carried on as I have said the major part of the work of the Board. The entire membership was convened fortnightly, on an average, and on those occasions matters of concern to the Board as a whole were presented and dealt with.

Jurisprudence Governing Decisions

"One will observe that in the original establishment of the Board emphasis was placed particularly upon its representative character. An effort was made to secure a Board which would be representative alike of employers and employees. An equal emphasis, however, was not placed upon the judicial character of the Board. I do not mean to say that the Board was expected to do other than discharge its duties in accordance with the principles of justice. In its actual procedure, however, there was no jurisprudence governing its proceedings. One case would be dealt with, then another and another, in the order in which they were presented without any necessary relationship as to the principles governing in decisions. The point I wish to make clear is that the Board was not regarded like a court of justice in which principles are laid down which should govern generally.

"Mr. Justice McTague has emphasized the fact that it would be helpful in the avoidance and settlement of industrial disputes, and in dealing with industrial relations generally if the National War Labour Board could partake more of the nature of an industrial court. He feels that the members of the Board should be fewer in number, in order that they might, sitting together continuously, gradually build up a jurisprudence which would govern in labour matters.

"The government, after giving careful consideration to Mr. Justice McTague's representations, have come wholly to agree with the view he has expressed. The National War Labour Board, as it will now be constituted, will therefore be more in the nature of an industrial court. It will be limited in its members, but care will be taken to see that it will also maintain its representative character."

Board as Reconstituted

The Prime Minister then announced the constitution of the new three-man Board. In addition to Mr. Justice McTague as Chairman, the new members of the Board are Senator J. J. Bench, K.C., as representative of employers, and Mr. J. L. Cohen, K.C., as representative of employees.

In regard to the new members the Prime Minister declared, "I wish to stress the point that each of these gentlemen has knowledge not second I believe to that possessed by any other persons in this country, either on the side of capital or on the side of labour interests, in dealing with problems of industrial relations."

It was announced that Mr. George Hodge and Mr. J. McClelland, who with the Minister of Labour had been members of the executive

committee of the Board as previously constituted, would continue to be associated with the Board as technical advisors. The other members of the old Board would constitute members of a national war labour committee, to consult with and advise the presently constituted Board.

Hearings in Public

The Prime Minister called attention to the intention of the new Board to conduct its hearings in public. He said, "It is felt that in dealing with industrial disputes that are likely to affect our war effort and affect thereby the interests, not only of the country as a whole but of the United Nations as well, it would serve a useful and helpful purpose if the public could have a wider knowledge of the questions at issue." The public, he declared, will be kept fully informed of these matters which are of immediate public concern.

Mr. Percy Bengough, acting president of the Trades and Labour Congress, and Mr. Pat Conroy, secretary-treasurer of the Canadian Congress of Labour, issued statements expressing approval of Mr. Cohen's appointment as labour representative and confidence in Mr. Justice McTague as chairman. Both congresses had been consulted as to the appointment of the labour representative.

Statement of Chairman

Mr. Justice McTague issued a statement in regard to the policy of the Board which read in part as follows:

"While the Board hopes to establish a consistent jurisprudence and by public hearings and published judgments and reasons to acquaint the public fully with the principles upon which the Board proceeds in applying the wages order, such as would be the case if we were a court of industrial relations, we feel that we should state at the outset that it is our understanding that neither the government or the text of the order which we now are charged with administering expects or requires a legalistic or narrow technical approach, particularly in cases where by comparison with others, or having regard to standards reasonably necessary for a proper livelihood or the maintenance of proper morale, wage rates are inadequate or depressed.

"It is our view that the order contemplates that the board will correct such injustices in so far as they come before the board and are included in its scope.

"By the same token it is our view that the order, as a wartime measure, does not contemplate changes in wages or working conditions which do not find their justification in the correction of improper or depressed conditions."

Reconstruction

Reconstitution of Post-War Reconstruction Advisory Bodies

THE reconstitution of two important advisory bodies, the Advisory Committee on Economic Policy and the Advisory Committee on Reconstruction, was announced by the Prime Minister in the latter part of January.

The Committee on Economic Policy was first set up soon after the outbreak of war in September, 1939.¹ Its primary functions, then established, "to investigate, report and advise on questions of economic and financial policy and organization arising out of Canadian participation in the war," with a view to avoiding duplication of effort by departments and agencies of government and ensuring effective co-ordination, remain unchanged. To these have now been added "the additional functions of planning and organizing the activities of departments and agencies of government" (in respect of post-war matters) "as well as conducting investigations and study of post-war problems in collaboration with the Committee on Reconstruction, and the preparation and submission of appropriate reports and recommendations." In particular the Committee on Economic Policy has the authority "to assign to any department or agency of government responsibility for making investigations and preparing reports on post-war problems relating to the work of such department or agency."

The membership of the Advisory Committee on Economic Policy remains substantially the same, with the exception of a few changes necessitated by the transference of former members to other duties, and one recent addition.² The chairman is Dr. W. C. Clark, Deputy Minister of Finance; Dr. W. A. Mackintosh, Special Assistant to the Deputy Minister, is Vice-Chairman; and the other members are the following: G. S. H. Barton, Deputy Minister of Agriculture; Donovan Bartley Finn, Deputy Minister of Fisheries; Chas. Camsell, Deputy Minister of Mines and Resources; Donald Gordon, Chairman of the Wartime Prices and Trade Board; R. A. C. Henry, Department of Munitions and Supply; A. D. P. Heeney, Clerk of the Privy Council and Secretary to the Cabinet War Committee; Arthur MacNamara, Associate Deputy Minister of Labour; Hector McKinnon, Chairman of the Tariff Board and President of the Commodity Prices Stabilization Corporation; Oliver Master, Acting Deputy Minister of Trade and Commerce; Norman Robertson, Under-Secretary of State for External Affairs; Henri DesRosiers, Deputy Minister of National

Defence (Army); Hugh D. Scully, Commissioner of Customs; and Graham F. Towers, Governor, Bank of Canada. R. B. Bryce of the Department of Finance is Secretary of the Committee.

The Committee is responsible to the Prime Minister and reports to him or otherwise as he may direct. The Committee may appoint subcommittees, consisting of its own members or other persons, to investigate and report upon any matter within the functions of the Committee. And departments and agencies of government are required, at the request of the Committee, to designate officials to assist the Committee, its subcommittees and staff, in the performance of its functions.

Advisory Committee on Reconstruction

The Committee on Reconstruction was formally constituted in September, 1941,¹ although it began its work soon after the extension of the powers of the special Cabinet Committee charged with the consideration of demobilization and rehabilitation problems, in February, 1941.² The original definition of the duties of the Committee was related to this extension, "to examine and discuss the general questions of postwar reconstruction, and to make recommendation as to what government facilities should be established to deal with this question". The Committee was charged, "to submit to the special Committee of the Cabinet ... reports and recommendations respecting information received and consideration given to keep the special Committee of the Cabinet informed in respect thereto." Orders in Council P.C. 1218 (February 17, 1941) and P.C. 6874 (September 2, 1941) are now revoked, and the Cabinet Committee on Demobilization and Re-establishment reverts to its previous functions, i.e., "to report regarding the problems which will arise from the demobilization and discharge of members of the forces during and after the conclusion of the present war and their rehabilitation into civil life", with the Advisory Committee on Demobilization and Rehabilitation (under the chairmanship of Brig-Gen. H. F. McDonald)³ continuing as the advisory and co-ordinating body of government officials in this field.

The reconstituted Committee on Reconstruction, like the Committee on Economic Policy, reports directly to the Prime Minister, or otherwise as he may require. Its functions are redefined as follows:

¹ P.C. 2698, September 14, 1939 (amended later by P.C. 767, February 23, 1940.)

² P.C. 1027, February 8, 1943.

¹ P.C. 6874, September 2, 1941.

² P.C. 1218, February 17, 1941, amending P.C. 4068, December 8, 1939.

³ P.C. 5421, October 8, 1940.

"The Committee shall, on their own initiative, make such recommendations and draw attention to such considerations in the field of postwar problems as they may deem desirable.

"The Committee shall undertake such investigations and studies of postwar problems as may from time to time be determined in co-operation with the Advisory Committee on Economic Policy or as the President of the Privy Council may direct."

As before, the Committee is empowered to "appoint such subcommittees and consult such recognized experts as it may deem advisable", and to "invite to appear before the subcommittees . . . persons specially qualified to deal with any matter coming within the terms of reference of the Committee."

The membership of the Committee on Reconstruction continues unchanged, except for the replacement of Mr. Tom Moore, who has resigned. The Chairman is Dr. F. Cyril James, Principal of McGill University; and the other members are: Mr. Percy R. Bengough, Vice-President, Canadian Trades and Labour Congress⁽⁴⁾; Hon. D. G. McKenzie, Chief Commissioner, Board of Grain Commissioners for Canada; J. S. McLean, President, Canada Packers, Limited; Dr. Edouard Montpetit, Secretary-General, University of Montreal; Dr. R. C. Wallace, Principal of Queen's University. Ex-officio and liaison members are as follows: K. M. Cameron, chief engineer, Department

of Public Works, chairman, Subcommittee on Postwar Construction Projects; Dr. W. A. Macintosh, chairman, Canadian section, Joint Economic Committees; Brig-Gen. H. F. McDonald, chairman, General Advisory Committee on Demobilization and Rehabilitation; Walter S. Woods, chairman, Demobilization and Rehabilitation subcommittees on Interrupted Education and Land Settlement. Dr. Mackintosh is vice-chairman of the Advisory Committee on Economic Policy, but provision is made in the new Order in Council for the attendance of another member representing this Committee, if necessary. Dr. Leonard C. Marsh, formerly Director of Social Research at McGill University, is Research Adviser to the Committee; and Mr. J. E. Mackay, formerly Editor of the Commercial Intelligence Journal, is Secretary.

Arrangements have been made for mutual consultation and collaboration between the Advisory Committee on Economic Policy and the Advisory Committee on Reconstruction on studies, reports and subcommittee work; with the Committee on Economic Policy particularly concerned with the reference of postwar problems to Dominion departments and agencies and the co-ordination of a program of practical measures for the consideration of the government, and the Committee on Reconstruction particularly concerned with preparatory and consultative work not directly involving any specific government department.

Reconstruction Planning in Australia

Parliamentary Committee Recommends Establishment of Ministry of Reconstruction and Ministry of Social Security to Give Full Time to Economic and Social Betterment

RECONSTRUCTION planning was the subject of the fifth interim report of the Australian Parliamentary Joint Committee on Social Security which was published on October 8. Earlier reports dealt with social security legislation, unemployment, and housing (L.G., 1942, p. 1175). In its latest report the Committee declared that the object of social planning was "the attainment of a better standard of living for the great majority of the nation and in particular for the lower wage-earners, and protection against the hazards which life presents—poverty, unemployment, ill health, malnutrition and bad housing". It recognized, however, that the immediate postwar problems connected with the transition from war to peace such as demobilization and repatriation, the relaxing of wartime controls and the change-over from war- to peace-time industry must first be met.

For this purpose the Committee proposed the establishment of a Ministry of Reconstruction and the appointment of a National Planning and Co-ordination Committee to direct and co-ordinate all reconstruction planning in the economic field. This would replace the present Inter-departmental Advisory Committee on Reconstruction where members occupied highly responsible positions and had no time for meetings of the Committee. The proposed Committee would consist only of three experts, including one public works specialist to act as Chairman, and would be responsible to the new Minister of Reconstruction. Four sub-committees would work under it to make plans regarding public works, rehabilitation of secondary industries, rural settlement, and demobilization and repatriation, and a fifth would co-ordinate departmental planning for economic rehabilitation.

⁴ P.C. 951, February 5, 1943.

Employment Through Public Works

The function of the sub-committee on public works, it was suggested, would be to prepare a program to provide large scale employment for demobilized service men and women and war workers, pending their re-absorption in industry and economic readjustment between the nations. This should be done in consultation with commonwealth, state and local authorities. While a considerable number would revert to their pre-war occupations in the public service, railways, banks and private employment, plans would have to be made in advance for the employment of very large numbers of men and also many women.

"The preparation of a works development program to be put into operation at this stage, to take up any lag in employment," the Committee declared, "is of the utmost importance; indeed, it is probably the most urgent phase of planning to be completed".

In determining priorities for works projects, location would be a matter for consideration as well as the permanent value to the nation, labour and materials potential and the indirect effect upon industry generally; the whole being related to a policy of national development and stabilization of employment. There would be a vast field of development in Australia by way of schemes for water conservation, irrigation, hydro-electric and other power services, land reclamation, public utility services, building construction and transportation affecting all classes of labour and materials. In this connection also, many works projects for the development and expansion of post and telegraph services would be sound financially in addition to providing large scale employment.

The sub-committee on rehabilitation of secondary industries, it was suggested, should investigate the potentialities for re-employment in the re-establishment of industries, or in the development of new industries in the post-war period. As the services of expert industrialists, now directing war production, became available, they should be co-opted to assist in this most important phase of post-war planning.

It was suggested that the rural planning sub-committee consider schemes for soldier settlement as well as problems of marketing, rural industries, land utilization and improvement, rural living standards, etc.

Social Planning

The Committee proposed that social planning be directed by a Ministry of Social

Security, as recommended in an earlier report; and that it include the measures already suggested by the Committee: a commonwealth Social Security Act and a national Housing Planning Authority.

It was recommended, that the Social Security Act be passed immediately. It should embody the foundation principles of complete social security and take the form of a legislative framework into which existing social legislation would be drafted and future measures included. It should include a scheme of unemployment benefits financed by a graduated tax on incomes.

A national plan of medical, health, maternal and child welfare services for all, irrespective of circumstances, was considered to be of utmost importance in the approach to social security. Such a plan would probably be possible of achievement when normal conditions were restored to the medical profession by the demobilization from the forces of the large number of medical practitioners at present engaged therein.

The Committee considered housing as primarily a social rather than an economic problem, the implications of which overshadowed the immediate aspects of employment and building expansion necessarily associated with any large scale housing project. Slums and bad and inadequate housing were declared to be the root of many of the most acute social evils and a great deal of ill health.

The Committee urged the immediate appointment of a Housing Planning Authority. This authority should report directly to the Minister for Social Security concerning the social aspects of housing, including housing standards, slum clearance and draft uniform legislation, but the employment and works development aspects, which might be described as the by-products of a national housing scheme, should be co-ordinated by the National Planning and Co-ordination Committee.

As a necessary basis for any social security plan, the Committee recommended equality of educational opportunity through a nationally controlled uniform system of education. Whether this could best be achieved by grants-in-aid to States or by constitutional reform giving the Federal Government jurisdiction in this sphere was a question to be settled later. The need for more vocational guidance and technical education was stressed but the Committee also believed that children must be provided with "cultural and civic training to qualify them to become useful and efficient members of society".

Industrial Welfare

Industrial Nutrition in Canada

THE Nutrition Services Branch of the Department of Pensions and National Health has prepared the following suggestions for a nutrition program in industrial plants.

1. Remembering that proper nutrition really makes a difference to your present and future health, as well as your work, why not decide to have a Nutrition Program in your plant? (See the booklet "Nutrition in Industry", copies of which may be obtained free on request from the Publicity and Health Division.)

2. Survey and evaluate food facilities in the plant. Do they supply those foods necessary for best health? Are they adequate, clean, comfortable? If no cafeteria is possible, consider arranging for good boxed lunches, supplemented by canteen service.

3. Get together a Program Committee representative of Management and Employee. This Committee might be headed by an employee leader, the personnel manager, doctor or nurse.

4. Plan an "opening rally" for the Program, perhaps associated with a regular employees' social evening. Get a trained speaker to give a short talk on nutrition. Motion pictures on nutrition are also available. The local radio might assist.

5. Posters will help a lot if changed frequently. The management might sponsor a poster contest among employees' children, or among the city school children. Pass around the best posters to all the industries in town. Posters can also be obtained from the Milk Foundation of Toronto, Health League of Canada in Toronto, Nutrition Services, Department of Pensions and National Health in Ottawa, etc.

6. Literature—Various government departments, and also groups like the Health League, distribute material to workers and their wives. Many companies have published their own handbook, with some assistance.

7. If there is a food service, its co-operation is essential. Posters and displays will be useful but it is also necessary to help customers get nutritious meals at reasonable cost. A special "Victory Lunch" saves material and labour by providing a good lunch with no choices allowed, and at a minimum price.

8. The Nursing and Medical services can co-operate by giving special emphasis to

nutrition in their contacts. This help is very important. The company nurse might "score" the lunches being brought or carried, and post the results at intervals. Forms are available from Nutrition Services, Ottawa.

9. Company or employee publications should be utilized to the full. Short "boxes" should appear regularly, and competitions should be sponsored for cartoons, illustrations, recipes, menus, lunch suggestions, etc.

10. Exhibits from time to time may be arranged by dietitian, nurse or welfare worker.

For emphasis, all the above suggestions that can be followed should be developed to start about the same time, but they can also be done separately. These can be followed up by: (1) Nutrition classes, demonstrations or informal talks by trained people to employee groups. (2) Pay envelope slips. (3) Periodic advertising of the Victory Lunch. (4) Competitions on menus, etc., for workers' wives. (5) Motion pictures every month.

In the September, 1942, issue of the LABOUR GAZETTE an account was given of the Nutrition Services survey of food facilities in Canadian war industries and of the recommendations concerning nutrition in industry adopted by the Canadian Council on Nutrition held in June, 1942.

Canada's Official Food Rules

The Nutrition Services Branch has prepared the following Official Food Rules for Canada.

Milk—Adults, $\frac{1}{2}$ pint. Children, more than 1 pint. And some cheese, as available.

Fruits—One serving of tomatoes daily, or of a citrus fruit, or of tomato or citrus fruit juices, and one serving of other fruits, fresh, canned or dried.

Vegetables—(In addition to potatoes of which you need one serving daily)—Two servings daily of vegetables, preferably leafy, green or yellow and frequently raw.

Cereals and Bread—One serving of whole-grain cereal and 4 to 6 slices of Canada Approved Bread, brown or white.

Meat, Fish, etc.—One serving a day of meat, fish, or meat substitutes. Liver, kidney or heart once a week.

Eggs—At least 3 or 4 eggs weekly.

Eat these foods first, then add these and other foods you wish.

Some source of vitamin D, such as fish liver oils, is essential for children and may be advisable for adults.

These are the health-protective foods which everyone requires. Everyone should endeavour to eat them every day in at least the amounts indicated and to use more if possible.

Other material concerning healthful eating is contained in a pamphlet of the same name which has been issued by the Nutrition Services Branch of the Department of Pensions and National Health.¹

Community Nutrition Programs

Reports of Community nutrition programs and activities are coming in to Nutrition Services daily. There is little of the dramatic in the immediate results of a program of this type, for any program of health education produces long-term rather than immediate results. The reports being received by Nutrition Services show that a great deal of work is being undertaken, much of it directed primarily toward the worker and his family. In some cases the motivation for the program has stemmed from the community, in others, industry has approached the community asking that certain work be undertaken.

One Ontario community is directing its whole program towards two groups; girls employed in

industry and the wives of industrial workers, for whom special classes and groups have been arranged.

A Western city has adapted its program especially to the needs and convenience of the Wartime Housing groups.

A town in Nova Scotia has a war industry whose employees have increased from 500 to 1,700. This rapid expansion in a small town caused acute feeding problems. The plant approached the I.O.D.E. for help in opening and operating an emergency canteen at the plant until such time as the plant could equip and put into operation a large cafeteria. This help was given and the plant cafeteria is now operating under the direction of an experienced dietitian.

In a New Brunswick plant the supervisor of Industrial Relations sought the help of trained Home Economists to organize and conduct classes for wives of the workers.

In Cape Breton, regional Nutrition Committees are concentrating largely on the problems of workers in the mines and steel plants and their wives and families. Lunch boxes and meal problems rising from staggered working hours are two of the chief problems in this district.

The publicity sub-committee of the local nutrition committee in a western city is approaching industry with a prepared modification of the Servel plan and is encouraging each industry to create its own program to include workers' families.

Nutritional Programs for Industrial Employees

Company Nutritional Programs Described in Survey in United States

THE *Industrial Relations Section* of the *Department of Economics and Social Institutions* of Princeton University has prepared a digest of current practice and experience on "Nutritional Programs for Industrial Employees" in the United States. The digest, an outline of which is given below, is based on an analysis of research reports on nutrition and on information received from representative companies.

The experience and opinion of industrial physicians and other company executives indicate that employee eating habits are a definite factor in productivity, absences, and turnover. Yet recent surveys reveal that a large percentage of workers are ill-fed. The situation is in part due to the growth of new large plants remote from adequate restaurants, the rapid expansion of personnel in existing plants, and the creation of additional shift assignments. Such community conditions as transportation difficulties, overcrowded housing without cooking apparatus, and employment of women with home duties mag-

nify the problem. While some of these obstacles to good-health-through-good-diet cannot be tackled by industry alone, management has found that programs directed at the worker's meals in the factory can alleviate the ill-effects of inadequate lunches and, at the same time, may encourage the workers to eat more healthful foods at all their meals. The basic methods and policies utilized by companies with established feeding programs are outlined below.

Meal Facilities

The extent and direction of any company meal program varies with the restaurant facilities in the neighbourhood of the plant, the number of employees, the size of the plant, the length of the lunch hour, and the eating customs of the force. The Committee of Nutrition in Industry of the United States National Research Council urges that:

"Nutritious meals of natural food at prices that the workers are accustomed to

and can afford to pay should be made available in all plants engaged in production for war or defense purposes, except in small plants where the worker may obtain such meals from private sources in the free time at his disposal."¹

Plant nutritionists and interested government agencies believe that the meal should, if possible, be a hot one. English experience with the contribution of the hot meal in the factory has gone farther than in the United States and recommendations on this subject have been implemented by the Factories Canteens Order, 1940. This authorizes the Department of Factory Inspection to require that canteens serving hot meals be established in war plants which employ more than 250 persons. These canteens are now prevalent in England and are held to be vital to production.

Plants in the United States which are giving attention to their employees' health during expanded production have established lunch rooms on all shifts. When plants are too large for all the workers to reach one cafeteria and eat in the allotted time, management often has found it desirable to decentralize feeding services. This is done by placing lunch counters at selected spots or by using mobile wagons. Some of these canteens dispense complete hot meals, others can only provide hot and cold supplements to the lunch box.

Companies employing a well-trained nutritionist to supervise the feeding services have reported the value of this policy in terms of better meals and thriftier marketing. When a nutritionist is employed, the cafeteria and other lunch facilities are usually company operated. The executives of such plants believe that whereas concessionaires must cover costs and make a profit, cafeterias run by plant management can focus upon the primary consideration of improved employee health through good eating habits. Several plants report, in this connection, that they subsidize their lunch rooms to provide the necessary food at reasonable prices.

Although most of the large plants are expanding their lunch rooms, they cannot or do not serve all their employees, and many of the smaller plants have no cafeterias. Frequently the owner of the small plant feels that he cannot afford the equipment involved. For workers in these plants, as well as for those carrying food from home to plants with cafeterias, the lunch box is the basis of the factory meal. Management's primary objectives in relation to the lunch box meal are (a) education for packing good lunches and

(b) the provision of food that can be conveniently distributed at low cost in the plant to fill in the vitamins and minerals which are deficient in the lunch brought from home. The Division of Industrial Hygiene of New York State gives suggestions for supplementary foods in a letter to all war plants in the state and estimates that the cost is within the reach of all plants.²

Lunch Period

Industrial physicians have emphasized that an adequate meal implies time in which to eat it. A chance to relax at mealtime is especially needed now when the demands of war are placing considerable physical and emotional strain upon the worker. The physicians, executives, and special research bodies are generally of the opinion that a minimum of one-half hour should be allowed for lunch. These groups state that the desirable length of the meal period depends upon the nature of the work—very heavy or very monotonous work requires a longer rest—and upon certain external conditions. For example, when poisonous substances are handled, a longer period is necessary for washing up and eating, especially if the washroom and lunch room are at some distance from the work place.

Snack Pauses

Management has found between-meal snacks useful in eliminating mid-morning and mid-afternoon slumps in production. Haggard and Greenberg's physiological tests on shoe workers at Yale University³ show that muscular efficiency rises after each meal and falls again 2½-4 hours later. Their findings that muscular efficiency is at its lowest level before breakfast are highly significant when added to the observations of plant executives that many workers leave home with a light breakfast or none at all. Without the snack pause the level of efficiency remains low until lunch.

English and American studies of workers' habits reveal that when left to themselves most workers take rest pauses at irregular and unsuitable times, and nibble at food surreptitiously. A number of English manufacturers stated, in response to an inquiry into the operation of such pauses, that official pauses were introduced so that management could prescribe the time and distribution that would maintain the best rate of productivity.⁴

²Industrial Bulletin, September, 1942. "Industrial hygiene; kinds of foods for proper nutrition of war workers prescribed," pp. 301-302.

³For the report of the experiments see H. W. Haggard and L. A. Greenberg. Diet and physical efficiency. New Haven. 1935.

⁴See J. Ramsey, R. E. Rawson and others. Rest pauses and refreshments in industry. London, 1939. Sec. IV, "Employers' attitudes to rest pauses and refreshments," pp. 31-36.

¹National Research Council, Committee on Nutrition in Industry. The food and nutrition of industrial workers in war time, p. 15.

Furthermore, the management's interest has had a salutary effect upon morale.

Representative manufacturing firms in the United States report the growing use of rolling wagons that dispense coffee, milk, sandwiches, ice cream, and candy during the pauses. Automatic dispensing machines are also prevalent. The provision of free milk to reduce the health hazards of munitions workers and of malted milk to underweight office and factory employees are examples of the effective use of snack pauses in plant-wide health programs.

Vitamin Provision

While there is some division of opinion among industrial physicians about the value of distributing vitamins to all employees, there is general agreement that for long-run health maintenance vitamin concentrates should be subordinated to the provision of natural diets rich in essential food factors.

The physicians agree upon the desirability of supplementing the diet with synthetic vitamins in particular instances of deficiencies that can be isolated and treated. One company, for instance, has reported that after 25 months of vitamin A therapy to improve the efficiency and relieve the eye fatigue of colour testers, assembly line rejects due to off-colour parts had been reduced from an average of 1.7 to three-tenths of one per cent. . . .

Some firms are distributing vitamin tablets free of charge or at a low price throughout their plant. The medical supervisor of an arms manufacturing company stated that 33 per cent of the employees of one branch took vitamin tablets for eight months, 44 per cent of the group taking them daily and 56 per cent periodically. Forty-two per cent of the employees in the daily group and 58 per cent of the periodical group reported their general health improved and said they fatigued less easily and had over 40 per cent fewer colds than in the previous year.

However, most companies using synthetics believe that the best practice is to administer them selectively under the supervision of the company doctor.

Companies adhering to this practice state that, since it has been found that many essential food factors are unavailable in concentrate form, it is wise to promote nutritious natural meals and to place the determination of the therapeutic contributions of vitamin pills in the realm of the physician.

Education

Many companies have found that the provision of adequate eating facilities is not in itself a guarantee that the worker will eat balanced meals. To promote better use of the cafeteria and to encourage more nourishing lunch boxes, employees must be convinced of

the value of good foods. Companies and special groups which have given attention to the problem of nutritional education have found the following methods helpful.⁵

- (a) Feature articles on proper eating habits, including menus for lunch boxes, in the plant bulletin.
- (b) Distribute booklets on nutrition and on lunch-box menus to workers and their families. A large manufacturing organization has appended a separate letter to such booklets given to foremen. This letter cites typical situations and useful methods by which the foreman may promote employee interest in the booklet and in good eating habits in general.
- (c) Post cafeteria "Victory" menus to suggest meals that can be prepared at home.
- (d) Serve in the cafeteria nutritious foods which appeal to the eye and the taste.
- (e) Make available the advice of a trained dietitian to employees and their families. To encourage the use of the dietitian, one company inserted a coupon in the plant magazine to be checked for nutritional disabilities, such as overweight. This was followed up by correspondence and, where necessary, private consultation.
- (f) Provide pay envelope slips listing items of food of good nutritional value which are on the market at reasonable prices.
- (g) Organize classes and demonstrations on the selection and preparation of balanced meals. These can be conducted by the plant dietitian or by a representative of the local nutrition group.
- (h) Place posters and exhibits, emphasizing the importance of good eating habits, at strategic spots around the plant.

Companies with feeding programs state the value of such efforts in greater employee health, productivity, accuracy, improved morale and lessened absenteeism.

Many executives have pointed out the fact, however, that the results of plant attention to eating habits are not measurable in exact terms. Such a program nearly always operates in conjunction with other important health efforts and often has been inaugurated along with improved machine techniques.

Considered as a part of a general company health program, the consensus of opinion and supporting evidence is that company cafeterias and efforts to improve employee eating habits contribute materially to the fullest use of manpower in the war emergency.

⁵Two good programs available nationally to war plants through their local gas and utility companies have been worked out by Servel, Inc., and Westinghouse Electric and Manufacturing Company.

The Place of Day Nurseries in the War Effort

Provisions of Dominion-Provincial Agreement

THE Plan for Day Nurseries authorized under a Dominion-Provincial agreement has received support of the Canadian Welfare Council. Under the title "Day Care of Children in Wartime", the Council has compiled a memorandum on the place of day nurseries in the war effort. The foreword states that "this memorandum is designed principally for the use of the local committees set up under the Dominion-Provincial agreement, July, 1942, and has not been prepared for the purpose of serving as a detailed guide to the creation and operation of individual day nurseries." Important factors concerning day nurseries and allied problems which have been discussed, form a very useful guide to those seeking to work with or plan day nurseries.

Introducing the subject is the statement that "thousands of married women who are now employed in industry and the increasing number still entering industry makes the proper care of their children a major problem."

To meet this need an agreement was drawn up in July, 1942, between the Dominion Government and the Provinces of Ontario and Quebec (War industry areas) which provides financial aid from the Dominion for the setting up of day nurseries wherever certain minimum standards are observed.

This agreement provides financial aid from the Dominion wherever these minimum standards are observed and gives the first claim on these day nurseries to children of mothers engaged in war industries. The term war industries takes in essential industries which are contributory to the war effort such as food processing, cafeterias, etc. In other words, industries—the continuation of which is essential to the war effort. Children will also be admitted whose mothers do not come under the above category, providing their number does not exceed 25 per cent of the total number of children in the day nursery, and provided there is no waiting list from mothers who are engaged in essential war industries.

The term mother includes foster mothers from which it will be seen that every effort has been made to provide for the needs of children, regardless of rank.

It is expected that full use will be made of any existing nurseries, nursery schools, church buildings, Sunday schools, etc. in order to save initial expense and cut down on overhead, providing the standards and administration are fully approved by the Dominion

and the Province concerned. Expenses for such centres will be on the unit cost per day basis.

There is to be no discrimination against any mother wishing to place her child in a day nursery on the ground of nationality, race, religious or political connections. Nevertheless, the religious affiliations of the respective children must be regarded in their placement in the day nurseries, in addition to the standards covering health, welfare, education and recreational needs.

Administration

Full charge of the general administration is vested in the Province which must set up a Provincial Advisory Committee. Membership must include a representative of the Provincial Department of Public Welfare and one nominated by the Director of National Selective Service and approved by the Dominion Minister of Labour. The Minister of Public Welfare may act as chairman or appoint his choice of chairman. Following are the duties of the Advisory Committee:—

1. To keep informed on the conditions pertaining to the employment of mothers in war industries in the Province.
2. To conduct periodical inspections of the facilities functioning under the terms of the agreement.
3. To report and advise the Province generally on questions of policy relative to the subject matter of the agreement.
4. To make and refuse recommendations regarding the numbers of personnel required for carrying on any project under the agreement.
5. To make and refuse recommendations regarding services for school age children.

The agreement between the Dominion and Provinces places no restriction on local groups. Where such groups representative of community interests are already concerned with day nursery care, provided their work is on satisfactory lines, it should be made to co-operate as closely as possible with provincial authorities in order that the committee may be recognized as a local committee under the terms of the agreement. Once recognized by the province the committee will be under provincial supervision and will be able to enjoy assistance and advice from provincial sources as needs arise, provided of course the standard set forth by

the province and the Dominion are maintained.

Where representative committees do not exist and a need for day nursery care arises the following courses are open:—

1. The province itself may have a local committee appointed.
2. The local community may make request to the province to appoint a local committee to look after the need.
3. The community may set up its own committee and then appeal to the province for recognition.

It is suggested that local committees and community groups planning for day nurseries will find the experience of Councils of Social Agencies and of family welfare organizations, particularly the Children's Aid Societies, to be invaluable.

Nursery Location and Facilities

Location should be within easy distance of homes of working mothers and if possible removed from factory districts. The size of the unit should be well considered in relation to other factors. Those providing for 40 and 50 children appear to give most effective service with economy of overhead.

A good deal of consideration and sound advice is given on selection or planning of buildings. Arrangement of space to allow for proper ventilation, rest rooms, adequate lighting, sanitation, playground facilities and sufficient play space for each child, also the necessary living space per child. Separate rooms for medical examination and for isolating sick children. The importance of proper furniture and equipment to suit the needs of small children.

Selection of Staff

Several pages are devoted to selection of staff and the importance of trained and equipped personnel, stressing that a "qualified staff is a prerequisite for success." Day nursery care of children must rest on principles which will assure constructive development for them. A superintendent chosen for day nursery work must have a broad understanding and knowledge of the individual all-round needs of children at different age levels. She must also have good contacts with and knowledge of outside agencies and groups so as to be in a position to deal with unusual problems. Stress is placed also on the importance of health services and personnel and an outline is given of a desirable daily program and some space devoted to the importance of keeping proper records.

The entire memorandum tends to raise the conception of day nursery work and daytime care of children to a much higher level than previously conceived. "There is an obligation upon day nursery management to function as an extension of home care through establishing an understanding with mothers that the purpose of these modern day nurseries is to educate and develop the child on its mental, physical and emotional side."

The suggestion is made that no married woman with children should be employed unless she has made satisfactory plans for their care during her absence.

Several paragraphs are devoted to the subject of working hours for mothers and the suggestion is made that shorter working days should be considered for married women and that they be employed on day shifts only.

The authors of this memorandum see in the present Dominion-Provincial co-operation, with proper fees paid by parents, an opportunity to put day nursery work on a far higher level than it attained under the old charity regime, a suggestion that such day nurseries may expand into permanent educational agencies for the younger child, serviced by specialists who work for their welfare and advancement.

A radical change from the day nurseries of other times which functioned largely to relieve distressed families and for the most part, financed by private funds or charity drives, were very limited in scope. Halifax, in pre-war days had one day nursery, three functioned in Montreal, five in Toronto, two in Winnipeg and one each in Ottawa, London, Hamilton, Edmonton and Vancouver. It pays tributes to the institute of Child Study of the University of Toronto as the most outstanding development in nursery schools.

The need of the older child is also provided for in the Dominion-Provincial Agreement since day nurseries meet only a part of the problem, and provision must be made for care of school age children of mothers who start work as early as 7 a.m. and may not return home until 6 or 7 p.m.

For care of these older children it is suggested that church buildings or other organized centres manned by experienced volunteer workers might be pressed into service or that day schools be used and the services of carefully selected teachers, who should be paid for their extra hours of work and called upon only once or twice a week.

The Act also allows for provision of a noon day meal for school age children.

The memorandum includes a Bibliography of twenty-four helpful books, reports and pamphlets enlarging on day nursery work and child care.

Manpower

Control of Civilian Employment Under National Selective Service

Review of Government's Manpower Control Operations from March, 1942 to January, 1943

ON January 19, 1943, a new set of civilian manpower regulations (P.C. 246) was announced by the Minister of Labour. The new regulations, as described on page 16 of the January LABOUR GAZETTE, consolidated previous National Selective Service Civilian regulations, with certain amendments.

The following article is a review of the Government's operations in the control of employment, from the establishment of National Selective Service in March a year ago, until the coming into effect of the new regulations.

General Statement on Control of Employment

The control of employment through the employment offices falls into three stages. During the first, from March 23, 1942, to June 17, 1942, the offices were administering Order in Council P.C. 2250, which provided that physically fit male persons aged 17 to 45 years could not enter specified restricted occupations without the written permission of a National Selective Service officer and Order in Council P.C. 2251, which provided that persons wholly or mainly engaged in agriculture could not enter employment outside agriculture, except active service, compulsory military training or seasonal employment in specified primary industries, without such permission. During the second stage from June 17, 1942, to September 1, 1942, Order in Council P.C. 2251 (Stabilization in Agriculture) remained in force, but P.C. 2250 (Restricted Occupations) had been repealed and replaced by P.C. 5038, which provided that, except in agriculture and certain other specified employments, no employer should take any person into employment except through an employment office. During the third stage from September 1, 1942, to January 19, 1943, P.C. 5038 had been repealed and replaced by P.C. 7595, the National Selective Service Regulations, which also repealed P.C. 2251 but incorporated the substance of P.C. 2251 with some minor modifications.

The first and second stages of this development may be regarded as preliminary, during which employers and employees became acquainted with the employment offices and their facilities, and the number of employment offices and their staffs were increased. Undoubtedly the movement of labour was given some direction during these periods, but it was very much less than that given during the third period.

In the third period, the establishment of a schedule of labour priorities in which industries as a whole and selected firms are classified as having very high, high, low or no labour priority, assessed for the first time the relative importance of all labour requirements. Without this schedule, placement officers could direct labour only on the basis of unofficial impressions of relative essentiality. The requirement that employers could not engage employees, except in a few occupations, without a permit to seek employment gradually forced employers to advise the offices of job openings. This requirement similarly compelled all job seekers to register at the offices. The control of advertising checked labour "poaching." Thus the reporting of job openings or vacancies, coupled with the labour priority schedule, gave the offices the requisite knowledge, and the registration of workers gave them the requisite opportunity to control the movement of labour. The further requirement that employers or employees had to give seven days' notice of separation from employment and that, in ordinary cases, permits to seek employment were given only to those having notices of separation, reinforced this opportunity. This requirement was intended also to deter labour turnover, to give employers an opportunity to replace workers who quit, and to give employees an opportunity to seek other jobs before layoffs.

The requirement of seven days' notice proved difficult to administer in certain industries and was from time to time modified by the Director, as provided in P.C. 7595. In P.C. 246 of January 19, 1943, the consolidated

National Selective Service Civilian Regulations, the requirement was somewhat relaxed. It is no longer applicable to employees during the first month of probationary employment nor to employment in building construction.

Employment Office Statistics

Meanwhile, a few selected statistics give a summary of employment office operations from April through December, 1942:—

Applications for employment.—Cumulative total, 1,392,943; male, 938,087; female, 454,856. From 54,297 in April all applications increased to a peak of 272,138 in November to 200,110 in December. From April to November all applications increased 401 per cent; male applications, 345 per cent; female applications, 537 per cent. From April to December all applications increased 268 per cent; male applications, 257 per cent; female applications, 296 per cent.

Vacancies notified.—Cumulative total, 1,289,404; male, 891,152; female, 398,252. From 43,534 in April all vacancies increased to a peak of 271,118 in October, to 198,839 in December. From April to October all vacancies reported to employment offices increased 523 per cent; male vacancies, 558 per cent; female vacancies, 459 per cent. From April to December all vacancies increased 357 per cent; male vacancies, 388 per cent; female vacancies, 300 per cent.

Placements effected.—Cumulative total, 824,945; male, 551,902; female, 273,043. From 31,529 in April all placements increased to a peak of 202,259 in November, to 148,355 in December. From April to November all placements increased 542 per cent; male placements, 524 per cent; female placements, 575 per cent. From April to December all placements increased 370 per cent; male placements, 371 per cent; female placements, 370 per cent.

Unfilled vacancies.—Unfilled vacancies increased from 15,061 (9,687 male; 5,374 female) on April 30 to a peak of 192,203 (139,049 male; 53,154 female) on October 31, to 147,116 (104,705 male, 42,411 female) on December 31.

Unplaced applicants.—Unplaced applicants at the end of the month increased from 33,020 (24,879 male; 8,141 female) on April 30 to a peak of 114,049 (63,674 male; 50,375 female) on September 30, to 82,372 (50,941 male; 31,431 female) on December 31.

Notices of separation and permits to seek employment.—Since September 17, the first week after the passage of P.C. 7595 for which reports were available, through December 31, the offices received 621,260 notices of separation (459,336 male; 161,924 female), issued 65,956 permits to agricultural workers to seek employment outside agriculture (63,817 male;

2,139 female) and issued 980,093 other permits to seek non-agricultural employment (650,657 male; 329,436 female).

The apparent anomaly that vacancies remain unfilled while applicants remain unplaced arises of course from the facts that the applicants and the vacancies are often not in the same place and that many of the applicants do not have the requisite qualifications to fill the available vacancies. From April through July the number of unfilled vacancies was less than the number of unplaced applicants. After July the unfilled vacancies consistently exceeded the unplaced applicants. This reflects the increasing labour shortage.

Unfilled vacancies have remained consistently large in a few high priority industries, especially in those involving heavy male work. For example, unfilled vacancies in logging and coal mining have ranged from 44,000 to 52,000 and from 2,300 to 2,700 respectively.

Special Labour Supply Problems

Following representations by the logging and sawmill operators, National Selective Service undertook a campaign to induce farmers to work in the bush during the winter months. This campaign took the form of the distribution of pamphlets to farmers, advertisements in rural papers, spot radio announcements, press releases, and co-operation with Provincial Governments. The Provincial Governments through employees in their Departments of Agriculture, Lands, Forests and Mines, undertook to canvass farm areas and to explain to farmers the importance of working in logging and sawmill operations. In addition, operating companies were permitted to place recruiting agents in the field subject to conditions prescribed by National Selective Service. While the publicity induced a flow of farm workers to the woods, actual placement was to a large extent under control of the employment offices. Reports indicate that the campaign has been quite successful. Late in August, National Selective Service was informed that it would be necessary to have 125,000 men in the woods by December. On December 1 it was estimated that there were 121,500 so engaged. It should be noted, however, that a late harvest restricted the flow of manpower to woods operations during the months of October and November.

The provision of coal miners has been a serious problem for National Selective Service. In co-operation with provincial authorities and the National War Services Boards in the provinces of Saskatchewan and Manitoba, miners have been recruited for the lignite fields in Saskatchewan. In co-operation with the Emergency Coal Production Board and the Armed Forces, miners have been released from the Army and directed to employment

in the mines. Civilian industry has also been combed for experienced coalminers. This matter is now being pursued in the East. Some 280 miners have been returned to mines in the West.

The urgent need of International Nickel Company for miners in the fall was met in part by a transfer of gold miners from the Timmins and Kirkland Lake area.

Shortage of power has resulted in the curtailment of the pulp and paper industry. Much of the manpower released by this curtailment has been diverted to the employment of the Aluminum Company of Canada in Arvida and to the Electro-Metallurgical Company of Welland.

Emergency labour recruiting measures were reasonably successful in saving the sugar beet crop and in providing fruit and vegetable canneries with labour.

Through arrangements with the representatives of management and of the employees in the jewelry industry, jewelry workers are being directed to employment in essential war plants.

Arrangements have been made to employ freight handlers in Halifax in fresh fish processing plants when they are not required to handle freight. Along the same line, arrangements have been worked out on the Pacific coast to use vegetable and fruit canning plants to can fish when there are no vegetables and fruits to can.

Arrangements have also been made with certain Mobilization Boards to use conscientious objectors on essential civilian work instead of calling them to alternative service.

To ensure crews for vessels sailing the Great Lakes, arrangements have been made to employ crews on temporary permits during the winter on shore and to direct crews back to lake boats in the Spring with the opening of navigation.

In October the decline of production in coal mining, base metal mining and basic steel plants led to negotiations between the Departments of Labour, National War Services, Munitions and Supply and the Wartime Prices and Trade Board, which resulted in arrangements by which until February 15, 1943, employees in designated establishments in these fields were to be given special consideration for postponement from military service and, except in special cases, denied permits to seek employment with any other employer.

Enforcement of Control of Employment

All documents such as notices of separation and permits to seek employment are filed alphabetically so that the recorded work history of each applicant is in one place. If an individual appears to have given or received too many notices of separation he is referred to a special officer who may order him to a

specific job. Cases of non-compliance are handled usually by the employment office manager, or a special officer in the larger offices, who explains the regulations to the employer or employee concerned and endeavours to induce compliance. If this fails the case is referred to the enforcement section at headquarters which, after such supplementary investigation and report by the local manager as it feels necessary, and after approval of the Director of National Selective Service, refers any case in which it appears that prosecution would be advisable to the Department of Justice. Only eight prosecutions have been undertaken to date. It has also been arranged that the Inspectors of Insurance Revenue, who periodically audit employers' records of contribution payments, will also inspect payroll and employment records for compliance with selective service requirements.

Labour Exit Permits

The Labour Exit Permit Order of October 16, 1942, prohibited any person, with minor exceptions, from leaving Canada to seek employment without a labour exit permit. It is estimated that between 1,600 and 1,700 individual labour exit permit applications have been received and dealt with at headquarters. Of these, approximately 50 per cent (800-850) have been granted.

These figures do not include applications rejected by local offices. Local offices have the right to refuse applications, but in the interests of uniformity of policy, authority for approval cannot be given without reference to headquarters. Neither does the figure of 1,600 quoted include any of the special woods labour permits mentioned below.

Prior to December 15 the policy adopted was a fairly drastic one, and anyone who was capable of being usefully employed in Canada, whether in essential industry or not, was refused a permit. This was for the purpose of conserving labour and providing potential workers for war industry. On this basis, not more than 15 per cent of the applications reaching headquarters at that time were receiving approval.

Since December 15 the policy has been modified and permits are now being refused only where the individual possesses skill which is scarce at the present time and which is essential to the war effort. This applies to persons with technical qualifications, industrial qualifications, doctors, nurses, and others whose services are essential to the national welfare. Skilled tradesmen, farmers and farm labour, and persons with technical accounting skill are likewise refused. Common labour, domestics, clerks, ordinary book-keepers and stenographers are being allowed to leave the country under the present policy. This results in a high percentage of approvals and as previously

mentioned, an approximate figure of permits granted to date is 800.

During past years Canadian woods labour from the Provinces of Quebec and New Brunswick was rather extensively employed on lumbering operations in the New England States. As a result of representations made by the United States Government to have this practice continued during the current logging season, National Selective Service, after consultation with representatives of Canadian and United States lumbering interests, agreed to make labour available during this season but established some measures of control over the migration.

In April last it was agreed that 3,700 Canadian woodsmen would be permitted to enter the United States and remain in employment there until January 15, at which time the situation was to be reviewed. This quota was allocated by the United States War Manpower Commission among 37 lumbering operators in the New England States, of which eight were Canadian operators having timber limits in the area. During the early fall the War Manpower Commission effected a re-allocation of the quota which reduced the numbers previously allocated to the Canadian operators by 256 and National Selective Service, as a result of the representations then made by the Canadian operators, re-established their allocations by increasing the original quota to 3,956. Late in December a further 500 men were made available at the request of the United States Government and the quota was thus raised to 4,456.

Operators commenced to secure their labour extensively in the early fall and with the passage of the Labour Exit Permit Order of October 16, 1942, local offices began to issue permits to the men then going into the United States. In November field parties were sent out to issue permits to the woodsmen who had entered the United States before the Order was passed. With the completion of this work in mid-December it was found that the operators had not been able to maintain their full allocations of woods labour and that they suffered a continual loss of men who, after working a short time, gave up the employment and returned to Canada. As a result of representations then made by the operators, it was decided to permit them to recruit labour up to quota strength replacing men who had returned to Canada, but it was specified that the border would be closed to Canadian woods labour on January 16 and that such labour then in the United States would be permitted to remain until May 15.

During the past month local offices have been issuing labour exit permits to men going to employment with the various operators, but the total number of permits issued does not represent the actual number of men in the United States since many permits were issued

to men going in as replacements. Local offices, however, are now engaged in the work of renewing the expiry date of the permits held by men in the United States at January 16 and when this task is completed there will be an individual record of each man in the United States at the time when the border was closed. Preliminary reports would seem to indicate that not all operators were able to secure their complete allocation of manpower before the border was closed and that the number of men now in the United States falls short of the over-all quota by some few hundred.

Permits to Seek Employment Outside Agriculture

The numbers of permits requested, granted and refused to persons normally employed in agriculture to seek employment elsewhere from March 23, 1942, to January 7, 1943, is as follows:

Region	Requested	Granted	Refused
Maritimes ..	11,587	11,281	306
Quebec	28,378	27,764	614
Ontario	19,656	19,082	574
Prairie	11,841	11,246	595
Pacific	3,096	2,909	187
Total ..	74,558	72,282	2,276

The figures show the number of permits granted to be almost equal to the number requested, but it should be noted that a very large percentage of these permits grants are of temporary duration to allow the farmer to take seasonal employment outside agriculture with the definite understanding that he return to agricultural employment at the proper time. It is estimated that 90 per cent of the permits granted to agricultural workers to take employment outside agriculture are limited in point of time and that the farm worker will return to agricultural employment. This is partly confirmed by the fact that over 65,000 of the total were granted after September 17, 1942, during the slack season in agriculture.

Method of Enforcing Stabilization in Agriculture

The provisions of the Stabilization of Employment in Agriculture Regulations, 1942 (Order in Council P.C. 2251, March 23, 1942) were incorporated into Part 3 of the National Selective Service Regulations, 1942 (Order in Council P.C. 7595, August 26, 1942). One notable change was made at that time. An agricultural worker was then authorized to take any employment outside agriculture, without permit, for a period of not more than thirty consecutive days at a time when such employment would not interfere with agricultural production. This was intended to permit farmers to continue their normal off-season

occupations and has worked out reasonably well although there have been some abuses. The following excerpts taken from current instructions to National Selective Service officers indicate the policy being followed:

"The movement of agricultural workers to employment outside agriculture must be discouraged, except where the new employment is to be in one of the following primary industries: lumbering and logging, forestry, fishing, trapping and mining.

"All offices are required to further the policy of retaining agricultural workers in agricultural employment and seasonal employment in the primary industries named.

"When issuing a permit to a farmer to take temporary employment outside of agriculture, it should be pointed out clearly to the applicant that the permit is limited in time and that he is expected to return to agricultural employment immediately after the time stated on the permit. It will be necessary to set up special files in all such cases and to mark them appropriately so that they can be brought up for attention at the termination of the time indicated on the permit. A check should then be made of a reasonable number of cases to see that such farm workers are returning to agricultural employment."

While there have been no prosecutions of farmers for taking employment outside agriculture contrary to the Regulations, the local offices follow any such movement closely and require any such worker to return to agricultural employment. There has been little evidence of any serious movement of farm workers from agricultural employment contrary to the Regulations. Most employers are also careful to comply with the provisions of the Regulations and, in the event of a farm worker exceeding the period of employment outside agriculture without permit, the facts are brought to the attention of the Selective Service officer. Routine inspections by Inspectors of Insurance Revenue will also bring to light such cases.

Compulsory Employment

Very little use has been necessary of the authority to compel unemployed persons to accept employment and persons employed less than full time to accept other full-time em-

ployment. From March 23, 1942, to January 7, 1943, only 102 persons were so compelled, 9 in the Maritime Region, 30 in Quebec, 47 in Ontario, 6 in the Prairie Region and 10 in the Pacific Region.

However, in an unknown but substantial number of cases equivalent compulsion has been used by Selective Service officers in denying employees in special situations permits to seek work with any but their present or former employer.

Reinstatement Rights

The volume of labour turnover as indicated in the large numbers of separation notices and applications for employment filed at the offices has made it unnecessary for Selective Service officers to induce many transfers with the promise of a right to reinstatement. From March 23, 1942, to January 7, 1943, there were only 725 such cases, 3 in the Maritime Region, 21 in Quebec, 669 in Ontario, 30 in the Prairie Region and 2 in the Pacific Region. The Ontario cases were chiefly gold miners being transferred to the International Nickel Company.

Restricted Occupations

Order in Council P.C. 2250 which established the schedule of restricted occupations was repealed on June 17, 1942, and has been replaced by a very much more comprehensive labour priority schedule prepared and revised in collaboration with the Department of Munitions and Supply and the Wartime Prices and Trade Board. Substantially all the "restricted occupations" are in the lowest or "no labour priority" classification. Suitable applicants are referred to available vacancies having the highest labour priority.

Vocational Training

The numbers given training directly through the vocational and plant school classes of the Dominion-Provincial War Emergency Training Program totalled 87,211 from April 1 through December 31, 1942, as set forth in the following table:

Nature of Training	Total Numbers Enrolled from Commencement of Program to December 31, 1942	Numbers Enrolled during period April 1, 1942 to December 31, 1942
Pre-Employment Industrial Classes:		
Men..	65,894	17,178
Women..	19,446	13,523
Part-time Industrial Classes:		
Men..	15,041	13,249
Women..	2,628	2,545
Rehabilitation Classes for Discharged Soldiers.	875	875
Plant Schools:		
Men..	3,882	3,882
Women..	3,154	3,154
Classes for Members of the Armed Forces.. . .	62,855	32,805
Total Enrollees, all Classes..	173,775	87,211

The Department is promoting, and in special cases helping to finance, training within industry by plant schools and otherwise. Except with respect to plant schools, no satisfactory statistics have been obtainable on this phase of the work because of the difficulty in establishing a precise and uniformly applicable definition of what constitutes "training" as distinct from the unavoidable "breaking in" of new employees. One sample enquiry, however, supports the belief that the number given special training in industry approximately equals the number trained in the vocational school classes of the War Emergency Training Program.

Training in Personnel Management

As of January 18, 1943, 240 persons had completed and 271 were still attending the courses in Personnel Management sponsored by the Department of Labour, as set forth below:

Completed Courses	
University of British Columbia.. . . .	44
McGill University.. . . .	43
Queen's University:	
1st course.. . . .	44
2nd course.. . . .	23
University of Toronto (day course)..	86
Attendance at Completed Courses..	240
Courses Being Conducted	
Dalhousie University.. . . .	51
University of Manitoba—evening..	30
McMaster University.. . . .	64
University of Toronto—2 courses evening.. . . .	126
Attendance at Uncompleted Courses..	271
Total Attendance—All Courses.. . .	511

Number of Technicians Transferred to War Industry and Wartime Bureau of Technical Personnel

The number of technicians transferred to war industries from April 1 to December 31, 1942, as measured by the number of permits issued was 3,076. During that period the Bureau interviewed 7,461 persons, received back 11,064 questionnaires and application forms and referred 6,374 records to employers for consideration.

Because of a growing shortage of chemists, engineers and other technically trained personnel, the Wartime Bureau of Technical Personnel was established under authority of Order in Council P.C. 780 dated February 12, 1941, in co-operation with the Engineering Institute of Canada, the Canadian Institute

of Mining and Metallurgy and the Canadian Institute of Chemistry, to organize the effective placement of such personnel in war industries and to co-operate with the Civil Service Commission in arranging for their placement in Government Service. Mr. E. M. Little was named Director of the Bureau, which was guided by an Advisory Board consisting of representatives of the Institutes named above, the Canadian Manufacturers' Association, Canadian universities and provincial professional associations. The Bureau circulated enquiries to industrial organizations and Government departments about their needs for additional technical personnel and, starting with the records of those who had registered as engineers, architects or chemists at the time of the National Registration, conducted a registration of such personnel and eventually extended the registration to include all graduates in pure science. The records so obtained have been classified and cross-indexed and, when requests are received from prospective employers, the names of persons with appropriate qualifications are referred for consideration.

The work of the Bureau was greatly facilitated by Order in Council P.C. 638 of March 4, 1942, which provided that scientific and technical personnel could not be employed otherwise than through or with the approval of the Bureau on behalf of the Minister of Labour, made notice to the Bureau compulsory if the employment of such person was terminated, and provided that at the request of the Minister any employer would be required to release any such person if he were willing to accept more essential employment and gave to such persons who accepted more essential employment at the request of the Minister the same reinstatement privileges as are extended to the members of His Majesty's Forces.

In the early months of the Bureau's work considerable time was devoted to the extension to the mining, public utility, petroleum and textile industries of the plan developed by the pulp and paper industry for plant training, the lending of skilled workers to war industries, the development of sub-contracting and assistance in training for the maintenance of military equipment.

Close liaison was maintained with the three branches of the Armed Services in regard to meeting their needs for technical officers.

Close co-operation was established with the Canadian universities, in the consideration of such problems as the granting of financial aid to suitable students in need of such assistance, the promotion of summer employment of undergraduates in work which would contribute to their professional advancement, and the manner in which members of graduating

classes could be most usefully employed either in the Armed Forces or in essential war industries. The universities co-operated also in the registration of all new technical graduates.

Appeals under National Selective Service Regulations

One hundred and sixty-five appeals from decisions of National Selective Service officers were taken to National War Services Boards from April 1, 1942, to January 7, 1943: 1 in the Maritime Region, 18 in Quebec, 45 in Ontario, 75 in the Prairie Region and 26 in the Pacific Region.

Of the 26 in the Pacific Region 10 were withdrawn, 4 disallowed, 11 allowed and 1 is still pending. Particulars of the disposition in the other regions are not yet available.

Of 90 cases in which the subject matter of the appeal has been reported, 40 had to do with refusals to issue permits to seek employment of the kind desired by the applicant, 33 with decisions about suspensions for misconduct, 13 with the requirement of seven days' notice of separation and 4 with revocation of permits.

The system of appeals to National War Services Boards did not prove entirely satisfactory as these boards were constituted for a quite different purpose. P.C. 246 of January 19, 1943, now directs such appeals to Courts of Referees under the Unemployment Insurance Act. These Courts are representative of both workers and employers, with an impartial chairman, and it is felt that these Courts are in a better position to deal with appeals under the National Selective Service Civilian Regulations.

Labour Supply Branch Formed

ANNOUNCEMENT was made on February 8 that the Minister of Labour has approved of the formation of a Labour Supply Branch within the Department. Plans for the branch were recently presented to the Minister by Mr. C. F. Needham, Associate Director of National Selective Service, Civilian, who drew up the plan in consultation with the Civil Service Commission. The branch will be under the direct control of Mr. Needham, and will centralize within the Department the formation of policies on labour supply and employment.

The new branch will recommend policies and procedure to be adopted to assist in meeting labour shortages, and for the even distribution of labour among industries and among districts. It will work in co-operation with the Wartime Prices and Trade Board, the Department of Munitions and Supply, and other departments of Government, in connection with several phases of labour supply and transfer. These will include labour priorities; the curtailment of non-essential industries so that manpower may be available elsewhere; the replacement of men in industry by women;

and more complete utilization of the skill of workers already employed in plants.

It is proposed that through this branch the Labour Department will organize manpower advisory committees in industries where serious labour problems arise. The policies devised by the branch will be carried into effect through the Employment and Selective Service offices across Canada. While the new branch will base its duties upon registration data and statistics from a variety of sources, this information will mainly be secured through other branches of the Labour Department.

"Employment conditions which we are faced with for 1943", Mr. Arthur MacNamara, Director of National Selective Service stated, "make it imperative that we should centralize in a single branch matters of policy and planning in connection with labour supply. The new Labour Supply Branch, acting as a co-ordinating agency in regard to these matters, will make for better planning and distribution of manpower and womanpower available for our industries."

The Minister of Labour later announced the establishment of an agricultural division of the Labour Supply Branch.

Selective Service Offices Enlist Women for Armed Services

HON. Humphrey Mitchell, Minister of Labour, announced recently that late in February the local Employment and Selective Service Offices across Canada will be equipped to interview girls who are prospects for enlistment with the women's branches of the armed forces. This action is being taken at the request of the Ministers of National Defence as part of a program for enlisting women. At

the present time officers of the Defence Departments and of the Labour Department and National Selective Service are working out a scheme to meet the situation.

Training schools will be operated at nine points across Canada, in order to train members of the staff of the Employment and Selective Service Offices to carry out their new duties.

Mrs. Rex Eaton, Associate Director in charge of the Women's Division of National Selective Service, has been requested by A. MacNamara, Director, to devote considerable of her time and attention to the organization of a drive for suitable volunteers for the Canadian Women's Army Corps, the Women's Division of the R.C.A.F., and the Women's Royal Canadian Naval Service, in co-operation with the recruiting divisions of the three branches of the Armed Forces.

The Minister pointed out that there are unemployed women in various parts of Canada, particularly in those districts where it has not been possible to develop war production. To the extent that women can be used to carry on non-combatant work in the armed forces, men will be released for more active duties. By developing this movement to the fullest possible extent, the Minister stated, the shortage of medically fit men available for fighting duties will be improved. Therefore it has been felt that as this recruiting is part of the manpower problem, the employment offices should be fully informed in regard to the need of women for the services, and should be able to discuss terms of enlistment with, and give information to, any woman or girl interested in enlisting.

The Minister pointed out that the recruitment of women in the armed forces is on a

voluntary basis. The process of actually enlisting women will still be handled by the Women's Services themselves, and not by the Employment and Selective Service Offices, but it is hoped that with the employment offices acting as information bureaus, the opportunity offered to girls to join the forces will be much more widely understood and appreciated. Mr. Mitchell added: "In all the larger employment offices it will be women who will discuss enlistment with any of the girls visiting those offices, who may appear to be interested. It is to be emphasized further that the women officials who will handle this matter in the employment offices will all be civilian officials."

The date when the employment offices will be prepared to undertake their new duties was announced to be February 22.

The addition of interviewing women for the armed forces to the work of Selective Service still further broadens the duties of the local offices. Duties already assigned to them include unemployment insurance work, employment placement, issue of selective service permits and enforcement of Selective Service Regulations, control of advertising for labour, administration of re-instatement in civil employment of ex-members of the forces, and transfers of labour.

Placement of Science and Engineering Students

MR. Arthur MacNamara, Director of National Selective Service, announced on February 5 that the Wartime Bureau of Technical Personnel, operated by Selective Service, is compiling a list of the opportunities to place university science students and engineering undergraduates in essential employment during next summer. Part of this list will soon be sent to all universities in Canada.

"It is very important", Mr. MacNamara stated, "that these students undertake work

during the summer holidays, in which war production will receive the benefit of the training the students have already had. At the same time the types of work offered will further their technical training in most cases".

The Director pointed out that university undergraduates must be in possession of National Selective Service permits to legally seek summer employment. These permits to obtain essential work will be available on applying at the nearest National Selective Service Office.

Definition of 'Person Employed in Agriculture'

An Order in Council, P.C. 455 of January 19, 1943, amending the National Selective Service Mobilization Regulations¹, defined employment in agriculture as follows:—

'person employed in agriculture' means a person who, on the twenty-third day of March, nineteen hundred and forty-two, was wholly or mainly employed or occupied in agriculture and includes any person who, on the said day, was employed or occupied on seasonal work in a primary industry and whose last employment

or occupation immediately prior to such employment or occupation in a primary industry was wholly or mainly in agriculture, but does not include any such person who, since the first day of December, nineteen hundred and forty-two, has been employed or occupied outside agriculture unless seasonally or temporarily employed or occupied outside an urban municipality for not more than sixty days in any year when such employment or occupation does not interfere with agricultural production or unless employed or occupied outside agriculture pursuant to a permit from a National Selective Service Officer.

¹ P.C. 10924, Dec. 1, 1942.

Farm Labour Policy for 1943

Program for Supplying Labour to the Farms Announced by Minister of Labour

A NATIONAL farm labour program for 1943 was outlined by the Minister of Labour, Honourable Humphrey Mitchell, in the House of Commons on February 26.

The plan re-emphasizes the Government's established policy of keeping essential labour on the farms. It also provides for the release of men and women suitable for farm work from non-essential industry and the direction of military rejects to agriculture. It calls for co-operation by Dominion and Provincial authorities in furnishing labour for farm work and for organized effort by local committees to meet production goals. The most efficient use will be made of existing supplies of manpower, and workers will be moved from low productive farms to more productive farms.

The eleven-point program outlined by the Minister of Labour is as follows:

1. Stabilizing employment in agriculture.—

Under P.C. 246, January 19, 1943 (L. G. Jan. 1943, p. 16) no person employed in agriculture shall accept other employment except,

(a) Active service in the armed forces, or

(b) Temporary employment not exceeding sixty days in any calendar year outside an urban municipality, but not for a longer time unless a permit has been obtained from an employment and selective service office. All employment offices have been instructed that permits should not be given to those who are essential to agriculture. Provision has been made to allow for the seasonal employment of agricultural workers in logging, lumbering, mining, and fishing, when they can be spared from the farms.

Under the mobilization regulations farmers and farm workers applying for postponement of military service shall be granted such postponement until further notice unless it is established to the satisfaction of the board that they are not essential to agriculture.

An interpretative letter was sent on February 1 to the Chairman of each Mobilization Board to ensure greater uniformity in the application of the Mobilization Regulations and to emphasize the importance of retaining manpower in agriculture. This letter stressed that postponements be granted until further notice to essential agricultural workers and outlined the following policy in regard to agricultural farm workers:

(1) An agricultural worker is, of course, free to volunteer for active service.

(2) It is the intention of the regulations that agricultural workers are to be retained in agricultural employment as far as prac-

tical through the National Selective Service Civilian Regulations. To the extent that their services can be spared from the farms during the "off crop" season they are to be encouraged to take temporary seasonal employment in lumbering and logging, forestry, fishing, coal and base metal mining, and acceptance of seasonal work in such industries does not deprive men of their right to postponement as agricultural workers providing they return to farm work when the season re-opens.

(3) Agricultural workers are to be discouraged from taking employment outside agriculture except in the primary industries indicated above. If they leave agriculture without a permit from a National Selective Service Officer contrary to the regulations they, of course, lose any special rights to claim deferment as agricultural workers.

(4) Farm workers who apply for postponement from military training are to be granted postponement until further notice, unless it is established that the applicant is not an essential worker in agriculture. The regulations, it should be noted, do not require the farmer to produce proof that he is an essential farm worker. If the Board doubts that a man is an essential farm worker, even though postponement until further notice is given, it can always exercise the right to deny postponement by calling such a man before the Board when established facts are presented.

(5) If a worker who upon receipt of Order—*Medical Examination* claims to be an agricultural worker but is not considered by the Board to be essential to the operation of a specific farm, the question then arises as to whether or not he is essential to agriculture in the district. If agricultural labour is needed in the district, he should be given an opportunity to place himself in a position where his services would be essential to agriculture on some other farm; or in the alternative to increase the production of a specific farm. The Board could give a deferment for three months instead of "granting postponement until further notice" in order to give the man an opportunity of finding essential work.

(6) A person who may not have been employed in agriculture on March 23, 1942, but who has become engaged in agriculture since that time, and is shown to be essential to agriculture, may be considered for

postponement on application if the merits of the case are established.

(7) Conscientious objectors including Doukhobors, Mennonites, and others who receive postponement of military training until further notice and are agricultural workers should not be directed to report for alternative service so long as they are employed in essential work in agriculture.

(8) Application for leave should be invited from agricultural workers engaged in alternative service, and such applications should be given favourable consideration.

2. Dominion-Provincial co-operative farm labour activity.—The Minister referred to the farm labour agreements between Dominion and Provincial Governments.

In Ontario, with the Dominion sharing equally in the costs, a Farm Service Force was recruited for farm work, made up of students, school teachers, and men and women from urban centres during vacation and spare hours. (L. G. Jan. 1943, p. 40.)

Under this arrangement, the Minister declared, "fifty thousand workers were made available for farmers who otherwise would not have gone near a farm."

In Nova Scotia, assistance in fruit picking operations in the Annapolis Valley was provided.

Agreements were made with each of the three Prairie Provinces to provide financial assistance for the recruiting, transporting and placement of emergency help for harvesting operations.

In British Columbia, the financial assistance was used in carrying out special measures to meet the labour requirements for fruit picking.

"This Dominion-Provincial co-operative plan," the Minister said, "will be expanded and further developed this year in all provinces. Already conferences to this end have been conducted. Suggestions have been made that we develop a woman's land army—well, you see we have had three years of successful experience with a much broader scheme in Ontario and to a lesser degree in other provinces.

"This year we will exceed our 50,000 individuals of 1942 in Ontario and do equally well in other provinces."

3. Return of workers to agriculture from seasonal employment.—Arrangements through the Employment and Selective Service Offices are planned and will go into effect to ensure that farmers and farm workers engaged in seasonal employment in logging, lumbering

and other seasonal work return to agriculture in time for spring work. These men were encouraged to leave agriculture during the winter, when they could be spared, on the understanding that they would go back to the farms in the spring.

There are some 175,000 men who were moved from farms for winter work who must return to agriculture, otherwise they will lose their rights to postponement under the Mobilization Regulations.

The Employment Offices will not issue permits to them for work in any other industry.

Positive assurance therefore exists that this large body of men will be available for 1943 farm work.

4. Recruitment of farm labour from existing sources.—The following existing pools of manpower will be tapped:

- (a) *Prisoners of war*—The Labour Department will explore the possible use of prisoners of war on farms and will assume the responsibility for this activity.
- (b) *Japanese in Canada*—Already representatives of the sugar beet growers of Alberta and Ontario have representatives in the Japanese towns in British Columbia negotiating for Japanese labour. We used these men successfully in Alberta, Manitoba, and to a lesser degree, in Ontario last year. In 1943 we expect still greater success.
- (c) *Indians on reserves*—Treaty Indians from the Reserves will be used on farms. This was tried out last fall and proved satisfactory and will be further developed this year.
- (d) *Other sources*—Other sources of potential farm manpower will be explored. These include recruitment and training of women for driving farm equipment; use of civilian internees; use of men discharged from the armed forces and numerous others.

5. Release of manpower from industries.—A survey will be made, and based on same, industries which can do so without impairing the war effort will be required to release men and women suitable for farm work. This may mean that during the rush seasons some industries may be closed temporarily.

6. Direction to agriculture of persons unfit for military service.—The authority provided under National Selective Service Regulations will be used to direct to agriculture unmarried men who are called for military service and are found to be unfit and who in the opinion of the National Selective

Service Officer are suitable for farm work. These men will be directed to productive farms where labour is needed.

The Government will pay transportation and if found necessary will make an initial allowance for work clothing. Furthermore, the Department will see to it that the men are paid promptly.

7. Mobility of labour.—To provide absolute mobility of farm labour so that manpower may be moved from areas where work is completed to other areas where needed, the Dominion Government will provide transportation when the movement is from one province to another and will share expenditure within the province with the Provincial Governments. This will permit of organization of farm labour excursions and similar arrangements.

8. Local agricultural war committees.—Local agricultural war committees in counties, townships, parishes and municipalities have already been established by several of the provinces to promote organized effort in local communities to meet 1943 farm production goals. Other provinces have this same plan under consideration. Such committees can assist greatly in carrying out the details of the Farm Labour Program.

The committees would be asked to perform the following functions:—

- (a) To encourage within the local area the best use of existing farm manpower through the efficient planning and management of farm operations, farmers working together where practical, the sharing of labour, and the co-operative use of farm machinery.
- (b) To determine seasonal and full time farm labour requirements in the community.
- (c) To encourage the transfer of labour from low to high productive farms and to work with Provincial agricultural representatives, other Provincial field men, and local Employment and Selective Service Officers in facilitating the placement on the most productive farms of workers brought in from other sources.
- (d) To assist Provincial field men and employment officers in recruiting farmers and farm workers who can be spared from agriculture during the slack seasons for work in other essential primary industries.
- (e) Supplying information regarding the essentiality, or otherwise, of farm workers whose cases are under consideration

by the Mobilization Boards when requested to do so. The local committees could be of assistance by reporting the facts regarding men who have not made themselves essential to agriculture by increasing production on the farm where they are working or by moving to a farm where their services are required. They could also report men who are unwilling to undertake essential seasonal work elsewhere when they can be spared from agriculture. Such reports will be made available to National Selective Service officials, the representatives of National Defence and Agriculture, appearing before the Mobilization Board and taken in conjunction with reports received from Recruiting Committees and other sources will enable the Board to reach a decision based on the facts.

9. Movement of workers from low productive farms.—Encouragement will be given to those at present on low productive farms to move to more productive farms. Each province will be requested to explore this possibility and to develop detailed plans which will best fit the local necessities.

10. Experienced farmers will be used to advise.—The advice of experienced farmers will be obtained as follows:—

- (a) Qualified men with agricultural experience will be appointed to the employment staff of each region and where necessary within individual provinces.
- (b) An Agricultural Division of the Labour Supply Branch has been established. On its staff are men experienced in agriculture.
- (c) A close contact will be maintained between this Agricultural Division and the Federal and Provincial Departments of Agriculture.
- (d) An outstanding farmer who is a member of the Canadian Federation of Agriculture has been added to the National Selective Service Advisory Board.

11. Discussion of program with Provincial Authorities.—This program will be sent at once to each Provincial Department of Agriculture and Labour and will be followed by detailed discussions in each province between their respective officials and representatives of the Department of Labour.

In reply to a question, the Minister stated that the Department of Labour was giving attention to the utilization of conscientious objectors on the farms.

Government Control of Manpower Extended in United States

Measures Aimed at Directing Workers into Most Useful Employment— Forty-Eight Hour Minimum Work Week

EARLY in February three sets of regulations were brought into effect in the United States, all aimed at making the most efficient use of available manpower.

(1) Physically fit workers in certain non-essential industries were directed to find employment in war work or face loss of deferment in the draft, regardless of their number of dependents.

(2) Government control of employment was instituted in certain areas of labour shortage.

(3) A minimum work week of forty-eight hours was ordered for critical labour shortage regions.

Transfer from Non-Essential to War Work

Workers in non-essential occupations in the United States were notified on February 3 that they might expect no further draft deferments, regardless of their number of dependents, unless they found more essential jobs.

Under the terms of the order, physically fit male workers in twenty-nine specified occupations and thirty-six industries were given until April 1 to undertake more vital work or face induction into the armed forces.

Mr. Paul V. McNutt, Chairman of the War Manpower Commission, stated that more and more non-essential activities would have to be curtailed as war production required more raw materials, labour, transportation facilities, electric power, plant facilities, fuel, public services, and the like.

Workers affected by the order were advised to consult with United States Employment Service offices for employment in war jobs. They were instructed not to go to overcrowded defense centres unless jobs had definitely been arranged for them.

"By the end of this year", Mr. McNutt said, "ten out of every fourteen of the able-bodied men between 18 and 38 will be in the armed services." The War Manpower Commission estimated that of 22,154,000 men in this age group, fourteen or fifteen million could pass present military physical requirements.

Control of Hiring

Mr. McNutt announced on February 4 that the War Manpower Commission would take control of the hiring of labour in thirty-two specified areas throughout the country, classified as "critical labour shortage areas".

Under the new system the Manpower Commission, or agencies approved by it, would furnish workers to employers on a priority system, based on the importance of the employer to the war effort. With certain minor exceptions no employment in the shortage areas could be undertaken without the Commission's supervision and approval.

It was stated that "the programs will be operated in a democratic way, with full regard to local conditions and with the advice of local leaders of management and labour."

The hiring agencies were directed to do these things:

1. Refer workers to jobs which "will use their skill most effectively in the war effort."
2. Accord priority to employers engaged in essential activities in the order of the urgency of their activities.
3. Place workers in jobs on the basis of their qualifications and without discrimination as to race, colour, creed, sex, national origin, or, except as required by law, citizenship.

These employment control regulations were issued by Mr. McNutt under the authority of an executive order signed by President Roosevelt on December 5 giving to the Chairman of the War Manpower Commission various general controls over manpower both for military and for industrial needs (LABOUR GAZETTE, December, 1942, p. 1415). They were expected to supersede the Commission's plan for voluntary employment stabilization, which had been in operation in a number of areas of labour shortage.

This plan had been put into effect in such areas with the approval of representatives of management and labour. It provided for the utilization of United States Employment Service agencies in the hiring of workers. No employer might hire a worker covered by the plan unless he had a certificate of release from his previous employer, obtained through the Government employment agency.

Employers were forbidden to advertise for workers unless the advertisement contained a clause stating that no person working in a war production plant need apply. They might not advertise, recruit or scout for workers outside their area without clearance from the Government Employment Service, and agreed to make maximum use of local labour, including women, minority groups and other groups not ordinarily employed, as well as workers from non-essential industries.

Forty-Eight Hour Week

A minimum wartime work week of forty-eight hours was decreed in the United States by an executive order signed by President Roosevelt on February 10.

The order stated that "for the duration of the war, no plants, factories or other places of employment shall be deemed to be making the most effective utilization of its manpower if the minimum week therein is less than forty-eight hours per week."

It was specified that the Fair Labour Standards Act of June 25, 1938 (LABOUR GAZETTE, 1938, p. 719) was not affected by the order, so that time and one-half was to be paid for all hours worked in excess of forty per week in industries covered by the Act. The order provided expressly, however, that no change is made by it in any collective bargaining agreement as to the rate of overtime pay.

The Chairman of the War Manpower Commission was directed to issue regulations to effectuate the statement of policy contained in the order. He was authorized also to establish a minimum work week greater or less than forty-eight hours in cases where such action

would expedite production. In the case of a plant that claims the forty-eight hour minimum is impossible of application, the employer must seek specific permission from the Commission.

Mr. McNutt announced that the order would be applied at first only to thirty-two "labour shortage" areas listed by him. In those areas it would apply to all employment, and would be mandatory rather than merely a statement of policy. Employers would, however, receive time to attain a forty-eight hour week gradually over a period of several weeks. Employers would be expected to prepare schedules of release showing how they proposed to release workers whose services they would now be able to dispense with. These workers would be placed in other war jobs.

Employers who failed to comply with the regulations would be unable to get new workers from the lists of the United States Employment Service, through whom most hiring now has to be done in critical labour areas.

The Office of Price Administration would determine whether increased labour costs resulting from the order warranted price adjustments.

Plan of U.S. Railroad Union to Conserve Manpower

Brotherhood of Railroad Trainmen Undertakes Emergency Placement Program to Relieve Temporary Manpower Shortages

A plan designed to make the most efficient use of available manpower on United States railroads is being worked out by the Brotherhood of Railroad Trainmen. The plan will apply to the type of situation where one road is suffering from a temporary shortage of workers at the very moment when another road may have a number of its employees temporarily idle. It will permit workers who are idle for several days because of traffic slumps on their own roads to take day-to-day jobs on other roads that need additional manpower. Details of the program are being carefully worked out so as to preserve the rights of employees on the roads concerned.

The plan is described in the following article reprinted from the January, 1943, issue of *The Railroad Trainman*:—

Unemployment Registry Plan

The Brotherhood of Railroad Trainmen is undertaking an emergency placement program which will unquestionably relieve the manpower shortage in yardmen and yard service employees on the nation's railroads. It centres about a plan to utilize every potential man-

hour of trainmen labour, so that workers who are idle for several days because of traffic slumps on their own roads will be permitted to take day-to-day jobs on other roads that need additional manpower.

The program is being worked out carefully so that the rights of employees, both on the roads which employ temporary manpower and also on those which give the lay-off, are not prejudiced. It will be employed first within the Chicago Switching District, where the plan was developed, but will be extended wherever possible to other railroad centres.

The idea was born out of President A. F. Whitney's suggestion that a temporary job registry should be set up in Chicago to relieve the desperate manpower situation that was holding up movement of war goods. Railroad management had been pointing out that lack of yardmen and yard servicemen was creating a slow-up. President Whitney's survey of the Chicago problem revealed that at the very time that many roads were crying for additional yardmen, other roads within the Chicago Switching District were laying off yardmen because their traffic had hit off-peak periods.

President Whitney suggested that a plan should be formulated to permit roads to employ these idle trainmen on a temporary basis, and at the same time to preserve the rights of all other Brotherhood men on the roads concerned.

12-Rule Program

The Association of Local Chairmen of the Chicago Switching District undertook to work out the plan which is now to be put into operation. The Association made a painstaking analysis of the problems involved and laid down a 12-Rule Program which will succeed in eliminating any chance of prejudice to any employee involved.

The entire program, which depends upon the individual co-operation of all trainmen for success, in substance provides:—

- (1) Establishment of a Central Bureau to register all idle men engaged in yard service and yardmen.
- (2) Railroads needing men will advise the Central Bureau of the number, starting-time and job-location of each vacancy to be filled.
- (3) Trainmen will be required to protect the vacancies in the same manner as though called to fill vacancies on their home lines.
- (4) Trainmen will be governed by the wage and working agreements of the line to which they are furnished.
- (5) Trainmen will not be furnished or assigned on a foreign railroad for any fixed number of days, but will be employed on a day-to-day basis.
- (6) Trainmen thus temporarily employed shall continue to accrue seniority on their home railroads, but shall not accumulate any seniority on foreign railroads.
- (7) No co-operating railroad shall call on the Central Bureau for Trainmen until all available trainmen on its property have been engaged.

Other sections of the proposal relate to the protection of existing agreements and rules on the railroads which co-operate to use the Central Bureau. The entire plan will be subject to cancellation upon 30 days' notice

upon the part either of the railroads or the Brotherhood.

There will be two principal benefits to the trainmen who co-operate to make the plan successful:—

They will be able to augment their earnings at a time when the cost of living has risen abruptly and will be better able to participate in the War Bond purchasing program which the Brotherhood has set for itself.

They will be able to keep the field of employment levelled off, in view of the current demand for additional train and yard service employees, so that their contracts will be protected when normal movements are resumed, once the war is over.

Demand for New Employees

Bulletins released by the Office of Defence Transportation indicate that some 450,000 new railroad employees will be needed to handle the railroad traffic for 1943. Advertising and the recall of thousands of retired railroad workers have not yet been able to cope with this demand. The plan will ease the pressure and assure that no vital war traffic will be delayed for lack of adequate manpower.

The Brotherhood urges all trainmen to co-operate fully with their Central Bureau, whenever the plan is extended to their own railroads. As a matter of self-protection, trainmen should stop to consider the effect of releasing an additional 450,000 new railroad workers, once the war emergency is over. They can best conserve the strength and security of their respective wage and working agreements, if they do all in their power to shoulder the new burden of extra work that has fallen on the shoulders of all American workers.

The plan is a test of patriotism, and the Brotherhood of Railroad Trainmen, which has sponsored the wartime temporary job program, knows that its members will make it a success.

Australian Action Against Absentees

HUNDREDS of workers in Sydney, Australia, who absented themselves from their jobs in war production on New Year's Day in spite of the Federal Government's order that the day should be observed as an ordinary working day, were summoned to appear in special courts.

Australia's National Security Regulations provide for fines up to £100, or six months' imprisonment, or both, for absence from employment except in the case of illness or incapacity, customary leave of absence, attendance to union business, or a domestic or other pressing emergency.

The rule applies to employers as well as

to employees; and summonses were issued against a number of employers, managers and other persons holding executive positions, as well as against employees.

Most of the men who were convicted were bound over in a bond of £20 to observe the Regulations, in default 14 days' imprisonment. The magistrate declared that a pecuniary fine would result in a "tarpaulin muster"; and that if imprisonment were ordered this would retard production, besides, in his opinion, being unjust, because only a minority of the absentees were being charged. He therefore thought that the situation could best be met by binding the defendants over.

Industrial Disputes and Conciliation

Introduction

THE *Industrial Disputes and Conciliation* section contains monthly articles dealing with Recent Proceedings under the Industrial Disputes Investigation Act, Conciliation Work of the Department of Labour, and Strikes and Lockouts in Canada, Great Britain and other countries.

Recent Proceedings under the Industrial Disputes Investigation Act.—This article gives an account of all applications for Boards of Conciliation and Investigation, and the disposition of these applications. In cases where Boards are established, the *LABOUR GAZETTE* publishes in due course the full text of their Reports, as submitted to the Minister of Labour.

Since the outbreak of war and the extension of the Industrial Disputes Investigation Act to cover disputes in war industries, the number of applications for Boards of Conciliation and Investigation has greatly increased. In recent months the majority of applications for Boards have been referred to Industrial Disputes Inquiry Commissioners for preliminary investigation, to determine whether the circumstances warrant the establishment of a Board. Reports of Commissioners appointed under the Act are summarized in this article.

Industrial disputes which concern wage demands are now administered by the National War Labour Board.

Conciliation Work of the Department of Labour.—Conciliation proceedings are carried

on by the Department of Labour for the most part under the provisions of the Conciliation and Labour Act which empowers the Minister to inquire into the causes and circumstances of a dispute, to take such steps as seem expedient for the purposes of bringing the parties together, and to appoint a conciliator or an arbitrator when requested by the parties concerned. In some disputes occurring in industries coming directly under the Industrial Disputes Investigation Act, namely, mines and public utilities, and war work, preliminary inquiries and mediation by officers of the Department result in the settlement of the matters in dispute without the necessity of the establishment of Boards of Conciliation and Investigation.

Strikes and Lockouts.—The latest information concerning strikes and lockouts in Canada is published month by month in tabular form, with a summary appearing once a year. The summary of strikes and lockouts in Canada and other countries during 1941 appeared in the *LABOUR GAZETTE* for May, 1942.

The latest available information as to strikes and lockouts in Great Britain and other countries appear from month to month.

Dispute in Steel Industry.—This month the *LABOUR GAZETTE* publishes an account of the settlement of the industrial dispute affecting steel workers at Sault Ste. Marie, Ontario, Sydney and Trenton, Nova Scotia.

Steel Workers' Industrial Dispute

Conference of Government, Employers and Employees in Ottawa— Terms of Settlement

THE January issue of the *LABOUR GAZETTE* contained on page 53 an account of the background of the industrial dispute affecting steel workers at Sault Ste. Marie, Ontario, and Sydney, Nova Scotia, together with the majority and minority reports of the Royal Commission appointed to report as to wage rates of employees in these companies. The majority report of the Commission recommended that with certain exceptions basic wage rates in the steel companies should remain unchanged.

The minority report recommended that the basic wage rate be raised to 55 cents an hour, and that steel be declared a national industry.

Copies of the majority and minority reports of the Commission were transmitted to the interested parties on January 9, 1943. On January 12, 5,200 employees of Dominion Steel and Coal Corporation, Sydney, N.S., went on strike for increases in basic wage rates, as recommended in the minority report of the Royal Commission. On January 14, 3,786

employees of Algoma Steel Corporation in Sault Ste. Marie went on strike for the same reason. On the same day, 2,675 employees in four plants in Trenton, N.S., went on strike, in sympathy with the other strikers, and demanding that they be recognized as workers in a "basic" steel industry, and for increases in basic wage rates as recommended for Sydney and Sault Ste. Marie steel workers in the minority report. In all the plants the union arranged for maintenance crews to keep machinery in working order.

The Minister of Labour on January 14 advised the interested parties that the Government was prepared to meet representatives of employers and employees in a conference to be held in Ottawa on Saturday, January 16. Due to the inability of some of the representatives to make transportation arrangements, this conference was postponed to Monday, January 18.

Mr. Philip Murray, President of the United Steel Workers of America, was urged in a telegram from the Minister of Labour to intervene in requiring the employees to return to work. Mr. Murray subsequently appointed a commission of three representatives of the steel workers' union to attend the conference in Ottawa, with the other representatives.

Government Proposals

During the course of the conference, the Prime Minister made certain proposals to the steel workers on behalf of the Government. In the event of the steel workers returning immediately to work, the Government would see that immediate effect be given to the majority recommendations of the Royal Commission. The Government would be prepared to recognize basic steel as a national industry; so that if the workers desired to present a new case to the National War Labour Board as belonging to a national industry they would be free to do so.

In accordance with his own suggestion, the Government was prepared to free the Minister of Labour from the duties of Chairman of the National War Labour Board, and to appoint a new Chairman. If the workers desired to present a new submission to the Board, the Board would be convened at the earliest opportunity. Moreover, the Government would immediately pass an order in council fixing 55 cents an hour as a minimum wage in the Sydney and Algoma steel plants, the same wage to apply to those operations in the Trenton plants immediately re-

lated to the production of basic steel. The minimum wage of 55 cents an hour would be understood as including the cost of living bonus. The steel workers at Trenton might apply to the Regional Board to determine how far operations at Trenton were concerned with basic steel.

These terms were rejected by the steel-workers' union officials.

Further conferences were held, however, and on January 22 a basis of settlement was accepted by the union officials. The conditions of settlement were similar to those offered on January 18, with the following exceptions:

The 55 cent basic wage rate, inclusive of cost-of-living bonus, was to be made retro-active to November 1, 1942;

In the event of a reduction in the cost-of-living bonus this basic wage rate would not be reduced, but would be augmented by any increase in the cost-of-living bonus in the future.

Officials of the United Steel Workers of America recommended to the locals at Sydney, Trenton, and Sault Ste. Marie that these terms be accepted. Workers at Sydney and Sault Ste. Marie held mass meetings, and decided to take a vote on January 25 to determine acceptance or rejection of the Government proposals. The vote at Sydney showed a majority in favour of a return to work; at Sault Ste. Marie the majority favoured remaining on strike.

Following announcement of the result of the vote, the workers at Sydney resumed operations, and shortly afterwards officials of the United Steel Workers of America proposed an amalgamation of the votes taken at the two plants, thus giving an overall majority in favour of acceptance of the Government's proposals.

This plan was accepted by the union local at Sault Ste. Marie, whereupon the employees there went back to work.

Steelworkers at Trenton, however, remained on strike until January 30. At meetings on January 24 and 26 the men voted against returning to work until they were officially recognized as "basic" steel workers, and thus assured a base wage equal to that paid workers in the Sydney and Sault Ste. Marie plants. At a mass meeting on January 29, however, the workers voted to suspend their strike for 30 days, meanwhile making application to the National War Labour Board, in accordance with the Prime Minister's proposals.

Text of Order in Council

The text of the Order in Council (P.C. 689, dated January 26), authorizing implementation of the terms of settlement of the dispute is as follows:

Whereas the Minister of Labour reports that it is imperatively necessary that vital steel production which has been interrupted by a dispute at the steel plants in Sydney, Nova Scotia, Sault Ste. Marie, Ontario and Trenton, Nova Scotia, be continued without further interruption;

That the Government and the employees as represented by the United Steel Workers of America have arrived at a satisfactory basis for the settlement of the dispute as set forth in the Memorandum of Understanding dated January 22, 1943, and steel production has been resumed;

That, since the terms of the settlement incorporate the recommendations on which the majority and minority of the Royal Commission on the Steel Industry (Barlow Commission) were agreed and represent a reasonable and equitable adjustment of other matters in dispute, it is advisable formally to ratify them and to authorize the Minister of Labour and the National War Labour Board to implement them.

Therefore, His Excellency the Governor General in Council, on the recommendation of the Minister of Labour, and under authority of the War Measures Act, Chapter 206 of the Revised Statutes of Canada, 1927, and notwithstanding the provisions of any other law, order or regulation, is pleased to authorize and do hereby authorize the Minister of Labour and the National War Labour Board to implement the proposed terms of settlement as set forth in the Memorandum of Understanding dated January 22, 1943, a copy of which is attached hereto.

MEMORANDUM OF UNDERSTANDING WITH RESPECT TO THE SETTLEMENT OF THE DISPUTE IN THE STEEL INDUSTRY OF CANADA

The decision, as clarified, is as follows:

(1) That in the event of the steel workers now on strike returning immediately to work the Government will take immediate steps to implement the majority report of the Barlow Commission, namely:

1. That the management and the maintenance men enter into negotiations and that an application be made to the National War Labour Board for such increased wage rates or range of wage rates with respect to such maintenance men as pipe fitters, steamfitters, mill-wrights, electricians and carpenters as will bring their wage rates on a level with prevailing wage rates paid to maintenance men in such classifications.

2. That time and a half be paid for the seventh consecutive day worked by any employee.

3. That arrangements be made for the making of a careful study having in view a reclassification and an evaluation of jobs.

4. That management-union-employee committees be appointed in the different departments of each company.

The foregoing recommendations were also included in the minority report.

(2) The Government would be prepared to recommend that the Dominion Steel and Coal Corporation in respect of its steel plant at Sydney, Nova Scotia, and the Algoma Steel Corporation in respect of its steel plant at Sault Ste. Marie, Ontario, be designated as national employees.

(3) If, as belonging to a national industry, the steel workers desire to present a new case to the National War Labour Board, they shall be free to do so.

(4) The Minister of Labour desires to be relieved of his duties as Chairman of the National War Labour Board, and therefore any new application by the steel workers will be considered by the National War Labour Board, headed by a Chairman who has not previously had the matter before him.

(5) The Government will undertake to recommend in the event of the steel workers desiring, as members of a national industry, to present a new submission to the National War Labour Board, that the Board be convened at the earliest opportunity.

(6) If the men return to work immediately the Government will immediately pass an order in council fixing 55 cents an hour as a minimum rate of earnings, effective from November 1, 1942, in the Sydney and Algoma Steel plants, the same rate to apply to those operations in the Trenton plant which are involved in the production of basic steel, the minimum rate of earnings of 55 cents an hour to be understood as including the cost of living bonus as of the present date. However, this provision shall not prejudice the right of the employees from making representations in respect to the cost of living bonus to the National War Labour Board and such representations may be considered by the Board on their merits and the Board may make such orders thereon as in its judgment are warranted. However, for the duration of the war, should the cost of living bonus be reduced the 55 cent minimum earning rate shall not be reduced, but should the cost of living bonus be increased as from the present time the earning rate of 55 cents shall be likewise increased, thus establishing a guaranteed minimum earning rate of 55 cents.

(7) The steel workers at Trenton may apply to the National War Labour Board to determine how far operations at Trenton are to be regarded as basic steel production.

It is understood that the Government will adhere to its price ceiling and wage stabilization policy.

Nothing in these terms of settlement shall decrease the previous earnings of any employee.

Recent Proceedings Under the Industrial Disputes Investigation Act

DURING the month of January, three Boards of Conciliation and Investigation submitted their reports in connection with the following disputes:

(1) Between the London Concrete Machinery Company, Limited, London, Ont., and its employees, members of Local 2740, United Steelworkers of America.

(2) Between Ontario Steel Products Company, Limited, Chatham, Ont., and its employees, members of Local 127, United Automobile Workers of America.

(3) Between the Canada Paper Company, Windsor Mills, P.Q., and its employees, members of the National Catholic Union of Canada Paper Company.

The texts of these board reports follow at the conclusion of this statement.

Applications Received

Fifteen applications* for the establishment of Boards of Conciliation and Investigation under the provisions of the Industrial Disputes Investigation Act were received in the Department of Labour during the month of January. These were:

1. From employees of A. R. Clarke and Company, Toronto, Ont., members of Local 280, International Fur and Leather Workers' Union. The dispute, which concerns the negotiation of a collective agreement, is said to directly affect 275 workers. On January 18, Mr. F. J. Ainsborough, Industrial Relations Officer, Dominion Department of Labour, Toronto, was appointed an Industrial Disputes Inquiry Commissioner to investigate the dispute.

2. From employees of the Davis Leather Company, Limited, Newmarket, Ont., members of Local 290, International Fur and Leather Workers' Union. Some 280 employees are said to be directly affected in the dispute which concerns the negotiation of an agreement. On January 26, Mr. F. J. Ainsborough, Industrial Relations Officer, Dominion Department of Labour, Toronto, Ont., was appointed an Industrial Disputes Inquiry Commissioner to investigate the dispute.

3. From employees of Wallaceburg Brass, Limited, Wallaceburg, Ont., members of Local

251, United Automobile Workers of America. On January 30, Mr. J. P. Nicol, Industrial Relations Officer, Dominion Department of Labour, Toronto, was appointed an Industrial Disputes Inquiry Commissioner to investigate the dispute which is said to directly affect some 550 employees and concerns union recognition.

4. From employees of the Schultz Die Casting Company of Canada, Limited, Wallaceburg, Ont., members of Local 251, United Automobile Workers of America. The dispute concerns union recognition and the negotiation of a collective agreement. Mr. J. P. Nicol, Industrial Relations Officer, Dominion Department of Labour, Toronto, was appointed an Industrial Disputes Inquiry Commissioner on January 30 to investigate the dispute.

5. From employees of the Sangamo Company, Limited, Leaside, Ont., members of the United Electrical, Radio and Machine Workers of America. The dispute which concerns the negotiation of a collective agreement is said to directly affect some 500 employees. On January 26 Mr. J. P. Nicol, Industrial Relations Officer, Dominion Department of Labour, Toronto, was appointed Industrial Disputes Inquiry Commissioner to investigate the dispute.

6. From employees of the Progressive Engineering Works, Limited, Vancouver, B.C., members of Local 1, Moulders and Foundry Workers' Union. Some 35 workers are said to be directly affected by the dispute which concerns the negotiation of a collective agreement. On January 26 Mr. G. R. Currie, Industrial Relations Officer, Dominion Department of Labour, Vancouver, was appointed an Industrial Disputes Inquiry Commissioner to investigate the dispute.

7. From employees of Yarrows Limited, Victoria, B.C., members of Local 324, United Association of Journeymen, Plumbers and Steamfitters of the United States and Canada. Mr. G. R. Currie, Industrial Relations Officer, Dominion Department of Labour, Vancouver, was appointed an Industrial Disputes Inquiry Commissioner to investigate the dispute.

8. From employees of the Wilson Motor Bodies, Limited, Long Branch, Ontario, members of Local 252, United Automobile Workers of America. The dispute which concerns the negotiation of a collective agreement is said to directly affect some 200 employees.

9. From employees of James Hazel and Son, Quebec, P.Q., members of Local 74, International Moulders and Foundry Workers' Union of North America. The dispute arises out of the Company's refusal to recognize

* By P.C. 5963, the National and Regional War Labour Boards are specifically charged with the duty of adjudicating wage demands. Therefore all applications for the establishment of Boards of Conciliation and Investigation in which wages are the sole cause of the dispute are removed from the ambit of the Industrial Disputes Investigation Act and the applicants are referred to their respective War Labour Board.

the union as the bargaining agent of the employees and affects 10 directly and 1 indirectly. On January 30 Dr. Percy A. Robert, Special Representative, Department of Labour, was appointed Industrial Disputes Inquiry Commissioner to investigate the dispute.

10. From employees of the F. X. Drolet Co., Quebec, P.Q., members of Local 74, International Moulders and Foundry Workers Union of North America. The dispute concerns the Company's refusal to recognize the union as the representative or agent of its employees and affects 29 employees directly and 1 indirectly. Dr. Percy A. Robert, Special Representative, Department of Labour, was appointed Industrial Disputes Inquiry Commissioner to investigate the dispute.

11. From employees of the Welland-Vale Manufacturing Company, Limited, Hamilton, Ont., members of Local 2853 United Steelworkers of America. The dispute, which concerns the negotiation of a collective agreement, is said to directly affect 75 employees.

12. From employees of the Aluminum Company of Canada, Kingston, Ont., members of Local 54, International Association of Machinists, United Brotherhood of Carpenters and Joiners, Local 115, International Brotherhood of Electrical Workers, United Association of Plumbers and Steamfitters, Federal Union 23233, A.F. of L., all represented by the Joint Committee of A.F. of L. Unions. The dispute which concerns the recognition of the Joint Council, is said to directly affect 2,600 employees.

13. From employees of the Ford Motor Company of Canada, Limited, Windsor, Ont., members of Local 240, United Automobile Workers of America. Some 1,300 employees are said to be directly affected in the dispute which concerns union recognition and the negotiation of a collective labour agreement.

14. From employees of the Ford Motor Company of Canada, Limited, Windsor, Ont., members of the Ford of Canada Employees' Association. It is stated that 1,300 employees are directly affected in the dispute which concerns the negotiation of a collective labour agreement.

15. From employees of the Davie Shipbuilding and Repairing Company, Limited, Lauzon, P.Q., members of Local No. 3, Canadian Union of Boilermakers and Iron Shipbuilders, Canadian Congress of Labour. The dispute, which concerns the negotiation of a collective agreement, is said to indirectly affect 3,500 employees.

Boards Established

On January 13, a Board of Conciliation and Investigation was established to deal with a dispute between Hull Iron & Steel Foundries,

Limited, Hull, P.Q., and its employees, members of Local 318, International Moulders and Foundry Workers' Union of North America. (LABOUR GAZETTE, Dec. 1942, page 1377.) Following receipt of the application for the establishment of a Board, Mr. J. S. McCullagh, Industrial Relations Officer, Dominion Department of Labour, Ottawa, was appointed an Industrial Disputes Inquiry Commissioner to make an investigation. During November, a vote was taken to determine the bargaining agency of the employees which resulted in favour of the International Moulders and Foundry Workers Union of North America. On January 12, the Commissioner reported that he had been unable to effect a mutually satisfactory agreement of the matters in dispute and recommended the establishment of a board. At the end of the month. Mr. Francois Caron, K.C., Hull, P.Q., and Mr. Drummond Wren, Toronto, Ont., had been appointed members of the board on the nomination of the employer and employees respectively and had been requested to confer respecting the nomination of a person to act as chairman.

On January 13, a Board of Conciliation and Investigation was established to deal with a dispute between Cannery Machinery Limited, Simcoe, Ont., and its employees, members of the United Automobile Workers of America. (LABOUR GAZETTE, Dec. 1942, page 1374.) Following receipt of the application, Mr. F. J. Ainsborough, Industrial Relations Officer, Dominion Department of Labour, Toronto, was appointed an Industrial Disputes Inquiry Commissioner to investigate the dispute. The Commissioner reported that he had been unable to obtain a satisfactory settlement of the matters in dispute and recommended the establishment of a board. The personnel of the board is as follows: His Honour Judge James Parker, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members; Mr. Victor A. Sinclair, K.C., and Mr. Drummond Wren, appointed on the nomination of the employer and employees respectively. All three reside in Toronto.

On January 13, the Minister of Labour established a Board of Conciliation and Investigation to deal with the dispute between Levis Ferry Limited, Levis, P.Q., and its employees, members of the Canadian Brotherhood of Railway Employees and Other Transport Workers. (LABOUR GAZETTE, Jan. 1943, page 70.) In December Mr. Bernard Rose, K.C., Montreal, was authorized to investigate this dispute as an Industrial Disputes Inquiry Commissioner. The Commissioner reported that he had been unable to effect a mutually satisfactory settlement of the dispute and recommended the establishment of a board. The

personnel of the board is as follows: Mr. Andre Montpetit, Montreal, P.Q., chairman, appointed on the joint recommendation of the other two members of the Board, Mr. Paul Lesage; K.C., Quebec, P.Q., and Mr. Guy M. Desaulniers, Montreal, P.Q., appointed on the nomination of the employer and employees respectively.

Other Boards Fully Constituted

The Board of Conciliation and Investigation established by the Minister of Labour on December 22 to deal with a dispute between the Manitoba Rolling Mill Company, Limited, Selkirk, Man., and its employees, members of the Selkirk Rolling Mill employees Federal Union No. 120, (LABOUR GAZETTE, Jan. 1943, page 69), was fully constituted during the month. The personnel of the Board is as follows: Mr. J. W. Morrison, K.C., Master and Referee, Court of King's Bench, chairman, appointed on the joint recommendation of Mr. W. C. Hamilton, K.C., and Mr. C. W. Brock, K.C., respectively. All three reside in Winnipeg.

The constitution of the Board of Conciliation and Investigation established in December to deal with the dispute between George W. Reed and Company, Ltd., Montreal, P.Q., and its employees, Local 2735, United Steelworkers of America, (LABOUR GAZETTE, Jan. 1943, page 69), was completed during January. The personnel of the Board is as follows: Mr. Ayme Lafontaine, K.C., chairman, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members; Messrs. D. A. Paterson and R. L. Calder, K.C., appointed on the nomination of the employer and employees respectively. All three reside in Montreal.

Other Reports of Industrial Disputes Inquiry Commissioners

A report was received from Mr. Bernard Rose, K.C., Montreal, who had been authorized as an Industrial Disputes Inquiry Commissioner to investigate the dispute between Johnson Woolen Mills, Limited, Waterville, P.Q., and certain of its employees (LABOUR GAZETTE, January, 1943, page 70). The Commissioner reported that it had been decided between the parties that recognition should be given the employees of the Company through the establishment of a Committee of Employees, the employees not being members of any union. The Committee would deal with the management in any grievance or complaint that may arise in the future. In view of this apparent settlement, the Commissioner recommended that the application for a Board of Conciliation and Investigation be denied. At the end

of the month, the Department was advised that the settlement reported by the Commissioner was unsatisfactory and Mr. Rose was asked to make a further report on the matter.

On January 11, Mr. J. P. Nicol, Industrial Relations Officer, Dominion Department of Labour, Toronto, made his report as Industrial Disputes Inquiry Commissioner concerning the dispute between the Dominion Glass Company, Limited, Wallaceburg, Ont., and its employees, members of the United Automobile Workers of America (LABOUR GAZETTE, January, 1943, page 68). The Commissioner recommended that a board be not established, as the volume of war work being done by the company was insufficient to warrant the bringing of the dispute under the scope of the Act as extended by P.C. 3495.

Other Disputes Referred to Industrial Disputes Inquiry Commissioners

On January 11, the Minister of Labour appointed Mr. H. S. Johnstone, Industrial Relations Officer, Dominion Department of Labour, Regina, an Industrial Disputes Inquiry Commissioner, to investigate the dispute between Robin Hood Flour Mills Limited, Moose Jaw, Sask., and its employees, members of Local 201, United Packinghouse Workers of America.

On January 25, Prof. J. C. Cameron, Kingston, Ont., was appointed an Industrial Disputes Inquiry Commissioner to investigate a dispute between the Steel Company of Canada, Limited, Hamilton, Ont., and Local 1005, United Steelworkers of America.

Other Disputes Referred to Industrial Relations Officers

On January 9, Mr. J. S. McCullagh, Industrial Relations Officer, Department of Labour, Ottawa, was directed to investigate the dispute between the Hamilton Bridge Company, Limited, Hamilton, Ont., and its employees, members of Local 2537, United Steelworkers of America (LABOUR GAZETTE, January, 1943, page 69).

Settlements

During January, the Department was advised that an agreement had been signed by the Chrysler Corporation of Canada Limited, and its employees, members of Local 127, United Automobile Workers of America, Chatham, Ont. (LABOUR GAZETTE, November, 1942, page 1267). Following the receipt of the report of the Board of Conciliation and Investigation, a representation vote was conducted under the supervision of departmental officials to determine the employees' bargaining agent. The vote resulted in favour of the

local union of the United Automobile Workers of America. The agreement between the Company and the Union is summarized in the article entitled "Recent Industrial Agreements and Schedules of Wages" appearing elsewhere in this issue.

The Department was also advised during the month that an agreement had been signed between Gotfredson, Ltd., Walkerville, Ont., and its employees, members of Local 195, United Automobile Workers of America (LABOUR GAZETTE, November, 1942, page 1248). Following the receipt of the application, Mr. L. Fine, Chief Conciliation Officer of the Ontario Department of Labour was authorized to investigate the dispute as Industrial Disputes Inquiry Commissioner. A ballot of the employees had been taken early in November to determine the employees bargaining agent and resulted in favour of the local union of the United Automobile Workers of America. The agreement between the Company and the Union is summarized in the article entitled "Recent Industrial Agreements and Schedules of Wages" appearing elsewhere in this issue. The application for the establishment of a board was subsequently withdrawn.

The January issue of the LABOUR GAZETTE (page 71) contained the report of the Board of Conciliation and Investigation appointed to deal with the dispute between the Riverside Iron Works Limited, Calgary, Alta., and its employees, members of Local 360, International Moulders and Foundry Workers' Union of North America. At the end of January, the Department was advised that an agreement between the Company and the Union had been signed. A summary of the agreement will be found in the section of this

issue of the LABOUR GAZETTE entitled "Recent Industrial Agreements and Schedules of Wages".

Other Applications Withdrawn

On January 21, the application for the establishment of a Board of Conciliation and Investigation to investigate a dispute between the Montreal Stock Yards Ltd., Montreal, and its employees, members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees (LABOUR GAZETTE, November, 1942, page 1249) was withdrawn.

In the January issue of the LABOUR GAZETTE, page 69, reference was made to the settlement obtained in December in the dispute between Canada Packers, Limited, Toronto, Ont., and its employees, members of Local 114, United Packinghouse Workers of America, and the Toronto Employees' Plant Council. Two applications for the establishment of Boards of Conciliation and Investigation were received, one from each organization, each organization being a party to the applications. On January 13, the Employees' Plant Council of Canada Packers Limited, Toronto, withdrew its application for the establishment of a board.

On January 27, the application for the establishment of a Board of Conciliation and Investigation was withdrawn in the dispute between the Alberta Clay Products Company, Ltd., Medicine Hat, Alta., and its employees, members of the Clay Products Workers' Local Union No. 2 (LABOUR GAZETTE, December, 1942, page 1375). The nature of the dispute indicated that it came under the jurisdiction of provincial conciliation.

Report of Board in Dispute between the London Concrete Machinery Company Limited, London, Ont., and its Employees

A unanimous report was received during the month by the Minister of Labour from the Board of Conciliation and Investigation established to deal with a dispute between the London Concrete Machinery Company Limited, London, Ont., and its employees, members of Local 2740, United Steelworkers of America. (LABOUR GAZETTE, December 1942, page 1375.)

The personnel of the board was as follows: His Honour Judge James Parker, Toronto, Ont., appointed by the Minister of Labour in the absence of a joint recommendation from the other two members; Mr. J. A. E. Braden, K.C., London, Ont., appointed on the nomination of the employer and Prof. G. M. A. Grube, Toronto, Ont., appointed on the nomination of the employees.

The Board's report follows:—

Report of Board

To

The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa.

In the Matter of The Industrial Disputes Investigation Act, and of a dispute between the London Concrete Machinery Company Limited and its employees, members of Local 2740, United Steelworkers of America.

The Board of Conciliation appointed by you to deal with this dispute was constituted as follows: His Honour Judge James Parker, Toronto, Chairman, Mr. J. A. E. Braden, of London, Ont., nominated by the employers, and

Professor G. M. A. Grube, of Toronto, nominated by the employees.

The Board held three meetings at the Court House in London, on December 9th, December 22nd, 1942, and January 15th, 1943, all members of the Board being present.

Present on behalf of the Company were:

Mr. Henry Pocock,
Mr. Claire Pocock, and
Mr. A. H. Murphy, K.C., Counsel for the Company.

The Union was represented by:

Mr. Fred Brimacombe,
Mr. Stanley Barton, and
Mr. Erie Dalrymple, except that Mr. E. B. Joliffe represented the Union at the second meeting of the Board, on December 22nd, as Counsel.

At the first meeting it was stated on behalf of the Union that sufficient notice had not been given of the holding of the meeting to the representatives of the Union and after some discussion it was decided to adjourn the sittings to the 22nd of December, 1942. In the meantime there was a preliminary discussion about the matters in dispute.

On December 22nd, 1942, after discussion between the parties and the Board, the Board decided to take a vote of the employees to determine whether the Union represented the majority of the employees, and the form of the ballot was agreed upon as follows:—

MARK YOUR CHOICE WITH X

Do you wish to be represented in negotiations with the company by the United Steelworkers of America, Local 2740?

OR

Do you wish to be represented in negotiations with the company by the London Concrete Machinery Shop Union?

and both parties expressed their willingness for the chairman to take the vote.

It was subsequently decided that the vote should be held under the auspices of the Department of Labour and Mr. Bernard Wil-

son, Industrial Relations Officer in the Department of Labour, was placed at the disposal of the Chairman in order to arrange the date and other matters in connection with the vote.

The vote was held on January 8th, and the result as communicated to us from Ottawa was as follows:—

Number of eligible voters.....	76
Number of votes cast.....	75
Number of votes in favour of United Steelworkers of America, Local 2740	28
Number of votes in favour of Shop Union	47

At its third meeting on January 15th, 1943, the Board met again with representatives of both parties, when, while not challenging the result of the ballot, Mr. Dalrymple pointed out on behalf of the Union that they had not received notice of the taking of the vote until the time that the notice of election was posted up in the plant, and contended that the notice should have been longer.

With regard to the two grounds for dispute listed in the application for the Board of Conciliation, the Union did not press the second count, namely: the wrongful and discriminatory dismissal of employees because of election to office of Union executive, and the board therefore makes no recommendations in this connection.

On the first ground of complaint, namely: refusal of employer to recognize Local Union 2740, the United Steelworkers of America as collective bargaining agency for its employees or to negotiate with the Union or its representatives, the Board, in view of the result of the ballot quoted above, does not recommend recognition of the Union as a collective bargaining agency for the employees of this plant at the present time.

All of which is respectfully submitted.

Dated this 15th day of January, A.D. 1943.

(Sgd.) J. PARKER, *Chairman.*

(Sgd.) J. A. E. BRADEN, *Member.*

(Sgd.) G. M. A. GRUBE, *Member.*

Report of Board in Dispute between Ontario Steel Products Company Limited, Chatham, Ont., and its Employees

During the month, the Minister of Labour received the report of the Board of Conciliation and Investigation established to deal with a dispute between the Ontario Steel Products Company Limited, Chatham, Ont., and its employees, members of Local 127, United Automobile Workers of America. (LABOUR GAZETTE, December, 1942, page 1376.)

The personnel of the Board was as follows: Honourable Mr. Justice J. G. Gillanders of

the Supreme Court of Ontario, chairman, appointed on the joint recommendation of the other two members; Mr. George C. Richardes, Windsor, Ont., and Mr. Drummond Wren, Toronto, Ont., appointed on the nomination of the employer and employees respectively.

The report of the board is signed by the chairman and Mr. Drummond Wren. Mr. George C. Richardes submitted a minority

report. The texts of the report of the board and the minority report follow:—

Report of Board

The Honourable Humphrey Mitchell,
Minister of Labour,
Ottawa, Ontario.

In the matter of the Industrial Disputes Investigation Act and of a dispute between Ontario Steel Products Company, Limited, (Employer) and its Employees, Members of Local 127, United Automobile Workers of America.

The Board of Conciliation and Investigation established in this matter has held meetings at Chatham and Toronto. At the sittings in Chatham written submissions were filed and read, oral representations made and argument heard on behalf of both parties.

The applicant Union was represented by John Eldon, International Representative of the U.A.W.-C.I.O., Ross Perry, Chairman of Local 127 of the U.A.W.-C.I.O. and an employee of the Company, and Fred Simpson, Treasurer of Local 127 U.A.W.-C.I.O. and an employee of the Company.

The Company was represented by J. A. McNevin, K.C., Counsel, G. G. Hood, President, John Hargraft, Manager of the Chatham plant, and J. R. Guttredger, the Works Manager of the Chatham plant.

In view of the provisions of section 42 of the Act it should be noted that Union representatives and the Board consented to Mr. McNevin appearing as counsel for the Company.

The Company's plant where the dispute arises, is situated at Chatham, Ontario. At this plant there are some 260 hourly-rated employees. Union representatives submitted for the Board's inspection 254 signed membership cards, stating that these were all membership cards of employees of this plant. They were willing that the Board should check these with the Company's pay-roll if this is so desired. These cards bore dates between July 5th and August 1st, 1942. A sworn declaration has since been filed by the Union which further confirms the information given at the hearing respecting the number of employees who are members of the applicant Union.

It has been established that a very substantial majority of the employees were on the 23rd October, 1942, when this Board was constituted, and still are members of the applicant Union.

There is no other trade union or employees' organization seeking recognition as the agent of the employees of this plant. At present the company has no collective agreement with

the employees of the plant in question, or with any union or organization on their behalf.

After hearing and perusing the submissions of parties it appears that the dispute rests on narrow grounds. The applicants desire to negotiate a collective agreement on behalf of the employees with the Company. They urge that this agreement should be between the Company on the one part and the Union on the other part.

In the application for the establishment of this Board the applicants state the cause of the dispute and the claims to which exception is taken to be as follows:

"The dispute was caused when the company (Ontario Steel Products, Chatham, Ontario) refused to open negotiations upon request to do so with a committee of employees of the company representing Local 127, UAW-CIO, Chatham, Ontario (of which the majority of the employees of the company are members), and representatives of the International Union, UAW-CIO, with a view to concluding a collective bargaining agreement between the company and Local 127, UAW-CIO, Chatham, Ontario. The employees are requesting that the UAW-CIO be recognized as the sole collective bargaining agent for all hourly-rated employees of the company.

The employees are also requesting that the agreement cover union recognition, grievance procedure, seniority, etc. And further make it known that low wages are contributory to the dispute."

The Company on its part has no objection to the employees organizing in a trade union of their own choice free from the control of the Company. Further, it is willing to negotiate with its employees a collective agreement and concedes that in the negotiation of such agreement the employees are free to avail themselves of any advice or assistance which might be desired from the Union or any of its officers or representatives, whether employees of the Company or not. However, the Company submits that the agreement when negotiated should be between the Company and its employees rather than between the Company and the Union.

It is urged that the Board should content itself with recommending that negotiations be opened between the Company and its employees through the officers of their trade union if desired, with a view to the conclusion of a collective agreement, but should make no recommendation who the parties to such agreement should be.

It is further urged that to do so would be going beyond the provisions of P.C. 2685, section 7.

If Local 127 consisted exclusively of employees of this Company an agreement with this Local would in effect be with the employees who were members in organized form. However, Local 127 includes others in addition to employees of the Company. It is an amalgamated local and at present includes a large group of members who are employees of another local industrial concern. Employees of other companies may be brought in. The Company fears that an agreement with the Union at large, or with its amalgamated local, would result in difficulties, and disputes which might arise between other employers and their employees needlessly affecting amicable conditions existing with its own employees. On the other hand, Union representatives assure the Board that such an amalgamated local is merely for the purpose of bringing better organization to small groups, and that in practice each plant has absolute autonomy so far as the negotiation and carrying out of any agreement is concerned.

As indicated, the real dispute here is, who are to be parties to the proposed collective agreement. The order establishing this Board recites in part:

"And whereas the Minister of Labour, Canada, hereinafter called the Minister, is satisfied that the said dispute is one to which the provisions of the said Act apply."

Under the circumstances the Board's recommendation should deal with the question in dispute. To do otherwise would leave the parties with no recommendation on the real matter in dispute. Furthermore, this course would seem justified by both the provisions and spirit of P.C. 2685, and the practice followed in a number of cases by other Boards of Investigation and Conciliation.

It having been established that the applicant Union should be recognized as the bargaining agent on behalf of the Company's employees who are members of the Union, the

Board respectfully recommends that negotiations be entered into between the Company and the Union with a view to concluding a collective agreement between the Company and Local 127 U.A.W.A. on behalf of the hourly-rated employees engaged in the Chatham plant who are members of the Union.

All of which is respectfully submitted.

(Sgd.) J. G. GILLANDERS,
Chairman.

Minority Report

The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

In the matter of the Industrial Disputes Investigation Act and of a dispute between Ontario Steel Products Company, Limited (Employer), and its employees, members of Local 127, United Automobile Workers of America.

The parties involved in this dispute are the company and some of the hourly-rated employees at its Chatham plant.

I think it follows that they should be the parties to any agreement entered into unless the parties both agree otherwise.

Accordingly I respectfully recommend that negotiations be entered into between the company and the hourly-rated employees of its Chatham plant with a view to the conclusion of a collective agreement in accordance with the provisions of P.C. 2685.

All of which is respectfully submitted.

(Sgd.) G. C. RICHARDES,
Member.

Dated at Windsor, Ontario, this 12th day of January, 1943.

Report of Board in Dispute between the Canada Paper Company, Windsor Mills, P.Q., and Employees

The Minister of Labour has received the report of the Board of Conciliation and Investigation established to deal with a dispute between the Canada Paper Company, Windsor Mills, P.Q., and its employees, members of the National Catholic Union of Canada Paper Company. (LABOUR GAZETTE, November 1942, page 1249).

The personnel of the board was as follows: Honourable Mr. Justice Alfred Savard, Quebec Superior Court, Quebec, P.Q., chairman,

appointed on the joint recommendation of the other two members; Mr. John E. Crankshaw, K.C., Montreal, P.Q., and Mr. Gerard Picard, Quebec, P.Q., appointed on the nomination of the employer and employees respectively.

The report of the board is signed by the chairman and Mr. Gerard Picard; and Mr. John E. Crankshaw presented a minority report. The texts of the report of the board and the minority report follow:

Report of Board

Mr. M. M. Maclean,
Director of Industrial Relations and Registrar,
Department of Labour,
Ottawa, Ontario.

*Re: Industrial Disputes Investigation Act and
re Dispute between the Canada Paper
Company and its Employees, Members
of the National Catholic Union of
Canada Paper Company.*

Dear Sir:

Mr. Gerard Picard and myself, appointed members of the Board of Conciliation and Investigation in the above matter, beg herewith to submit our report.

It has been the earnest desire of this Board to be able to present a unanimous report, and, to further this end, we did everything that could be possible and that we could think of. It was only after the employers and the employees could not agree, that it became our task to present our report which is a submission of the majority of the Board. Mr. Crankshaw dissenting.

The Canada Paper Company has been operating a paper mill at Windsor Mills for the last eighty years. Windsor Mills is a small town located about sixteen miles west of Sherbrooke, and the Canada Paper Company is the only industry of importance. It employs about 600 hands, of which 90 per cent are French-speaking. A substantial number of the key men, however, are English-speaking.

Up to a few years ago, the local branch of the American Federation of Labor was the only trade union operating in Windsor Mills at the plant of the Company. They suspended their operations for a time, but afterwards came back.

In the meantime, the National Catholic Union came into existence and opened up a branch of their union at Windsor Mills.

If our information is correct, 75 per cent of the employees of the Company belong to the Syndicat, and 25 per cent to the American Federation of Labor. The key men and the English-speaking employees—or at least a substantial number of them belong to the American Federation of Labor. We cannot state the exact number of the members belonging to each trade union; this could only be ascertained if a vote or a count were taken.

In any event, these unions are operating side by side in the same plant. The members of the Syndicat are under the impression that the Company is leaning towards the American Federation of Labor and that the members of the International Union receive better treatment with regard to promotions, laying off and calling of men to return to work.

On the other hand, the executives of the Company seem to be suspicious of their men, probably due to a recent strike which occurred at Windsor Mills.

And these are the conditions under which the operations of the Company are carried out and the state of mind in which they seem to operate. So far, there has been no collective agreement between the Syndicat and the Company, nor between the American Federation of Labor and the Company.

Before commencing its work properly, this Board held several preliminary conferences in Montreal with the Company's Counsel, Mr. Paul Gauthier, K.C., with the idea of finding out what the issue was, what was the Company's point of view and any possible suggestions that he would have to offer. The Board began its regular sittings in Montreal on the 18th of October.

The Company was represented by Mr. L. A. Forsyth, K.C., and by Mr. Paul Gauthier, K.C., and also by Messrs. Phillips and D. Grant, the officials in charge of the plant at Windsor Mills.

The Syndicat was represented by their Counsel, Mr. Fortin, and also by Messrs. Paquette, Lessard and Girard.

On that date, Mr. L. P. Lacroix, Vice-President of the International Brotherhood of the Paper, Pulp and Sulphite, together with Mr. M. C. Reynolds, Canadian Representative of the International Brotherhood of Paper Makers, asked to be allowed to attend the deliberations of the Board. The Board would not accede to their request as it was an issue between the Company and the Syndicat, in which they had no interest. The Board felt their presence would have rendered its work rather difficult. However, they were given the assurance that this Board would not agree to anything which would affect their standing powers, rights and privileges, and they were told that, if, in the course of the deliberations it was felt that their presence was necessary, or if it was felt they could be of assistance and service to the Board, they would be called. The submission of the Syndicat was then considered. Their demands could be summed up as follows:

1. Official recognition of the Syndicat.
2. The negotiation of the collective labour agreement between the Syndicat and the Company.
3. The approbation of the payment to be made to the Regional War Labour Board.
4. The survey of conditions of work in general.
5. It was suggested that the Board should study the case of the President of the Syndicat.

As against this submission, the Company stated that it had refused to recognize the

Syndicat and to sign a collective labour agreement with it for the following reasons:

1. A great number of the skilled employees of the Company belong to the Syndicat and have notified the Company that, if the Syndicat was recognized and an agreement signed with the Syndicat they would resign their position with the Company and thereby make it almost impossible for the Company to efficiently operate its plant.

2. The membership of the Syndicat includes men who are not employed by the Company as Pulp and Paper Mill Workers. The membership includes a small percentage of skilled tradesmen and consists mostly of casual labour.

3. The Company admits that it has refused to enter into a collective labour agreement with the Syndicat and it maintains that its business is such that wages paid and conditions of work cannot be fixed by a collective labour agreement inspired by the Syndicat as presently constituted.

4. The Company has been informed by several of its employees that threats, coercion and false promises have been used on employees of the Company and others to increase membership.

5. The members of the Syndicat have used unfair means of securing some of the objectives of the Syndicat:

- (a) Its members have unjustifiably gone on strike without taking a proper strike vote;
- (b) Some of its members have created riots, damage to property, assaulted and caused severe bodily harm to people who did not share their views;
- (c) Some of its members have picketed the premises of the Company and prevented by threats of violence the loyal employees of the Company from entering the mills and premises of the Company;
- (d) Some of its members have prevented the office staff by threats of violence from entering the office, causing a complete stoppage of operations. The paymaster was prevented by members of the Syndicat from fulfilling his duties, and, as a result, the weekly pay was delayed, which caused great hardship and inconvenience on the part of the loyal employees;
- (e) Some of the members have caused bodily harm to a member of the staff who was investigating the necessary fire precautions;
- (f) Some of the members have denied admission, and threatened violence to representatives of the Fire Underwriters' Association who wished to make an inspection of the mills and premises of the Company.

These are the reasons given by the Company for refusing to recognize the Syndicat as the bargaining medium between itself and its employees, and to enter into a collective labour agreement with the Syndicat. The Company contends that the recognition of the Syndicat and the execution of the collective labour agreement do not represent the genuine free wish of the majority of the permanent employees of the Company and, furthermore,

it feels that such an agreement would create such internal dissensions serious enough to make the operation of the plant impossible.

It is to be noted that the Company is not against the principle of collective agreements with its employees, and this is borne out by the fact that collective labour agreements are in effect in five other mills of associated companies. In addition, the Company states that it has never refused to its employees the right to organize and to maintain a professional Syndicat, or to belong to any union or labour organization of their choice. It was so stated in the memorandum to the Department of Labour when the application for a conciliation board was filed with the Department of Labour.

The only reason why, in the present case, it is reluctant to recognize the Syndicat, is due to the fact that there is another trade union operating in the same plant and it cannot favour one union to the detriment of the other.

In order to meet this situation, it was decided to adjourn the meeting of the Board, and contact the officials of the American Federation of Labor, in order to find out if they would not be agreeable to a joint agreement with the Syndicat. This was done, and the Chairman had a long interview with Mr. M. C. Reynolds of the American Federation of Labor. His reply was that his union could not be a party to such a joint agreement with the Syndicat. It was also made clear to the Chairman that there was nothing to gain by communicating with Mr. L. P. Lacroix because his reply would be the same.

The Board met again and considered the draft agreement of a contract with a plant committee, members of which were to be composed of men belonging to both unions and elected by the majority of the men working in the different departments of the Company. The officials of the American Federation of Labor were again interviewed. A copy of the contract was left with them and after consideration, it was refused. Then the Company suggested a contract with a plant committee composed of the President of each union, members ex officio, and of members chosen by the men working in each department. A letter was sent to Mr. Lacroix by the Chairman of the Board submitting this proposition, but his letter was left unanswered.

Then again, the officials of the American Federation of Labor were invited by the Company to appear before the Board. Mr. Reynolds alone accepted this invitation but Mr. Lacroix was away for two weeks in the Maritime Provinces. It was suggested to Mr. Reynolds to consult the members of his

union at Windsor Mills, but this suggestion was turned down. The Company came back with a proposition of an agreement to be signed by a plant committee composed of the two Presidents of the respective unions and of members elected by the men working in the different departments. This would have been workable if it had been possible to have an expression of opinion from the American Federation of Labor and if their approval had been secured, but no such approval could be secured. However, it was suggested by the Syndicat, as a counter proposition, that a plant committee composed as above prepare a contract and that the final draft be signed by the Company and the Syndicat as the contracting party. It was to be left to the plant committee to set out a policy for the operation of the agreement. The Company could not see its way to accept this last proposition.

After so many attempts to face the problem from all its angles and considering the merits of each proposition without the possibility of an understanding being reached, it became evident that, in view of the fact that the two parties before the Board could not reach an understanding, the Board would have to present its finding and conclusion.

After considering everything, it would seem that there is very little that divides the two parties. As we stated before, the Company is not against the principle of collective agreements, and it concedes to its employees the right to organize and to maintain a professional Syndicat. It goes so far as to declare its willingness to sign a contract with a plant committee. The weak point of this proposition is that one of the two unions would have a majority on that plant committee, and this would give rise to possible grounds of conflict.

The majority of this Board feels that the Company should have gone one step further and, to be logical, agree with the suggestion of a collective agreement accepted by the plant committee, and to be signed by the Syndicat as a contracting party. This, it seems, would have given the Company additional security and guarantee of continuous operation of the agreement; but unfortunately this suggestion was turned down.

The majority of this Board believes that a fair trial should be given to an agreement, or a collective agreement entered into between the Syndicat and the Company for a period of one year. Such agreement might not solve all of the difficulties; it might not be perfect, but if it were signed, and both parties would enter into it with a sincere view of giving it a fair trial and carrying its provisions, it

should greatly help in improving the operations at the plant and bring between the Company and its employees a better sense of understanding, comprehension and mutual trust in all matters in which they have a mutual interest. The majority of this Board fully realizes the feeling of the Company due to the recent strike, and the unpleasant incidents which have occurred. All this should be brushed aside, a new leaf turned and a fair trial given to another *modus operandi*.

With this in view, the majority of this Board recommends the official recognition of the Syndicat by way of the Company signing a collective labour agreement with the Syndicat, the officials of the Syndicat being the persons delegated by the Syndicat as a bargaining agent on any matters which might arise in the course of the life of the agreement. This board fully realizes the situation in which the Company finds itself, due to the existence of two rival unions in its plant. It also approves of its policy not to favour any one union to the detriment of the other, and also its policy to grant every union the absolute same rights and privileges, and its determination to keep them absolutely on the same footing, which also meets with the approval of the Syndicat, and it is all that it seeks to obtain. The Syndicat does not ask for a closed shop nor for the exclusive recognition of their union.

The American Federation of Labor has applied for a Board of Conciliation at Windsor Mills. If this petition is granted, this Board is satisfied that the Company will take exactly the same stand that it took in the present case, and the other Board will certainly not grant more than what is granted by this present Board. To meet the situation, so created, this Board suggests that the very same contract which will be offered to the Syndicat be granted to the American Federation of Labor. In this way, both unions would be exactly on the same footing, with exactly the same rights, privileges and obligations, and it could not be said that the Company is favouring one union in preference to another. This policy of the same contract governing members of both unions could be given a trial.

The study of the problem of adjustment of wages cannot be dealt with by this Board, because, under the provisions of P.C. 5963, the question of workers' remuneration can be dealt with only by the appropriate war labour board. The employing Company involved in this dispute falls within the category of regional employer as defined by the National War Labour Board. Therefore, any matters relating to the remuneration of the employees concerned, is not to be dealt

with by this Board but must be referred to the Quebec Regional War Labour Board for decision.

With regard to conditions of work in general, evidence had been adduced in Windsor Mills tending to show that the members of the American Federation of Labor received better treatment from the Company than the treatment offered to the members of the Syndicat, whenever there is a question of promotion, or of letting men out. It has been contended that the members of the Syndicat are the first ones to go and the last ones to be recalled. It was also suggested this was done with the knowledge and approval of the Company. A great number of witnesses have been heard in Windsor Mills, but none of them have been able to establish their contention. They were mostly girls. At one time about forty girls were employed at the mill. Just now there are only six of them left. Three belong to the Syndicat and three belong to the Federation of Labour. However, it has been found that some members of the American Federation of Labor have taken advantage of their position to make propaganda, in the plant, in favour of their union, and this, despite the fact that such a course of action was forbidden, and that notices had been posted. This happened in the case of Miss Labonte and Mr. Butler, heads of their respective departments, but this was done by them in violation of the rules of the plant and without any knowledge and consent of the management.

This Board has been very much impressed by the stand taken by Messrs. Phillips and Grant. Their policy has always been to treat every one of their employees with the same measure of justice and fairness, irrespective of the union to which they belong. They are not concerned about the union to which they belong, but only wish to promote good relationship between management and employees and the utmost production from their staff.

The French-Canadian worker is of the best. In Windsor Mills they have been working for the Company for one or two generations. There is in this question perhaps a psychological side which would be worth the while of the Company to go into. There should be between the men and the management more opportunities of sitting together around a table and talking to one another and telling each other frankly any grievance which one may think it has; it must not be forgotten that in a large industry, the management and its directors are partners with their men. The success of one means the success of the other, and if the labour is happy and satis-

fied, it is an incentive to increase its production and an incentive to do better. The Board did not take into consideration the case of the President of the Syndicat because since this petition was filed, the gentleman has resigned from his office with the Syndicat.

The majority of this Board feels that all the employees should be allowed to belong to any trade union, with the exception of the executive officials. Otherwise, the employees might feel that the Company takes advantage of the men by promoting them and then barring them from occupying a position of service in the trade union.

If and when the Board applied for by the American Federation of Labor convenes, this Board, if invited, will be only too glad to meet with it, if they can be of service; and this may be the case, due to the fact that the demands submitted by the American Federation of Labor will in all probability be similar and will concern the same problems, and it would be in the interest of all concerned that there should be no conflict between the recommendations of each Board.

The whole respectfully submitted.

(Sgd.) ALFRED SAVARD,
Chairman.

(Sgd.) GÉRARD PICARD,
Member.

Minority Report

Montreal, January 11, 1943.

Mr. M. M. Maclean,
Director of Industrial Relations
and Registrar,
Department of Labour,
Ottawa, Ontario.

*Re: Industrial Disputes Investigation Act and
re Dispute between the Canada Paper
Company and Its Employees, Members
of the National Catholic Union of
Canada.*

Dear Sir:

As the application for the establishment of this Board indicates, the Board was set up as a result of a dispute between those employees of the Canada Paper Company at Windsor Mills, Quebec, who are members of the National Catholic Union, and the Company.

While the employer admits that the Catholic Union has a substantial membership among its employees, it also asserts that two other units of the American Federation of Labor, viz: The International Brotherhood of Pulp, Sulphite and Paper Mill Workers, and the International Brotherhood of Paper Makers

also have many adherents among those employees. No evidence was forthcoming before the Board upon which I am prepared to make a finding as to the relative strength of the two principal groups,—The National Catholic Union and the American Federation of Labor.

Certainly it would appear that in the application for the Board and Company's answer to it, the real issues which called for the establishment of the Board, and the real problem which a tribunal of conciliation ought to solve for this industry, were obscured.

The matters stressed and over-emphasized in the application and the answer, were charges of discrimination and coercive practices, made against the Company by the employees, and accusations of illegal or unjustified striking, rioting, picketing and other disorderly conduct made against members of the Union by the Company.

The charges made against the Company were thoroughly and fairly investigated by the Board at a two-day session at Windsor Mills and were found to be without foundation. The Company did not see fit to adduce any detailed evidence of its complaints against the Union. I have little doubt, however, that, as is not infrequent in cases of this kind, the imaginary grievances of the individual employees were availed of by interested persons to create an atmosphere of hostility and ill-will between the employees and the employer, because an unauthorized strike did take place in the Company's plant accompanied by disagreeable and unpleasant incidents which were wholly unnecessary and uncalled for,—although the Union denies any participation in bringing about such a state of affairs.

That such a state of affairs should have engendered some resentment on the part of the management and some suspicion of the good faith of the union leaders is not surprising, but, happily both parties to the dispute appear now to take a broader view of their differences, and, for this state of affairs, the representatives of the Company and of the Union and perhaps this Board are entitled to be congratulated.

However, the fact remains that the real issues confronting the Board appear, after investigation, to be such that there appears little likelihood of their being adequately met by any recommendation that the Board can make, and this, I think, is due to a fundamental defect in the legislation under which the Board was established as well as in those Orders in Council which declare Government policy in industrial disputes.

As previously pointed out the employees of the Canada Paper Company adhere in

substantial numbers to two essentially separated labour organizations. Both these organizations in their membership are vertical rather than horizontal, and claim members among both skilled and unskilled workers, although I gained the impression that the majority of skilled tradesmen are affiliated rather with the Federation than with the Catholic Union.

It is my view that a Board constituted as this one is,—one appointee nominated by the National Catholic Union, and incidentally an officer of it, another appointee nominated by the Company, with a chairman appointed by agreement of the two first named—is not a proper tribunal to deal with a dispute the real issue of which concerns, and vitally concerns, a third important and unrepresented interest.

It cannot be doubted that a Board so constituted could not be expected to obtain the confidence of the members of the American Federation of Labor, whose existence as an important factor in the situation appears to have been overlooked from the outset. Indeed the possibility of the existence of more than one trade union in such disputes and the consequent right of representation would seem not to have been within the contemplation of the framers of the Industrial Disputes Investigation Act or of the more recent Orders in Council.

Now it is true that at the first formal sittings of the Board, Messrs. Lacroix and Reynolds, representing the Federation of Labor Unions appeared and pressed for the right to attend the sittings of the Board and to be heard as persons interested in the office that the Board was appointed to perform. The Chairman took the view, with which I have no quarrel, that, not being parties to the dispute, these unions were not entitled to be present and to take part in the proceedings, although they were assured by him that when, in the view of the Board, their interests seemed to be in issue they would be advised and invited to attend.

Under these circumstances it is not to be wondered at if the Federation of Labor adopted a distant, not to say non-co-operative, attitude toward this Board and all its doings, although I feel compelled to state that so far as unwillingness to accept the compromise suggestions put forward on behalf of the Company is concerned I find little if any difference between the position taken by either of the trade union groups.

Personally, the fact that the Federation of Labour group has applied for another Board does not surprise me, although I see little prospect of a solution of the problem from the

recommendation of another Board of similar make-up, save for the replacement of the representative of one Union by that of the other.

If I may venture to say so, the problem is one which should be considered and passed upon by a tribunal, either absolutely independent and disinterested in its composition or fully representative of all interests concerned.

This Board, and I, as one member of it, must, however, take the situation as it is.

Two unions exist, both have demanded official recognition by the Company as bargaining agents, with all the powers and obligations that such recognition involves. Both wish to enter into collective agreements with the Company covering wages and working conditions for the employees. To my mind, if I assume, and I think I must, upon the Company's admissions and the statements of the Union officials, that both have a substantial number of adherents among the employees, then the fact that one may have today a majority of those employees who are trade union members,—for there are apparently some who are not—would not justify me in saying that that Union should speak for all the employees, more particularly when I understand, as I do, that the underlying philosophy of the two groups concerned in this enquiry is essentially different, not to say opposed, in principle. The taking of a vote would, therefore, in my view, settle nothing.

The Company on more than one occasion developed in great detail to the Board the reasons for its unwillingness to deal with both Unions separately and these reasons impressed me; and the more so because the Company made it abundantly clear that it was not basically opposed to union recognition nor to collective bargaining. It was also made clear to the Board that neither individually nor collectively was the membership of either Union to be advantaged or preferred by the management.

I can see that the existence of two distinct and separate collective agreements with all the incidental discussions arising out of them concerning grievances, promotions, layoffs, hiring, transfers, etc., would create an intolerable position for the Company, would tend to promote and encourage an unhealthy rivalry between the two groups in the inevitable competition to recruit and retain membership, and would foster and develop enmity and bad

feeling rather than harmony and good will, would make for the aggravation rather than for the composition of differences not only between the employees and the employer but among the employees themselves.

I cannot therefore concur in recommending the conclusion of an agreement between the Company and the National Catholic Union, knowing that such a course would leave the Company no alternative but to deal similarly with the Federation of Labor with the attendant consequences that I foresee.

During the course of our enquiry the representatives of the Company, after the earlier verbal skirmishes relating to past grievances had terminated, displayed, I thought, a keen and comprehensive appreciation of the situation which confronts them, and manifested what I deemed to be a genuine desire to deal with it in a spirit of reasonable compromise, and if their efforts in that direction had been received in the same spirit by both Unions, I feel that much might have been accomplished for the good of all concerned.

Before proceeding with my recommendation I may be permitted to remark that, in dealing with this dispute, I feel that the end to be kept uppermost in mind is that in this industry there should exist good will and co-operation between employer and employee to the end that the facilities provided by the former may be so utilized by the labour of the latter that the utmost in efficient production be attained. I realize that in the pursuit of this goal all concerned have rights which must be respected and preserved, and among those rights not the least is that of the employees to organize for their protection and through such organization to treat with their employer on all matters of interest and concern to them. But no right exists, as I view it, for any one organization to exploit either the employer or other employees or organizations to its advantage, nor for any two or more organizations to take a position, in which the employer is to be the focal point of a competition which will eventually disrupt and disorganize labour relations in his plant and ultimately ruin his industry.

With the foregoing thoughts in mind I suggest that under such situation as the one with which this Board has to deal, it behooves trade union leaders as well as employers to approach their problems in a more

unselfish frame of mind, to consider their paramount obligations to those they represent not from the point of view of temporary advantage to the organization but to ultimate and lasting advantage to their members in improved relations and assured employment under the best obtainable conditions.

Very early in our deliberations the Company, being asked for its proposals, suggested first the creation of a Men's Committee, so-called, to be elected by the employees of the various departments of the mill, with which committee the Company would deal as representing all employees whether members of one union or the other, and would conclude a Collective Agreement. The National Catholic Union suggested the possible alternative of the agreement being made with the two Unions and policed by the Shop Committee. This proposal, was discussed by the Chairman with representatives of the Federation of Labor who evinced unwillingness to join the other Union in such an agreement.

The Company's original proposal as was pointed out to its representatives failed to meet the insistent demand for official recognition of the applicant Union. The Company thereupon amended its original proposal so as to provide for the addition to the Committee of the President of each union as a member, *virtute officii*.

The latter proposal appealed to me as one which if fairly and honestly received and loyally supported would meet the demands of both Unions for recognition, would enable the members of each Union to feel satisfied that their interests not only as individual workers, but as members of their Unions, would be adequately and properly supervised and safeguarded by persons chosen in accordance with the elementary principles of democratic philosophy; and it is now a proposal which I commend to the acceptance of all parties concerned, and officially recommend as a member of this Board as the only apparent solution of this difficult and involved situation.

Much has been said in the report of the majority of the Board about the failure of the Federation of Labor to accept or endorse these proposals. I must say in fairness to the Company that through their representatives they asked that their last proposal be submitted to the Federation of Labor as a compromise endorsed by the Board; it was submitted but not as having the support of the Board, probably for the very good reason that

the representative of the Catholic Union on the Board, as well as those who appeared before us on behalf of that Union were unwilling to accept or to approve.

It would, of course, be highly desirable to forward a unanimous report, and I, for one, regret the impossibility of so doing, but, as I view it, to recommend—as my colleague and the Chairman seem prepared to do a course which invites the continuance of the state of affairs which in reality gave rise to the dispute—the rivalry between the two unions—is not to fulfil in any measure the functions of this Board as I appreciate them. To satisfy the ambitions, however laudable, of one union or of both at the risk of constant disturbance and disagreement in the plant is not conciliation as I understand it, because it fails to take into account the right of the Company, so long as it recognizes the legitimate aspirations of its employees to organize and to treat collectively with it, to enjoy peaceful and harmonious relations with its workers and to escape the annoyance consequent upon the position which it would occupy as the target of inter-union rivalry and competition.

I would recommend first that both unions accept the proposal of the Company that a Workers' Committee, consisting of representatives of each department, chosen by ballot of the employees in the respective departments, but including the local president of each union, *ex officio*, be set up. That this Committee be the bargaining agent of all employees, and negotiate and conclude with the Company on behalf of all employees a collective agreement covering such matters as are of concern to both parties.

Failing the adoption of this recommendation, I would recommend that the Minister of Labour establish a Board or Commission composed either of representatives of *all* interests concerned or entirely independent of any such interest to investigate and report its views as to a desirable solution.

In any event I respectfully call the attention of the Department to the apparent necessity of some amendment to present legislation which would at least offer some guidance to future Boards before whom similar circumstances may be brought under review.

Yours respectfully,

(Sgd.) JOHN E. CRANKSHAW

Conciliation Work of the Department of Labour During January, 1943

DURING January, approximately 50 disputes were referred to the Industrial Relations Branch of the Department. In a great number of these cases, and in other disputes carried over from the preceding month, Industrial Relations Officers were instrumental in bringing about an amicable settlement of the matters in dispute. The following statement, however, summarizes only those disputes of peculiar interest or importance and is not intended as a complete review of the activities of the Branch during the month.

Industrial Relations Officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal and Fredericton. The territory of the officers resident in Vancouver comprises British Columbia and Alberta; officers stationed in Winnipeg cover the provinces of Saskatchewan and Manitoba; the officers resident in Toronto confine their activities to Ontario; the officers in Montreal to the Province of Quebec and the officer resident in Fredericton represents the Department in the Maritime Provinces. The headquarters of the Industrial Relations Branch and the Director of Industrial Relations and staff are situated in Ottawa.

MUNITIONS WORKERS, BURNABY, B.C.—On January 11, approximately 750 employees in the Burnaby Ordnance Plant of Dominion Bridge Company Limited, Vancouver, B.C., ceased work in protest against the dismissal of one employee because of an infraction of regulations. On the same afternoon, Mr. G. R. Currie, Industrial Relations Officer, Vancouver, arranged a joint conference of the parties and, as a result, work was resumed at 3.45 p.m. The Company agreed to retain the dismissed employee pending a re-examination of the circumstances of the case. The situation was reviewed by a representative of the Company and the Union, the United Steelworkers of America, and it was decided that the employee concerned would leave the employ of the company with a clear record to take employment, at the same wage rate and classification, which had been arranged for him in another local industry. It was also decided that in order to prevent similar recurrences, a five-point system of rating employees would be established, and a three-man committee set up to deal promptly with all grievances which could not be settled by the charge hands and shop stewards.

ORDNANCE WORKERS, TORONTO, ONT.—Late in December the Department was asked by a Representative of the United Steelworkers of America (C.I.O.) to appoint an Industrial

Disputes Inquiry Commissioner under the provisions of P.C. 4020 to investigate the discharge of certain employees of John Inglis Company, Limited, Toronto, Ontario. A preliminary investigation revealed that the men in question had broken Company rules and that their dismissal was warranted. Accordingly no Commissioner was appointed to deal with the situation. During January the management of the Company requested the Department to supervise a representation vote to determine which of two competing unions should be recognized as the bargaining agency for some 14,000 employees in its Ordnance plant. At the end of the month conferences as to the nature of the ballot and procedure were in progress between a departmental representative, and representatives of the Management, Local Lodge 1612, International Association of Machinists, and the United Steelworkers of America (C.I.O.).

COAL MINERS, ROBB, ALTA.—On January 30, the Department was advised that approximately 30 unorganized miners and labourers employed by Thirty-Two Collieries, Ltd., Robb, Alta., had gone on strike. The stoppage was mainly due to the absence of sugar at meals in the company canteen, caused by a temporary shortage. Mr. F. E. Harrison, Western Representative of the Department of Labour, was requested to investigate. Operations were resumed on February 1.

COAL MINERS, BLAIRMORE, ALTA.—When ownership of a bus line serving Blairmore and Hillcrest, Alberta, changed hands and a new proprietor increased the monthly fare to miners from \$4 to \$6, about sixty employees of West Canadian Collieries, Limited, resident in Hillcrest, refused to report for work for several days. Officers of the Department of Labour and the Wartime Prices and Trade Board endeavoured to find a solution. Finally the employees decided to use private vehicles and arrangements for a supply of gasoline and oil for this sole purpose were made through the Oil Controller for Alberta.

COAL MINERS, DRUMHELLER, ALTA.—When a strike of 150 to 175 employees of the Hy-Grade Coal Mining Company, Limited, Drumheller, Alberta, occurred on January 12, Mr. F. E. Harrison, Western Representative of the Department of Labour, immediately took up the matter with officials of District 18, United Mine Workers of America. The District Office dispatched two representatives to the scene to instruct the men, members of Local 7332, U.M.W.A., to resume operations. The dispute arose over the dismissal

of one miner for not complying with an order from a mine official. Following negotiations the miner in question agreed to obey orders and the men resumed work on the morning of January 13.

COAL MINERS, DRUMHELLER, ALTA.—On January 30th 172 employees of the Newcastle Coal Co., Ltd., Drumheller, Alta., went on strike when the management refused to comply with a demand that it supply coffee during extremely cold weather to men working on the tippie and on the surface. The men claimed that certain other mining companies in the area served coffee during working hours, and it was ascertained that 4 or 5 out of 25 collieries in the district did so in severe weather. Work was resumed on February 1st after Mr. F. E. Harrison, Western Representative of the Department, took the matter up with officers of District 18, United Mine Workers of America. On February 8 the same group of men again ceased work in an attempt to enforce compliance with the same demand, and remained on strike until the morning of February 12, in spite of instructions from their District leaders to resume work and advice that the strike was illegal. In the meantime, Government rationing officials cancelled permission for any mine to serve coffee to its workmen.

COAL MINERS, PRINCETON, B.C.—A decision of the National War Labour Board, declining to authorize the Princeton Tulameen Coal Company, Princeton, B.C., to pay as large an increase in basic wage rates as was applied for in a joint request, led to the threat of a strike by the employees in mid-January. Mr. F. E. Harrison, Western Representative, Department of Labour, dealt with the situation through the Officers of District 18, United Mine Workers of America. It was finally agreed that the men would accept the award of the National War Labour Board under protest and make an application for reconsideration.

LEATHER WORKERS, PENETANGUISHENE, ONT.—Late in January the Department was asked to inquire into the dismissal by the Breithaupt Leather Company, Limited, Penetanguishene, Ontario, of certain persons said to comprise the newly-elected Executive Committee of a local of the Shoe and Leather Workers' Union. Following representations by Mr. H. Perkins, Industrial Relations Officer, Toronto, the management of the Company agreed to reinstate three workers at once and the others within a few days.

COAL MINERS, FLORENCE, N.S.—A change in the manner of drawing chucks and building the mid-wall, instituted because of a

change in mining methods, resulted in a strike on January 14, by sixty-five employees of Old Sydney Collieries, Limited, Florence, Nova Scotia. Mr. H. R. Pettigrove, Industrial Relations Officer, Fredericton, N.B., conferred at once with representatives of the Company and Executive Officers of District 26, United Mine Workers of America. About three-quarters of the working force resumed operations on January 18, and the rest did so shortly afterwards.

ASBESTOS WORKERS, EAST BROUGHTON, P.Q.—Mediation by Mr. R. Trepanier, Industrial Relations Officer, Montreal, brought about during January the termination of a prolonged stoppage of work at the plant of the Quebec Asbestos Corporation, East Broughton, P.Q. Some 120 employees were involved in the dispute, which arose on November 24, 1942, after the Company and an independent contractor had disagreed as to the terms of a contract price. The contractor employed 4 or 5 men in connection with loading and shipping operations and these men not only worked in the same plant as a large number of the firm's regular workmen, but also belonged to the same union, the National Catholic Syndicate of Asbestos Workers of East Broughton. The Department was unable definitely to ascertain whether a strike or lockout existed, inasmuch as the employees of the Corporation claimed that they had been ordered to stop work, while the management of the firm maintained just as emphatically that only the employees of the independent contractor had been barred from the premises. Numerous attempts were made by Departmental officials to bring the parties together, but were not attended by success until January 15th, when joint conferences were held at Sherbrooke, P.Q. A mutually satisfactory agreement was reached the following day and production was resumed on January 22nd, following the signing of an agreement.

Union Representation Votes

PUBLIC UTILITY WORKERS, WINDSOR, ONT.—By joint consent of the parties, Mr. H. Perkins, Industrial Relations Officer, Toronto, supervised a vote among employees of the Windsor Gas Company on January 19. In the balloting 52 voted in favour of bargaining collectively through the National Union of Natural Gas Workers, and 12 in favour of dealing with the management through a Shop Committee of employees.

AUTOMOTIVE PARTS WORKERS, WINDSOR, ONT.—During January an application was made for the Department to supervise a vote among employees of the Bendix-Eclipse Company

of Canada, Limited, Windsor, Ontario. On February 1-2, the employees voted upon the following question: "Do you want to bargain collectively with your employer through Local 195 of the U. A. W. A.-C.I.O.?" The vote resulted in favour of the Union by 356 to 118, with 8 ballots spoiled.

CHEMICAL WORKERS, CALGARY, ALTA.—By joint consent of the parties concerned, a ballot was conducted under Departmental supervision on January 29 among employees of Alberta Nitrogen Products Limited, Calgary, Alta., to determine the agency through which the employees wished to be represented. The ballot resulted in 167 in favour of the Company Plant Committee and 74 in favour of affiliation with a labour union, with one spoiled ballot. There were 271 employees eligible to vote.

ENGINEERING PLANT EMPLOYEES, LACHINE, P.Q.—By joint consent of the parties, two representation votes were conducted by Mr.

L. Pepin, Industrial Relations Officer, Montreal, on January 5 among employees of the Dominion Engineering Works, Lachine, P.Q. The vote in the general plant was to determine whether the workers desired to be represented by the Montreal Metal Trades Council (A.F. of L.), the United Steelworkers of America, Local 2525 (C.I.O.), or to be unrepresented by any Union. Out of 1063 eligible employees, the Montreal Metal Trades Council secured 641 votes, and Local 2525, United Steelworkers of America, secured 53. There were 14 spoiled ballots and 163 voted against having any Union. In the Foundry Department the ballot was to ascertain the numbers of employees in favour of the International Moulders' and Foundry Workers' Union No. 21 (A.F. of L.), the United Steelworkers of America, Local 2525, or no Union. There were 317 eligible and 218 voted in favour of the Moulders' Union, as against 10 for the United Steelworkers. The vote for no Union totalled 39 and 7 ballots were spoiled.

Strikes and Lockouts in Canada During January, 1943

DURING the month of January, 1943, the number of strikes reported, the number of workers involved and the time loss in man working days increased sharply as compared with the previous month when the time loss was the lowest recorded since March, 1941. This great increase was accounted for largely by strikes of steel mill workers at Sydney and Trenton, N.S., and Sault Ste. Marie, Ont., (see page 191) which caused 88 per cent of the time loss. During January there were 34 strikes, involving 19,857 workers and causing a time loss of 166,707 man working days, as compared with 13 strikes in December, 1942, involving 1,434 workers, with a time loss of 6,016 days. In January, 1942, there were 13 strikes, with 2,715 workers involved and a time loss of 46,606 days.

One strike, involving 120 workers, was carried over from December, 1942, and 33 commenced during January, 1943. Of these, 29 were terminated during the month. Twelve resulted in favour if the workers, seven in favour of the employers, five were compromise settlements, one was partially successful and four were indefinite in result.

At the end of the month five strikes were reported as unterminated, namely: tobacco factory workers at Montreal, P.Q., copper refinery workers at Montreal, P.Q., moulders at Sackville, N.B., glass factory workers at Wallaceburg, Ont., and coal truckers at Yorkton, Sask.

The record does not include minor strikes such as are defined in another paragraph

nor does it include strikes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. Such strikes are listed in this paragraph for a period up to one year after their removal from the table of current strikes.

The following table gives information for January, 1943, December, 1942 and January, 1942.

Date	Number of strikes	Number of workers involved	Time loss in man working days
*January, 1943.....	34	19,857	166,707
*December, 1942.....	13	1,434	6,016
*January, 1942.....	13	2,715	46,606

* Preliminary figures.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees are not included in the published record unless ten days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review.

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

STRIKES AND LOCKOUTS IN CANADA DURING JANUARY, 1943*

Industry, occupation and locality	Number involved		Time loss in man working days	Particulars†
	Establish- ments	Workers		
(a) Strikes and Lockouts in Progress Prior to January, 1943				
MINING— Asbestos miners, East Broughton, P.Q.	1	120	2,000	Commenced November 24, 1942; against dismissal of a contractor and his employees; terminated January 22, 1943; conciliation (federal); in favour of employer.
(b) Strikes and Lockouts Commencing During January 1943				
MINING— Coal miners, Blairmore, Alta.	1	50	200	Commenced January 6; against increase in bus fares for transportation to mine; terminated January 9; conciliation (federal); in favour of workers.
Coal miners, Drumheller, Alta.	1	175	175	Commenced January 12; against dismissal of a worker; terminated January 12; negotiations; in favour of workers.
Coal miners, Glace Bay, N.S.	1	300	300	Commenced January 13 for payment for extra time for trappers; terminated January 13; negotiations; in favour of employer.
Coal miners, Florence, N.S.	1	625	1,250	Commenced January 14; re change in method of mining; terminated January 16; conciliation (federal); in favour of employer.
Coal miners, Beverly, Alta.	1	60	75	Commenced January 15; against removal of a cutting machine; terminated January 16; negotiations; in favour of workers.
Coal miners, East Coulee, Alta.	1	126	1,008	Commenced January 19; against assignment of two contract miners to do timbering; terminated January 27; negotiations; in favour of workers.
Coal miners, Minto, N.B.	1	(a) 12	24	Commenced January 18; for employment of extra wheelers; terminated January 19; conciliation (federal); in favour of workers.
Coal miners, Robb, Alta.	1	(b) 10	10	Commenced January 30; re meals; terminated January 30; return of workers and replacement; in favour of employer.
Coal miners, Drumheller, Alta.	1	172	172	Commenced January 30; against failure to serve coffee to surfacemen during working hours; terminated January 30; return of workers; in favour of employer.
MANUFACTURING— Tobacco and Liquors— Tobacco factory workers, Montreal, P.Q.	1	1,685	5,055	Commenced January 27; for wage adjustments as provided in agreement; unterminated.
Boots and Shoes— Shoe factory workers, Quebec, P.Q.	1	25	50	Commenced January 12; for increases in piece rates; terminated January 13; arbitration; in favour of workers.
Shoe factory workers, Quebec, P.Q.	1	(c) 25	125	Commenced January 18; for increase in piece rates; terminated January 22; return of workers pending settlement; indefinite.
Textiles and Clothing— Cotton factory workers, Montmorency Village, P.Q.	1	(d) 350	2,100	Commenced January 7; against dismissal of workers for not working on religious holiday as per agreement; terminated January 14; conciliation (provincial); in favour of workers.
Miscellaneous Wood Products: Wood factory workers, Alexandria, Ont.	1	12	42	Commenced January 20; re cost of living bonus; terminated January 23; return of workers and replacement; partially successful.

STRIKES AND LOCKOUTS IN CANADA DURING JANUARY, 1943*—*Continued*

Industry, occupation and locality	Number involved		Time loss in man working days	Particulars†
	Establish- ments	Workers		

(b) Strikes and Lockouts Commencing During January, 1943—Continued

MANUFACTURING—Con. <i>Metal Products—</i> Copper refinery workers, Montreal, P.Q.	1	250	750	Commenced January 5; for increased wages; terminated January 7; conciliation (federal); return of workers pending further reference to Regional War Labour Board; compromise.
Munitions factory workers, Toronto, Ont.	1	50	25	Commenced January 7; against demotion of worker; terminated January 7; return of workers; in favour of workers.
Motor vehicles factory workers, Windsor, Ont.	1	1,734	867	Commenced January 9; against dismissal of a worker; terminated January 9; negotiations; (worker reinstated in another department); compromise.
Steel mill workers, Burnaby, B.C.	1	350	130	Commenced January 11; against dismissal of a union worker; terminated January 11; conciliation (federal); (worker secured work elsewhere); in favour of employer.
Metal factory workers, Brantford, Ont.	1	58	58	Commenced January 11; against non-payment of Christmas bonus and delay in signing a union agreement; terminated January 12; return of workers pending settlement; indefinite.
Steel mill workers, Sydney, N.S.	1	5,200	65,000	Commenced January 12; for increases in basic wage rates as recommended in the minority report of the Royal Commission; terminated January 25; conciliation (federal); compromise. (p 191)
Steel mill workers, Sault Ste. Marie, Ont.	1	(e) 3,786	42,000	Commenced January 14; for increases in basic wage rates as recommended in minority report of the Royal Commission; terminated January 26; conciliation (federal); compromise. (p 191)
Steel mill workers, Trenton, N.S.	4	(f) 2,675	40,000	Commenced January 14; in sympathy with the strikers at Sydney and for increases in basic wage rates as recommended in the minority report of the Royal Commission for the steel mills at Sydney and Sault Ste. Marie; terminated January 30; conciliation (federal); return of workers pending reference to National War Labour Board re classification of operations; indefinite. (p 191)
Railway car factory work- ers, Hamilton, Ont.	1	236	708	Commenced January 14; for reduction in quota of cars per day; terminated January 16; negotiations; in favour of workers.
Copper refinery workers, Montreal, P.Q.	1	250	3,000	Commenced January 15; for increased wages; untermiated.
Metal factory workers, Windsor, Ont.	1	562	500	Commenced January 15; against delay in signing a union agreement; terminated January 16; conciliation (provincial); return of workers pending arbitration; in favour of workers.
Truck body factory work- ers, Toronto, Ont.	1	55	440	Commenced January 18; for union recognition and agreement; terminated January 26; conciliation (federal and provincial); in favour of workers.
Tool factory workers, Windsor, Ont.	1	101	135	Commenced January 20; for closed shop union agreement; terminated January 21; negotiations; in favour of workers.

STRIKES AND LOCKOUTS IN CANADA DURING JANUARY, 1943*—*Concluded*

Strikes and Lockouts in Great Britain and Other Countries

THE latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month, bringing down to date that given in the May, 1942, issue, in the review of "Strikes and Lockouts in Canada and Other Countries, 1941". The latter included a table summarizing the principal statistics as to strikes and lockouts since 1919, in the various countries for which such figures are available. Statistics given in the annual review and in this article are taken as far as possible from the government publications of the various countries concerned.

Great Britain and Northern Ireland

The British Ministry of Labour Gazette publishes statistics dealing with disputes involving stoppages of work and gives some details of the more important ones. An order

under the Defence Regulations, effective July 25, 1940, provides for the settlement of disputes and the prevention of strikes and lockouts, as noted in the LABOUR GAZETTE, August, 1940, page 760.

The number of disputes beginning in November was 130, and 7 were still in progress from the previous month, making a total of 137 disputes in progress during the month; 40,300 workers were involved in the disputes in progress during the month and the time loss was 93,000 working days.

Of the 130 disputes beginning in November, 35 arose out of demands for increased wages and 46 over other wage questions; 3 over working hours; 17 over questions as to the employment of particular classes or persons; 27 over other questions as to working arrangements; and 2 on questions of trade union principle. Final settlements were reached in 101 disputes, of which 21 were

settled in favour of workers, 55 in favour of employers and 25 resulted in compromises; in 28 other disputes, work was resumed pending negotiations.

Australia

For the year 1941, the number of disputes in existence is now given as 567 (instead of the figure reported in the December, 1942, *LABOUR GAZETTE*); 240,845 workers were directly involved and the time loss for the year was 984,174 working days. For the first quarter of 1942, 121 disputes were reported, directly involving 27,815 workers, with a time loss of 55,394 working days.

New Zealand

The number of disputes during the first nine months of the year 1942 was 57, involving

13,223 workers, with a time loss of 50,718 working days, as compared with a time loss of 24,020 working days for the same period in 1941.

British India

The number of disputes in progress in the year 1941 was 359, involving 291,054 workers, with a time loss of 3,330,503 working days. Corresponding figures for the year 1940 were 322 disputes, 452,539 workers involved and a time loss of 7,577,281 working days.

United States

For the month of December, the number of strikes beginning in the month was 160, involving 57,000 workers in these new strikes. The time loss for all disputes in progress during the month was 200,000 working days.

Immigration to Canada During 1942

IMMIGRATION to Canada continued to decline during the calendar year 1942, according to a statistical statement issued recently by the Immigration Branch of the Department of Mines and Resources.

A total of 7,576 immigrants came to Canada in 1942, a decline of 18.8 per cent from the preceding year, when 9,329 persons had entered the country.

This was the smallest number to enter Canada since Confederation. A table published in the Canada Year Book showing the number of immigrant arrivals in Canada since 1852 indicates that the lowest numbers previously recorded were in 1859 and 1860, in each of which years the entries were just over 6,000. In no other year until 1941 did the total drop below 10,000.

The heaviest wave of immigration came between the beginning of the century and the first world war. During this period immigration rose from 41,681 in 1900 until a peak of 400,870 was reached in 1913.

From 1919 until 1930 the average number of arrivals was over 100,000 a year, but since 1931 the figures have declined from 27,530 to the present low of 7,576.

Immigration by Origin

The greater number of those coming to Canada during 1942 were from the United States. From this country there were 5,098 entries, which represented a decline of 22.7 per cent from the 1941 total of 6,594. The number from the British Isles remained at

about the same level, 2,259, compared with 2,300 during the preceding year.

Arrivals from other countries was negligible. There were 132 immigrants in the group classified as Northern European races, of whom about half were French. The number in this group declined from 194 in 1941 and from 1,957 in 1939, the year the war broke out.

There were 87 immigrants in the group classified as "other races." During 1941 there had been 241 in this group, and in 1939 there had been 5,844.

Occupational Classification

Classified according to sex, there were 2,280 adult males, 3,429 adult females, and 1,867 children under eighteen in the total; while occupationally this number was divided as follows:

	Males		Under 18
	Females		
Farming	172	70	77
Labouring	242	86	64
Mechanics	485	145	123
Trading	289	310	99
Mining	21	10	6
Female domestic servants	411	46
Other classes	1,071	2,397	1,452

The destinations of these immigrants were as follows: Nova Scotia, 989; New Brunswick, 279; Prince Edward Island, 31; Quebec, 1,399; Ontario, 3,315; Manitoba, 209; Saskatchewan, 118; Alberta, 287; British Columbia, 949.

Collective Agreements and Wage Schedules

Recent Collective Agreements

COLLECTIVE agreements received in the Department are outlined in the **LABOUR GAZETTE** from month to month. It is not always possible because of limitation of space to include all agreements received each month. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of the employers and workers are also included. Verbally accepted agreements are so indicated.

Manufacturing: Fur and Leather Products

WINNIPEG, MANITOBA. — CERTAIN GLOVE MANUFACTURERS AND THE INTERNATIONAL GLOVE WORKERS' UNION OF AMERICA, LOCAL 90.

Agreements to be in effect from December 28, 1942, for one manufacturer, February 1, 1943, for the others, all to January 1, 1944. The Company recognizes the union and, when requiring additional experienced help, will apply to the union; if none available, others employed are to join the union. No discrimination against employees on account of union activity.

Hours: 8 per day, 4 on Saturday, a 44-hour week. Overtime is payable at time and one-quarter; work on Sundays and holidays, time and one-half. Wage rates are piece work rates agreed upon between the union and the employer, and the union agrees that this schedule be recognized throughout the Winnipeg glove industry as a whole; for samples, etc., cut on time work, at least 50 cents per hour for cutters, 40 cents for operators. Provision is made for division of work in the slack season, and for the settlement of disputes.

Manufacturing: Textiles and Clothing

MONTREAL, QUEBEC.—THE ASSOCIATED CLOTHING MANUFACTURERS OF THE PROVINCE OF QUEBEC, INC., AND THE AMALGAMATED CLOTHING WORKERS OF AMERICA, MONTREAL JOINT BOARD.

Agreement in effect from July 1, 1941, to July 1, 1944. This agreement continues the conditions of the previous agreement which was summarized in the **LABOUR GAZETTE**, October 1940, page 1070, with certain new conditions.

Bonus: Instead of the 10 per cent bonus prevailing previous to July 1, 1941, a 20 per cent war bonus was made effective if and when incorporated by Order in Council into the agreement for this industry under the Collective Agreement Act. (This was done in the Order in Council noted in the **LABOUR GAZETTE**, August, 1941, page 1008.) Wages: Either party may request a revision in wages and conditions between March 1 and March 15 of any year,

whereupon a joint conference board will meet to decide on any such requests.

Manufacturing: Printing and Publishing

VICTORIA, B.C.—TWO NEWSPAPERS AND THE INTERNATIONAL TYPOGRAPHICAL UNION, LOCAL 201.

Agreement to be in effect from July 7, 1941, from year to year, subject to notice. Only union members to be employed. Hours: 7½ per shift, a 45-hour week for both day and night workers; overtime at time and one-half; work on Sundays or holidays at double time. Hourly wage rates: \$1.13½ for day work; \$1.21½ for night work. Vacation: One week with pay to employees with one year's service.

VICTORIA, B.C.—CERTAIN JOB PRINTING FIRMS AND THE INTERNATIONAL TYPOGRAPHICAL UNION, LOCAL 201.

Agreement to be in effect from September 1, 1941, to August 31, 1943, and thereafter from year to year, subject to notice. Hours: 8 per day, 4 on Saturdays, a 44-hour week. Overtime at time and one-half until midnight and double time thereafter; work on Sundays and holidays, double time. Hourly wage rates: \$1.08½ for day work, \$1.16½ for night work. Vacation: One week with pay to employees with one year's service. Apprentices to serve six years and to be paid from \$12 per week during second year to \$32 during sixth year.

Manufacturing: Metal Products

CAMPBELLTON, N.B.—A CERTAIN FOUNDRY AND THE INTERNATIONAL ASSOCIATION OF MACHINISTS, LOCAL 1456.

Agreement to be in effect from December 15, 1942, to December 15, 1943, and thereafter from year to year, subject to notice. The employer recognizes the union as the bargaining agency for its members. Regular working hours, rates of pay and cost of living bonus were to be prescribed by the Regional War Labour Board. Overtime is payable at time and one-half. Provision is made for seniority rights and for the settlement of grievances.

TORONTO, ONTARIO.—A CERTAIN MANUFACTURER OF SHEET METAL AND ENAMELWARE PRODUCTS AND THEIR EMPLOYEES WHO ARE REPRESENTED BY THE UNITED STEEL WORKERS OF AMERICA, LOCAL 1111.

Agreement to be in effect from December 17, 1942, to December 31, 1943, and thereafter from year to year, subject to notice. All employees who are members of the union or who shall become members, shall remain members during the life of this agreement.

Hours: The hours vary with the shift and the

department, from a 40 to a 48-hour week; any employee required to work more than the stipulated hours per day or per night to be paid time and one-half for the first four hours and double time thereafter; double time for work on Sundays and legal holidays. Wages: Established piece work rates will not be altered except by mutual agreement or change in the method of manufacture. Any change in wage rates will be subject to the approval of the Regional War Labour Board. Any alleged unfairness as to wages, etc., will be dealt with in accordance with the grievance procedure. Vacation: One week's vacation with pay to all employees with two years' seniority. Provision is made for seniority rights and for the settlement of grievances.

TORONTO, ONTARIO.—A CERTAIN MANUFACTURER OF TIN CANS, ETC., AND THEIR EMPLOYEES WHO ARE REPRESENTED BY THE UNITED STEEL WORKERS OF AMERICA, LOCAL 2514.

Agreement to be in effect from December 21, 1942, to December 31, 1943, and thereafter from year to year, subject to notice. This agreement is similar to the agreement noted above for the sheet metal and enamelware plant of this same company, except that a 48-hour week prevails throughout the plant as the standard day shift.

TORONTO, ONTARIO.—A CERTAIN METAL PRODUCTS FACTORY AND THE UNITED STEELWORKERS OF AMERICA, LOCAL 2808.

Agreement to be in effect from December 16, 1942, to December 15, 1943 (or 1944 if no notice given by either party); the agreement may also be terminated on 60 days' notice after the cessation of hostilities. The company will deal with a union committee. No discrimination by the company against any employee for being a union member, and the union will not coerce employees into membership.

Hours: 8 per day, 4 on Saturdays, a 44-hour week for all shifts, with a lunch period of 20 minutes allowed on each shift. Overtime is payable at time and one-half; work on Sundays and holidays at time and one-half. The wage scale is not part of the agreement but it is agreed that wage rates may be changed as circumstances require or upon a government order. A cost-of-living bonus is payable in accordance with the federal government 1941 Order in Council 8253 and amendments. An incentive bonus scheme is in effect. Provision is made for seniority rights and for the settlement of disputes.

KITCHENER, ONTARIO. — DOMINION TRUCK EQUIPMENT CO. LTD., AND THE UNITED STEEL WORKERS OF AMERICA, LOCAL 2429.

Agreement reached through conciliation by an officer of the Department of Labour. Agreement to be in effect from October 8, 1942, for the duration of the war, except that one month's notice may be given by either party at any time after October 1, 1943. The Company recognizes the union as the sole bargaining agent for employees of the Company, and there will be no discrimination by the Company or employees because of union activity or the lack of it by any employees. All new employees must join the union, but present employees are not compelled to join.

Hours: 9 per day, 5 on Saturdays, a 50-hour week. Overtime is payable at time and one-half; work on Sundays and holidays at time and one-half. For all work on night shift (10 hours per night for 5 nights per week), time and one-tenth to be paid. Hourly wage

rates: junior workers (those under 21 years of age) 20 cents during first four weeks to 35 cents after 12 weeks; labourers and helpers 45 cents for 30 days and 50 cents thereafter; skilled employees (mechanics, machinists, welders, body builders, maintenance men, painters and blacksmiths) 60 cents to start, with increases according to merit, ability and skill. Cost-of-living bonus: the bonus being paid at the time the agreement was made was \$3.10 a week to those earning \$25 per week or over and 12-4 per cent of weekly wages of all other employees; this bonus to be increased or decreased in accordance with the provisions of Orders in Council. Vacation: one week annually to employees with at least one year's service. Provision is made for seniority rights and for the settlement of grievances.

CHATHAM, ONTARIO.—CHRYSLER CORPORATION OF CANADA, LIMITED, AND THE INTERNATIONAL UNION OF UNITED AUTOMOBILE, AIRCRAFT AND AGRICULTURAL IMPLEMENT WORKERS OF AMERICA, LOCAL 127.

Agreement reached following a report of a board under the Industrial Disputes Investigation Act (LABOUR GAZETTE, Nov. 1942, p. 1267, and this issue, p. 196).

Agreement to be in effect from December 23, 1942, to November 30, 1943, and thereafter from year to year, subject to notice. The company recognizes the union as bargaining agent for its members. Employees are free to join or not to join any union or association; no discrimination by the company or union members against any employee for being or not being a union member.

Hours: at the time of signing the agreement, regular hours were 8 per day, 4 on Saturdays, a 44-hour week; time and one-half for overtime and for work on Sundays and holidays. Employees regularly engaged on the second or third shift receive 5 per cent extra pay. Provision is made for seniority rights and employees leaving the plant to serve in the armed forces are to accumulate seniority during their absence and be re-employed on their discharge from the armed forces, if work is available. Provision is made for the settlement of grievances.

WINDSOR, ONTARIO.—GOTFREDSON, LIMITED, AND THE INTERNATIONAL UNION, UNITED AUTOMOBILE, AIRCRAFT AND AGRICULTURAL IMPLEMENT WORKERS OF AMERICA, LOCAL 195.

Agreement reached through intervention of an Industrial Disputes Inquiry Commissioner, as noted on page 197 of this issue. Agreement to be in effect from November 1, 1942, to November 1, 1943, and thereafter from year to year, subject to notice. The company recognizes the union as the bargaining agency for its members. The employees are free to join or not to join any union or association; no discrimination by the company or by union members against any employee for being or not being a union member. While existing legislation remains in force affecting wages, bonuses, etc., both parties agree not to make application to the Regional or National War Labour Board until the matter has been discussed between the parties. Seniority rights are provided for, and employees leaving the plant to serve in the armed forces will accumulate seniority during such absence and be re-employed on their discharge, if work is avail-

able. Provision is made for the settlement of grievances.

CALGARY, ALBERTA.—RIVERSIDE IRON WORKS LTD. AND THE HOURLY RATED EMPLOYEES IN THE FOUNDRY DEPARTMENT, MEMBERS OF INTERNATIONAL MOULDERS AND FOUNDRY WORKER'S UNION, LOCAL 360, REPRESENTED BY A COMMITTEE OF EMPLOYEES.

Agreement reached following the report of the board under the Industrial Disputes Investigation Act. (LABOUR GAZETTE, January 1943, page 71). Agreement to be in effect from January 26, 1943, for the duration of the war, and thereafter from year to year, subject to notice. No discrimination by the company or union members on account of union membership or non-membership.

Hours: 8 per day, 44 per week. Overtime is payable at time and one half for the first four hours and double time thereafter; double time for work on holidays and on Sunday or the day following six consecutive shifts. The agreement does not restrict either party from applying to the Regional War Labour Board for revision of existing wage rates or working conditions. The full cost of living bonus will be paid to all employees in accordance with Dominion Government Orders in Council. The present incentive bonus scheme and method of distribution to remain in effect, any modification of such scheme to be approved by the Regional War Labour Board. Apprenticeship is for five years. Provision is made for the settlement of disputes.

Manufacturing: Shipbuilding

OWEN SOUND, ONTARIO.—A MANUFACTURER OF TUGS AND BARGES AND THE UNITED STEELWORKERS OF AMERICA.

Agreement to be in effect from December 16, 1942, to December 31, 1943, and thereafter from year to year, subject to notice. The company recognizes the union as the sole bargaining agency for hourly rated employees. No discrimination by the company or union members against any employee on account of union activity or membership.

Hours: 10 per cent, 5 on Saturdays, a 55-hour week, until June 30, 1943; from July 1, 1943, hours to be 9 per day, 5 on Saturdays, a 50-hour week. Overtime is payable at time and one half; work on Sundays and holidays, double time. Wages: the company to meet a committee of the union to reclassify jobs throughout the plant and to set wage rates, this wage scale to be submitted jointly to the Regional War Labour Board. Vacation: one week's vacation with pay to employees with one year's service or more. Provision is made for seniority rights and for the settlement of grievances.

VANCOUVER, B.C.—NORTH VAN SHIP REPAIRS LTD., AND THE INTERNATIONAL UNION OF OPERATING ENGINEERS, LOCAL 115.

Agreement in effect from January 2, 1942, for the duration of the war and wartime contracts. This agreement is similar to the one in effect between the Burrard Dry Dock Co. Ltd., and the National Union of Operating Engineers (LABOUR GAZETTE, June, 1940, page 606), the basic hourly rate for hoisting

engineers being 90 cents, \$1 on floating derricks, with a cost of living bonus.

VICTORIA, B.C.—YARROWS, LTD., VICTORIA MACHINERY DEPOT, Co., LTD., AND THE NATIONAL UNION OF MACHINISTS, FITTERS AND HELPERS, LOCAL No. 2.

Agreements to be in effect from May 5, 1942, for the duration of the war and wartime contracts. Only union members to be employed, if available.

Hours: 8 per day, 44 per week for day work; for second shift $7\frac{1}{2}$ hours' work with 8 hours' pay; for third shift 7 hours' work with 8 hours' pay; a 40-hour week for second and third shift. Overtime is payable at time and one half; thereafter at double time; work on Sundays and holidays, double time. Time and one quarter for all dirty work or work in confined spaces full of gas or wet paint fumes. Hourly wage rates: machinists 90 cents, improvers 75 cents, helpers 50 to 60 cents, cranemen 67 to 90 cents, compressor engineer 72 cents. A cost of living bonus to be paid in accordance with the 1941 Order in Council P.C. 8253. For work at outside points, travelling time, fare and board to be paid by employer. The company agree to endeavour to settle any dispute with the employees' committee.

Supplementary agreements, also dated May 5, 1942, with reference to the continuous operation plan, are the same as the agreement summarized below for Vancouver and Victoria shipyards.

NANAIMO, B.C.—NEWCASTLE SHIPBUILDING Co. LTD., AND AMALGAMATED BUILDING WORKERS OF CANADA, NANAIMO UNIT No. 1 (SHIPWRIGHTS, ETC.).

Agreement to be in effect from January 14, 1943, for the duration of the war and wartime contracts. If the union is unable to supply competent mechanics, non-union men may be hired and the union agrees to accept such a man.

Hours: 8 per day, a 44-hour week for day work; $7\frac{1}{2}$ per shift with pay for 8 hours, a 40-hour week for second shift except on emergent war work when 44 hours may be worked; 7 per shift with pay for 8 hours, a 40-hour week for third shift. Overtime at time and one half for first four hours and double time thereafter; double time for work on Sundays and holidays. Hourly wage rates: carpenters, joiners and shipwrights 90 cents; caulkers 93 cents; leading hands \$1; painters 85 cents; electricians \$1; improvers 80 cents; mechanics' helpers 72 cents; general labourers 55 cents; these rates to be subject to adjustment quarterly with changes in the cost of living. Time and one quarter for all dirty work.

VANCOUVER AND VICTORIA, B.C.—CERTAIN SHIPBUILDING AND SHIP REPAIR FIRMS AND VARIOUS UNIONS AS LISTED BELOW.

Supplementary agreements were made in April, 1942, between shipyards and the unions listed below, which are supplementary to the original agreements and amendments to which reference is made in each case. The supplementary agreements provide for the operation of the shipyards for three shifts a day, seven days a week. Individuals to work six shifts consecutively and to have the seventh shift off.

Hours for day shift: 8 per shift, a 48-hour week, with time and one half for the last four hours of the sixth shift paid at time and one half, which makes weekly wages equivalent to pay for 50 hours. Hours for second shift: 7½ per shift, a 46-hour week, with pay for 54 hours. Hours for third shift: 7½ hours, a 43-hour week, with pay for 54 hours. Overtime: time and one half for first four hours and double time thereafter. After six consecutive shifts, if any worker is required to work a seventh shift, double time rates to be paid; double time for work on three holidays.

This same agreement was made by shipyards and each of the following unions (References to publication of the original agreements and amendments in the LABOUR GAZETTE are given for each):

VANCOUVER—BOILERMAKERS AND IRON SHIPBUILDERS UNION OF CANADA, LOCAL NO. 1.
LABOUR GAZETTE, Mar., 1940, p. 278; June, 1941, p. 700; Apr., 1942, p. 481, and June, 1942, p. 737.

VANCOUVER—AMALGAMATED BUILDING WORKERS OF CANADA, SHIPYARD SECTION (SHIPWRIGHTS AND CAULKERS).

LABOUR GAZETTE, December, 1941, p. 1570; and October, 1942, p. 1208. In addition to these two agreements, a similar one was made between the union and the Burrard (Vancouver) Dry Dock Co. Ltd., October 1, 1941; the supplementary agreements of April, 1942, affect all three shipyards.

VANCOUVER—AMALGAMATED BUILDING WORKERS OF CANADA, ELECTRICAL WORKERS' SHIPYARD UNIT.

LABOUR GAZETTE, December, 1941, p. 1570; and April, 1942, p. 481.

VANCOUVER—NATIONAL UNION OF OPERATING ENGINEERS NO. 3.

LABOUR GAZETTE, June, 1940, p. 606; and April, 1942, p. 481.

VANCOUVER—BROTHERHOOD OF PAINTERS, DECORATORS AND PAPERHANGERS OF AMERICA, LOCAL 138.

LABOUR GAZETTE, May, 1940, p. 493; and April, 1942, p. 481.

VANCOUVER—INTERNATIONAL ASSOCIATION OF PLUMBERS AND STEAMFITTERS, LOCAL 170.

LABOUR GAZETTE, July, 1940, p. 728; February, 1941, p. 180; and April, 1942, p. 481.

VANCOUVER—SHEET METAL WORKERS' INTERNATIONAL ASSOCIATION, LOCAL 280.

LABOUR GAZETTE, July, 1940, p. 729, and April, 1942, p. 481.

VANCOUVER—THE DOCK AND SHIPYARD WORKERS' UNION OF VANCOUVER AND DISTRICT, LOCAL 2.

LABOUR GAZETTE, June, 1940, p. 607; and April, 1942, p. 481.

VICTORIA—BOILERMAKERS AND IRON SHIPBUILDERS' UNION OF CANADA, LOCAL NO. 2.

LABOUR GAZETTE, May, 1940, p. 493; April, 1942, p. 481. In addition, an amendment was made for one shipyard May 7, 1941, which was

not mentioned in the LABOUR GAZETTE, but which is the same as the amendment of February 24, 1941, to the agreement for boilermakers at Vancouver, which was summarized in the LABOUR GAZETTE, June, 1941, p. 700.

VICTORIA—UNITED BROTHERHOOD OF CARPENTERS AND JOINERS, LOCAL 1598

LABOUR GAZETTE, June, 1941, p. 700; December, 1941, p. 1571; April, 1942, p. 482.

VICTORIA—AMALGAMATED BUILDING WORKERS, SHIPYARD SECTION, LOCAL NO. 1 (SHIPWRIGHTS AND CAULKERS).

LABOUR GAZETTE, February, 1941, p. 180; December, 1941, p. 1571; April, 1942, p. 482.

A further supplementary agreement with one shipyard (Victoria Machinery Depot Co., Ltd.) is dated January 1, 1943, and provides for the employment of improver shipwrights and improver caulkers, if union unable to supply journeymen, at a wage rate of 80 cents per hour plus cost of living bonus; after six months such improvers may be paid at journeyman's rate if they have attained journeyman efficiency, the number of such improvers to be set by the union in consultation with the foreman.

VICTORIA—INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS, LOCAL 230.

LABOUR GAZETTE, April, 1942, p. 481, wherein the effective date of one agreement is given as October 1, 1941; the date of the other shipyard's agreement is June 1, 1941.

VICTORIA—THE DOCK AND SHIPYARD WORKERS, LOCAL 1 (LABOURERS, ETC.).

LABOUR GAZETTE, February, 1941, p. 181; April, 1942, p. 482.

Transportation and Public Utilities: Water Transportation

SAINT JOHN, N.B.—CERTAIN STEAMSHIP COMPANIES AND THE INTERNATIONAL LONGSHOREMEN'S ASSOCIATION, LOCAL 273 (LONGSHOREMEN).

Agreement to be in effect from December 1, 1942, to November 30, 1943, and thereafter from year to year, subject to notice.

Hours: 8 per day or night. Hourly wage rates for day or night work: for handling general cargo, 80 cents, plus a war bonus of 8 cents per hour, or a total of 88 cents per hour, plus a cost of living bonus of 9 cents per hour which is to be adjusted in accordance with the provisions of 1941 Order in Council P.C. 8253; for handling bulk cargoes and certain other cargoes, 10 cents per hour extra. Double time for work during meal hour and until relieved; double time for work on Sundays and holidays and also for Saturday after 1 p.m. between June 1 and September 30. Provision is made for the settlement of disputes.

Transportation and Public Utilities: Air Transportation

TRANS-CANADA AIR LINES AND THEIR EMPLOYEES, REPRESENTED BY INTERNATIONAL ASSOCIATION OF MACHINISTS, LODGE 714 (AIRCRAFT MAINTENANCE MECHANICS, ETC.).

This agreement, which covers aircraft maintenance at all landing fields of the Trans Canada

Air Lines in Canada, is in effect from June 1, 1942, to May 31, 1943, and thereafter subject to notice. This is an amended agreement, the original having been summarized in the *LABOUR GAZETTE*, June, 1941, p. 701. Sub-foreman, tool and die makers, helpers, chauffeurs and janitors are added to the classes of workers covered. Minimum monthly wage rates, based on a 48 hour week, are: crew chief, air engineer and aircraft inspector, \$175 (no change from previous agreement) sub-foreman, tool and die maker, \$175 (not in previous agreement), detail inspector \$165 (formerly \$175), mechanic \$165 (no change), junior mechanic \$120 to \$150 (no change), learners \$60 to \$110 (no change); helper \$120 (not in previous agreement), chauffeurs \$85 to \$110 (not in previous agreement), janitors \$75 to \$95 (not in previous agreement), cleaner \$75 (no change); stockkeeper \$130 to \$140 (formerly \$120 to \$125), shipper and receiver \$120 to \$130 (formerly \$110 to \$115), assistant stockkeeper \$100 to \$115 (formerly \$100 to \$105), issuer \$60 to \$90 (no change).

Vacation: the date on which employees are classified as having a year's service and eligible for a two weeks' vacation (or less service and eligible for a partial vacation) is March 31, instead of June 30. A Co-operative Committee to be set up to work in conjunction with the management on matters requiring joint consideration.

An amendment was made to this agreement from October 1, 1942, to cover the employment of female workers in the maintenance and overhaul department: female workers to start at \$55 a month for the first month (or longer if necessary to determine fitness to be learners); if assigned a cleaner, basic rate will then be \$70; if assigned as a learner, basic rate of \$55, with advancement each six months as for male learners except that female learners are paid \$5 less per month than male learners; in the stores department female issuers or assistant stockkeepers are paid the same rates as male employees if capable of performing the same work.

Collective Agreement Act, Quebec

Recent Proceedings Under the Act

IN Quebec, the Collective Agreement Act provides that where a collective agreement has been entered into by an organization of employees and one or more employers or associations of employers, either side may apply to the provincial Minister of Labour to have the terms of the agreement which concern wages, hours of labour, apprenticeship and certain other conditions made binding throughout the province or within a certain district on all employers and employees in the trade or industry covered by the agreement. Notice of such application is published and thirty days allowed for the filing of objections, after which an Order in Council may be passed granting the application, with or without changes as considered advisable by the Minister. The Order in Council may be amended or revoked in the same manner. Each agreement is administered and enforced by a joint committee of the parties. Further information concerning this legislation is given in the *LABOUR GAZETTE*, January, 1943, page 86. Proceedings under the Act and earlier legislation have been noted in the *LABOUR GAZETTE* monthly since June, 1934.

Recent proceedings under the Act include twenty amendments to agreements, all of which are noted below. A request for the extension of a new agreement for longshoremen (inland navigation) at Montreal was published in the *Quebec Official Gazette*, January 23. Requests for the amendment of certain agreements were published in the *Quebec Official Gazette*, as follows: for the men's and boys' hats and caps industry throughout the Province, and for building trades at St. Jerome, in the issue of January

16; for barbers and hairdressers at St. Hyacinthe, in the issue of January 23; hairdressers at Montreal, retail stores at Quebec, in the issue of January 30.

In addition, Orders in Council were published in the *Quebec Official Gazette* during January, approving or amending the constitution and bylaws of certain joint committees, and others approving the levy of assessment on the parties, or amending previous Orders in Council in this connection by certain other joint committees.

Manufacturing: Printing and Publishing

LITHOGRAPHING INDUSTRY, PROVINCE OF QUEBEC

An Order in Council, dated December 24, and gazetted January 2, extends the terms of this agreement (*LABOUR GAZETTE*, December, 1940, page 1310, and May, 1942, page 631) to January 31, 1943.

Another Order in Council, dated January 22, and gazetted January 30, again extends the term to March 1, 1943.

Construction: Building and Structures

BUILDING TRADES, CHICOUTIMI AND LAKE ST. JOHN DISTRICT

An Order in Council, dated January 22, and gazetted January 30, amends the previous Orders in Council for these trades (*LABOUR GAZETTE*, August, 1941, page 1009, November, page 1425, December, page 1573; and December, 1942, page 1490). In structural steel work, the installation of portable tanks and boilers under two tons in weight, the rate is 58 cents per hour (an increase of 5 cents); for steam generation work (erection of equipment used in the generation of steam), it is now provided that work on direct water heating systems is not included, but on work installing stokers in furnaces with a horizontal heating surface of 20 feet or less 70 cents per hour for mechanics and 47 cents for helpers to be paid, with a 55-hour week.

BUILDING TRADES, QUEBEC CITY AND DISTRICT

An Order in Council, dated January 22, and gazetted January 30, amends the previous Orders in Council for these trades (LABOUR GAZETTE, August, 1941, page 1009, September, 1942, page 1097, and October, 1942, page 1209) by the same amendment as noted above for building trades in Chicoutimi and the Lake St. John district.

BUILDING TRADES, THREE RIVERS

An Order in Council, dated January 13, and gazetted January 16, amends the previous Orders in Council for these trades (LABOUR GAZETTE, May, 1940, page 497, June, page 609, August, page 866; March, 1941, page 334, August, page 1010; September, 1942, page 1097, November, page 1348) by adding another contractor to the parties to the agreement.

Another Order in Council, dated January 22, and gazetted January 30, also amends the previous Orders in Council for these trades by the same amendment as noted above for building trades in Chicoutimi and the Lake St. John district.

BUILDING TRADES, ST. HYACINTHE

An Order in Council, dated January 22, and gazetted January 30, amends the previous Orders in Council for these trades (LABOUR GAZETTE, August, 1940, page 867, December, page 1311; March, 1941, page 334, September, page 1160; September, 1942, page 1097; January, 1943, page 88.) by the same amendment as noted above for building trades in Chicoutimi and the Lake St. John district.

BUILDING TRADES, SOREL

An Order in Council, dated January 13, and gazetted January 16, amends the previous Orders in Council for these trades (LABOUR GAZETTE, October, 1938, page 1172, November, page 1299; December, 1940, page 1311; March, 1941, page 334; June, 1942, page 738, September, page 1097). Three further contractors are added as parties to the agreement. A cost-of-living bonus of 5 cents per hour above the hourly wage rates paid to each employee on November 15, 1941 is made payable; this bonus which was approved by the Regional War Labour Board December 22, 1942, is to continue unchanged until December 22, 1943.

Another Order in Council, dated January 22, and gazetted January 30, also amends the previous Orders in Council for these trades by the same amendment as noted above for building trades in Chicoutimi and the Lake St. John district.

BUILDING TRADES, SHERBROOKE

An Order in Council, dated January 13, and gazetted January 16, amends the previous Order in Council for these trades (LABOUR GAZETTE, October, 1942, p. 1209). A cost of living bonus of 5 cents per hour above the hourly wage rates paid to each employee on November 15, 1941, is made payable; this bonus which was approved by the Regional War Labour Board, November 3, 1942, is to continue unchanged until November 3, 1943.

Another Order in Council, dated January 22, and gazetted January 30, corrects the Order in Council which was summarized in the LABOUR GAZETTE, October, 1942, p. 1209, by changing the wage rate for the installation of portable tanks and boilers under 2 tons in weight from 53 to 58 cents per hour.

BUILDING TRADES, JOLIETTE

An Order in Council, dated January 22, and gazetted January 30, amends the previous Orders in Council for these trades (LABOUR

GAZETTE, May, 1940, p. 498; March, 1941, p. 334; June, 1942, p. 738, Sept., p. 1097). A cost of living bonus of 5 cents per hour above the hourly rates paid to each employee on November 15, 1941, is made payable; this bonus, which was approved by the Regional War Labour Board November 24, 1942, is to continue unchanged until Nov. 28, 1943.

Another Order in Council, dated January 22, and gazetted January 30, also amends the previous Orders in Council for these trades by the same amendment as noted above for building trades in Chicoutimi and the Lake St. John district.

BUILDING TRADES, ST. JOHN AND IBERVILLE

An Order in Council, dated January 22, and gazetted January 30, amends the previous Orders in Council for these trades (LABOUR GAZETTE, Nov., 1938, p. 1299; March, 1940, p. 283; March, 1941, p. 334, Aug., p. 1011, Dec., p. 1490) by the same amendment as noted above for building trades in Chicoutimi and the Lake St. John district.

BUILDING TRADES, ST. JEROME AND TERREBONNE COUNTY.

An Order in Council, dated January 22, and gazetted January 30, amends the previous Orders in Council for these trades (LABOUR GAZETTE, May, 1940, p. 499; May, 1939, p. 529; March, 1941, p. 334, Sept., p. 1160, Dec., p. 1573; Sept., 1942, p. 1097, Nov., p. 1348) by the same amendment as noted above for building trades in Chicoutimi and the Lake St. John district.

BUILDING TRADES, HULL

An Order in Council, dated January 13, and gazetted January 16, amends the previous Orders in Council for these trades (LABOUR GAZETTE, July, 1938, p. 798, Nov., p. 1300; March, 1939, p. 335, Oct., p. 1066, Dec., p. 1280; Feb., 1940, p. 172; March, 1941, p. 334, Aug., p. 1012, Dec., p. 1573; Sept., 1942, p. 1097). A cost of living bonus of 5 cents per hour above the hourly rates paid each employee on November 15, 1941, is made payable; this bonus, which was approved by the Regional War Labour Board, November 18, 1942, is to continue unchanged until November 1, 1943.

Another Order in Council, dated January 22, and gazetted January 30, also amends the previous Orders in Council by the same amendment as noted above for building trades in Chicoutimi and the Lake St. John district.

BUILDING TRADES, VAL D'OR AND AMOS

An Order in Council, dated January 13, and gazetted January 23, extends to February 11, 1944, the duration of this agreement (LABOUR GAZETTE, June, 1941, p. 704, Oct., p. 1315, Dec., p. 1573; March, 1942, p. 353 and Sept., p. 1097).

Trade**CLERKS AND BOOKKEEPERS, JONQUIERE, KENOGAMI, ARVIDA AND ST. JOSEPH D'ALMA**

An Order in Council, dated January 13, and gazetted January 16, amends the previous Orders in Council for these workers (LABOUR GAZETTE, July, 1939, p. 730; Jan., 1940, p. 69, Oct., p. 1076, Nov., p. 1203, Dec., p. 1312; Feb., 1941, p. 184, March, p. 234; June, 1942, p. 739).

Hours in commercial establishments in Jonquière, Kenogami and Arvida are reduced from 63 to 57 per week, dairies from 70 to 60 hours. A paid vacation of one day for every year's service up to 7 days is granted. Telephone operators are no longer included in the agreement.

Industrial Standards Acts, Etc.

Schedule of Wages and Hours Recently Approved by Provincial Orders in Council in Ontario and Saskatchewan

IN six provinces—Ontario, Alberta, Nova Scotia, Saskatchewan, New Brunswick and Manitoba—legislation provides that, following a petition from representatives of employers or employees in any (or specified) industries, the provincial Minister charged with the administration of the Act may himself, or through a government official delegated by him, call a conference of representatives of employers and employees. This conference is for the purpose of investigating and considering the conditions of labour in the industry and of negotiating minimum rates of wages and maximum hours of work. A schedule of wages and hours of labour drawn up at such a conference, if the Minister

considers that it has been agreed to by a proper and sufficient representation of employers and employees, may on his recommendation be made binding by Order in Council in all the zones designated by the Minister. The Minister may also establish an advisory committee for every zone to which a schedule applies to assist in carrying out the provisions of the Act and the regulations. References to the summaries of these Acts and of amendments to them are given in the *LABOUR GAZETTE*, October, 1940, page 1077. Schedules of wages and hours recently made binding by Orders in Council under these Acts are summarized below.

Ontario

Manufacturing: Miscellaneous Wood Products

HARD FURNITURE INDUSTRY, PROVINCE OF ONTARIO.

An Order in Council, dated January 5, and gazetted January 9, makes binding throughout the Province of Ontario the terms of a new schedule of wages and bonus for the hard furniture industry, from October 16, 1942, to October 15, 1943. This schedule is similar to the one previously in effect (*LABOUR GAZETTE*, March, 1940, p. 285, Dec., p. 1313; April, 1941, p. 474, Nov., p. 1427; Feb., 1942, p. 234) with

this exception: Provisions for a cost of living bonus are replaced by a new clause by which, in conformity with the Federal Government 1942 Order in Council P.C. 5963, the cost of living bonus is \$4.25 per week of 47 hours is payable to all adult male employees and all employees receiving \$25 per week or more, and a bonus of 17 per cent of weekly wages (exclusive of overtime) is payable to all female employees and all male employees under 21 years of age, who earn less than \$25 per week. This bonus is to be adjusted in accordance with the Federal Government orders. Female employees are now included and are in class "B".

* **Saskatchewan**

Trade

COAL AND WOOD INDUSTRY, REGINA

An Order in Council, dated December 23, 1942, and gazetted January 15, 1943, amends

the previous Orders in Council for this industry (*LABOUR GAZETTE*, Nov., 1940, p. 1204, and Oct., 1941, p. 1318) by changing the daily hours to 10 per day, Monday to Friday, and 5 hours on Saturday; the provisions for a working week of 54 hours, however, is unchanged.

U.S. Women's Bureau Advocates "Equal Pay" Principle

THE United States Women's Bureau has published a bulletin entitled *Equal Pay for Women in War Industries*. In favour of the principle it is argued that "light work" done by women often involves considerable skill, that their output compares favourably with men's and that many women have dependents. As regards the contention that women should be paid lower rates because they require more supervision, additional lifting and carrying devices or plant adjustments to conform with labour laws relating specifically to women, it is considered that any new body of workers requires such adjustments and supervision.

While not denying that women have higher absenteeism and turn-over rates, the Bureau stresses that both could be reduced by im-

proved conditions of work and indicates plants where the absenteeism rate for women is no higher than for men.

A survey of current practice in war industries revealed that the principle of "equal pay" is being applied most extensively in industries such as aircraft where women were not employed in substantial numbers before the present emergency. In most ammunition and some machine-tool plants, women's entrance rates were well below men's, but in some cases the rate for the job was paid in the higher classifications.

The recent endorsement of "equal pay" by the National War Labour Board in its decision on the General Motors cases is appended to the bulletin.

War Emergency Training Program

Statistical Summary for January, 1943

AT the end of January, 1943, a total of 20,988 persons were training in the classes being carried on under the Dominion-Provincial War Emergency Training Program. This represents an increase of 5,889, as compared with the end of April, the first month of the fiscal year, when the total enrolment under the program was 15,099.

The increase in the enrolment as at the end of January is accounted for largely by the greater number of persons now receiving training in part-time classes and plant schools, and a steady increase in the enrolment in Air Force and Navy classes. In the part-time classes to increase the skill of persons already employed in war industry or to fit persons presently employed in non-essential industries for the time when they will be required to change over to war work, there were enrolled at the end of January 4,946, composed of 4,142 men and 804 women. At the end of April, 1942, the enrolment in these part-time classes was 1,871, which included 1,582 men and 289 women. There have not, however, been as many applications for training from persons employed in non-essential industries as was expected.

In the R.C.A.F. classes the enrolment has increased from 5,179 at the end of April, 1942, to 6,991 at the end of January. In April, 1942, 1,279 trainees from R.C.A.F. classes completed their training as compared with 1,342 during the month of January.

The total enrolment in Navy classes at the end of April, 1942, was 178 and this has shown a steady increase up to the end of January, 1943, when there were 942 enlisted Navy men under training.

At the end of January there were fewer men enrolled in the Army classes than on the same date last year. The enrolment fell off to 1,851 at the end of July, 1942, but there has been an increase since that time so that at the end of January there were

2,700 enrolled in the classes. The number enrolled in Army classes at the end of April, 1942, was 2,428.

While there has been an increase in the part-time classes, and Air Force and Navy classes, the enrolment in the full-time pre-employment classes was considerably lower at the end of January than at the end of April, 1942. In the full-time pre-employment classes the total enrolment of men has decreased from 3,558 at the end of April, 1942, to 2,382 at the end of January. The enrolment in women's industrial classes also shows a slight decrease from 1,341 at the end of April, 1942, to 1,259 at the end of January, 1943.

One of the contributing factors in the larger total enrolment under the program at the end of January as compared with that at the end of April, 1942, is the steady increase in the numbers under training in approved plant schools. At the end of January, a total of 73 plant schools had received approval under the War Emergency Training Program and at that time there were under training in the schools 810 men and 727 women. At the end of April, 1942, there were 349 men and only 22 women in approved plant schools.

War Emergency Training Conference

A conference of the Regional Directors of the War Emergency Training Program and other interested officials in the provinces is to be held in Ottawa, February 25 and 26. At this meeting matters concerning the administration of the program will be discussed and plans for the coming year developed. Similar conferences of War Emergency Training officials were held during the two previous years in which the program has been in operation and proved of much value in the exchange of ideas and establishment of procedure.

Recommendations for Industrial Medical Service

THE New York State Department of Labour has recently published in its Industrial Bulletin three articles on the subject of medical services for large industrial plants. Stress is laid on the preventive aspects of plant medical work and on the value of pre-employment examinations supplemented by periodic examinations.

Matters to be considered in choosing the location of medical department are accessibility to workers, lighting, freedom from noise, opportunity for expansion, etc. The equipment for both a one-room and a three-room dispensary is described. As serious cases should be removed to hospital without delay, the treatment room is primarily for looking after minor injuries. Additional facilities suggested for the large plant are a clinical laboratory and X-ray dental, eye, and physio-therapy departments.

If the physician is to develop a preventive program he should be employed full-time or part-time. He should have a general knowledge of industrial relations, working conditions, sanitation, occupational diseases, accident prevention, workmen's compensation, methods of rehabilitation, and the transport, housing, recreational and educational facilities in the community. He must know the hazards of the substances and processes used and must be keenly interested in preventive work.

The industrial nurse requires special knowledge of public health, social case work, personnel administration, nutrition, industrial hazards, mental and personal hygiene, etc. She should be able to take charge of the medical room when the part-time physician is absent, supervise lunch-rooms, health and safety education, do follow-up work in remedying physical defects, keep accurate records and undertake home visiting.

An adequate medical service should include nutrition, health and safety education, accident prevention, sanitation, ventilation and lighting, and the prevention of fatigue. Attention should be given to the control of respiratory diseases which account for over 40 per cent of all sickness according to the United States Public Health Service.

Pre-employment medical examinations should weed out persons whose employment might be hazardous for themselves, other workers or the job. A recent survey based on such examinations revealed that the rejection rate was only 4.4 per cent. Persons with physical defects are not rejected if work suitable for them is available, and the medical department attempts to correct defects. For those exposed to toxic substances examinations are necessary at intervals of one to six months depending on the severity of the exposure. In other cases biennial examinations are usually sufficient for workers under 45, and annual for those over 45.

Attention should be given to the prevention of industrial fatigue which may result from excessive hours, monotony, irregular shifts, heavy lifting, defective posture, poor health and malnutrition, poor physical and psychological adaptation to the job, etc. It may also be due to defective ventilation and lighting, inadequate sanitary facilities, extremes of temperature, lack of drinking water and proper food, home worries and long journeys to work. An adjustment of hours and shift schedules may help to reduce fatigue. However, the article declares,

"It is impossible to state what optimum working hours are since they differ under different conditions and for different types of work, but experience has shown that increasing the hours of work beyond a certain point does not result in correspondingly increased production..."

Rest periods with opportunities for refreshment and exercise or relaxation can reduce fatigue. Shift systems should be arranged so as to minimize interference with sleeping habits. Too frequent rotation of shifts is discouraged. Other suggestions for preventing fatigue are to reduce noise, provide hot lunches in plant cafeterias, organize recreation, and arrange work benches at proper heights for correct posture and to permit both sitting and standing at work. Workers not adapted to their jobs should be transferred to others and they should be made to feel that their welfare is being considered and their job worth-while.

Activities of the Unemployment Insurance Commission

Meeting of the National Employment Committee—Insurance Registration—Claims for Benefit

THE gravity of the farm labour situation and the importance to the war effort of increasing production from Canadian farms has prompted the National Employment Committee of the Unemployment Insurance Commission to recommend that agricultural representatives be added to the membership of all its Committees throughout Canada. The recommendation calls for the addition of an agricultural representative to National, Regional and Local Committees. About 46 Committees located throughout Canada are affected.

The National Committee held its seventh meeting on Monday, February 8th, under the Chairmanship of Commissioner R. J. Tallon, who is Acting Chairman during the illness of Mr. Tom Moore. Those in attendance were Mr. A. R. Mosher, Ottawa, Mr. Carl Berg, Edmonton, Mr. Geo. S. Hougham, Toronto, Mr. E. R. Complin, Montreal, Mr. Ivor Lewis, Toronto, Miss M. Wherry, Montreal, Mr. J. C. G. Herwig, Ottawa, and Dr. Geo. F. Davidson, Ottawa.

Dr. Davidson and Miss Wherry were substituting for Mrs. C. H. Thorburn, O.B.E., Ottawa, and Mrs. Florence Martel, Montreal, respectively.

Another decision of the Committee, which is advisory to the Unemployment Insurance Commission and the Director of National Selective Service, was to recommend the appointment in the near future of a qualified man to head up the work of the Commission in respect to handicapped men. At the present time provision is made at the main offices of the Commission for dealing with handicapped men from the point of view of interview, placement, etc. There has not yet been established a special section for this work at the Head Office of the Commission. The view of the Committee was that such a section should be established without delay.

The decision in respect to a handicapped section was reached following statements to the Committee by Major A. M. Wright, Director of Rehabilitation, Department of Pensions and National Health, and Mr. A. W. Crawford, Superintendent of Vocational Training for that Department.

These officers gave the Committee a review of what is being done and planned for care of handicapped men in the Armed Services. The need for action so as to tie up the work of the Department of Pensions with that of the Unemployment Insurance Commission and National Selective Service was emphasized. It was pointed out that if handicapped men could be interviewed in hospital, as soon as their condition would permit, as to what employment they could take when released from hospital, they were much less likely to become discouraged and depressed.

The National Employment Committee went on record as favouring the issue of more informative and explanatory literature dealing with National Selective Service Regulations. It was represented that the "Worker's Handbook" should be revised and re-issued. Short explanatory radio broadcasts were suggested in order to acquaint the public, particularly those affected by National Selective Service Regulations, with the meaning of the Regulations. It was recommended that any handbook summarizing the Regulations should be submitted to the Committee before being issued.

The Committee will hold its next meeting early in March.

Insurance Registration

Reports from Local Offices of the Unemployment Insurance Commission showed that at February 1, 1943, 163,531 employers establishments and 3,594,744 persons were registered. Of the persons registered, 2,848,306 were insurable and 746,438 were uninsurable.

The insurable group consisted of insurable employees of registered firms and unemployed persons whose last employment was insurable. The other group of persons registered included employees of registered firms not coming within the coverage of the Act, and partners and proprietors of these firms. Also forming a part of this group were persons unemployed at date of registration whose last employment was uninsurable and women between the ages of twenty and twenty-four not engaged in insurable employment at the time of the recent registration.

Claims for Benefit

The amount paid in claims for unemployment insurance benefit during the period from February 1 to December 31, 1942, was \$349,655. In this period 24,206 claims were received for adjudication at the nine offices of the Commission, of which 17,883 claims were allowed, 5,137 claims were not allowed, with 1,186 claims pending.

An analysis of the 5,137 claims not allowed by insurance officers reveals the following reasons for non-allowance: 1,793 claims under Section 28 (i) with insufficient contributions; 167 claims under Section 28 (ii) in which 111 applications were not made in the prescribed manner, and 56 of the claimants were not unemployed; 112 claims under Section 28 (iii) in which 74 claimants were not capable of work, and 38 were not available for work; 53 claims under Section 43 (a) for loss of work due to labour disputes; 39 claims under Section 43 (b) (i) for refusal of an offer of work; 37 claims under Section 43 (b) (ii) for neglect of opportunity to work; 1 claim under Section 43 (b) (iii) for failure to carry out written directions; 2,902 claims under Section 43 (c) in which 581 were disqualified because they were discharged due to their own misconduct and 2,321 were disqualified

for voluntary leaving without just cause; 6 under Section 43 (d) for being under 16 years of age; 2 under Section 43 (e) for being inmates of prison, etc.; 25 under Section 43 (f) for being in class "O" contributions.

Appeals and References

During the period from February 1, to December 31, 1942, there were 413 references and 30 appeals made by claimants, to Courts of Referees. In addition there were 13 references by insurance officers to Courts of Referees. Of the 456 references and appeals, 351 were heard, 63 have not yet been heard, and 42 were withdrawn. The Courts of Referees disallowed 286 claims and allowed 65. (See page 233).

Appeals to Umpire

Three claimants have sought permission from the Chairman of the Courts of Referees to appeal to the Umpire under Section 58 (c) (ii). Two of the requests to appeal were refused and 1 was granted. In addition, one other appeal was made by a claimant or association on behalf of the claimant. Of the two appeals reaching the Umpire, 1 has been heard and disallowed and the other has not yet been heard.

¹ *Initial Claim:* this is the first application for insurance benefit within a Benefit Year, filed with a Local Office. As a result of the Initial Claim, if the first Statutory Condition be proven therein, the Benefit Year will be established.

² *Renewal Claim:* this is an application for insurance benefit which may be required during a Benefit Year, where the Initial Claim, or the Initial Claim and the succeeding Continuing Claims, have been followed by an interruption of some length of time by reason of:—

- (a) applicant having secured insured employment;
- (b) applicant having secured non-insured employment;
- (c) temporary suspension of benefit rights.

Trade Union Membership in Britain in 1941

THE British Ministry of Labour Gazette reports that the total membership of trade unions in Great Britain and Northern Ireland in 1941 reached 7,090,000, an increase of 8.4 per cent over the previous year. The most striking increase was in the number of women members which rose by 26.8 per cent to 1,372,000. The general labour unions and those recruiting workers in the national Government services reported the largest gains in female membership. Male membership increased chiefly in the unions in the engineering and metal industries and in the general labour unions. It rose from 5,460,000 in 1940 to 5,718,000 in 1941, a 4.7 per cent gain.

The membership figures were compiled from information supplied to the Registrar of Friendly Societies by trade unions registered under the Trade Union Acts of Britain and Northern Ireland, and from returns made by unregistered unions to the Ministry of Labour and National Service. They cover all organizations of workers which endeavour to regulate conditions of employment through negotiating with employers and include organizations of

salariated and professional workers as well as of manual wage-earners. Trade union members in the Armed Forces and overseas members of unions with head offices in Britain or Northern Ireland are included in the totals but members of organizations with head offices elsewhere are excluded.

The number of unions in 1941 dropped from 989 to 983. Thirteen were reported as dissolved and seven new unions were formed. Federations of trade unions remained at 56 and net federated membership was approximately 2,467,000 in both 1940 and 1941. The Trades Union Congress had 5,432,000 members. Further details concerning the Trades Union Congress were reported in the January LABOUR GAZETTE, p. 89.

Over 55 per cent of all trade union members belonged to 14 unions, each of which had a membership of 100,000 or more, and 78 per cent of the membership was accounted for by 46 unions with 25,000 or more members each. Of the 983 unions in existence, 768 or 78.2 per cent had 2,500 members or less.

Employment and Unemployment

Summary

IN the Employment and Unemployment section of the *LABOUR GAZETTE*, information regarding the employment situation in Canada is based upon reports from the following sources:

The employment situation at the beginning of December, as reported by employers.

—The Dominion Bureau of Statistics receives each month reports from firms employing fifteen or more employees. These firms represent practically all industries except agriculture, fishing, hunting and highly specialized business operations.

The Bureau has been receiving these reports for many years; hence, although the figures given show considerably less than the total number of persons employed in Canada, they give a valid picture of the *trend* of employment in Canada over a period of years.

This month's article shows that there were further important increases in industrial employment at the beginning of December, when the staffs of the 13,322 co-operating employers aggregated 1,867,597, as compared with 1,836,070 at November 1, 1942. The expansion was greater than at December 1 in any earlier year in which the trend at that date was upward; normally, there is a decline at the beginning of December.

The index number of employment (based on the 1926 average as 100) rose from 183.3 in the preceding month, to 186.5 at December 1. This compared with 168.8 at the same date in 1941, previously the maximum for December in the period since 1920. At the outbreak of war it stood at 119.6.

The same employers also submit each month information regarding payrolls, which is incorporated in this article.

The per capita average wage in the Canadian industries submitting returns rose from \$29.81 a week in the last report to \$30.03 at December 1, 1942. The figure for December 1, 1941, had been \$27.32.

Employment conditions at the end of January as reported by Employment and Selective Service Offices.—Reports from the Employment and Selective Service Offices of the Unemployment Insurance Commission give a brief survey of the employment situation at

the end of January. These reports describe employment conditions in the Maritimes, Quebec, Ontario, the Prairie Provinces, and British Columbia. This article, and the one following, were formerly included in the article, *Activities of the Unemployment Insurance Commission*.

Applications for employment, vacancies and placements, December.—From the Employment and Selective Service Offices of the Unemployment Insurance Commission come reports showing the number of positions reported as vacant across the Dominion, together with the number of applications for employment and the number of placements effected.

Reports received from Employment and Selective Service offices during December, 1942, indicated a pronounced decline in business transacted when compared with the preceding month, but a marked gain over that of the corresponding month a year ago, this comparison being based on the average number of placements effected daily during the periods under review. Manufacturing, construction, services and trade recorded the greatest losses under the first comparison and manufacturing, trade, construction and services the highest gains under the second. The marked increase over last year was due to National Selective Service Regulations under which employers seeking workers, and persons desiring employment, must notify Employment and Selective Service Offices. Vacancies in December, 1942, numbered 202,708, applications 200,354 and placements in regular and casual employment 148,758.

Unemployment in Trade Unions.—The Department of Labour receives reports from the local trade unions throughout Canada, showing the number of their members who were unemployed during the period under review.

At the beginning of January, 1943, the percentage of unemployment among trade union members stood at 1.2 in comparison with 0.8 per cent in December and 5.2 per cent in January, 1942. The percentage for January was based on returns compiled from 2,263 labour organizations with a total membership of 406,278 persons.

It should be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

Unemployment Insurance Registration.—

The registration figures of the Unemployment Insurance Commission provide further data in regard to the employment situation in Canada.

During the 1942 registration conducted by the Commission, employers with insured persons in their employ registered their insured and non-insured employees. This nation-wide manpower inventory covered a large portion of Canadian wage-earners, but it did not for the most part include employees engaged in employment in agriculture, horticulture, for-

estry, logging, lumbering, hunting and trapping and a number of other excepted occupations.

The number of persons registered during the period April 1, 1942 to February 1, 1943, was 3,594,744 (see page 228). However, the total of persons registered during this period is greater than the number of persons in registered employment at any one date. For instance, some of the registered persons may subsequently have joined the armed forces, or left their registered employment for other reasons.

Nevertheless, taking into consideration the occupations not covered in the registration, it may be assumed that the figure represents at least a minimum approximation of the number of persons employed in Canada.

The Employment Situation at the Beginning of December, 1942, as Reported by Employers

INDUSTRIAL employment at the beginning of December showed important expansion, continuing the steadily upward movement indicated from March 1. The increase was the largest reported since the beginning of July, also exceeding that recorded in any earlier December in the period of the war; according to pre-war experience, it was contra-seasonal in character. The Dominion Bureau of Statistics tabulated data from 13,322 employers with a combined working force of 1,867,597, as compared with 1,836,070 at November 1. The weekly payrolls disbursed aggregated \$56,076,173 at the latest date, as compared with \$54,738,728 at the beginning of November. There was thus a rise of 1.7 per cent in the number of employees, accompanied by that of 2.4 per cent in the earnings of these persons. The per capita average showed a further gain, advancing from \$29.81 at November 1, to \$30.03 at the date under review. These two are the highest in the payroll record, dating from June 1, 1941.

The index number of employment at December 1, 1942, reached a new maximum, at 186.5, as compared with 183.3 in the preceding month, and 168.8 at December 1, 1941. The 1926 average equals 100 in calculating these indexes. Since the increase at the date under review was contrary to the usual seasonal tendency, the seasonally-adjusted index showed a further rise, standing at 182.1, as compared with 175.4 in the preceding report. The general index of employment exceeded by 10½ per cent that indicated at the beginning of December in 1941. This important gain has been accom-

panied by that of 20.8 per cent in the index number of payrolls in the 12 months.

The greatest advances at December 1, 1942, were in manufacturing, which absorbed an additional 16,116 persons, and in logging, in which the increase amounted to 13,600. There was also an important gain in employment in retail trade from November 1. The improvement in the last two industries is in accordance with the usual trend at the beginning of December; that in manufacturing is contra-seasonal. Although it repeats the upward movement indicated at December 1 in each year since the outbreak of war, it was on a much larger scale than in the early winter of 1939, 1940 or 1941. Within the manufacturing group, especially marked increases were recorded in iron and steel, some 12,000 additional employees being reported in such plants. Other branches of the durable goods industries, with the exception of lumber, were also considerably more active than at November 1. Concentration of employment in the heavy industries continues to be a feature of the situation, these classes now accounting for a third of the total number on the payrolls of the employers furnishing data at December 1, 1942; at the same date in 1939, little more than one-fifth of the workers in recorded employment were engaged in the production of durable goods. The manufacture of non-durable goods continued at a high level, according to the pre-war standards; nevertheless, employment in a number of classes in this category was in smaller volume than at the same date of 1941. This situation, which is mainly a result of the prevailing shortage of labour,

is affecting a growing number of plants in both manufacturing and non-manufacturing divisions. Thus, where employment in twenty industries or groups at July 1, 1942, was below its level at the same date in 1941, the number showing an unfavourable trend at the latest date as compared with December 1, 1941, was 30.

Payrolls

The aggregate payroll of \$56,076,173, already mentioned as having been disbursed in weekly salaries and wages at December 1 by

the co-operating employers, was 2.4 per cent higher than the amount paid at the beginning of November. The advance continues the upward trend shown by payrolls since the institution of such statistics in the spring of 1941. The only exception in these months was at the beginning of January, 1942, the observance of the Christmas and New Year's holidays then having lowered the reported aggregate. The weekly per capita earnings averaged \$29.81 at November 1 and \$30.03 at the beginning of December, 1942, while the December 1, 1941, average was \$27.32.

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

Including the data received from financial institutions, the latest survey of employment and payrolls shows that the number of persons in recorded employment was 1,931,573, as compared with 1,900,125 at the beginning of November. The amounts received as weekly earnings by these persons were stated as \$58,051,931 paid on or about December 1, and \$56,711,085 paid on or about November 1. The per capita average for the nine main industries, including finance, was \$30.05, as compared with \$29.85 at the beginning of November, and \$27.40 at December 1, 1941. These averages were slightly higher than those given in the preceding paragraph for the eight leading industries, for which records of employment are available for a lengthy period, whose totals are used in the general comparisons of this report; these industries are as follows: manufacturing, logging, mining, transportation, communications, construction and maintenance, services and trade.

Table I summarizes the latest statistics of employment and payrolls for the leading industrial groups, the provinces and economic areas and the eight leading industrial cities, and gives comparisons as at November 1, 1942, and December 1, 1941.

The index numbers of payrolls are based on the amounts disbursed by the co-operating firms at June 1, 1941, as 100. To facilitate comparisons of the trends of employment and payrolls, the indexes of employment have been converted from their original base 1926=100 to June 1, 1941, as 100. The table shows that

in the period for which data are available, there has been an increase of 22 per cent in the number of persons in recorded employment in the eight leading industrial groups, while the weekly earnings of these persons have risen by 44.3 per cent. Including finance, the gain in employment from June 1, 1941, to December 1, 1942, amounted to 21.4 per cent, and that in payrolls to 43 per cent.

Between December 1, 1941, and December 1, 1942, there has been an increase in employment in the eight industries (manufacturing, logging, mining, communications, transportation, construction and maintenance, services and trade), amounting to 10½ per cent, accompanied by that of 20.8 per cent in the weekly payrolls. The reasons previously given for the much greater rise in the latter than in employment may again be stated: (1) the growing concentration of workers in the heavy manufacturing industries, where rates of pay are above the average and, in addition, there is a considerable amount of overtime work, (2) the extension of the system of paying cost of living bonus to the majority of workers; the rates at which this allowance has been calculated have been enlarged on more than one occasion since its institution, and (3) the progressive up-grading of employees as they gain experience in their work. In certain cases, higher wage-rates have also been awarded. In spite of these main factors reacting favourably upon the earnings of the typical worker, the average weekly pay envelope, as a result of the continued dilution of labour, has not shown

advances commensurate with those in the index of aggregate payrolls. Where the latter has risen by 44.3 per cent from June 1, 1941, the index of per capita earnings has increased by 18.9 per cent since June 1, 1941.

For obvious reasons, the growth in employment and payrolls in manufacturing in the period of observation has greatly exceeded that in the non-manufacturing industries; where the index of employment has risen by 32 per cent from June 1, 1941, that of payrolls has advanced by 60.1 per cent. The weekly earnings of the typical individual engaged in factory work has increased by 21.7 per cent, while the all-industries average has risen by 18.9. The factors given above as influencing

the all-industries trends operate with greater force in the case of the manufacturing group.

Even more striking than the expansion in the number of workers and the payrolls in manufacturing as a whole in recent months, is that which has taken place in plants producing durable goods, in which the index of employment has risen by 47.4 per cent and that of payrolls by 82.7 per cent from June 1, 1941, to the beginning of December, 1942. Despite curtailment in certain lines in the non-durable goods division, the index number of employment in this group was 18.7 per cent above that indicated at June 1, 1941, while the increases in the payrolls amounted to 37.2 per cent.

¹ This classification comprises the following:—Iron and steel, non-ferrous metals, electrical apparatus, lumber, musical instruments and clay, glass and stone products.

* Revised.

In regard to the marked variations shown in the average earnings of workers in the different industrial classes, it must be borne in mind that the sex distribution¹ of such persons is an important factor, frequently associated with variations in the age groups. In general, the female workers tend to belong to the younger age classes, in which the earnings are naturally lower than among those of greater experience. The matter of short-time or over-time may also considerably influence the reported aggregates and averages.

Employment and Payrolls by Industries

Manufacturing.—Activity in manufacturing establishments showed its eleventh consecutive gain at the beginning of December; this was also the thirty-sixth monthly increase since the outbreak of war, the upward trend indicated since then having been interrupted on only three occasions. These were at January 1, in 1940, 1941 and 1942, and resulted from the observance of the year-end holidays. The ex-

pansion at December 1, 1942, exceeded that recorded in either of the two preceding months, being also larger than in any other December in which heightened employment had been reported in that month. The movement at December 1 in pre-war years, however, was almost invariably unfavourable.

The latest index number of employment established a new high, standing at 221.7 per cent of the 1926 average. This was 17.7 per cent above the December 1, 1941, figure of 188.4. The index at November 1, 1942, was 218.6. The seasonally-adjusted index also advanced to a new maximum, rising from 216.7 in the preceding month, to 224.2 at December 1, 1942.

The working forces of the 7,440 manufacturers furnishing statistics aggregated 1,155,307; as compared with their staffs of 1,139,191 at November 1, there was an increase of 16,116 persons, or 1.4 per cent. The weekly payrolls, at \$35,960,079, were higher by \$988,147, or 2.8 per cent. The weekly per capita average at December 1 was \$31.13, as compared with the revised November 1 average of \$30.70. These two are the highest in the record, which commences with June 1, 1941. At December 1,

1 For information respecting the sex distribution of the persons in recorded employment at Oct. 1, 1942, see LABOUR GAZETTE, December, 1942, page 1464.

Relative weight of Employment by Provinces and Economic Areas as at Dec. 1, 1942	100.0	7.8	0.1	4.8	2.9	31.7	40.9	10.3	4.9	2.0	3.4	9.3

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated area, to the total number of all employees reported in Canada by the firms making returns at the date under review.

1941, the per capita average had been \$28.15. In the year since then the index of aggregate payrolls has risen by 29.7 per cent, an advance which substantially exceeds that of 17.7 per cent in the index of employment.

There were especially impressive advances at the date under review in iron and steel plants, which absorbed over 12,000 additional

workers. Chemical, tobacco, non-ferrous metal, electrical apparatus, animal food, leather, rubber, clay, glass and stone and miscellaneous manufactured products also afforded considerably more employment. The gains in iron and steel were widely distributed, the greatest being in shipbuilding and aircraft plants. Seasonal curtailment of operations continued

TABLE IV.—INDEX NUMBERS OF EMPLOYMENT BY INDUSTRIES (AVERAGE 1926=100)

¹ The relative weight shows the proportion of employees reported in the indicated industry to the total number of employees reported in Canada by the firms making returns at the date under review.

to lower employment in vegetable food and lumber factories; pulp and paper and beverage works were also quieter.

In the last report, it was pointed out that, largely as a result of the wartime labour stringency, employment in a growing number of plants producing consumers' goods is showing declines from the high levels established in the latter part of 1941. Thus, where eleven manufacturing industries or groups at July 1, 1942, reported curtailment as compared with a year earlier, 20 divisions at Dec. 1 showed a falling-off from the same date in 1941. Notable among these 20 were the food, fur, leather, lumber, pulp and paper and rubber divisions, in which, however, activity continued decidedly above the pre-war level. The slackening in many of the above-mentioned groups is the more remarkable in view of the fact that in a great many cases, plants in these categories are engaged in manufacturing commodities or parts directly required in the war effort. On the other hand, employment in an important number of industrial divisions has reached new all-time highs in recent months; especially noteworthy among those in this category are the chemical, tobacco, beverage and the various metal-using industries.

Based on the weekly salaries and wages disbursed by the reporting employers at June 1, 1941, as 100, the index number of payrolls at December 1, 1942, was 160.1 as compared with 155.7 at the beginning of November, 1942, and 123.4 at December 1, 1941. There was thus an increase of 29.7 per cent during the 12 months, which accompanied that of 17.7 per cent in the index number of employment. The reasons previously given for the disparity in the rates of increase in employment and payrolls may again be stated:— (1) the growing concentration of workers in the more highly-paid heavy industries, together with important amounts of overtime work in these classes, and, (2) the general practice of paying a bonus to meet the increase in the cost of living, under the terms of P.C. 8253 of October 24, 1941. The cost-of-living bonus has shown increases since its institution. The up-grading of workers has also contributed to the greater expansion in the reported payrolls, a factor of growing importance, which is tending to counteract the effect of the large-scale dilution of labour resulting from the existing stringency.

The extent to which the changing industrial distribution of factory workers has contributed to the relatively larger growth in payrolls than in employment is emphasized by a comparison of the figures for the durable and non-durable goods groups. Thus, the payroll index in the former at December 1 was

42.4 per cent higher than at December 1, 1941, while that in the non-durable goods division was 15.0 per cent higher; over the same period, the index of employment in the durable goods has risen by 29.7 per cent, while that in the non-durable classes has gained by only 6.5 per cent.

In the period in which statistics of payrolls have been collected, there have been particularly great increases in the amounts disbursed in the chemical, iron and steel, non-ferrous metal, miscellaneous manufactured products, electrical apparatus and beverage industries. The advances in these industries have been associated with the important though relatively smaller gains in employment. In practically every case, and notably in the industries just mentioned, the per capita averages in the various branches of manufacturing were substantially higher at December 1, 1942, than at the same date of 1941.

In comparing the figures of per capita averages in the various industries, it must be borne in mind that many factors contribute to the existing differences. Important among these is the sex distribution of workers in the various industries; with this factor is associated that of age, the women workers in general tending to belong in the younger age groups, where earnings normally are less than among more experienced workers. The presence or absence of overtime also affects substantially the per capita average earnings.

Logging.—Seasonal activity in bush operations resulted in a substantial increase in the personnel of logging camps, 470 of which reported 70,071 employees, compared with 56,467 at November 1. The percentage gain was larger than that indicated at December 1, 1941, but approximated the average over a period of years. The index of employment, at 236.2 was the lowest for December since the outbreak of hostilities. As compared with 250.3 at December 1, 1941, there was a decline of 5.6 per cent in the index of employment; that of weekly payrolls, however, was only slightly lower. The salaries and wages reported at the latest date amounted to \$1,476,179, a figure which was higher by 22.6 per cent than the payrolls indicated at the beginning of November, 1942.

The per capita average earnings were lowered from \$21.32 at November 1, 1942, to \$21.07 at the date under review; the decline is associated with the large increase in the number employed. The average at December 1, 1941, was \$17.92. In considering the figures of aggregate and per capita earnings in logging, it must be recalled that they do not include the value of board and lodging, frequently a part of the remuneration of workers en-

gaged in bush operations. The high labour turnover in many camps is also an important factor in lowering the reported earnings.

Mining:—Coal-mining was brisker at December 1, 1942, but employment in the extraction of other non-metallic minerals and of metallic ores showed a further reduction. The 432 operators whose returns were tabulated reported 76,101 employees, 150 fewer than in the preceding month. The index in the mining group at December 1 was 162·7, being 11·4 per cent below that of 183·5 at the same date in 1941. In the 12 months, the index of payrolls has fallen by 7·4 per cent. The salaries and wages disbursed at the beginning of December aggregated \$2,726,362, showing a moderate increase as compared with the November 1 payments. As a result of this disparity in employment and payrolls, the per capita average earnings were higher, at \$35·83, as compared with \$35·36 in the preceding period of observation. The December 1, 1941, figure had been \$33·89.

Communications:—A small increase in employment in telegraphs was rather more than offset by a falling-off in telephones. A personnel of 27,775 was reported by the employers furnishing data; at November 1 they had employed 27,959 men and women. The loss approximated the average. The reported payrolls, however, were higher, at \$815,242, as against \$800,994 at November 1. The per capita average rose from \$28·65 at November 1 to \$29·35 at the first of December; the December 1, 1941, average had been \$27·51. Based on the 1926 average as 100, the latest index of employment was 104·0. This was 3·4 per cent higher than the December 1, 1941, figure of 100·6, while there was a gain of 10·2 per cent in the index of payrolls in the twelve months.

Transportation:—The trend in transportation was seasonally downward at the beginning of December, when 566 firms and branches reported 137,928 employees, or 1,399 fewer than at November 1. The decline was mainly in shipping and stevedoring; steam railway operation showed little general change, while further improvement was noted in local transportation. The index, at 109·4 was the highest for December 1 in any year since 1928, exceeding by 5·1 per cent that of 104·1 recorded at December 1, 1941. The payrolls, at \$4,879,707, were considerably above those reported in the preceding period of observation. The average per capita weekly earnings rose from \$34·55 at November 1, to \$35·38 at the date under review. The December 1, 1941, figure had been \$34·94.

Construction and Maintenance reported seasonal curtailment at the date under review, when the decline was decidedly below average

for December 1, according to the experience of the years since 1920. A further gain was shown in building, but highway and railway construction and maintenance reported lessened activity. Data were received from 1,525 employers with a force of 190,854 persons, as compared with 195,334 at the beginning of November. The weekly salaries and wages paid by the co-operating contractors amounted to \$5,380,873, while the November 1 aggregate had been \$5,568,446. There was also a falling-off in the per capita average earnings, which stood at \$28·19 at December 1, as compared with \$28·51 at the beginning of November. The December 1, 1941, figure was \$24·14.

The December 1 index for construction, at 151·3, was higher than that of 143·4 at the beginning of December of last year. This increase of 5½ per cent was accompanied by that of 19·8 per cent in the reported payrolls.

Services:—Further seasonal reductions were indicated in the service division; the losses, which were moderate, took place in hotels and restaurants and in laundries and dry-cleaning establishments. Six hundred and fourteen employers reported a staff of 40,548 men and women, 132 fewer than at November 1. The shrinkage was below average for December 1. The salaries and wages distributed at the date under review amounted to \$739,744, compared with \$741,437 in the preceding period of observation.

During the last 12 months, there has been an advance of 6·8 per cent in the number of persons in recorded employment, while the reported payrolls showed a gain of 16·1 per cent. The per capita averages were \$18·24 at December 1 and \$18·23 at November 1, 1942, while the December 1, 1941, figure had been \$16·75. Attention must again be drawn to the fact that in hotels and restaurants, as in logging, many of those employed receive board and lodging as part of their remuneration; the former division constituted some 61 per cent of the total reported in the service division as a whole at the beginning of December.

Trade:—The seasonal increases indicated in trade at December 1 were considerably above average, according to the experience of the years since 1920. The 2,214 employers co-operating in the latest survey had 169,013 persons on their staffs, 8,152 more than at November 1. The payrolls reported at December 1 amounted to \$4,097,987, exceeding by 3·9 per cent the amounts disbursed by the same firms at November 1. This percentage gain was not equal to that in the number of employees, with the result that the per capita average slightly declined, standing at \$24·25, as compared with \$24·51 in the preceding report; the December 1, 1941, figure had been \$23·21.

The index number of employment in trade at December 1 was 164.5, slightly lower than that of 167.1 at the same date in 1941. The decline of 1.6 per cent in this comparison, however, was accompanied by a gain of 2.6 per cent in the index of payrolls.

Financial Institutions:—The 753 financial institutions whose returns were tabulated employed a personnel of 63,976, as against 64,055 at November 1. The weekly earnings paid

at the date under review amounted to \$1,975,758, as compared with \$1,972,357, paid on or about November 1. The per capita weekly average was \$30.88, as compared with \$30.79 in the last report. The index of employment in financial institutions was higher by 1.6 per cent than at December 1, 1941, while the index number of payrolls was higher by 6.5 per cent.

Employment Conditions at the end of January as Reported by Employment and Selective Service Offices

RECENT reports from Employment and Selective Service Offices of the Unemployment Insurance Commission indicate that employment conditions across Canada at the end of January were as follows:

MARITIME PROVINCES

Farming activities in the Maritime Provinces were reduced to a minimum during January. Most farmers were carrying on without hired labour. The movement of farm workers to the lumber and pulpwood camps for off season employment has terminated. Many farmers were working in their woodlots getting out fuel for use during the spring and summer seasons. Labour supply for the summer months was being seriously considered, especially in Prince Edward Island, where representations on the subject were being prepared by farmers' organizations and the Provincial Department of Agriculture for presentation to the Dominion Government.

Fishing operations were on a small scale. Gaspereau and smelt were coming on the market, and although the catches were not large, prices were high on the St. John market. Weather was unfavourable for lobster fishing. Fishermen at Newcastle were setting nets for tom cod. The labour supply was adequate. Some fishermen were offering themselves for six-months' employment.

Logging and pulpwood cutting were being carried on actively at many centres in Nova Scotia and New Brunswick. In most camps there was not sufficient experienced help. At one or two points workers were being recruited in the vicinity of the camps.

Both coal and salt mines were operating full time, but both skilled and unskilled underground workers were in demand. Cotton mills were operating twenty-four hours a day and had sufficient help. Lumber and saw mills had full crews in most instances. Women were wanted in the candy and baking industries. Sheet metal workers were required for aircraft work. Clothing makers were short of experienced help.

No important construction work was being undertaken. Existing contracts were progressing favourably. A few carpenters were being taken on for defence projects, and there was a steady demand for labourers at Halifax. However, there was a surplus of both carpenters and labourers at most points and several were being laid off or transferred to other places. Freight movement was fairly heavy, but the supply of labour was adequate and a few brakemen and firemen were laid off temporarily at Moncton. Import and export trade was practically at a standstill, and wholesale and retail lines were only fairly active. With the exception of one or two of the larger centres, there was an almost general shortage of stenographers, typists, waitresses and domestic help.

QUEBEC

Farming activities were reduced to a minimum in Quebec. Practically no demand existed for farm workers and very few were offering themselves. There was a widespread shortage of bushmen for logging and pulpwood operations. In only a few instances were the local supplies adequate, while at other points the shortage was acute. Experienced miners were needed at a number of base metal mining camps. Production of gold was declining.

Most of the industries were very active. This was especially true in the case of textiles; some of the cotton, silk and woollen mills were operating night and day. Labour conditions in the textile industry were improving, although spinners, weavers, skilled seamstresses and power sewing machine operators were urgently needed in some centres. In most instances the demand was not being met locally. Some of the hosiery plants were short of materials. Labour conditions in the tobacco industry were fairly stable, but a few placements were necessary. Activity in the clothing industry declined somewhat, but some factories were working full time. The fur industry was dull. Although the rubber industry was improving, it was not very active.

Iron and steel plants were busy, with little labour turnover in the smaller centres. Experienced machinists, stationary engineers, moulders and coremakers were wanted in some of the larger plants. Skilled and semi-skilled workers, both men and women, were needed for aircraft production. Quebec arsenals required a large number of women as machine operators. Many, if not all of these, were expected to be obtained locally. Newer arsenals will require experienced foundry men. Chemical plants and some defence industries released a number of workers, but others were expanding and will require additional labour. Pulp and paper mills were having difficulties due to lack of sufficient shipping facilities. Some men had to be laid off and others placed on short time temporarily. Experienced plumbers, electricians, coppersmiths, rivet throwers and boring machine operators were required for ship building. It was expected that some, if not all of these, would be found locally.

Bad weather and shortage of materials were hampering construction work. Wartime housing projects were nearing completion. There was a small demand for builders' labourers at some points, but in practically all instances the supply of workers was adequate. Freight traffic was heavy on the railways and at some points passenger service had to be reduced. Truck drivers and casual labourers were in some demand. Wholesale and retail trade was good in many places, but in others, workers were being laid off or transferred to industries. Competent office help was needed in the larger centres and the demand for hotel and restaurant help, and domestics greatly exceeded the supply.

ONTARIO

There were indications that greater activity in the farm labour markets would soon be under way at a number of points in Ontario. In some instances the demand for farm workers was already brisk, while in others, inquiries were being made for help for the end of February. Both single and married men will be required. There were very few placements. Many hundreds of farm workers were employed in industry during the winter months. Heavy snow and cold weather had curtailed logging and pulpwood operations in some areas. Cutting was about completed in some camps, and teamsters, loaders and haulers were needed. The demand for bushmen continued at a somewhat reduced scale.

Experienced underground miners were needed in the nickel-copper areas, but the gold mines had reduced their output heavily. Helpers were required at the Steep Rock

iron mines. It was expected that these could be secured locally.

All branches of industry were active. Labour turnover was not heavy, but there was a general shortage of workers, especially of skilled craftsmen. Flour mills were on full time and few placements of workers were necessary. Bakers and bakers' assistants were needed at some points. The meat-packing industry had sufficient labour. Tannery workers and labourers were in demand. A few placements were made in pulp and paper mills. One or two of these mills were working three shifts, but it was indicated that this would be reduced somewhat in the near future. Saw mills were working steadily and had an adequate supply of labour. Skilled machinists, cabinet makers and other craftsmen were in some demand in the aircraft industry. Weavers, menders, spinners and assistants were required in textiles. The situation was relieved in some cases by employing as part-time workers, housekeepers who had experience in textiles. The demand for skilled machinists, toolmakers and designers, stationary engineers, welders, die makers, millwrights, draughtsmen and other metal tradesmen, as well as unskilled machine shop workers was widespread. In some instances local supplies were sufficient, while in other cases clearance was resorted to in order to get the men. At a number of points industrial activity was slowed down by shortage of materials. Automobile mechanics were needed at widely separated centres. Tire builders and mill men were in demand in the rubber industry, and workers were in training for the expected production of synthetic rubber.

Bad weather and shortage of materials held up construction activities in many places. Wartime housing projects were nearly completed. In some centres carpenters were unemployed and in a few cases were being transferred to other communities. Electricians, welders, bricklayers, steel erectors, riveters and heaters were needed for industrial construction work and were being obtained through clearance. Timbermen and bridgemen were needed for highway work in Northern Ontario. Transportation by rail, road and air slowed down in some districts due to heavy storms. Skilled office help was needed in many centres. Female workers for institutions, hotels, restaurants and private homes were in general demand.

PRAIRIES

Farming operations on the Prairies were on the usual decreased winter season scale. Stockmen, dairymen and choremen were in

some demand, but a sufficient number was not available. Anxiety was shown in some districts as to the supply of farm workers for the spring and summer months. Fish were being hauled to the railheads from Reindeer Lake in Northern Manitoba. Fishermen were wanted and wages were attractive. Bushmen and loggers were needed at several points; in some instances the demand was urgent. A number of bush workers were transferred to Ontario. Only a few farmers would accept this class of work at this season.

Certificated miners were in demand in coal mining areas. Although the coal situation had improved it was still acute in some districts. Miners and miners' helpers were needed for the hardrock mines, but placements had increased greatly toward the end of the month. A few were transferred to British Columbia. Farmers did not care to undertake work in the mines so late in the season. Industrial conditions were fairly normal and labour turnover was not heavy. The flour milling industry was considering expanding. There was a seasonal call for workers in egg processing plants. Hatcheries were preparing for the spring trade and were enquiring for girls to assist in traying eggs, sorting and grading baby chicks and for incubator work. There was a slight increase in the placement of girls in the garment and textile industries. Skilled mechanics were wanted in the metal trades, principally for aircraft work, and men recently laid off in the steel industry were being re-employed.

Construction activity was on a reduced scale. Progress was being made on defence projects in spite of shortages of materials and severe weather. The labour supply was adequate and a number of carpenters were transferred to Ontario and to the West Coast. Transportation companies were busy. Both steam and street railways used casual labour, obtained locally, for snow removal. Gangs of labourers and painters were being sent out to make repairs to railway property. Experienced railway engineers, firemen, telegraph operators and machinists were in demand in Northern Alberta. The supply of such labour did not satisfy requirements. Retail trade was normal in most places, but in some centres shortage of merchandise caused notable declines. Seedhouses were looking for labourers for their approaching busy season. Produce merchants wanted egg candlers, warehouse shippers, truck drivers and ice harvesters. These requirements were not being fully met. The demand for experienced office and warehouse men, especially first class accountants and bookkeepers, and for qualified stenographers exceeded the supply. Graduate nurses, dietitians, candy

makers and cooks were required. The supply was inadequate. A number of experienced stenographers were transferred to Ontario for war work. Several teachers were wanted in Saskatchewan but were not available. The demand for domestics was general and much exceeded the supply.

BRITISH COLUMBIA

Sufficient farm workers were not available to meet the demand in British Columbia. In a few instances the shortage was acute, but in general, the requirements were not heavy. Extremely cold weather and heavy snow brought logging operations almost to a standstill during January. Many camps were closed, but by the end of the month work was being resumed. Fallers, sawyers, and loggers were in demand, and some workers were being transferred in from the Prairies. Many more could have been placed.

Experienced miners and muckers were needed for both coal and base metal mines, as well as casual help for surface work. One mining company needed carpenters and also contractors to cut cord wood. The demand could not be fully supplied. Severe weather had led to the closing of most of the sawmills and plywood plants, but they were being reopened, and a few were working at capacity. The labour supply was adequate. Canneries were operating and had sufficient help. Machine shops were busy and skilled men were needed for work in iron foundries. The shipyards were also hampered by bad weather conditions, but needed machinists, iron moulders, electric welders, stage riggers and labourers. War orders were increasing the demand for machinists, plumbers and moulders. In general the labour turnover in industry was not heavy. The unusually severe weather and lack of materials held up almost all construction operations. Only a small amount of inside work was being done and many carpenters were laid off. Some cabinet makers were needed, and it was difficult to place bricklayers, plasterers and painters.

Construction work on the Brilliant Power Plant proceeded slowly and the supply of labour for highway work was nearly sufficient. Bad weather interfered seriously with transportation, especially by bus and boat. Rail shipments of fresh fruit were held up by the severe cold. Normal schedules were being resumed. Competent office help, stenographers and typists, were in fairly general demand, and a sufficient number of qualified workers was not available. Waitresses, laundry workers and domestics were needed in several places, but the number offering for this class of work was insufficient.

Applications for Employment, Vacancies and Placements, December, 1942

THE volume of business transacted by the Employment and Selective Service Offices during the month of December, 1942, showed a decline of 141 per cent in the average daily placements when compared with those of the preceding month, but an increase of nearly 392 per cent over those of December a year ago. All industrial divisions showed losses from November, the most pronounced being in manufacturing. Heavy declines were noted in construction, services and trade, the decreases in other groups being moderate. In comparison with December, 1941, outstanding gains were registered in manufacturing with large increases in trade, construction and services and somewhat smaller advances in other industrial divisions except agriculture in which a nominal decline was registered.

The accompanying chart shows the trend of employment since January, 1940, as represented by the ratios of vacancies notified and of placements effected for each 100 applications for work registered, each month, at Employment and Selective Service Offices throughout Canada. It will be seen from the graph that the trend of the curve of vacancies in relation to applications showed a marked upward trend, while that of placements remained about the same, the ratio of vacancies to each 100 applications being 101.2 during December, in contrast to 88.6 in November and 74.4 during the corresponding period of 1941. The ratio of placements to each 100 applications during the period under review was 74.2 compared with 74.3 for November, 1942, and 65.4 during the corresponding month in 1941.

The average number of vacancies reported daily by employers to the offices throughout Canada during December, 1942, was 7,797 as compared with 9,649 during the preceding month and with 1,661 in December a year ago. The average number of applications for employment received daily by the offices during the month under review was 7,706, in comparison with 10,886 in November, 1942, and with 2,232 in December, 1941. The average number of placements made daily by the offices during December, 1942, was 5,722, of which 5,514 were in regular employment and 208 in work of one week's duration or less, as compared with a total daily average of 8,091 during the preceding month. Placements in December a year ago averaged 1,460 daily, consisting of 895 in regular and 565 in casual employment.

During the month of December, 1942, the Employment and Selective Service Offices re-

ferred 188,029 persons to vacancies and effected a total of 148,758 placements. Of these, the placements in regular employment were 143,366, of which 96,805 were of men and 46,561 of women, while placements in casual work totalled 5,392. The number of vacancies reported by employers was 140,973 for men and 61,735 for women, a total of 202,708, while applications for work numbered 200,354, of which 137,651 were from men and 62,703 from women. Reports for November, 1942, showed 241,204 positions available, 272,138 applications made and 202,259 placements effected, while in December, 1941, there were recorded 43,181 vacancies, 58,020 applications for work and 37,943 placements in regular and casual employment.

During the year 1942 the offices throughout Canada reported 1,381,842 vacancies, 1,544,129 applications and 895,621 placements in regular and casual employment, a gain in placements of 76.4 per cent over the year 1941.

The exceptionally heavy gains were attributable to the National Selective Service Regulations passed under authority of Order in Council P.C. 7595, which makes it obligatory for employers seeking workers and persons desiring employment to notify Employment and Selective Service Offices. The permit system, also established under these regulations, necessitated the opening of a number of new offices, and since the latter part of August, employment offices have been opened at many additional centres in order to provide facilities for employers and workers to obtain necessary permits, there being 201 offices in operation at the end of December, 1942.

The following table gives the placements effected by the offices, each year, from January, 1932, to date:—

Year	Placements		
	Regular	Casual	Totals
1932.....	153,771	198,443	352,214
1933.....	170,576	181,521	352,097
1934.....	223,564	182,527	406,091
1935.....	226,345	127,457	353,802
1936.....	217,931	113,519	331,450
1937.....	275,300	114,236	389,536
1938.....	256,134	126,161	382,295
1939.....	242,982	141,920	384,882
1940.....	320,090	155,016	475,106
1941.....	316,168	191,505	507,763
1942.....	809,983	85,638	895,621

NOVA SCOTIA AND PRINCE EDWARD ISLAND

During December, 1942, vacancies offered through Employment and Selective Service

facturing, construction, trade and logging. Placements by industrial divisions included: construction 887; manufacturing 841; services 840; trade 778 and logging 598. During the month 3,054 men and 1,064 women were placed in regular employment.

QUEBEC

Orders listed at Employment Offices in the Province of Quebec during December called for 17 per cent fewer workers than in the preceding month, but 408 per cent more than the corresponding period a year ago. Placements were 43 per cent below those of the previous month, but recorded an increase of

Applications _____ Vacancies - - - - - Placements - o - o - o - o - o - o

224 per cent when compared with December, 1941. The large gain in placements over December a year ago was mainly due to an increase in manufacturing, although substantial gains were reported in trade, construction, logging and transportation; the only decrease of importance was in services. Placements by industrial groups numbered: manufacturing 18,352; construction 5,084; services 4,803; logging 4,337; trade 3,956 and transportation 1,476. There were 25,962 men and 12,567 women placed in regular employment.

NEW BRUNSWICK

ONTARIO

Employment opportunities, as indicated by orders received at Employment Offices in Ontario during December, were over 5 per

* 99 placements effected by offices not operating.

cent fewer than in the preceding month, but 453 per cent greater than in December, 1941. There was a decrease of 14 per cent in placements when compared with November, but an increase of 421 per cent in comparison with the corresponding month a year ago. A substantial increase in the manufacturing industries was mainly responsible for the gain in placements over December, 1941, although all other industrial groups, except agriculture, showed improvement under this comparison, the most important of which were in trade, services, construction, transportation and logging. Industrial divisions in which most of the placements were effected were: manufacturing 28,247; services 9,558; trade 8,514; construction 5,188; logging 3,538 and transportation 2,835. Placements in regular employment numbered 39,115 of men and 18,433 of women.

MANITOBA

The demand for workers, as shown by orders listed at Employment Offices in Manitoba during December, was 27 per cent below November, but 131 per cent above December, 1941. Placements showed a decrease of 18 per cent when compared with the preceding month, but an increase of 229 per cent in comparison with the corresponding month a year ago. All industrial groups reported gains, except logging and agriculture, in which small losses occurred. The most marked improvement recorded was in trade, manufacturing and services. Placements by industrial divisions included: trade 2,087; manufacturing 1,737; services 1,727; logging 805 and construction 679. There were 4,219 men and 2,936 women placed in regular employment.

SASKATCHEWAN

Orders received at Employment Offices in Saskatchewan during December called for 35 per cent fewer workers than in the preceding month, but 217 per cent more than during the corresponding month of 1941. Placements were 19 per cent below November but 125 per cent more than December a year ago. With the exception of a fairly substantial decline in logging, and a small loss in agriculture, placements were higher in all industrial divisions than during December, 1941, the most noteworthy increases being in manufacturing, trade and services. The majority of placements recorded during the month were in the following industries: services 1,526; manufacturing 1,300; trade 1,118; construction 326; logging 313 and transportation 299. During the month 3,002 men and 1,788 women were placed in regular employment.

ALBERTA

There was a decrease of 22 per cent in the number of positions offered through Employment Offices in Alberta during December when compared with the preceding month, but an increase of 306 per cent in comparison with the corresponding month of the previous year. Placements were 22 per cent fewer than November, but 304 per cent greater than in the corresponding month of 1941. All indus-

trial divisions participated in the increase in placements when comparing the month under review with December, 1941, the most marked advances being in services, trade, manufacturing and construction. Placements by industrial groups included: services 1,871; manufacturing 1,203; trade 1,182; construction 1,134; logging 889 and transportation 752. Regular placements numbered 5,327 of men and 2,103 of women.

BRITISH COLUMBIA

Positions offered through Employment Offices in British Columbia during December called for 22 per cent fewer workers than in the preceding month, but 393 per cent more than during the corresponding month a year ago. There was a decrease of 22 per cent in placements when compared with November, but a gain of 368 per cent in comparison with December, 1941. A substantial increase in manufacturing and fairly large gains in trade, construction, and transportation accounted for the advance in placements over December a year ago, improvement being noted also in all other groups. Industrial divisions in which most of the placements were effected were: manufacturing 6,085; services 3,411; trade 2,966; construction 2,833; transportation 1,255 and logging 963. During the month 11,684 men and 6,166 women were placed in regular employment.

Quarterly Report of Employment and Selective Service Offices, October to December, 1942

THE work of the Employment and Selective Service Offices of Canada during the quarter October to December, 1942, as indicated by orders received and placements effected, was 419.2 per cent higher in volume under the first comparison and 304.9 per cent more under the second, than during the corresponding quarter of 1941. All industrial groups registered gains, the most pronounced being in manufacturing with heavy increases reported in trade, construction, services, transportation and logging. All provinces registered noteworthy expansions.

The accompanying table gives the vacancies and placements of the Employment and Selective Service Offices by industrial groups in the various provinces during the period October to December, 1942.

From the chart appearing elsewhere in this issue, which accompanies the article on the work of Employment and Selective Service Offices for the month of December, it will be noted that the curve of vacancies in relation

to applications showed a downward trend during October and November, but an upward course was reported in December, while that of placements recorded an upward tendency during October and November but little variation was shown during December.

During the period October to December, 1942, there was a ratio of 98.6 vacancies and 70.7 placements for each 100 applications for employment, as compared with 70.5 vacancies and 64.8 placements during the corresponding quarter of 1941.

The average number of positions offered daily during the quarter under review was 9,287, of applications registered, 9,417, and of placements effected, 6,655, in contrast with a daily average of 1,813 vacancies, 2,569 applications and 1,665 placements in regular and casual employment during the fourth quarter of 1941.

During the three months October to December, 1942, the offices reported that they had referred 663,403 persons to positions and had effected a total of 512,402 placements, of which

496,173 were in regular and 16,229 in casual work. Of the placements in regular employment 331,129 were of men and 165,044 of women, while casual work was found for 5,395 men and 10,834 women. Comparison with the same period in 1941 showed that 126,539 placements were then made, of which 80,132 were in regular and 46,407 in casual work. Applications for employment during the period under review were received from 469,172 men and 255,915 women, a total of

725,087 in contrast with the registration of 195,241 persons during the corresponding period of 1941. Employers notified the offices of 715,030 vacancies of which 483,454 were for men and 231,576 for women, as compared with 137,718 opportunities for work during the last quarter of 1941.

A report in detail of the transactions of the Employment and Selective Service Offices for the month of December, 1942, will be found elsewhere in this issue.

Unemployment in Trade Unions at the close of December, 1942

UNEMPLOYMENT in the following report has reference to involuntary idleness due to economic causes. Persons who are engaged at work outside their own trades or who are involved in industrial disputes are excluded from these tabulations. As the number of unions making returns varies from month to month, with consequent variations in the membership upon which the percentage of unemployment is based, it should be under-

stood that such figures have reference only to the organizations reporting.

Returns were tabulated at the end of December from 2,263 labour organizations, having a combined membership of 406,278 persons, of whom 4,977, or a percentage of 1.2 were shown as unemployed, in comparison with percentages of 0.8 in the previous month and 5.2 in December, 1941. The employment level for union members was slightly lower in Decem-

ber; this was due principally to the moderate seasonal decline in activity for those in the building and construction trades and to an appreciably lower employment level for members in the steam railway division of the transportation industries. Among building and construction workers the percentage of unemployment was up from 3.2 to 5.1 and for the members in the railway groups from 1.2 to 2.3. The percentage of those without work in the manufacturing division was very slightly upwards, standing at 0.5, while for those in the mining group and among fishermen also, there were minor employment contractions. The December unemployment percentage was the lowest, however, in trade union

table I, which appears with this article, slightly lower employment levels were apparent in Quebec, Ontario, Saskatchewan, Alberta and British Columbia, while in New Brunswick and Manitoba there were moderate contractions in activity. As compared with the situation at the close of December, 1941, pronounced employment advances were observed in Ontario, British Columbia and Quebec; the percentages of those without work in these provinces were 1.0, 0.6 and 1.6, as compared with 6.0, 5.3 and 5.7, respectively. In Manitoba, Saskatchewan and Alberta, likewise, there was substantial improvement, while in Nova Scotia there was a moderately higher employment level. On the other hand, in New

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADES UNIONS

records for any corresponding month since the trade union report was published on a monthly basis for the first time, in January 1919. Prior to that date the report appeared at the end of every quarter, from December, 1915 to the close of the year, 1918.

In table I the unemployment percentage is shown for each province. In December, these percentages ranged from 0.3 in Nova Scotia to 2.6 in Manitoba. Provinces in which less than one per cent of the membership was reported as without work, were Nova Scotia and British Columbia. In comparison with the November returns Nova Scotia members indicated a slightly higher employment level, the unemployment percentage standing at 0.3, in comparison with 0.7. As will be seen in

Brunswick there was a minor recession in activity.

A separate compilation is made each month of unemployment among trade union members in the largest city in each province with the exception of Prince Edward Island. The unemployment percentages ranged from 0.3 in Toronto to 2.5 in Winnipeg. Cities in which less than one per cent of the membership was unemployed were Toronto, Halifax, Vancouver and Edmonton. In comparison with the previous month, the employment level in Halifax was slightly higher, the percentage of members without work standing at 0.7. In Saint John there was a very slight betterment, while in Toronto the unemployment percentage of 0.3 remained unchanged. On the

other hand, minor declines in work available were apparent in Montreal, Edmonton and Vancouver, while in Winnipeg and Regina the unemployment percentages were up from 0.5 to 2.5 and from 0.3 to 1.0. As compared with the situation in December, 1941, Toronto, Edmonton, Vancouver and Montreal members recorded marked employment increases. The percentages of those without work in these cities were 0.3, 0.9, 0.8, and 1.1, while in December, 1941, the corresponding figures were 10.4, 7.2, 6.1 and 6.2, respectively. Much higher employment levels were observed, also, in Regina and Winnipeg; in Halifax and Saint John there were fair increases in available work.

The accompanying chart shows the trend of unemployment from January, 1936 to date. The curve in January, 1942, was at a moderately lower level than at the close of December, 1941, thus reflecting a fair improvement. There was a further rather slight decline in February, while in March the point of curve was a little higher, thus indicating a minor recession in work. In the months of April and May the level of the curve declined substantially thus manifesting noteworthy employment expansion. There was a further very slight rise in June, but from that point until the end of October the trend was in a downward direction. The point of the curve at the end of that month rested at the lowest level that has been indicated for any month in the trade union records, since these were placed on a monthly basis, in January, 1919. In November the level of the curve inclined very slightly and in December, due to seasonal conditions, there was a further rather moderate upward movement, thus reflecting during these months some employment contractions.

In the manufacturing industries 773 reports were tabulated, having a total membership of 226,090 persons, of whom, 1,159, or a percentage of 0.5 were without work in comparison with percentages of 0.4 in November and 4.7 in December, 1941. In comparison with November, papermakers and woodworkers, whose unemployment percentages were 0.5 and 0.2, respectively, were slightly better employed, while for unclassified workers there was a minor employment increase, also. The percentage of members shown as without work among hat, cap and glove workers and among union members in the iron and steel trades, remained unchanged, at 0.1, for each group. Among those organizations, in which the members were listed as employed at both dates were soft drink, cigar and tobacco workers, electric current employees, etc., textile and carpet, fur and rubber workers, jewellery, aluminum and gas workers. The percentages

of unemployment among union members in the printing and garment trades were 1.1 and 0.2, respectively. These were slightly higher, thus reflecting minor contractions in work. Among the organizations with smaller memberships, such as butchers, meat and fish packers, clay, glass and stone workers, chemical workers and bakers and confectioners there were slight employment recessions, also. Employment for leather workers showed a rather substantial decline as the unemployment percentage for these members was up from 2.0 to 7.1. Although, as the membership is small and consequently, not many were involved, the employment contraction for metal polishers, etc. was quite pronounced as the percentage in this case increased from no unemployment to 14.2. In comparison with December, 1941 employment for union members in the iron and steel trades was on a considerably higher level, while among garment workers, an organization which includes both men's and women's clothing workers, conditions were much better; the unemployment percentage in

this case, declined to 0.2, from 17.6. Among leather and fur workers, also, the percentages of 7.1 and 0, or full employment, were much lower, as in December 1941 the corresponding percentages for these members were 23.9 and 30.7 respectively; among unclassified workers the percentage declined from 17.9 to 6.9. Those unions in which the members were reported to be employed at both dates were electric current employees, etc., textile and carpet, rubber and jewellery workers.

Returns were tabulated from 57 unions of coal miners having a combined membership of 20,296 persons, of whom, 20, or 0.1 per cent were without work in comparison with percentages of 0.4 in November and 1.0 in December, 1941. As compared with November when the percentage was 0.7 there was no unemployment shown in Nova Scotia; in New Brunswick and British Columbia no unemployment was recorded at either date, while in Alberta the percentage was up very slightly from 0.1 to 0.3. When compared with conditions in December, 1941, British Columbia members indicated a rather marked improvement. Gains of lesser degree were reflected in Nova Scotia and Alberta; in New Brunswick there was no unemployment, at either date.

Reports were received from 8 unions of non-metallic mineral workers. The total membership was given at 4,212 of whom 196, or a percentage of 4.7, were without work in comparison with percentages of 1.0 in November and 8.1 in December 1941.

Unions in the building and construction trades returned 212 reports, in which the combined membership was 34,442 persons of whom 1,752 or a percentage of 5.1 were without work, in comparison with 3.2 per cent in November and 10.6 per cent in December, 1941. Bridge and structural ironworkers, whose membership is small, did not record any unemployment as compared with 4.1 per cent in November, while among hod carriers and miscellaneous building workers there was a minor employment advance as the unemployment percentage stood at 7.2. On the other hand, although reflecting little unemployment, electrical workers, plumbers and steamfitters and steam shovel men manifested slight contractions in work. Employment for painters, decorators and paperhangers showed a moderate decline, although the percentage of those without work was low. Bricklayers, masons and plasterers, carpenters and joiners, and granite and stonecutters, whose unemployment percentages were 13.4, 4.9 and 7.0, respectively, indicated appreciable recessions in work; these changes were due in a large measure to seasonal lay offs. Wood, wire and

metal lathers, whose membership is very small, did not show any unemployment at either date. In comparison with December, 1941, pronounced improvement was apparent for carpenters and joiners; the unemployment percentage for these members declined from 11.6 to 4.9. Among granite and stonecutters, bricklayers, masons and plasterers, and painters, decorators and paperhangers, there were marked expansions in activity, and although comparatively few members were involved, steam shovel men and bridge and structural iron workers, were much busier.

In the transportation industries there were 891 returns tabulated, having a combined membership of 80,576 persons, of whom, 1,541, or a percentage of 1.9, were without work, in comparison with 1.0 in November and 4.9 per cent in December, 1941. As compared with the previous month when 4.3 per cent of the members were without work, navigation workers indicated fair improvement as the percentage declined to 2.9. Very little unemployment was observed among street railway employees and teamsters and chauffeurs, although there were very slight recessions in activity. Steam railway employees, whose returns constituted over 79 per cent of the entire group membership in the transportation industries, reflected a moderate contraction in employment, as the percentage of those without work increased from 1.2 to 2.3. When compared with conditions at the end of December, 1941, steam railway employees were much better employed; and also among navigation workers, whose membership is comparatively small, there was a pronounced employment expansion. Street and electric railway employees and teamsters and chauffeurs recorded fractional increases in work.

From unions in the wholesale and retail trade, 10 returns were received, which showed a combined membership of 2,399 persons. As in November, no unemployment was reported. In December, 1941, the percentage of those without work was 0.1.

There were 109 reports received from unions of civic employees whose total membership was given as 10,654 persons. Of these, 5, or a percentage of 0.0 were without work, in comparison with 0.2 per cent in November and 0.5 per cent in December, 1941.

In the miscellaneous group of occupations, returns were tabulated from 143 unions, having an aggregate membership of 12,233 persons, of whom 61, or a percentage of 0.5, were recorded as unemployed, in comparison with percentages of 0.4 in November and 2.3 in December, 1941. As compared with the preceding month, theatre and stage employees indicated a fractional betterment; the unem-

ployment percentage for these members declined to 1.1. Only very small percentages of unemployment were reflected in reports received from unions in the other occupations. Among barbers, the percentage of 0.4 remained unchanged, while fractional employment recessions took place among hotel and restaurant employees, stationary engineers and firemen and unclassified workers. In comparison with December, 1941, much higher employment levels were observed among hotel and restaurant, theatre and stage employees, stationary engineers and firemen and unclassified workers. Among barbers there was a fractional employment increase, only.

Reports were secured from 3 unions of fishermen, whose aggregate membership was 2,514 persons. Of these 125, or a percentage

of 5.0, were without work, in comparison with 0.4 per cent in November and 17.7 per cent in December, 1941.

Returns were received from 2 unions of lumber workers and loggers. These organizations had a membership of 3,184 persons, and as in November, none were shown as unemployed. In December, 1941, the percentage of these members without work was 30.3.

Table I shows by provinces the average percentage of union members who were unemployed each year from 1932 to 1942, inclusive, and also the percentage of unemployment for December, of each year, from 1931 to 1941 inclusive, and for January, 1942, to date. Table II summarizes the returns in the various groups of industries for the months included in Table I.

Unemployment in Canada, as reported by Trade Unions for the Year 1942

THE Department of Labour receives monthly reports from local trade unions throughout the country, indicating their membership and the number of members unemployed on the last working day of each month, the tabulation of these data furnishing a continuous record of the unemployment situation among organized workers during the year. The average number of locals reporting during 1942 was 2,212 with an average membership of 363,533 persons, 2.2 per cent of whom were on an average unemployed. This percentage for 1942 was the lowest for any year in trade union records since the report appeared on a monthly basis for the first time in January, 1919. The highest percentage of unemployment was registered in March as 4.5 and the lowest, that of October, was 0.7. The corresponding percentages in 1941 were 6.9 in February and 2.4 in August. In each month of 1942, conditions reflected a substantial improvement over the corresponding month of the previous year; the most noteworthy employment expansions were apparent in February and for the period from October to the end of the year.

During 1942 employment for union members in the manufacturing industries continued to expand. The reports showed that except in March, April, June and July, in which the improvements were rather slight, that in the remaining months there were substantial employment expansions. Owing to the large increases in the manufacture of war supplies, employment for union members in the iron and steel industries attained very high levels during the months of 1941 and the further heavy expansion which took place during 1942

resulted in a greatly increased demand for this class of labour. With the exception of the months of March and April, during which automobile plants were being placed on a war basis, employment was at a higher level than even that of the previous year. The month to month record for union members in the pulp and paper products division showed that the highest percentage of unemployment was 1.4 in March, and that with the exception of October the situation in each month of 1942 reflected some expansion. Union members in the garment trades recorded rather pronounced employment contractions in June and July; in January and March, also, there were some employment recessions, but in the other months and especially in the last quarter conditions were much better than in the corresponding periods in 1941. In the wood products division impressive employment increases were apparent in the first quarter and in July. In the other months of both 1941 and 1942 employment stood at very high levels and although conditions in 1942 were better for each month, with the exception of October when there was a very slight contraction, the advances were not particularly noteworthy.

Employment for union members in coal mining attained much higher levels in every month; the most impressive expansion was apparent in April, May, June and July, and gains of somewhat lesser degree were observed in March, August and October.

In the building and construction trades the lowest percentage of unemployment during 1942 was that of October, 2.2, and the highest was 16.3, in March. The corresponding figures

for 1941 were 6.9 per cent in August and 19.9 in March. Marked improvement was in evidence in the first quarter of the year and moderately higher employment levels were apparent in the second. From July to the end of the year and especially in the last quarter, the returns received reflected marked expansions over the corresponding periods of the previous year.

Employment for union members in the transportation industries attained higher levels in each month, but as conditions were very good, also, during 1941, the expansions were not especially pronounced; the most noteworthy of these were observed in February and December. The situation in the steam railway division, likewise reflected employment increases in every month; the most marked improvements were noted in January, February and December. Workers in the navigation division recorded decidedly better conditions in each month.

Employment for communication workers, was much more prevalent; the general level was considerably higher in most months.

Very little unemployment was apparent for members in the retail and wholesale trade in any month of 1941 or 1942. Conditions on the whole, however, were even better in 1942, as with the exceptions of January and June, when 0.1 per cent of unemployment was shown, reports in the other months did not indicate any unemployment. Although union members in the services division, which included civic employees, hotel and restaurant employees, stationary engineers and firemen, etc., reported that conditions were good in the months of each year, the employment levels, generally, were higher in the months of 1942.

With the two exceptions of the months of April and August, when there were slight employment advances only, the situation for fishermen showed impressive employment expansion.

For lumber workers and loggers, a rather pronounced employment decline was apparent in March, while contractions on a minor scale were observed in January, May and June. On the other hand, with the exceptions of August and September, in which the employment increases were slight, marked employment advances were observed in the months of February and July, and also in the months of the last quarter. No unemployment was shown in reports received from July to the close of the year.

There was a fair employment advance in January, 1942, over December, 1941. Much better conditions prevailed for lumber workers and loggers, garment workers and steam railway employees. A further very slight increase in activity was apparent in February, and in March there was a minor decline in work available. In April and in May the percentage of unemployment declined substantially; this was due principally to the noteworthy expansion in activity among union members in the building and construction trades and for those in the manufacturing industries. A very slight adverse trend was observed in June, but from that point to the end of October the employment level continued in an upward direction. In October the percentage of unemployed members was the lowest for any month in the trade union records, which appeared on a monthly basis for the first time, in January, 1919. Seasonal employment recessions for building and construction workers and some lowering of employment levels for steam railway employees resulted in a slightly adverse trend in both November and December. The unemployment percentages in those months, however, remained the lowest for any corresponding months in the records.

Tables showing percentages of unemployment among union members by industries and provinces by months, during 1942 and for earlier dates, appear in the section on Unemployment in Trade Unions.

Employment and Unemployment in Great Britain and the United States

Great Britain

THE British *Ministry of Labour Gazette*, December, 1942, summarizes the October-November employment situation in Great Britain as follows:—

The number of men and boys registered at Employment Exchanges in Great Britain as wholly unemployed at November 16 (exclusive of 22,579 men who had been classified by interviewing panels as unsuitable for ordi-

nary industrial employment) was 59,151; those registered as on short time or otherwise temporarily suspended from work on the understanding that they were shortly to return to their former employment numbered 1,359; and those registered as unemployed casual workers (being persons who normally seek their livelihood by jobs of short duration) numbered 2,592. As compared with October 12, the numbers wholly unemployed showed a decrease of 1,618, those temporarily suspended

from work showed an increase of 2, and unemployed casual workers showed a decrease of 154.

The corresponding figures for women and girls at November 16 were 31,511 wholly unemployed (exclusive of those, numbering 956, who had been classified by interviewing panels as unsuitable for normal full-time employment), 681 temporarily stopped, and 148 unemployed casual workers. Of the 31,511 wholly unemployed, 1,055 had been classified as unable for good cause to transfer to another area. As compared with October 12, the numbers wholly unemployed showed a decrease of 3,737, those temporarily stopped showed a decrease of 158, but unemployed casual workers showed an increase of 27.

The number of applicants for unemployment benefit or allowances included in the foregoing totals for November 16 was 64,739, as compared with 65,907 at October 12, and 111,550 November 17, 1941.

United States

Total employment in nonagricultural establishments increased by 423,000 between mid-November and mid-December, according to the official report issued by the United States Secretary of Labour. The number at work in December was 38,956,000, a new all-time peak. It exceeded the December, 1941 figure by 2,868,000.

The outstanding gains over the month among the industry divisions were a seasonal increase of 341,000 in trade employment (due primarily to the hiring of additional personnel to handle the pre-Christmas buying and a gain of 235,000 in manufacturing employment (chiefly in war plants). Contract and Federal force account construction showed a decline of about 9 per cent or 170,000 workers.

Over the year interval, the outstanding gains were in manufacturing (2,103,000) and Federal, State, and local government (1,200,000). The gain in the latter division was due primarily to expansion in the War and Navy departments. The chief declines over the year were in trade (399,000) and contract and Federal force account construction (154,000).

War industries continued to report increases in wage-earner employment and pay rolls in the effort to maintain an increasing flow of war goods, among them being such durable goods industries as aircraft, shipbuilding, automobiles (now engaged almost entirely on war work), electrical equipment, machine-shop products, and engines.

Among non-durable goods industries showing substantial employment gains over the month interval—due partly to war demands

and partly to seasonal influences—were slaughtering and meat packing, ammunition, fireworks, cotton goods, tires and tubes, chemicals, paper boxes, men's clothing, and fertilizers.

Employment decreases, largely seasonal, were noted in canning (24,600); beet sugar (4,700), brick, tile and terra cotta (1,300); cottonseed-oil, cake and meal (1,300), and butter (1,100). Sawmills and logging camps reported an employment decline of 6,200 wage earners due partly to seasonal factors and partly to the difficulty of replacing men who had been called into the service or had left for other jobs.

The durable-goods group, as a whole, in which most of the war industries are concentrated, showed employment gains over the month and year intervals of 2.4 per cent and 25.5 per cent, respectively, in contrast to increases of only 0.4 per cent and 3.4 per cent respectively for the non-durable goods industries which produce chiefly for civilian consumption.

The corresponding gains in weekly pay-rolls were 3.0 per cent and 60.0 per cent, respectively, for durable goods and 3.3 and 24.1 per cent, respectively, for non-durable goods. For all manufacturing industries combined the number of wage earners had expanded by 1.5 per cent between mid-November and mid-December and by 15.0 per cent between December 1941 and December 1942, while pay-rolls had increased by 3.1 and 46.0 per cent, respectively.

In anthracite and bituminous-coal mining employment declined slightly between mid-November and mid-December (1.0 and 0.8 per cent, respectively) and quite sharply between December, 1941 and December, 1942 (6.9 and 7.2 per cent), reflecting the difficulty of replacing miners who have been called into the service or who have moved to other jobs. Anthracite pay-rolls, however, showed a gain of nearly 40 per cent and bituminous coal mining 8 per cent over the year interval, due primarily to increased working hours.

Metal mining employment as a whole showed little change over the month interval because of offsetting influences in the various branches of the industry. For example gold and silver mines reduced their forces by 10.1 per cent due to the Government closure order, while copper, lead, and zinc mines added nearly 2 per cent to the number on their pay-rolls.

Employment declines over the month were reported in all but 2 of the public utility and service industries. These declines were less than 1 per cent for all of these industries except dyeing and cleaning (3.6 per cent) and

electric light and power (1.1 per cent). The latter industry has been showing employment reductions each month since August, 1941. Brokerage firms reported an employment gain of 1.0 per cent over the month, but a comparison over the year interval showed a decline of 23.0 per cent. Street railway and bus companies continued to take on more workers (2.2 per cent) to meet increased demands for local transportation due in part to more general gas rationing and to restrictions on pleasure driving. The gain over the year interval of 27.8 per cent in pay-rolls in this industry reflected corresponding gains of 9.9 per cent in employment, 6.0 per cent in average weekly hours (the average number of hours worked in December, 1942 was nearly 50), and 10 per cent in average hourly earnings.

Retail trade establishments took on 9.7 per cent more employees to handle the large crowds of Christmas shoppers. Despite government restrictions on the manufacture and sale of certain items, the net employment decline in retail trade since December, 1941 was only 6.0 per cent. Declines over the year interval of 39 per cent in automotive establishments, 26 per cent in stores selling furniture and house furnishings, and 17 per cent in establishments selling lumber and building materials have been partially offset by a 3 per cent increase in the large group of stores selling general merchandise. The latter group, including variety, general merchandise, and department stores as well as mail-order houses, reported an employment increase of 26.3 per cent over the month. The apparel group reported an employment increase over the month of 10.5 per cent, the furniture and house furnishings group a gain of 2.9 per cent, and the automotive group an increase of 1.8 per cent. The gain in the last-named group was due in part, no doubt, to the sale by many stores of such non-automotive items as toys and work clothing. The lumber group reported 1.1 per cent fewer employees.

Wholesale trade employment showed virtually no change over the month (-0.2 per cent), all of the major groups having reported employment reductions except the automotive group (1.6 per cent) and the machinery, equipment and supplies group (1.2 per cent). Over the year interval declines were quite large for all of the major wholesale groups, the largest being in the automotive group (18.6 per cent) and the dry goods and apparel group (10.4 per cent) and the smallest in machinery, equipment

and supplies (2.2 per cent). Wholesale trade as a whole reported an employment decline of 7.6 per cent over the year interval.

The decline during December of 24,200 workers on construction projects financed by the Federal Government was partially due to the completion of several airport and non-residential building projects, and partially to seasonal declines on road and reclamation projects. Gains reported during the month on ship construction and air corps station construction projects were not great enough to completely offset these declines.

During the past year of war, employment on construction and shipbuilding projects increased 1,056,000. From the level of 1,068,000 in December 1941, employment rose rapidly during the spring and summer of 1942 until in August a peak of 2,229,000 workers was reached. From that point employment tapered off only gradually to a level of 2,124,000 in December. Most of the declines were due to the completion of projects rather than to seasonal influences. War project employment constituted 89 per cent of the total in December 1941 and 96 per cent in December 1942.

Civilian employment in the executive branch of the Federal Government aggregated 2,948,000 in December. This represented an addition since November of 120,000 workers of whom approximately 60,000 were in the War and Navy Departments and other agencies and 60,000 were temporarily employed by the Post Office Department to handle the heavy holiday mails. Employment in non-war agencies other than the Post Office Department remained approximately at the November 1942 level. Federal employment inside the District of Columbia turned down for the first time in 13 years. This was the result of decentralization of certain war and non-war offices during the month.

Over the past year Federal executive-services employment showed an increase of 1,239,000 which was distributed as follows: War Department 846,000, Navy Department 261,000 emergency war agencies (exclusive of Federal Security Agency employees who were transferred to the War Manpower Commission in December 1941) 110,000, and other agencies 22,000.

Reductions in December 1942 in personnel of the NYA, WPA, and CCC programs were 7,300, 26,100, and 700, respectively, leaving aggregate personnel on the NYA of 158,000 and on the other two programs of 338,000. A year ago workers on the NYA program totalled 623,000 and on the work-relief programs 1,206,000.

Legislative Proposals of Labour Organizations

PROPOSALS for legislation were submitted recently to the governments of the provinces of Ontario and British Columbia by

various labour organizations. A summary of these proposals follows dealing with a variety of matters regarding conditions of work.

Ontario Executive of Trades and Labour Congress

On January 6, 1943, the Ontario Provincial Executive of the Trades and Labour Congress of Canada presented its annual memorandum of requests for legislation to the Ontario Government.

Freedom of Association

The Congress requested enactment of a measure, based on a bill drafted for the Congress, forbidding employers to interfere with workers in exercising their right to form or join a labour union and compelling the employer to deal with such a union if one is organized by his employees, such legislation to cover all provincial and municipal employees or their agencies.

Cost-of-Living Bonus

The Ontario Government was urged to enact legislation to provide for a full cost-of-living bonus for all workers receiving up to \$3,000 a year who are not covered by the Dominion Order in Council, P.C. 5963, such as employees of provincial Governments and of hospitals and institutions not operated for gain.

Lord's Day Act

Attention was again drawn "to the fact that a great number of industries are permitted to produce seven days a week under the pretence of war urgency, thus transgressing the Lord's Day Act. Such violations are a direct attack on the principle of one day's rest in seven." The Congress requested that steps be taken to stop employment of workers seven days a week in industries not directly related to war production.

Minimum Wages

On the subject of minimum wages the memorandum declared that "despite the fact that the productivity of women workers has increased and to-day they are doing many tasks generally performed by men there has been no change in the minimum wage rates. We therefore request that the minimum wage rates be increased 20 per cent and that the Act be amended to include within its scope

domestic help employed in commercial establishments such as rooming- and boarding-houses and other publicly controlled places, and employees in establishments located on the outskirts of industrial centres, and that labour be given direct representation on the Board administering the Act."

Workmen's Compensation

Changes sought in the Workmen's Compensation Act include coverage of all members incapacitated by accident or occupational disease while following their employment; inclusion as industrial diseases of silicosis and tuberculosis, where such disease is traceable to occupation; increase in compensation rate from 66½ per cent to 100 per cent of earnings at the time of incapacity; extension of time limit for provision of artificial limbs, etc., and strict enforcement of regulations relating to first aid equipment; establishment of a committee upon which the Government would be directly represented through its Treasury Department, and with representation on the Board itself, to deal with investment of the funds; appointment of members of the Workmen's Compensation Board for ten years, subject to removal only for cause; labour representation on the Board.

Elevator Safety Code

The Congress requested the adoption by the Ontario Government of the Canadian Elevator Safety Code, as compiled by the Canadian Engineering Standards Association and approved by the Dominion Government, and a strict inspection of equipment now being used in the province.

Electrical Installations

Calling attention to the definition of "Contractor" in the regulations governing electrical installations issued by the Canadian Engineering Standards Association, the Congress declared itself opposed to the inclusion of definitions of personnel in these regulations since they could not increase safety and might lead to the inclusion of journeymen, to their disadvantage in securing employment.

Medical Charges in the Lumber Industry

An amendment in the Ontario Health Act was requested to provide that the fee for medical services in the lumber and pulp industry should be one dollar for 26 working days or a set rate of four cents a day, thus doing away with the practice under which an employee engaged by more than one employer during a month has the fee of one dollar deducted from his wages at each place of employment.

Health

Much time was lost in war industries through the workers suffering from dermatitis and other forms of skin trouble, due chiefly to the use of unsterilized materials in wiping services, and the Congress advocated that the sterilization of such materials should be compulsory and the workers insured against such risk.

Emergency Training Plan

The Congress reaffirmed its contention of the previous year that training given under the Emergency Training Plan is inadequate and repeated its requests for more extensive training, union rates of pay for trainees, and inclusion among those administering the plan for any industry of a qualified trade union representative of that industry.

Fire-Fighters

Dealing with fire-fighters, whose hours of duty were stated to be 72-84 per week with work on all regular holidays, the Congress appealed to the Provincial Government to go on record as approving of the three-platoon system for all Ontario fire depart-

ments as a post-war measure. Inclusion of fire-fighters within the scope of any Ontario law providing for collective bargaining was also requested.

Other Requests

Other matters on which legislation was requested included: the employment of two men on street-cars; compulsory pension schemes for civic employees; the employment of a qualified projectionist for each machine in use in a moving-picture theatre; compulsory installation of sprinkler systems in public buildings and apartment houses; regulations for the health and safety of persons employed in sand-blasting operations and in industrial processes where poisonous materials are used; free text-books for all school pupils; prohibition of home-work; amendments in the Old Age Pensions Act; forty-eight hour week for restaurant employees, no increase in working hours in other industries, except by mutual consent, and holidays with pay, where possible; increase in property exemptions under Mothers' Allowances Act and provision for benefit to dependants residing temporarily outside the Province to be near husband or father who is undergoing treatment on physician's order; institution of a system of state medical and hospital care; increase in provincial education grant to 50 per cent of the total expenditure; recommendation by Provincial Government to Dominion that the latter assume a larger share of the cost of education; no change in law governing sale of beer and spirits; upward revision of Court witness fees; establishment of uniform building, plumbing and steam-fitting standards throughout the Province.

Labour's Proposals for Legislation in British Columbia

Seven federal labour organizations in British Columbia, three affiliated with the Trades and Labour Congress of Canada, three with the Canadian Congress of Labour, together with the Vancouver Island Joint Labour Conference representing both organizations and the American Federation of Labor, collaborated in presenting a brief to the Provincial Government for changes in provincial labour laws.

Workmen's Compensation

Amendment of the Workmen's Compensation Act was requested along the lines recommended by Mr. Justice Sloan acting as Commissioner to inquire into the operation of the Act (LABOUR GAZETTE 1942, p. 1158). It was urged also that the Act be extended to the whole fishing industry and that a joint

committee of the Government and the parties interested should work out a scheme to achieve this.

Collective Bargaining

Revision of the Industrial Conciliation and Arbitration Act was recommended so as to make the recognition of unions and collective bargaining compulsory, to prevent the establishment of company unions and discrimination against union members, to make the Government responsible for prosecuting employers who violate such provisions of the Act and to enable compensation to be paid to employees whose interests were affected adversely by such violations. The Act should permit workers to bargain through

the union of their choice irrespective of the date at which the union was organized. The present Act distinguishes between unions organized before December 7, 1938, and those formed later. A union should be defined, it was advocated, as "a chartered organization to an international or national labour body and representing the majority of the employees in any employer unit, craft unit, plant unit or sub-division thereof by reason of their acceptance and paid-up membership in such organization." The establishment of a permanent Labour Relations Board with adequate labour representation was proposed to assist the Minister in administering the Act.

Legislation of this nature would, in the opinion of the labour organizations, speed up the settlement of disputes by eliminating those involving questions of union recognition and collective bargaining. Other proposals for preventing delays in handling disputes were: (1) to reduce the time limits in the Act for conciliation and investigation; (2) to forbid either party being represented at hearings by counsel if the other party objects; (3) to permit either party to apply for an arbitration board without going through conciliation procedure; and (4) to prohibit appeals to a Court on the question of the granting or refusal of a Board by the Minister or of the establishment or operation of a Board. The labour organizations were opposed to any change in the Act by which recommendations of a board of arbitration would be binding on the parties.

Health Insurance

The introduction of a provincial Health Insurance Act was urged and a more rigid enforcement of the provincial Health Act, particularly in connection with the construction of army camps. The Government was asked to work out a system by which municipal and provincial hospital grants would bear a definite relation to the amount of free service given by each hospital. As regards old age pensions, it was suggested that the pensionable age be reduced to 60, pensions increased to at least \$30 a month plus cost-of-living bonus and that pensions be paid regardless of the financial standing of the recipients or their relatives.

Other Requests

Other measures recommended were the promotion of an industrial safety campaign in view of the alarming increase in accidents and the widespread employment of inexperi-

enced workers, and an extension of the many provincial training centres to provide training in all trades, since the cost of training in private trade schools prevented many workers from attaining a high degree of skill. The Government was also asked to require stricter inspection of electrical equipment and to use its influence to have the definition of "contractor" in the Canadian Electrical Code Rule Book struck out as, in the opinion of the labour organizations, the definition "does not make the installation of electrical equipment safer for the public."

Skin Protection

A pamphlet has been prepared by the Division of Industrial Hygiene, Ontario Department of Health, dealing with the control of industrial dermatitis. It declares that skin eruption due to occupation is responsible for 60 to 70 per cent of the total number of occupational diseases, and that, therefore, the control of dermatitis is important to industry and its workers.

The pamphlet says, "It should be recognized that constant exposure to irritating substances will always produce skin eruption in some of those exposed. When contact with such substances is known to exist, preventive measures should be adopted before cases develop."

Plant workers are requested to report at once to the first aid room every instance in which a skin eruption occurs. Sometimes severe disability results from delay in treatment, continued exposure to irritating materials, and lack of adequate protective measures.

Blackouts and Cutting Tools

In an Ontario plant a short time ago, when the power failed suddenly, a large number of special cutting tools were broken due to being left with the cut on. In view of this experience, it is suggested that some effort be made in all plants so to arrange this that the amount of damage done in such circumstances can be kept to a minimum.

One firm at least has already adopted the plan during test blackout periods of having the watchman flicker the plant lights as an indication to employees that the power is to be cut off, so that they, in turn, may protect themselves and their equipment through prompt action.

Labour Law

Recent Regulations Under Dominion and Provincial Legislation

Selective Service—I.D.I. Commissions—Advisory Committees—Seamen— Cost of Living Bonuses—Alberta Boiler Regulations—Miners in Nova Scotia—Stationary Engineers and Minimum Wages in Quebec

THE National Selective Service Mobilization Regulations have been amended and several orders issued under the National Selective Service Regulations. The functions of Industrial Disputes Inquiry Commissions have been extended and advisory committees on economic policy, reconstruction and the public service set up. The National War Labour Board has issued its quarterly Order regarding cost-of-living bonuses. War bonuses for seamen employed on Department of Fisheries vessels were authorized.

In the provincial field, Nova Scotia has authorized temporary certificates for coal miners and mine examiners. Quebec now requires operators of stationary engines in mines to hold certificates under the Stationary Enginemen Act. The Quebec minimum wage Order governing forest operations has been revised, the Order relating to waste materials in Montreal and district was renewed and By-law B-1 amended. Alberta amended its boiler regulations.

Dominion

Selective Service

Selective Service Regulations. The text of the new National Selective Service Civilian Regulations issued January 19 (P.C. 246) and a summary of the National Selective Service Mobilization Regulations passed December 1 (P.C. 10924) appeared in last month's Gazette, pp. 19, 153.

Selective Service Orders. Orders issued under authority of the earlier National Selective Service Regulations (P.C. 7595, L.G., 1942, p. 1020) remain in effect as if they had been passed under the present regulations. Four such Orders have been published lately under section 30 (f) of P.C. 7595 which authorized the Director of National Selective Service to exclude any persons or groups of persons from any provision of the Regulations or to qualify the application of any provision to any person or group. By an Order dated October 15, 1942, paroled refugees of enemy origin were exempted from the Selective Service Regulations. A Christmas Order issued November 24 exempted from the Regulations for the period from December 13 to January 5 temporary seasonal employment by retail stores or the Post Office Department of teachers and students on vacation, women over 44 and men over 59 years of age. National Selective Service Officers in any zone might by public notice accord the same treatment to

women under 45 where the number of such applicants was more than sufficient to meet the requirements of high priority industry. Two other Orders, dated December 24 and January 5, excluded members of the Armed Forces employed while on leave, women working as practical nurses in private homes and persons employed in harvesting ice during the 1942-43 winter season from Part IV of the Regulations requiring notices of separation and permits to seek employment.

A fifth Order was issued January 16 under section 30 (g) of P.C. 7595. It required all employers to furnish the nearest Employment and Selective Service Office before February 6 with information concerning the nature of their business, the number of their employees on January 30 and the age and marital status of the employees, and to make an estimate of the number of workers they expected to need by April 30.

Travelling Expenses. The earlier National Selective Service Regulations (P.C. 7595) authorized the payment of travelling, moving and incidental expenses of workers and their dependents to the place of employment. In some cases it was necessary to pay the workers' return expenses from the place of employment to the point at which they were recruited or some equidistant point, but the Regulations did not authorize such payments.

However an Order in Council was passed under the War Measures Act on January 27 (P.C. 27/653) giving the Minister of Labour power to pay the return expenses of workers whether the cost of such transport had been incurred before or after the date of the Order. The payments may include the cost of transporting the worker, his dependents and effects and an allowance not exceeding \$3 a day to cover meals and incidental expenses on the trip.

Mobilization Regulations. An amendment in the National Selective Service Mobilization Regulations (L.G. Jan., 1943, p. 153) was passed January 19 (P.C. 455) under the War Measures and National Resources Mobilization Acts. "Person employed in agriculture" has been re-defined and definitions of the terms "primary industry" and "year" have been added. The term "person employed in agriculture" now includes persons in agriculture on March 23, 1942 and persons in a primary industry such as lumbering, logging, forestry, fishing and trapping on that date whose immediate previous employment was in agriculture. It does not include persons in any of the above primary industries on December 1, 1942 unless such persons were employed outside agriculture under a permit from a National Selective Service Officer or were temporarily or seasonally employed outside agriculture for a period not exceeding 60 days in a year and at a time not interfering with agricultural production. A section added to the Regulations declares that notwithstanding the definition, no one ceases to be a "person employed in agriculture" by reason of employment in a primary industry.

Registration of Men. A second amendment in the National Selective Service Mobilization Regulations was passed January 26 (P.C. 740). It extends from February 1 to March 1 the date by which all men born between 1902 and 1923 who were unmarried on July 15, 1940 or are childless widowers or divorced or judicially separated persons and who have not received a notice to report for medical examination must register.

Director of Employment Service and Unemployment Insurance.—The Order in Council (P.C. 9466, L.G., 1942, p. 1435) placing the Director of Employment Service and Unemployment Insurance and the other officers and employees of the Unemployment Insurance Commission under the Director of National Selective Service has been revoked by an Order in Council of January 7 (P.C. 82) passed under the War Measures Act. The Order in Council (P.C. 7994) of September 4 (L.G., 1942, p. 1058) which placed the local offices and

staff of the Unemployment Insurance Commission at the disposal of the Minister of Labour to assist in the administration of the National Selective Service Regulations remains in effect.

Industrial Relations

Industrial Disputes Inquiry Commissions. The Minister of Labour has been authorized by an Order in Council of January 19 (P.C. 496) under the War Measures Act to appoint an Industrial Disputes Inquiry Commission to investigate "any situation which in his opinion appears to be detrimental to the most effective utilization of labour in the war effort", and has been given power to make its recommendations effective. Industrial Disputes Inquiry Commissions consisting of one to three members were first provided for in June, 1941, to deal with some of the greatly increased number of disputes coming under the Industrial Disputes Investigation Act as a result of its extension to war industries. Their functions were later extended to examining allegations of discrimination against workers for union activity and of coercion of workers to join unions. (L.G., 1941, pp. 613, 797, 1210).

Advisory Committees

Committee on Economic Policy. The Advisory Committee on Economic Policy appointed in September, 1939, has been reconstituted and its functions extended to include post-war planning by an Order in Council passed January 23 (P.C. 608) under the War Measures Act. The Committee, which is responsible to the President of the Privy Council, is headed by the Deputy Minister of Finance and includes representatives of various government departments and agencies concerned with economic policy. It is to act as a co-ordinator of government activities in the fields of economic and financial policy and post-war planning, and may itself conduct investigations and prepare reports and recommendations on post-war problems, or direct any department or agency to do so. It will co-operate with the Committee on Reconstruction, the Advisory Committee on Demobilization and Rehabilitation and other agencies in formulating measures to meet post-war problems. The Committee may appoint sub-committees and obtain information and assistance from any government department or agency.

The membership of this Committee and of the Committee on Reconstruction is given on page 168 of this issue.

Committee on Reconstruction. A second Order in Council of January 23 (P.C. 609) under the War Measures Act re-constitutes

the Committee on Reconstruction (L.G., 1941, p. 496) and directs it to co-operate with the above Committee in conducting studies of post-war problems. The composition of the Reconstruction Committee has not been altered except for the addition of a representative of the Advisory Committee on Economic Policy as an ex-Officio member. The staff of the original Committee will be retained under the supervision of the new Committee which has power to appoint additional staff. The new Committee will make recommendations regarding post-war problems and conduct such investigations as are decided on by the Committee on Economic Policy or by the President of the Privy Council to whom both Committees are responsible. It has power to appoint sub-committees and consult experts whose expenses, incurred in appearing before the Committee, will be paid.

Advisory Committee on the Public Service. An Advisory Committee to the Treasury Board to study personnel problems of the Public Service was appointed by an Order in Council passed January 23 (P.C. 2/584) under the War Measures Act. The Committee consists of officers of the Civil Service Commission, National Harbours Board and Department of Finance and is headed by Mr. H. J. Coon, Executive Assistant, Bank of Nova Scotia. It is to study certain problems

of compensation as well as any other problems of management and the future demobilization of wartime staffs which may be referred to it or which it desires to investigate.

Seamen

An Order in Council of January 13 (P.C. 14/275) authorized the payment of war bonuses to the officers and crew of Department of Fisheries vessels engaged in the Fisheries Protection Service. The bonuses are to be paid under the same conditions as those earlier authorized for seamen on Department of Transport vessels operating after June 1, 1942 in areas designated by the Minister of Transport as war zones (L.G., 1942, p. 1045).

Cost of Living Bonuses

The Quarterly Order of the National War Labour Board concerning adjustment of cost-of-living bonuses paid under the Wartime Wages Control Order (P.C. 5963, L.G., 1942, p. 778) was issued February 4. Since the cost-of-living index has not changed by a whole point since the last adjustment of bonuses under the Board's Order of August 4 (L.G., 1942, p. 904), no adjustment of bonuses may be made between February 15 and May 15 unless specially authorized by a War Labour Board on the application of employers or workers.

Provincial

Alberta Boilers Act

An amendment gazetted April 30 in the regulations prescribing fees for various classes of certificates issued under the Act (L.G., 1942, p. 584) fixes \$2 as the fee for renewals of temporary certificates.

Nova Scotia Coal Mines Regulation and Coal Mines Regulation (Wartime Emergency) Acts

The lack of a sufficient number of coal miners and mine examiners has led to the adoption of two Orders in Council gazetted January 27 authorizing the issue of temporary certificates.

The first, passed under the Coal Mines Regulation Act, empowers the Minister of Mines to grant temporary certificates of competency as mine examiners to holders of first-class certificates approved by the local Deputy Inspector of Mines. Temporary certificates will be valid until 60 days after the date of the next regular examinations for certificates. The Act stipulates that examinations must be held annually or oftener if the Minister so directs.

The second is under the Wartime Emergency Act which empowers the Governor in Council to make regulations concerning the qualifications and supervision of persons employed at the working face. It authorizes local boards of examiners, appointed under the Coal Mines Regulation Act, to issue temporary certificates of competency required under the Act to coal miners who hold certificates from other provinces comparable to the Nova Scotia ones and who are granted leave of absence for three months or longer from the Armed Forces to overcome the shortage of coal miners. Candidates for temporary certificates, on examination by local boards, must produce a certificate issued outside the province and furnish evidence of experience at a working face sufficient to qualify them for employment in Nova Scotia mines. The certificates are valid only during the period of leave from the Armed Services.

Quebec Minimum Wage Act

By-law B-1 which imposes a levy on employers to defray the cost of administering the Act (L.G., Jan., 1943, p. 154.), has been further amended by an order gazetted on January 30.

The By-law provides that the levy is payable for two periods, January to June and August to December inclusive. The levy for the first period is now payable on August 10 rather than July 10 of each year and that for the second period on February 10 rather than January 10.

Order 39, 1942, governing forest operations, was gazetted on January 9 and is effective from that date until January 1, 1944. It supersedes an earlier Order which has been in effect since May, 1941 (L.G., 1941, p. 556).

There has been some re-arrangement of the Order but no changes in the main provisions. It covers all work in forests including transporting timber and reforestation, but does not apply to the handling of wood in mill storage ponds or to work in forest colonies or township forest reserves. The rates for cutting, which apply to 26 days work, are \$37.50 for firewood and \$52 for pulpwood. Stream drivers must receive \$3 per day and sorters and dam-keepers \$52 for 26 days work. The rates for cooks, teamsters and tradesmen range from \$35 per month for cookees to \$80 for cooks in camps of 50 men or more. In all the above cases board and lodging must be provided. Piece rates are also set for cutting, and the maximum deduction permitted from the wages of piece-workers for board and lodging is 60 cents per day.

In the case of most of the above classes of workers, hours in excess of 60 per week must be paid on a proportional basis. Workers must be provided with tools and may not be charged with the cost of broken or worn tools.

Deductions from wages are not permitted except for cash advances, the price of goods bought (provided a price list is posted in a conspicuous place), and, in the case of piece-workers, the price of board.

Before an employee starts work, the employer must draw up a written contract in triplicate setting forth the conditions of the engagement including a fixed or determinable wage rate. A copy of this contract must be given to the worker immediately. On the departure of a worker, the employer must prepare in triplicate a settlement sheet showing debits and credits in detail. The worker must be given a copy of this sheet, and copies of both it and the engagement contract must then be forwarded to the Minimum Wage Commission. Employers governed by this Order are exempt from the provisions of By-law B-2 which requires the keeping of registers and By-law B-4 requiring wages to be paid in envelopes on which relevant information appears.

Order 25, relating to waste materials in Montreal Island and a 10-mile radius (L.G., 1939, p. 301) has been renewed until March 1, 1944, by an order gazetted on January 30.

Quebec Mining Act

A regulation gazetted on January 30 provides that all persons who supervise the operation or attend to the maintenance of stationary engines in mines must hold a certificate issued under the Stationary Enginemen Act.

Recent Legal Decisions Affecting Labour

Alberta Court Dismisses Appeal of Dominion Government Employee Against Judgment Denying Right to Sue for Damages Contrary to Alberta Workmen's Compensation Act

ON December 9, 1942, the Appellate Division of the Alberta Supreme Court unanimously upheld the judgment of Howson, J. (L.G., 1942, p. 648) that a Dominion Government employee injured through the negligence of an employer subject to the Alberta Workmen's Compensation Act is entitled to compensation under that Act and thereby loses his right to sue for damages.

The plaintiff, a railway mail clerk employed by the Dominion Government, had been injured in a train collision in Alberta for which the Canadian Pacific Railway Company was held responsible. He had received compensation through the Alberta Workmen's Compensation Board but had later instituted an action for damages from the company.

Section 24 (6) of the Alberta Workmen's Compensation Act stipulates that a workman who is entitled to compensation under the Act and who by virtue of section 24 (3) would have a right of action against some person other than his employer as a result of an accident, has no right to such action if the person is an employer in an industry within the scope of the Act. The plaintiff, however, claimed that the provincial Act was not applicable to him but that he was entitled to and had received compensation under the authority of the Dominion Government Employees' Compensation Act. This Act provides that employees of the Dominion Government shall be paid compensation for injury according to the scale fixed by the Workmen's Compensation Act of the province in which the accident occurs, the matter to be determined by the Workmen's Compensation Board of the province. The plaintiff contended further that the Crown in right of Canada was not an

employer within the meaning of the provincial Act and that any intervention in the case by the Alberta Workmen's Compensation Board was purely for administrative purposes.

The trial Judge had considered that the intention of the Dominion Act

appears to have been that the Crown as employer and the Crown's employees should be put in the same position as other employers and employees in whatever province of Canada an accident occurred for which compensation should be paid either by the Crown (Dominion) or by some other employer who, or whose employee, caused the accident.

The Appellate Court in dismissing the appeal quoted with approval this opinion of the purpose of the Dominion Act which it declared was designed to assimilate the rights of Dominion Government employees to those of employees of private employers under the respective provincial laws.

Mr. Justice Ford pointed out that "what is being dealt with is the civil rights in the province of the person injured." He considered that there was

no doubt that a province can by legislation, not of a "colourable" nature, . . . deny, in an action brought in the Courts of the province, the civil right to recover damages for injury caused by negligence to an employee of the Dominion Government who has the statutory right to recover compensation for an injury received. At least this is so in the absence of overriding legislation by the Parliament of Canada, as to the right to pass which I express no opinion.

He saw no constitutional impediment to provincial legislation treating the Dominion as an employer, although Dominion legislation was required to authorize the provinces to determine the liability of the Crown in the right of the Dominion and to pay the sum determined. The argument that the provincial Workmen's Compensation Act under which the province determines the liability of the Crown is in conflict with the Exchequer Court Act was rejected on the ground that the Government Employees' Compensation Act gave the province the right to determine the Crown's liability in compensation cases.

Mr. Justice Ford drew attention to another ground for granting the appeal. He pointed out that the Alberta Act gives the Workmen's Compensation Board exclusive jurisdiction to determine whether any person or group of persons is an employer and whether any employee is a workman within the meaning of the Act. The board had ruled that the persons in this case were employers and employees within the meaning of the Act, and in his opinion, "the jurisdiction of the board being exclusive is not open to question."

Chief Justice Harvey agreed with Mr. Justice Ford's conclusions. As he expressed it:—

There is no doubt that the common-law right for damages is a civil right within the province to which the legislative jurisdiction of the province extends, and it can of course be taken away by provincial legislation. It seems clear from the two subsections referred to that that right has been taken away in the circumstances of this case and a right of compensation substituted for it.

I can see no reason for questioning the legislation on any ground. It does not attempt to make the Dominion Government liable and whether it has submitted to the operation of the Act to make it come within the definition of "employer" under sec. 2 (h) is in my opinion of no importance. Nor do I think it is of any importance that there is a Dominion statute under which the plaintiff could or did receive compensation. It is in cases where he is entitled to, not where he receives, compensation under the Act that his right of action is abolished and the right to compensation substituted therefor.

Other members of the Court concurred. *Ching v. Canadian Pacific Railway Company* (1943) 1 Western Weekly Reports 93.

British Columbia Court Dismisses Employer's Appeal for Injunction to Restrain Board of Arbitration from Investigating Dispute over Union Recognition

The British Columbia Court of Appeal, dividing three to two, on November 20, 1942, dismissed the appeal of a lumber company against a lower Court's refusal to grant an injunction restraining a Board of Arbitration appointed under the British Columbia Industrial Conciliation and Arbitration Act from making an investigation (L.G., 1942, p. 1503). The Board had been appointed after the company refused the request of a committee of its shingle division employees for recognition of the local of the International Woodworkers of America to which the employees belonged and for a collective agreement governing working conditions. The company applied for the injunction on the ground that the dispute over whether the company should sign an agreement with a union was not a dispute within the meaning of the Act. The trial Judge held, however, that the question of union recognition was only one of the terms of the draft agreement which the company was rejecting as a whole and therefore the dispute was, in the words of the Act, a dispute "as to matters or things affecting or relating to work done or to be done . . . or as to the privileges, rights and duties of employers or employees . . ." This definition is similar to that in the Dominion Industrial Disputes Investigation Act.

The majority of the Appeal Court agreed with the trial Judge and held further that the definition of dispute in section 2 (1) of the Act was sufficiently comprehensive to cover the subject of disagreement between the company and its employees even though the subject was not enumerated in the specific headings (a) to (g) supplemental to the general definition which are not to be deemed as "limiting the general nature of the above definition." They were of the opinion that an employer's refusal to enter into a collective agreement was a matter affecting the employees' "privileges and rights". In Mr. Justice O'Halloran's words,

"Privileges and rights" of employees certainly include the right to form a union of their own, or to form or join themselves into an existing local union which may be a branch or part of an established larger union It is also the right and privilege of employees when so organized to negotiate and contract with their employer through the medium of their union.

Mr. Justice Sloan also took this view and considered that the sole question was whether or not the dispute between the company and its employees was a dispute within the meaning of the Act. He pointed out that other sections of the Act recognized that "it is the privilege and right of the employees to belong to a trade union" and that "it is lawful for an employer to enter into an agreement with such trade union with respect to the working conditions of such trade union employees."

Counsel for the appellant also contended that the union was a third party without interest in the subject matter of the dispute. Mr. Justice O'Halloran considered that since "the majority of the employees seek to have this union represent them as a party to the proposed agreement" as it was their right to do, and as the proposed agreement provides for a grievance committee of three members "actually then in the employ of the company", it followed "that the interest of the employees is the interest of the union. It is definitely not an uninterested third party".

The appellant argued further that the company could not sign an agreement with the particular union because section 5 of the Act authorizes employees to bargain collectively with their employer through their trade union officers only if the majority of the employees were organized into a union prior to December 7, 1938. The shingle mill employees were organized after this date. The trial Judge held that it was for the Board of Arbitration to determine whether under the Act an agreement could be made with the union. Mr. Justice Sloan agreed with the trial Judge on this point but Mr. Justice O'Halloran, with whom Mr. Justice Fisher concurred, was of

the opinion, following judgments of the Privy Council and of the Supreme Court of Canada, that the Board of Arbitration was not competent to determine judicially a question of its own jurisdiction.

On the other hand, Mr. Justice O'Halloran distinguished between "bargaining" and "contracting". The "bargaining", that is negotiating, had been conducted, not by the union but by the elected representatives of the majority of the employees affected.

One of the terms of bargaining advanced by those representatives is that the company shall enter into the contract with their union as fully representing their interests. The distinction between "bargaining" and "contracting" is substantive and not purely verbal The expression "conduct such bargaining" occurs twice in sec. 5. That shows clearly that "bargain" is there used in the sense of negotiation, and not in the sense of a contract. One may conduct a negotiation, but obviously one cannot conduct a contract. Read in the sense the context demands, there is nothing in sec. 5 which hinders the company from entering into a contract with a union. That is particularly so here, since the negotiations have been conducted, not by the union, but by the representatives of the majority of the company's employees.

Mr. Justice O'Halloran declared that the Act should be construed according to its "cause and necessity" and according to that which is "consonant to reason and good discretion".

The "cause and necessity" of the statute is the effecting and maintenance of industrial peace and good will It is "consonant to reason and good discretion" that employees should form themselves into unions, and that such unions should contract with employers on their behalf.

Dissenting, Chief Justice McDonald, with whom Mr. Justice McQuarrie agreed, warned against carrying the statute "further than the import of its language will justify" and was of the opinion that the rights and privileges referred to in the Act's definition of a dispute referred to "rights, privileges, wages and conditions of employment; but they do not refer to a right in the employees to force their employer to enter into a contract with some third party". As regards section 5, the Chief Justice pointed out that as originally enacted in 1937 the section permitted employees to bargain collectively through their elected representatives who might or might not be a union. The 1938 amendment, in his opinion, restricted this right and made it unlawful for employees to bargain through their union unless it existed prior to December 7, 1938.

Permission has been given to appeal this decision to the Supreme Court of Canada. Meanwhile the Board of Arbitration, with the employee representative dissenting, reported on December 11 that in their opinion the

employees had not produced sufficient reasons why the company should enter into an agreement with the union. *Bloedel, Stewart and Welch Limited v. Stuart et al* (1943) 1 Western Weekly Reports 128.

British Columbia Appeal Court Holds that Board of Inquiry under the Merchant Seamen Order not Bound to Follow Judicial Procedure

By a three to two decision, the British Columbia Court of Appeal on November 3, 1942, allowed the appeal of the Minister of National Defence for Naval Services against the order of a lower Court for the release of a Greek seaman who had been detained under authority of the Merchant Seamen Order, 1941. The Order was passed under the War Measures Act. It provides for inquiry by a board representing the Departments of Naval Services and Transport and the Immigration Branch into the conduct of any seaman who is likely to delay the sailing of any ship or who deserts or refuses to sail or carry out his regular duties. (L.G., 1941, p. 650; 1942, p. 307, 1045).

In January, 1942, the seaman in this case had been brought before a Board of Inquiry on a charge of desertion and was ordered detained for three months. When his case was reviewed by the Board, he was ordered detained for a further period of six months because he refused to sign on a ship. In *habeas corpus* proceedings, the trial Judge ordered his release on the ground that he was imprisoned without due process of law because the Board had improperly called him as a witness and by questioning made him incriminate himself as a deserter. The Judge did not rule on his second contention that he had not been allowed the full services of counsel.

The majority of the Appeal Court in setting aside the order releasing the seaman held that a Board of Inquiry was not bound to observe the procedure of a criminal court because it was not a judicial but an administrative tribunal. Chief Justice McDonald declared:

... tribunals that are not Courts are not bound by the methods of Courts, but may adopt whatever methods are best suited to their functions.

The majority contended that the trial Judge had acted on the assumption that the Board's orders were in the nature of convictions for crimes whereas the Merchant Seamen Order, in their opinion, indicated that a Board of Inquiry's function is not to punish but to compel. Therefore, the fact that the seaman had committed the crime of desertion was irrelevant except insofar as his desertion was

detrimental to the war effort. In the words of Chief Justice McDonald:

... the board is authorized to coerce a deserting seaman, not because of his criminal or civil liability, but because it is *expedient* in the public interest. That is, the board is not designed to punish, and is not a criminal tribunal; its purpose is to enforce a species of conscription. ... So the board can make orders that have no relation whatever to legal liability. Such orders can only be based on policy and expediency.

The fact that the Board's members were government officials selected not for their legal knowledge but for their ability to deal with matters of national expediency was further evidence of its non-judicial nature.

Further, Chief Justice McDonald pointed out that the Board was authorized by the Merchant Seamen Order to interrogate a seaman to determine his willingness to sail on a ship, and there was nothing to show that it could not interrogate him on other points. The fact that the Board was given the powers of a commissioner under the Inquiries Act did not imply that it could not obtain evidence by other means than were authorized by that Act. Moreover, he declared that the right to representation by counsel is not an inherent right in all judicial tribunals and is only a legal right in tribunals resembling the ordinary Courts of Law.

In dissenting, Justices O'Halloran and Fisher held that the first detention order was invalid because the Board did not prove that the seaman was a deserter, and had no right in a case that was criminal in essence to interrogate the seaman and act on his incriminating answers; and the second order was invalid because the Board's jurisdiction to review depended on the first order being valid. They regarded the Board's hearing as a trial and upheld the right of a person charged with an offence against the State to have a case made out against him before being called upon to answer, whether he was before a criminal court or any other form of tribunal. Mr. Justice O'Halloran also contended that the second order of the Board was invalid because it was issued for "refusing to sign on a ship", an offence not mentioned in the Merchant Seamen Order and therefore outside the Board's jurisdiction. The Order listed "refusing to sail on his ship" as an offence but the seaman could not be charged with that as his ship had sailed before either hearing took place. Moreover, the Board, in finding the respondent guilty of refusing to sign, ignored his plea that he was physically unable to stand a long voyage due to rheumatism, and merely ordered that he be medically examined while undergoing detention and that a report be submitted for the Board's consideration.

The argument that the Board's actions were justified by State necessity was rejected by Mr. Justice O'Halloran in these words:

... until it is found necessary in time of war to displace the civil power by martial law, imprisonment or detention without due process of law is an anachronism. The establishment of boards without judicial personnel but with powers of detention and imprisonment must render it very difficult to prevent the gradual substitution of totalitarian negation of law for the rule of law.

Rex and Minister of National Defence for Naval Services v. Pantelidis (1943) 1 Western Weekly Reports 58.

Civic Early Closing By-law Declared Invalid by Ontario Court

Holding that where a municipal by-law interferes with business rights the Act authorizing the by-law should be strictly complied with and that this had not been done in the case before him, Mr. Justice Fisher in the Ontario High Court of Justice allowed with costs a motion for an order that an early closing by-law of the City of St. Thomas be quashed. The by-law which purported to be passed under the Ontario Factory, Shop and Office Building Act, applied to "all shops where groceries, meats, provisions, fruits, vegetables and other perishable household foods are exposed or offered for sale by retail". It was adopted on the petition of "retail vendors of groceries, meats, fruits, vegetables and other perishable household supplies and foods".

Section 82 of the Act provides, first, that a municipal council may make by-laws regarding the closing of "any class or classes of shops within the municipality" and, second, that if an application is presented to a council for the "passing of a by-law requiring the closing of any class of shops" and the council is satisfied that it is signed by at least three-fourths of the occupiers of the shops to which it relates, the council must pass a by-law requiring all shops "belonging to the class specified in the application" to be closed at the times and hours specified. The Court held that the by-law in question did not conform to the requirements of the Act since it affected shops of several distinct classes and was not based on a petition signed by only one class. *Cassis v. City of St. Thomas* (1942) Ontario Weekly Notes 643.

Montreal Court of Sessions Holds that Striking Workers Have Broken Contract of Employment

Ruling that employees who individually or collectively cease work without their employers' consent have automatically broken

their contract of employment, Mr. Justice Guerin in the Montreal Court of Sessions of the Peace on December 23, 1942, dismissed charges under Section 502A of the Criminal Code against the Banque Canadienne Nationale which was accused of discharging three employees for the sole reason that they belonged to a trade union and of using intimidation to prevent employees joining or continuing as members of a trade union.

The case arose when employees of the bank who were members of the Office and Professional Workers' Organizing Committee struck to secure recognition of their union and an increase in salaries (L. G., 1942, p. 672). Protesting against the management's refusal to discuss the workers' grievances, a number of the employees ceased work on April 30, 1942, but the majority returned when the employers posted notices inviting them back. Later, notices were posted in the bank branches announcing that those who had not returned to work were no longer employees of the bank and would be replaced. The plaintiffs were in this second group.

Mr. Justice Guerin, in dismissing the charges, declared that the bank did not discharge the plaintiffs nor refuse to employ them. He pointed out that the case was governed by the provisions of the Civil Code of Quebec relating to contracts of employment in the absence of any special law applicable to the plaintiffs modifying the general law. The Industrial Disputes Investigation Act specifically states that striking employees do not cease to be employees within the meaning of the Act, but the plaintiffs were not within the scope of that Act. After citing numerous authorities, the Judge held that under the Civil Code of Quebec the employees had broken their contracts of employment by ceasing work without the consent of their employer and refusing to return at his invitation. The case was not altered by the fact that many ceased work in obedience to union leaders, nor in his opinion, in which he followed Planiol and Riepert's Civil Law, is there any difference, as regards breach of contract between a collective cessation of work and cessation by an individual. He was also of the opinion that the act of striking implies a desire to break the contract of employment since the object of a strike is to alter the conditions of work and secure a better contract of employment. Finally, he considered that if employees have the right to strike, employers have the right to continue their business, and that implies the right to hire new employees to replace the strikers.

The second charge that the bank managers had by intimidation and threats of dismissal

tried to prevent the plaintiffs from belonging to a trade union was dismissed on the ground of insufficient evidence. While the plaintiffs had been asked by their employers to sign a prescribed letter of resignation from the union, the fact that they continued their membership in the union with the knowledge of their employers indicated that they had not been intimidated and were not in fear of losing their jobs. He accepted the definition of intimidation as "putting a person in

fear in some way" but did not consider that the evidence proved that the alleged acts of intimidation had produced such a state of mind in the plaintiffs. He added,

Section 502A does not prohibit the employer from indicating his opinion of trade unions to his employees nor from advising them not to belong to a union.

Le Roi v. La Banque Canadienne Nationale, Court of Sessions of the Peace, Montreal, December 23, 1942.

National Conference on Labour Legislation in U.S.A.

THE ninth National Conference on Labour Legislation called by the U.S. Secretary of Labour met on November 17 and 18 and was attended by representatives of the Federal and State Departments of Labour and of organized labour.

In a message to the Conference, President Roosevelt declared that:—"the standards which have been built up over the years to protect our industrial workers against accidents, disease and fatigue have great importance in conserving the manpower of the war effort to-day. For if the industrial army is crippled by these enemies on the home front, the supplies going to our fighting forces will be curtailed. In this you are confronted with a challenge: How to carry out the intent of the laws that you in the State Labour Departments administer and that organized labour has struggled to secure, while making necessary adaptations to wartime conditions? How to arrange working hours so that the machines can operate round the clock while the human beings secure adequate rest? . . . The hard work that still lies ahead of you is work that is essential to the winning of the war and is also essential to the peace that we hope to make—a peace in which good living and working standards will be established for all peoples." The War Department also sent a message endorsing the maintenance of labour standards in wartime as an aid to production and expressing appreciation of efforts of the Labour Commissioners to adjust State laws when required by emergency conditions in war industries.

Labour Standards in Wartime

The Conference declared that its purpose was to consider labour standards in relation to the fullest utilization of manpower in war production and that its recommendations would be made with a view to accelerating and strengthening the war effort. Such causes of

waste as the alarmingly high accident rate, absenteeism caused by fatigue, illness and industrial diseases and labour turnover should be dealt with by a policy framed in accordance with its recommendations. In order to do away with conflicting orders issued by a number of authorities, the Conference recommended that all Federal labour policies should be decided by, or in co-operation with, the United States Department of Labor and that State Labour Departments should be promptly informed as to such policies.

War production could best be maintained at a high level by adherence to existing labour standards and their extension to groups not now covered, but, where investigation by the State Labour Department showed the existence of an emergency, specific standards might be temporarily modified in war industries. The Conference endorsed the procedure for temporary adjustments developed by the State Labour Departments, in co-operation with the U.S. Department of Labor, the Army, the Navy, and the Maritime Commission, as they had made it possible to meet emergency war needs while preserving basic standards. The States had used various methods in making such adjustments and no single method could be recommended as the best.

Wages and Hours of Labour

While recognizing the need for maximum production for war purposes, the Conference strongly opposed any change in the Fair Labour Standards Act which might destroy the principle of the basic 40-hour week with time and one-half for overtime. It was pointed out that where hours were too long, production decreased owing to impairment of the worker's health and efficiency. A resolution endorsing the 40-hour week as prescribed by the Fair Labour Standards Act declared that to lengthen the basic work-week would reduce workers' earnings in the face

of the rising cost of living, cut purchasing power to a bare subsistence level and thus injure morale and interfere with production.

Approval was given to the joint recommendation of the War, Navy, Commerce and Labour Departments, the Maritime and War Manpower Commissions, War Production Board and Public Health Service, calling for a maximum working day of eight hours, except where temporary increases were necessary to meet war emergencies, a weekly rest-day, and pauses for meals.

Minimum-wage regulation was considered by the Conference to be a vital part of the war production program, since full production could only be obtained from workers whose wages were adequate for health, decency and high morale. It was necessary to protect the worker's income against rising living costs during the war and a fall in wages afterwards. The Conference therefore urged the extension of the 40-cent minimum rate to all workers under the Fair Labour Standards Act as soon as possible and the fullest use of the Public Contracts Act to set minimum prevailing wage rates. States without power to regulate wages should take immediate steps towards enactment of State wage and hour legislation, similar to the Federal Act, establishment of a basic minimum for all low-paid workers, and provision for wage-fixing machinery. States having a minimum-wage law applying to women should consider extending it to men. It was also recommended that wage-rates be established for the job with equal pay for equal work and that this principle should be incorporated in all union contracts, questions as to what constitutes equal work being referred to joint labour-management committees and, where no agreement can be reached, to arbitration.

Safety and Health

For the prevention of industrial accidents, which were the greatest single cause of lost time and which were responsible for the loss of 251,000,000 man-days in 1941, the Conference recommended a number of measures, including: strengthening of State laws, especially where there is no provision for rule-making authority; adoption of labour codes, where these are lacking, to deal with the principal hazards; provision for stricter inspection and enforcement; co-ordination of plans of Federal and State agencies; and safety training programs for new workers, foremen, key men and union shop stewards, and training courses in supervision. To deal with the serious problem of finding sanitary houses for war workers, it was recommended that the appropriate Federal authorities should, as

speedily as possible, put in effect a program of low-cost housing in areas where there has been a concentration of war industries.

Workmen's Compensation

In regard to workmen's compensation, the Conference considered that complete coverage, an adequate scale of benefits and prompt and simple administration were even more necessary during the war than in peacetime. Each State should, therefore, raise benefits, extend coverage and provide compensation for industrial diseases where these were not already included. A resolution was adopted urging the Federal Government to take the necessary steps to enact Federal legislation to protect employees contracting occupational diseases in defence plants operated for the Government by private contractors in States where compensation was not provided under the State law.

The Conference also considered that provision should be made to prevent a higher cost of workmen's compensation due to the increasing employment of handicapped and older workers. This should not be done by permitting such workers to waive their compensation rights but by building up special funds such as second injury funds. The employer would then carry only the normal cost of an accident, additional expense of the second injury being borne by the special fund.

Private Employment Offices

Referring to labour contractors and fee-charging employment agencies, the Conference condemned certain wasteful practices which seriously interfered with the orderly recruitment of labour for war industries and agriculture and recommended that they should be outlawed. These practices included spreading of false information, charging exorbitant fees, stimulating artificial labour turnover and encouraging unnecessary travel.

It was noted that although the States had done much to prevent abuses within their own borders, many employment agency placements were across State lines and the problem had become a national one. It was urged that the Bill, now before Congress, requiring Federal registration of employment agencies for industrial and agricultural labour operating across State lines, should be enacted.

Employment of Children and Young Persons

Principles which it considered should govern employment of young persons in industry and agriculture in wartime were laid down by the Conference and were summarized in the LABOUR

GAZETTE for January on page 8. These included prohibition of employment of children under 14 years of age as part of a hired labour force, of children under 16 in manufacturing or mining and of minors under 18 in hazardous occupations, guidance of young persons into occupations suited to their age and capacity, and recruitment of men over draft age and of women before young persons under 18 are recruited. In addition, the independent contractor or "little merchant" system, used in distributing newspapers, magazines and circulars, was condemned and the bringing of these groups under child labour laws was strongly advocated.

Home Work

The Conference reaffirmed the stand taken at its previous session in urging the abolition of home-work owing to the difficulty of enforcing labour standards in such work and coping with low wages, long hours, child labour and bad working conditions. The Administrator of the Wage-and-Hour and Public Contracts Divisions was commended for virtual prohibition of home-work in five important home-work industries and it was recommended that similar action be taken in the case of embroideries, handkerchiefs and other home-work industries and that a strong enforcement program be undertaken at once. It was also recommended that action be taken

by the States to control home-work in intra-State industries and industries not covered by Federal orders.

RESOLUTIONS

Resolutions of the Conference urged:— Centralized supervision of vocational training facilities and State regulation of privately-operated trade schools; special measures for maternity care of working women and day care of young children whose mothers are employed. Other resolutions directed attention to the unsatisfactory hours schedules prevailing in certain Government establishments notwithstanding the announced Federal policy on working hours; endorsed State health insurance; demanded adequate labour representation on Government bodies whose decisions affect the living and employment conditions of workers; encouraged the U.S. Department of Labour to proceed with plans providing an advisory service to industry and labour, in co-operation with State Labour Departments, for the improvement of working conditions in war industries.

The Conference recommended appointment of a committee to study and report to the delegates upon the American Arbitration Association's Standard Bill for arbitration of labour disputes and upon the Bill for emergency powers of Governors, distributed by the Council of State Governments.

Hazards to Young Workers from Radioactive Substances

As a result of an investigation by the Children's Bureau of the United States Department of Labour into the hazards to young workers in occupations involving exposure to radioactive substances, the Acting Chief of the Children's Bureau issued a Hazardous-Occupation Order effective on May 1, 1942, under the Fair Labour Standards Act prohibiting the employment of young persons under 18 in workrooms where self-luminous compounds containing radioactive substances are manufactured, handled or used, or where incandescent mantles made with solutions containing thorium salts are manufactured, processed or packaged.

The investigation was confined to the self-luminous dial painting industry, which has expanded considerably during the war, and the incandescent mantle industry. Over 40 per cent of the workers in typical plants of these industries were under 21. The findings of the investigators have been published as Report No. 6 of the Children's Bureau series entitled *Occupational Hazards to Young Workers*.

The report describes the processes where radioactive materials are used in the indus-

tries under study, and indicates the hazards in each process and the safety measures taken by various plants to minimize them. The harmful effects of exposure to radioactive substances are discussed, and particular attention is drawn to the effect of radium deposits on the growing ends of bones in young persons. The fact that symptoms of radium poisoning often do not appear until years after exposure renders it difficult to trace cases to particular occupations and to evaluate the effectiveness of preventive measures. As yet only twelve States pay workmen's compensation for injury from radioactive substances.

The investigators concluded that in spite of the great improvements in safe practices since the early days of the dial-painting industry there was still some risk in the industry, particularly to young workers who are less likely to be neat, careful and pay attention to personal hygiene. They were also of the opinion that the incandescent mantle industry was hazardous to young persons because reported measurements of radioactive gas in the air of a typical plant showed concentrations of radioactive gas many times as great as the maximum safety limit recommended by authorities on the subject.

Prices and Price Control

Price Control in Canada During January, 1943

Rationing and Allocation—Consumer Credit—Restrictions on Sale and Manufacture—Conservation Through Standardization and Elimination—Standards Section—Price Orders

THE success of the price reduction program introduced during December was shown by a drop of 1.7 points in the cost of living index between December 1 and January 2, the entire reduction being due to lower food prices. During January, the butter ration was reduced for the period January 18 to February 28. Consumer credit regulations were extended to cover certain additional commodities and terms regarding down payments and periods of credit were revised. Restrictions were placed on the distribution and sale of fertilizer, on the use of oils and fats in manufactured products and on the sale of office machinery. Use of metal was prohibited in 90 additional articles and measures to conserve metal and economize in production were introduced regarding electrical apparatus and equipment, heating and plumbing equipment, office equipment and luggage. Most important orders regulating prices concerned a number of simplified products, dried fruits and several varieties of fish, fuelwood and used steel drums and barrels.

Rationing and Allocation

Butter.—A change was made in the butter ration in January, reducing the effective ration from $\frac{1}{2}$ pound to $\frac{3}{4}$ pound per person per week for the six-weeks period, January 18-February 28. In the announcement, on January 20, it was explained that overall short supply and unusually severe winter weather, which has hampered the distribution of butter, made it necessary to reduce the ration. Prior to making this reduction the Board took measures to facilitate the distribution of butter stocks by cancelling all contracts for future delivery and by making shipments in car-lots from the Prairie Provinces (an area of surplus production) subject to a permit from the Foods Administrator, issued through the regional offices.

The method of reducing the ration has been to make four coupons cover the period formerly covered by six. Expiry dates on all four were extended to February 28 and consumers are themselves responsible for stretching the

butter allowance evenly over that period. Use of coupon No. 9, which becomes valid on March 1 and expires on March 14, will overlap with the first coupon in the new ration book. (Board Order No. 228, January 12, effective January 20, amending 220).

Corn Syrup.—Since the advent of sugar rationing, both the household and industrial consumption of corn syrup has expanded and, although the production of corn syrup had increased, shortages developed. In order to release extra supplies for household use, an order of the Sugar Administrator prohibited the use of corn syrup in the commercial manufacture of any product in Canada. (Glucose, a commercial corn syrup, provides a substitute for industrial use.) (A-570, Jan. 23, effective Jan. 28.) For similar reasons it was necessary last July to limit the industrial use of honey.

Beef Supplies.—Orders were issued by the Foods Administrator on Jan. 12 to all inspected abattoirs in Canada that the weekly requirements of the armed forces for beef supplies were to be met each week before making any sales to the public. It is expected that these orders will remain in effect for an indefinite period.

(It has been recently announced by the Defence Council that reductions have been made in the amounts of certain foods allowed to the Canadian Armed Forces in Canada. Rations of beef, pork, fish, butter, coffee, and tea have been reduced 25 per cent and sugar $12\frac{1}{2}$ per cent. This will bring navy, army and air force rations more nearly into line with the civilian scale.)

Ships' Stores.—A detailed procedure has been laid down for the purchase of ships' stores for ocean-going vessels. An inventory of goods on board at arrival and an indent for stores required must be delivered to the Administrator of Ships' Stores who has the power to reduce the quantities specified on the indent. Indents are to be approved and given a control number by the Administrator, and the number is to appear on subsequent purchase orders and invoices before the goods are supplied or bills paid. The Administrator

was also given power to fix a special price or markup on goods sold for ships' stores in order to ensure the supply of necessary stores in cases where the goods are not available on the local civilian market and to avoid subsidizing goods sold for ships' stores. (B-226, Jan. 12, revoking B-191).

Office Machinery.—Under a new system of allocation all sales and deliveries of office machinery have been made subject to written permit from the Director of Office and Accounting Machines. The order covers all transactions in office machinery, including transfers for trial, loan, rental, demonstration, or other use. Imports, from the United States, of office machinery in complete state, the only exemption under the order, come under the control of the Priorities Officer. Under the previous system, established last June, sales were allowed on a priority basis, preference being given first to the armed services and Dominion Government departments, secondly, to industries on war production and thirdly, to transportation companies, newspapers, food industries and other essential users. (A-546, Jan. 6, replacing A-195).

Consumer Credit

A new Consumer Credit Order has been issued, consolidating and revising previous orders and with few exceptions, extending control over all forms of credit sales. Repairs and replacements were covered by the regulations for the first time. The scope of the order was extended to include credit sales of food, fuel and drugs. Such sales are customarily made on charge accounts and previously had been specifically exempted. Fuel when purchased on written agreement is still exempt.

Other amendments will tend to curb further retail sales on credit. The period of credit on charge accounts has been reduced from the end of the month following the month of purchase with 10 days of grace, to the 25th day of the month following the month of purchase with no days of grace permitted. Stricter conditions have been imposed for the re-establishment of defaulted charge accounts—6 instead of 12 equal monthly instalments with a minimum instalment of \$5.00.

The down payment on all goods has been standardized at 33½ per cent. The effect of this is to tighten the terms on which furniture and pianos may be purchased and to relax the terms applying to farm machinery (the sale of which is subject to other control) and to automobiles. The maximum period of credit under instalment plans for clothing is still 6 months. On other goods, except farm machinery, it has been reduced from 12 to 10 months for any deferred balance under \$500

and from 18 to 15 months where the sum financed is \$500 or more. New regulations have been added relating to advertising, lay-away plans, goods delivered on approval, loans for purchase of goods and selective dating on sales contracts. (Board Order No. 225, Jan. 12, effective Feb. 1, replacing Nos. 75, 87 and 161).

Restrictions on Sale and Manufacture

Fertilizers.—With a view to conserving nitrogen fertilizers for essential food production, sales of *flue-cured tobacco fertilizers* to growers in the Norfolk tobacco zone of Ontario (the counties of Norfolk, Oxford, Elgin and Brant) have been generally limited to 1942 levels. Manufacturers and dealers are not allowed to take on new customers for this fertilizer or sell to old customers more than they sold them in 1942, unless a permit has been obtained from the Administrator of Fertilizers and Pesticides. (A-548, Jan. 5).

The distribution of *fertilizers in Eastern Canada* has been zoned in order to eliminate the cross-haulage of a large amount of fertilizer. Eastern Canada is divided into 16 selling zones, and the zones in which each specified fertilizer manufacturer may sell are designated. Manufacturers may however sell in other than their designated zones provided they charge the regular list price without any reductions by way of discount, etc. (A-549, Jan. 5).

Oils and Fats.—Maximum production quotas have been fixed for a large number of manufactured commodities using *oils and fats* as a principle ingredient. The new order consolidates previous orders and directives issued by the Administrator and parallel action taken by the War Production Board in the United States. The products covered are: shortening; other edible products such as mayonnaise, cooking oil, etc.; soap; paints, varnishes, lacquers and all other protective coatings; linoleum, oilcloth and other coated fabrics; and printing inks.

Production is controlled by limiting the use and consumption of oils and fats, in the manufacture (for civilian use) of the products covered. For each, a quota is specified, based on a quarterly average consumption during 1940 and 1941; except in the case of shortening and other edible products where the quota (80 per cent) is based on 1941 usage. (A-578, Jan. 30, revoking A-319).

Soap.—The production of soap, because of its relation to the production of glycerine, was given a quota of 100 per cent. The Oils and Fats Administrator recently specified the percentage of glycerol content, of soap lyes obtained during the manufacture of boiled settled soap, which is to be recovered as crude

glycerine. The maximum residual glycerine content allowed in finished boiled settled soap and miscellaneous soaps was also specified. (A-571, Jan. 23).

Paper.—The Administrator of Book and Writing Papers has been given power to control and establish conditions under which a wide range of *book, writing and specialty papers* may be manufactured in Canada. The terms of the order covered virtually all types of paper outside of the newsprint field, except kraft wrapping paper and paperboard. (Board Order No. 227, Jan. 21).

Rubber.—The order restricting production of *rubber tire reliners and patches* during 1942 to the number made in 1941, has been extended on the same basis to production in 1943 and subsequent years. (A-542, Jan. 4, amending A-191).

Cables and Transformers.—The manufacture or assembly of any *flexible metal covered cable* of the type known as "B X Cable" has been prohibited except with the Administrator's permission or for incorporation into articles ordered by D.M. and S. or its agencies, or by any of the Departments of National Defence. In this case, the purpose of the restriction, which is in line with a recent U.S. order, is to prohibit manufacture for civilian use as proper wiring facilities are available through other means. (A-552, Jan. 12, effective Feb. 11). In order to conserve steel and copper, the manufacture for stock of *distribution transformers* of the type covered by a previous order (A-434) has been made conditional upon the written permission of the Administrator. This covers the smaller transformers of distribution type commonly used in municipal systems and for rural services. (A-577, Jan. 30, amending A-434).

Conservation Through Standardization and Elimination

Metal Products.—The Co-ordinator of Metals has prohibited, from time to time, the use of any metal, other than silver or gold, in the manufacture of a large number of articles which were formerly made partly or entirely of metal. The only metal now allowed in these goods is that which is necessary for fittings, joining hardware, or reinforcing strips or struts. The list includes goods for ornamental purposes, many household articles, amusement park and sports equipment, gardening equipment and a number of articles of commercial and office equipment. The use of copper has been prohibited in an additional list of goods. In the new order 90 articles were added to the list of those in which no metal may be used, bringing the total to over 500 articles.

The new items added include amusement park devices, bicycle parking racks, linoleum binding, cash registers, except maintenance and repairs, desk equipment, decorative iron products, and flour shakers and sifters for household use. (A-579, Jan. 30, replacing A-224 and A-367).

Electrical Apparatus and Equipment.—The manufacture of small *electrical generators*, motors and control equipment and of generators, switchgear, circuit breakers and other electrical devices has been standardized, with certain types eliminated, and has been confined to D. M. and S. orders and to other orders for which permission is granted. The orders were designed to save steel and copper, electrical energy and labour in the manufacture of such equipment. In the order relating to small electrical generators, motors and control equipment, a standard motor has been designated. Previously, other types had brought about poor load factors, and in some cases, a bad power factor—either necessitating the installation of power factor corrective equipment or the generation of more power at the source. Several odd ratings have been eliminated as uneconomical to manufacture. (A-569, Jan. 22). Similar considerations of standardization, economy and elimination of unnecessary use of metal were applied to the equipment—switchgear, circuit breakers, etc., covered by the other order. (A-568, Jan. 22).

Heating and Plumbing Equipment.—To conserve steel, certain small sizes of low pressure welded *steel boilers* used for steam and hot water heating have been eliminated. These may be replaced by boilers constructed of materials less urgently needed for the war program. In order to prevent the tying up of metal in dormant stocks, the order provides that no one may manufacture a boiler until he has disposed of the supply of boilers of the same type and heating capacity which he owned or controlled on Jan. 19. (A-560, Jan. 15).

Manufacture of *screw feed coal stokers* in Canada will be reduced by more than 50 per cent as the result of an order which prohibits the manufacture of stokers with capacities of less than 50 lbs. per hour (the kind used in residences and small buildings). Sizes and specifications allowed are listed in the order and maximum prices are set for each size. Through the co-operation of stoker manufacturers a generally standardized model of stoker is to be made and parts will be interchangeable. (A-562, Jan. 15).

Standardization has also been designed in the case of *unit heaters*. Only those unit heaters, outlets and attachments listed as standard in the manufacturer's latest cata-

logue may be manufactured. Certain prohibitions and specifications as to capacities and motors are contained in the Order. (A-574, Jan. 23).

The manufacture of brass and bronze screwed *pipe fittings*, not already in the process of manufacture is restricted to specified types and sizes. (A-541, Jan. 4). Application of protective coatings of oil and tar is prohibited in the manufacture of cast iron *soil pipe and fittings*. Several additional sizes of fittings may now be manufactured but cast iron soil pipe may no longer be used for sewer connection in any houses in view of the strict conservation measures introduced by a recent order of the Controller of Construction. (A-572, Jan. 23, amending A-125).

Office Equipment.—Further specifications have been added for the standardization and simplification of new *office furniture and equipment* for the use of departments of the Canadian Government and agencies. Complete specifications are given covering materials, size and finishes of all types of office furniture. (A-559, Jan. 13, replacing A-189). The colours in which typewriter ribbons may be manufactured have been restricted and manufacturers are prohibited from acquiring metal box containers for packaging ribbons. (A-544, Jan. 6). The colours for typewriter and for pencil or pen *carbon papers* have also been specified and restrictions placed on packaging and wrapping. Manufacturers may not make brands not manufactured or sold during 1942. (A-573, Jan. 23).

Wallpaper.—Manufacturers of *wallpaper* must reduce the number of styles to 80 per cent of those they manufactured in 1942, and new styles cannot be added. There is no restriction on the quantity which may be manufactured. (A-565, Jan. 18).

Curtains.—The manufacture and sale of window *curtains* have been restricted to three types by an order designed to effect savings in basic materials, sewing thread and cotton yarns. (A-543, Jan. 4).

Luggage.—A further curtailment has been imposed on the number of designs of *luggage* which may be made in each of the 19 types of luggage and small leather goods allowed. The order will permit economies in the use of leather, lumber and textiles through a limitation of production to not more than 137 styles per manufacturer as compared with a peace-time production of approximately 450. Restrictions were placed on the use of leather binding and locks and catches. (A-566, Jan. 18, replacing A-135).

Apparel.—Further restrictions have been placed on the manufacture of *athletic foot-*

wear, in addition to the general ones regarding leather footwear, for the purposes of conserving sole leather and metal parts. The limitations specified apply to colours, patterns, linings, uppers, soles, heels, slugging and shanks. (A-580, Jan. 30). Manufacturers of leather and cotton fabric *gloves and mitts* are required to cut their style range by one-third from the 1942 range. The order gives certain specifications regarding styles and details the shades of leather which may be used. The use of zippers, elastic webbing, metal fasteners and domes has been prohibited. (A-557, Jan. 12).

Clothing.—Styles of outer *wool clothing* for men, youths and boys are frozen to 1942 model specifications and the manufacture of formal or dress suits, coats and vests is prohibited. (A-539, Jan. 2, amending A-207). Specifications as to measurement and style have been applied to the manufacture of all *boys' suits* made from American tweed imported by the Canadian Wool Board Limited. Since these suits will be different from ones previously manufactured, each is to be labelled as "boy's special wartime suit" and they are to be designated as such on invoices. The maximum prices for manufacturers, exclusive of sales tax, and maximum retailers' prices in Eastern and in Western Canada, have been specified. (A-582, Jan. 30).

When it was determined that garments made of pieces of fur are rendered unserviceable unless reinforced to the bottom, the regulations governing the manufacture of *fur garments* were amended to allow the use of silesia below the hipline in lining pieced garments. (A-554, Jan. 12, amending A-180).

Patterns for any garments whose design conflicts with regulations regarding wearing apparel, will not be available after April 1—the patterns of eliminated garments must be recalled or, where only one of the versions has been eliminated or in catalogues, etc., they must be marked as not available. Manufacturers may not sell or distribute patterns for garments the measurements of which exceed any prescribed maximum measurement by more than 5 per cent, exclusive of seams. (A-556, Jan. 12).

Miscellaneous.—Tumblers may no longer be manufactured for the commercial *packing* of certain *food products*—jam, marmalades, pickles, etc., but only for household use. Glass jars of the 9 oz. size are available for commercial use to replace the tumblers. The use of glass for packing cream cheese sandwich spread has been eliminated. (A-567, Jan. 22, amending A-441).

The amount of strychnine used in *gopher poisons* has been standardized in order to get

maximum results without waste. The size of containers has also been standardized to a 12 oz. weight. This will facilitate the present transfer from metal to glass containers and the obtainment of sufficient supplies of bottles. (A-563, Jan. 16).

Standards Section

During the month announcement was made of the formation of a Standards Section under the supervision of the Supply Division. The new section has been established (i) to enable the Board to investigate possible deterioration in quality, mainly of consumer goods currently being offered to the public and (ii) to provide the Board with yardsticks for fixing the maximum prices for the many new and modified products made necessary by wartime shortages.

Price Orders

The price orders during the month were of a miscellaneous character arising from a number of causes and dealing with widely different products. Two already mentioned, setting maximum prices for screw feed coal stokers and for special wartime suits for boys, dealt with goods which were modified or standardized by the order.

Wire.—The manufacture of *barbed wire* was simplified last June and a recent order set the maximum price at which manufacturers and wholesalers may sell to retailers barbed wire manufactured after June 30, 1942. Retailers are to price their wire by using their basic period markups which must not exceed 25 per cent of selling price. (A-575, Jan. 23).

Fish.—A number of varieties of *fish*, exempt from the price ceiling on all sales, were brought under a measure of price control by an order limiting the markups of wholesalers and retailers. The order applies to certain varieties of fresh, frozen, cured and canned fish, including lobsters, codfish, herring, haddock, etc., fresh water fish, and shell fish. Transportation charges and the markup (per cent of cost) customarily obtained in the basic period are to be added to the price paid the primary producer or processor, but this markup must not exceed the maximum markup specified in the order. (A-564, Jan. 18).

Fruit.—For purposes of levelling prices of *dried fruit* brought into Canada by arrangement with Commodity Prices Stabilization Corporation an order has been passed setting out brokers', wholesalers' and retailers' charges and markups. This will result in more uniform selling prices across Canada for dried raisins, currants, prunes, apricots and peaches. (A-553, Jan. 8).

Butter.—A minor amendment was made in the order regarding banana prices, removing the limit on retailers' markups, but reaffirming the uniform ceiling established. (Board Order No. 224, Jan. 12, amending No. 218). To take care of freight differentials between *butter* shipped to British Columbia and that shipped to Eastern Canada from the Prairie Provinces, the Board has increased by $\frac{1}{2}$ cent per lb. the maximum price which manufacturers may charge on sales to wholesalers and other manufacturers in Manitoba and Alberta. The order also established specific maximum prices on sales to wholesalers of butter lower than third grade. (Board Order No. 230, Jan. 23, amending No. 221).

Cheese.—Because of cost increases, the maximum price on *cheese boxes*, f.o.b. cheese factory, has been increased from 35 to 40 cents per box. This adjustment will in no way affect the domestic price of cheese (A-576, Jan. 23, revoking A-146).

Silver.—The maximum price has been specified for primary producers of silver selling *fine silver* in bar or ingot form for use or consumption anywhere in Canada. (A-588, Jan. 27).

Containers.—To assist wholesalers of fish in obtaining a sufficient supply of *fish boxes* for deliveries to the retail trade, it has been provided that wholesalers may charge a deposit of 25 cents for each box used in delivering fish to retailers, except by common carrier. This deposit is to be refunded on all boxes returned in good condition. (A-550, Jan. 12)

Steel Drums and Barrels.—A former order on *used steel drums and barrels* required their resale through authorized dealers appointed under the order. The facilities of these dealers proved inadequate and the order has been amended to allow those normally buying direct to do so and also any other essential users who have obtained permission from the Administrator of Used Goods. The maximum price schedule has been revised and extended to cover used cans and pails. To keep steel drums in use, persons are required to return or sell steel drums within 30 days after removing the material they contained. (A-561, Jan. 15, replacing A-269).

Fuelwood.—Field investigations were made in British Columbia in connection with the fuelwood situation. Since a serious shortage existed in the towns visited and it was found impossible to secure definite information respecting basic period prices, it was decided to set price schedules based on costs of production as the best means of encouraging production. Order No. 62, issued Jan. 19 applies to several towns in the interior and Order No. 63 sets ceiling prices for bushwood in the Vancouver

area and Lower Fraser Valley. Allowance was not made for delivery in Vancouver. Arrangements were made to pay a \$1.50 per cord subsidy to take care of this cost item.

Readjustment of price schedules for fuelwood in Eastern Canada to encourage greater production, was extended to the Western and South Shore counties in the Province of Quebec. The new order, which replaced several previously covering this area contained price schedules for seasoned fuelwood on a delivered basis only, roadside prices no longer being specified. (F-60, Jan. 7, replacing A-258, A-259,

A-260, A-261 and A-262 and amendments to them, F-31, F-32, F-38 and F-39 which add certain municipalities).

An order applying to several Northern Ontario districts revised and separated the schedules applying to the Districts of Parry Sound, Algoma, Manitoulin, Nipissing and Sudbury and to the chief municipalities in these districts. Maximum prices were also set for seasoned fuelwood in the Cochrane area, and in the Kirkland Lake and Timmins areas. (F-64, Jan. 29, replacing A-107, as amended by A-187 and A-291).

Prices, Retail and Wholesale, in Canada, January, 1943

Cost of Living, Prices of Staple Articles and Index Numbers

THE Dominion Bureau of Statistics index number of the cost of living in Canada on the base of average prices during the period 1935 to 1939 as 100 declined 1.7 points during the month to 117.1 at the beginning of January from 118.8 at the beginning of December, 1942. The decline was due entirely to a fall in the index of the food group, all other group indexes being unchanged with the exception of miscellaneous which was slightly higher. A reduction of two cents per quart in the price of milk to the consumers was the most important factor in the movement of the index

but prices were lower also for eggs, butter, tea, coffee and oranges. Moderate increases were recorded in the prices of beef, potatoes, onions, lard and lemons. The slight advance in the miscellaneous group was due to advances in hospital rates.

The advance in the index during the war period until the beginning of the current year was 16.2 per cent compared with an increase of 40.4 per cent for the equal period during the last war. Following the decline in the index during the month under review the percentage increase since the introduction of price control

COST OF LIVING AND WHOLESALE PRICES IN CANADA 1914-1922 AND 1939-1942

BASE: PRICES IN JULY, 1914 AND IN AUGUST, 1939=100

was less than one fifteenth of that recorded between October, 1916, and January, 1918, the comparable period during the last war.

Foods advanced 28·2 per cent between August, 1939, and January, 1943: clothing 20·1 per cent; home furnishings and services 16·7 per cent; fuel and light 13·9 per cent; rent 7·2 per cent; and the miscellaneous group, 6·1 per cent.

In compliance with Order in Council P.C. 6219, as amended, the prices of cigarettes and tobacco used in calculating the index do not include the tax imposed on June 24, 1942, under the special War Revenue Act.

The control of prices under an Order in Council of November 1, 1941, P.C. 8527, became effective on December 1, 1941 (LABOUR GAZETTE, 1941, page 1371). The order provided that no person should sell any goods or supply services at prices higher than during the period September 15 to October 11, except under the regulations of the Wartime Prices and Trade Board. In each issue of the LABOUR GAZETTE the activities of the Board in the operation of the price control policy are summarized. Prices of certain fresh fruits and vegetables and certain kinds of fresh, cured and canned fish were exempted by the Board from the provisions of the maximum prices regulations. The order does not apply to sales by farmers and fishermen to dealers or processors of live stock, poultry, eggs, milk, cream, dairy butter, farm-made cheese, honey, maple syrup and fish, but does apply to sales by such dealers and processors and to sales by farmers and fishermen to consumers.

The index number of the cost of living was constructed on the basis of a survey of expenditure of 1,439 families of wage-earners and salaried workers with earnings between \$450 and \$2,500 in 1938. The average expenditure was \$1,453.90, divided as follows: food (31·3 per cent), \$443; shelter (19·1 per cent), \$269.50; fuel and light (6·4 per cent), \$90.50; clothing (11·7 per cent), \$165.80; home furnishings (8·9 per cent), \$125.70; miscellaneous (22·6 per cent), \$319.40.

The last-named group includes health (4·3 per cent), \$60.80; personal care (1·7 per cent), \$23.90; transportation (5·6 per cent), \$79.30; recreation (5·8 per cent), \$32.10; life insurance (5·2 per cent), \$73.30. Other expenditure not directly represented in the index was \$40.

The Dominion Bureau of Statistics has issued an index number of retail prices of commodities included in the cost-of-living index exclu-

ding rents and services. The figures at certain dates since August, 1939, are: August, 1939, 100·0; September, 100·0; October, 103·8; November, 104·3; December, 104·3; January, 1940, 104·2; February, 104·3; March, 105·5; April, 105·5; May, 105·3; June, 105·3; July, 106·4; August, 106·8; September, 107·9; October, 108·4; November, 109·7; December, 110·0; January, 1941, 110·4; February, 110·1; March, 110·2; April, 110·7; May, 110·9; June, 112·7; July, 114·9; August, 117·7; September, 119·4; October, 120·1; November, 121·4; December, 120·6; January, 1942, 119·9; February, 120·3; March, 120·6; April, 120·6; May, 120·9; June, 121·8; July, 123·9; August, 123·5; September, 123·0; October, 123·7; November, 125·0; December, 125·2; January, 1943, 122·5.

The accompanying chart shows the trend of the cost of living and wholesale prices since the beginning of the present war compared with the trend in the period of 1914-1922.

Wholesale Prices

The Dominion Bureau of Statistics index number of wholesale prices on the base 1926 as 100, was slightly lower in January at 96·9 than in the preceding month. The only group to record a decline was the animals and their products group the decrease being somewhat less than one per cent. This decline was largely offset by minor advances in the vegetable products group, the iron and its products group, the non-metallic minerals group, and the chemicals and allied products group. The increase in wholesale prices as indicated by this index since the outbreak of war was 34 per cent compared with an advance of 86·8 per cent for the comparable period during the last war. The increase in consumers' goods between August, 1939, and January, 1943, was 32·9 per cent, while in producers' goods the increase was 35·8. The index of Canadian farm products rose 50 per cent in the same period.

Explanatory Note as to Retail Prices

The table of retail prices and rentals shows the prices at the beginning of December of seventy-six staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotations are given is set forth in the case of each commodity and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from

month to month, from city to city, etc. The prices of foods and groceries in each city, except the following, are the averages of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers. The exceptions are milk, bread, shoulder of veal, leg roast of pork, unsliced bacon, dairy butter, evaporated apples, vinegar and coal oil. Information as to the prices of the foregoing, with the exception of milk and bread, is obtained by the correspondents of the *LABOUR GAZETTE*. The prices of milk, bread, fuel and the rates for rent are obtained by the Bureau of Statistics and by the correspondents of the *LABOUR GAZETTE*.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition, less desirably located but still fairly central, without modern conveniences.

By Order in Council P.C.8965 (*LABOUR GAZETTE*, 1941, page 1462), the price ceiling established by P.C. 8527 (*LABOUR GAZETTE*, 1941, page 1371) was extended to rentals charged for all real property, the order to be administered by the Wartime Prices and Trade Board. Under authority conferred by Order in Council P.C.5003 (*LABOUR GAZETTE*, 1940, page 995) the Board from time to time had fixed maximum rentals for housing accommodation in certain of the cities in the list on page 104. In these cities the maximum rentals already fixed continue unchanged, based in some cases on those in effect on January 2, 1940, and in the others on those in effect on January 2, 1941. The former are Halifax, New Glasgow, Sydney, Thetford Mines, Kingston, Ottawa, Windsor, Brandon, Calgary, Nanaimo, New Westminster, Prince Rupert, Vancouver and Victoria; the latter are Truro, Moncton, Brockville, Belleville, Fort William, Hamilton, Niagara Falls, Oshawa, Peterborough, Port Arthur, St. Catharines, Sault Ste. Marie, Regina, Edmonton, Medicine Hat and Lethbridge. In all other cases the maximum rental for any housing accommodation is the rental which was in effect on October 11, 1941. Provision is made under the orders of the Board for variation of the maximum rentals for any accommodation under certain special circumstances affecting the accommodation.

Retail Prices

Retail prices of beef were somewhat higher at the beginning of January than one month earlier reflecting the advance authorized by the Wartime Prices and Trade Board in the prices of beef carcasses. Sirloin steak averaged 38·3 cents per pound compared with 38 cents at December 1 and 33·7 cents at January 1, 1942. Lamb averaged about three-quarters of a cent per pound higher than for December at 35·9 cents. The price in January, 1942, was 31·2 cents per pound. The prices of pork and bacon were little changed. The price of fresh eggs declined from an average of 56·3 cents per dozen at December 1 to 51·4 cents at the beginning of 1943. Production increased during December and surplus stocks were reported from some centres. Milk averaged 2 cents per quart lower at 10·1 cents, the reduction in the price to consumers effective December 16 being made under an order of the Wartime Prices and Trade Board. The stocks of creamery butter in cold storage at January 1 were about one-third lower than one month earlier and were about 50 per cent lower than at January 1, 1942. Production during December, 1942, increased 21 per cent as compared with the same month in 1941, while the production of cheese was nearly 40 per cent lower in the same comparison. The price of butter was 1 cent per pound lower at 40 cents, a decrease having been provided for under the regulations of the Board. The price of cheese was practically unchanged. Potatoes averaged slightly higher at 40·9 cents for 15 pounds. Seasonal increases in price were allowed by the Board for the period January to June to cover losses due to waste and shrinkage. Decreases in prices of oranges, tea and coffee were also provided for by the Board under the policy of stabilizing the cost of living. The price of oranges averaged about 5 cents per dozen lower at 40·3 cents per dozen, coffee was almost 4 cents per pound lower at 44·4 cents and tea about 5 cents per one-half pound lower at 38·7 cents.

The following are the prices reported for Welsh coal "cobbles" and "French nut" at the beginning of January, 1943: Halifax, \$18.50; Charlottetown, \$17.90; Saint John, \$18.50; Quebec, \$16.50; Three Rivers, \$17.25; Sherbrooke, \$18.75; St. Hyacinthe, \$17.50; Montreal, \$17.75.

* For the period 1913 to 1934 the former series on the base 1926=100 was converted to the base 1935-1939=100.

The cost of living bonus provided for by the Wartime Wages Control Order, July 10, 1942, P.C. 5963, replacing P.C. 8253, must be based on the index shown in the left-hand column. For each rise of one point in the index the amount of the bonus or its increase shall be:—(1) twenty-five cents per week for all adult male employees, and for all other employees employed at weekly wage rates of twenty-five dollars or more, and (2) one per cent of their basic weekly wage rates for male employees under twenty-one years of age and female workers employed at basic wages rate of less than twenty-five dollars per week.

† The Dominion Bureau of Statistics issues reports on prices with comprehensive figures as follows:—monthly, Prices and Price Indexes (Canada); annually, Prices and Price Indexes (Canada and Other Countries).

* Prior to 1926 number of commodities was 236, 1926 to 1933 inclusive 502, and since January, 1934, the number is 567.

Prices in Great Britain and Other Countries

THE following notes afford information as to recent changes in prices in Great Britain and certain other countries. Tables giving the official and certain other index numbers of cost of living, retail and wholesale prices, in Great Britain and certain of the principal industrial and commercial countries appeared in the January issue of the LABOUR GAZETTE. Since these monthly notes are all compiled from British and foreign sources, the information contained therein usually deals with conditions prevailing some months previous to the date of publication in the LABOUR GAZETTE.

Since the outbreak of war, control of prices, production and trade has been extended in many countries, resulting in much less movement in prices than occurred in the inflationary period during the last war.

Great Britain

WHOLESALE PRICES—The Board of Trade index number, on the base 1930=100, was 161.5 for December, an increase of 0.3 per cent for the month. Food and tobacco increased 0.6 per cent, which included a rise of 1.1 per cent in the meat, fish and eggs group. Among industrial materials and manufactures, all groups were practically unchanged except for an increase of 1.1 per cent in textiles other than cotton and wool. Comparing the December, 1941, figure, wholesale prices had risen 3.5 per cent during the year (64.6 per cent since August, 1939).

COST OF LIVING—The index number of the Ministry of Labour Gazette, on the base July, 1914=100, was 200 at December 1, showing

no change from any of the previous three months.

Newfoundland

COST OF LIVING—The index number of the Department of Health and Welfare, on the base October 1, 1938=100, was 149.7 at January 2, a decrease of 0.5 per cent for the month due to a decrease of 0.6 per cent in food prices, with lower prices for cheese and eggs.

Australia

WHOLESALE PRICES—The index number of the Commonwealth Bureau of Census and Statistics, on the base 1928-1929=1000, was 1203 for June, as compared with 1175 for May and 1122 for April.

COST OF LIVING—The official index number of the cost of food, groceries and housing (weighted average for 30 towns), on the base 1923-1927=1000, was 998 for the second quarter of 1942, as compared with 978 for the previous quarter.

New Zealand

WHOLESALE PRICES—The Census and Statistics Department index number, on the base 1926-1930=1000, was 1460 for September, as compared with 1453 in August and 1456 in July. The principal changes between August and September were an increase of 4 per cent

in textile manufactures and a decrease of 4 per cent in animal products.

COST OF LIVING—The official index number of retail prices on the base 1926-1930=1000, was 1125 for September, an increase of 0.6 per cent for the month, and of 13.1 per cent over the August, 1939, level.

United States

WHOLESALE PRICES—The index number of the Bureau of Labour Statistics, on the base 1926=100, was 101.0 for December, an increase of 0.7 per cent for the month. Farm products rose 3 per cent, foods 0.8 per cent, other groups showing little or no change.

COST OF LIVING—The index number of the Bureau of Labour Statistics, on the base 1935-1939=100, was 120.4 at December 15, as compared with 119.8 for November and 119.0 for October. The increase of 0.5 per cent in the cost of living between November 15 and December 15, was chiefly due to the increase of 1.2 per cent in food prices.

The National Industrial Conference Board index number, on the base 1923=100, was 101.0 for December, as compared with 100.3 for November, an increase of 0.7 per cent for the month. The principal change was a rise of 1.7 per cent in food prices, there being little or no change in the other groups.

Trends in Wartime Housing in the United States

An article in the United States Monthly Labour Review for December, 1942, describes wartime trends in the construction of dwelling units. "Housing needs of war workers," the article states, "have determined the location of an increasing share of the dwelling units built since the war housing program was started in the summer of 1940. Seven-tenths of all dwelling units, public and private, which were started in nonfarm areas during the second quarter of 1942 were in 138 selected defence-housing areas included in a Defence Housing Survey recently completed by the Bureau of Labor Statistics. These same areas accounted for only half of the nonfarm total in 1940.

With seasonal variation taken into account, the rate of construction of privately financed units rose steadily through 1940 and much of 1941 and then slowed down. Priorities regulations became a major influence during the second quarter of 1942, when the number of new privately built units dropped about 45 per cent from the total for the corresponding quarter of 1941. Totals for July and August, 1942, were 57 per cent below those for the same months of last year.

Public construction increased much more,

relatively, from 1940 to 1941 than did private operations. Then it continued to increase during the first half of 1942, with almost as many units started during the second quarter as during the entire year 1941. However, this increase was accompanied by a change in the characteristics of the units provided, with greater emphasis on temporary and demountable structures.

A table showing the permit valuations or estimated construction cost of privately financed dwelling units in the 138 defence areas from January, 1940, to August, 1942, indicates that more than one quarter of the units constructed cost between \$3,000 and \$3,999. Units valued at less than \$1,000 comprised about six per cent of the total. Ten per cent of the units cost between \$1,000 and \$1,999, and twenty per cent were valued between \$2,000 and \$2,999. Almost twenty per cent came in the \$4,000-\$4,999 group, and slightly under ten per cent in the \$5,000-\$5,999 category. About nine per cent cost over \$6,000 during the thirty-two-month period, but as a result of cost limitations embodied in priorities regulations, units having a valuation of \$6,000 or over made up only a little more than one per cent of the units reported for July and August, 1942.

Old Age and Blind Pensioners in Canada

Financial and Statistical Summary as at December 31, 1942

IN the accompanying tables, which have been prepared by the Department of Finance, information is given concerning the Old Age Pensions Act and the amendment to that Act providing for the payment of pensions to blind persons.

Old Age Pensions

In the first of the tables appearing with this article, particulars are given dealing with operations under the Old Age Pensions Act (Revised Statutes of Canada, 1927, Chapter 156; as amended by Statutes of 1931, Chapter 42), and under the various provincial concurrent acts, as at December 31, 1942. (The text of the Old Age Pensions Act was given in the *LABOUR GAZETTE* for April, 1927, page 375, and the new regulations were reviewed in the issue for March, 1938, pages 286-288.)

The Act made provision for the establishment of a Dominion-provincial pensions system to be effective in such provinces as might enact and give effect to special legislation for this purpose. All the provinces are now participating.

Under the Old Age Pensions Act a pension is payable to any British subject of 70 years and over who is not in receipt of an income of as much as \$365 a year and who has resided in Canada for 20 years, and in the province in which the application is made for the five years immediately preceding the date of the proposed commencement of pension. The Act also provides that an applicant must not have assigned or transferred property for the purpose of qualifying for a pension. Indians, as defined by the Indian Act, are not eligible to receive old age pensions.

The maximum amount of pension payable under the Act is \$240 yearly. In cases where pensioners have a private income the amount of their old age pension is subject to reduction by the amount that their private income exceeds \$125 a year.

Under the provisions of the Act as it was first passed, the Department of Labour of Canada (then the administering Department) paid quarterly to each province one-half of the net sum paid by the provincial pension authority during the preceding three months. At the 1931 session of the Dominion Parliament, however, the Act was amended, the amount of the Dominion contribution being increased from fifty to seventy-five per cent of the net sum.

In order to avoid duplication of departmental activities and to secure centralization of responsibility in carrying out the provisions of the Act, which involves accounting control and supervision, the administration of the Old Age Pensions Act was by Order in Council dated March 1, 1935, transferred to the Department of Finance from April 1, 1935.

Pensions for the Blind

An amendment to the Old Age Pensions Act, assented to on March 31, 1937 (*LABOUR GAZETTE*, May, 1937, page 503) provides for the payment of pensions to blind persons who have attained the age of 40 years and have fulfilled other conditions set forth in the Act. Such persons must be so incapacitated by blindness as to be unable to perform any work for which eyesight is essential, and must not be in receipt of a pension or allowance in respect of blindness under the Pension Act or the War Veterans' Allowance Act.

The maximum pension payable to a blind person, whether married, or unmarried, is \$240 per annum. If however, a blind person marries another blind person after March 31, 1937, the maximum pension is reduced to \$120. If a pensioner is unmarried, the maximum pension is reduced by the amount of his income from earnings or other sources in excess of \$200 a year. If a pensioner is married to a person not receiving a pension in respect of blindness, his income is deemed to be the total income of himself and his spouse (including any old age pension payable to the spouse) less the sum of \$165, and the maximum pension is reduced by the amount by which his income, so calculated, exceeds \$400. If a pensioner is married to a person receiving a pension in respect of blindness, his income is deemed to be one-half the total income of himself and his spouse (excluding the pension in respect of blindness payable to his spouse) and the maximum pension is reduced by the amount by which his income, so calculated, exceeds \$200.

Under agreements negotiated between the Dominion and the provinces, the Dominion contributes 75 per cent of the cost of pensions to blind persons, the provinces assuming the remainder of the cost of such pensions.

Regulations governing the payment of pensions to the blind were published in the *Canada Gazette* of August 28, 1937.

The accompanying tabular statistics indicate the extent of operations under this amendment to the Old Age Pensions Act.

* Percentages based on the estimated population as at June 1, 1941, taking into account the preliminary figures of the 1941 Census—Dominion Bureau of Statistics.

Fatal Industrial Accidents in Canada During the Fourth Quarter of 1942

DURING the fourth quarter of 1942 there were 355 fatal industrial accidents, including deaths from industrial diseases reported by workman's compensation boards, etc., as compared with 364 fatal accidents in the fourth quarter of 1941. Of the 355 fatalities in the period under review, 140 occurred in October, 107 in November and 108 in December. Fatal accidents during each year are recorded by quarterly periods in the issues of the *LABOUR GAZETTE* for May, August and November of that year, and in February of the following year.

The supplementary lists of accidents not reported in time for inclusion in the reports covering the periods in which they occurred, contain 47 fatalities for the first three quarters of 1942, and six fatalities for 1941.

In this series of reports it is customary to record industrial accidents under the dates of their occurrence, and fatal industrial diseases under the dates on which they prove fatal.

Information concerning accidents was received from the provincial Workmen's Compensation Boards, the Board of Transport Commissioners, certain other official sources, as well as from the correspondents of the *LABOUR GAZETTE* and newspaper reports.

Classified by groups of industries, the fatalities occurring during the fourth quarter of 1942 were as follows: Agriculture, 21; Logging, 30; Fishing and Trapping, 13; Mining, Non-ferrous Smelting and Quarrying, 35; Manufacturing, 74; Construction, 48; Electricity, Gas and Water Production and Supply, 9; Transportation and Public Utilities, 101; Trade, 8; Service, 16.

Of the mining accidents, 17 were in "metaliferous mining" 13 in "coal mining" four in "non-metallic mineral mining and quarrying, n.e.s." and one in "structural materials":

Of the accidents in manufacturing, three were in "vegetable foods, drink and tobacco", six in "animal foods," two in "textiles and clothing", one in "leather, fur and products", 11 in "saw and planing mill products", four in "pulp, paper and paper products", 24 in "iron, steel and products", four in "non-ferrous metal products", three in "non-metallic mineral products", four in "chemical and allied products", and 12 in "shipbuilding".

In construction there were 27 fatalities in "building and structures", 12 in "highway and bridge", and nine in "miscellaneous".

In transportation and public utilities, there were 45 fatalities in "steam railways", one in "street and electric railways", 22 in "water transportation", 15 in "air transportation", 13 in "local and highway transportation", two in "storage", two in "telegraphs and telephones", and one in "express".

There were two fatalities in "wholesale", and 6 in "retail" trade.

Of the fatalities in service, eight were in "public administration", one in "recreational", two in "laundering, dyeing and cleaning", and five in "personal, domestic and business".

The most serious accident during the period under review occurred about December 17, when a tug was lost in a storm on the Lower St. Lawrence River and the crew of ten men were drowned. Other accidents involving the loss of two or more lives were as follows:

When a schooner foundered and sank in a storm on the St. Lawrence River, near Isle Verte, Quebec, on October 27, the crew of six men were drowned.

In a collision of two freight trains, at Montauban les Mines, Quebec, on November 9, two engineers, two firemen and two brakemen lost their lives; and, in a similar accident at Nipissing Junction, Ontario, on December 28, two engineers, two firemen and a brakeman were killed.

Five construction labourers lost their lives following the collapse of a concrete roof, at Welland, Ontario, on November 20. Two erecting engineers were killed in a plane crash while en route from Dorval, Quebec, to Labrador, on October 26.

Two civilian pilots, a flight engineer and a radio officer were killed in an Atlantic ferry plane crash, on October 14, while en route from Dorval, Quebec. When a ferry bomber crashed at Dorval, Quebec, on October 26, a civilian pilot and a radio officer were killed. In a plane crash at Whitehorse, Yukon Territory, on December 4, a pilot and two mechanics lost their lives. On December 20, a plane disappeared near Vancouver, B.C. and a pilot, a co-pilot, and a stewardess were lost.

A test pilot, a test engineer and a mechanic, employed by an aircraft factory, were killed in a plane crash, at Halifax, N.S., on December 3. Two explosives plant workers died in an explosion in a pellet-tracer mixing room, at Pickering, Ontario, on October 23.

When a boat capsized on Shipshaw River, Quebec, three loggers were drowned on October 24. Two loggers broke through ice and were drowned in La Lievre River, Quebec, on November 21; and another two loggers were drowned in a similar accident, near Shabaqua, Ontario, on November 24.

Two fishermen fell through an air hole while setting nets and were drowned, near Black Island, Manitoba, on November 18. A captain, a mate and an engineer were swept overboard from a schooner in a storm and were drowned, off Lunenburg, N.S., about November 30. Another two fishermen were drowned when a boat capsized in a storm while they were tending lobster traps, near Liverpool, N.S., on December 31.

Two miners were killed by a fall of rock, near Sudbury, Ontario, on December 2. When overcome by gas following a bump in a coal mine, a fireboss and a timberman died at Cadomin, Alberta, on November 10.

Supplementary Lists of Accidents

A supplementary list of accidents occurring during the first three quarters of 1942 has been compiled which contains 47 fatalities of which one was in agriculture, five in logging, two in fishing and trapping, three in mining, non-ferrous smelting and quarrying, 14 in manufacturing, 11 in construction, seven in transportation and public utilities, three in trade and one in service. One of these accidents occurred in January, one in February, one in March, two in April, one in May, three in June, four in July, 10 in August and 24 in September.

A further supplementary list of accidents occurring in 1941 has been made. This includes six fatalities of which two were in manufacturing, one in transportation and public utilities and three in Service. One of these accidents occurred in February, one in March, one in June, two in August and one in October.

THE LABOUR GAZETTE

PREPARED AND EDITED BY

THE DEPARTMENT OF LABOUR, OTTAWA, CANADA

Minister—HON. HUMPHREY MITCHELL

Deputy Minister—ARTHUR MACNAMARA

Editor—HARRY J. WALKER

VOLUME XLIII]

MARCH: 1943

[NUMBER 3

Notes of Current Interest

Arthur MacNamara appointed Deputy Minister

By Order in Council P.C. 7057 of February 11, Mr. Arthur MacNamara was appointed Deputy Minister of Labour, effective from January 1. In this post Mr. MacNamara succeeds Dr.

Bryce M. Stewart, whose resignation was announced last December.

On March 9, Mr. MacNamara was also appointed to be a member of the Wartime Prices and Trade Board, to fill the vacancy created by the resignation of Dr. Stewart.

Mr. MacNamara had previously held the position of Associate Deputy Minister of Labour, and retains the post of Director of National Selective Service.

Before coming to Ottawa, Mr. MacNamara was Deputy Minister of Public Works and Labour in the Province of Manitoba. In January, 1940, at the request of the late Hon. Norman Rogers, the Manitoba Government loaned Mr. MacNamara to the Federal Government to organize the Dependents' Allowance Board. He became Acting Chairman of this Board, a position which he held until he was appointed Associate Deputy Minister of Labour for the Dominion Government.

On January 7, 1941, Mr. MacNamara was appointed Acting Chief Commissioner of the Unemployment Insurance Commission and remained at this post during the establishment of the nation-wide organization of the Commission. In March, 1942, he returned to the

Department of Labour to resume his duties of Associate Deputy Minister of Labour on a full time basis.

Strikes and lockouts during February

While the number of strikes and lock-outs reported for the month of February, 1943, was only two less than the previous month, the number of workers involved and the time loss in man working days were both substantially lower.

The figures show 32 strikes on record, involving 5,243 workers and a time loss of 24,306 man working days, as compared with 34 strikes in January, with 19,857 workers involved and a time loss of 166,707 days. During February, 1942, there were 16 strikes recorded, involving 2,901 workers, with a time loss of 23,997 days. Two strikes carried over from January, namely, tobacco factory workers at Montreal, P.Q., and glass factory workers at Wallaceburg, Ont., caused about 68 per cent of the time loss during the month under review. The exceptionally large time loss in January was caused by the strikes of steel mill workers in Sault Ste. Marie, Ont., and Sydney and Trenton, N.S.

Of the 32 disputes during February, 30 were terminated during the month. Eleven resulted in favour of the workers, seven in favour of the employers, four were compromise settlements, one was partially successful and seven were indefinite in result. Two strikes involving 716 workers were recorded as unterminated at the end of the month.

Business Statistics

The table below gives the latest statistics available reflecting industrial conditions in Canada.

A decline at the beginning of January, less than normal for the month, was recorded by the index of employment; but as compared with January, 1942, an increase of 10.8 per cent was recorded. The index of the physical volume of business measuring changes in

mineral production, manufacturing, construction, electric power and distribution continued upward, rising from 221.2 for December, 1942, to 227.3 for January, 1943, the highest level in the record and 18 per cent higher than in January, 1942.

Expansion was indicated in each of the foregoing principal factors as compared with the preceding month. In manufacturing, declines were indicated in a number of industries, but

(8) MacLean's Building Review.

these were more than offset by advances in industries engaged on war production. Important increases were indicated in flour milling, in the production of boots and shoes and in iron and steel.

Mineral production and the output of electric power recorded decline in January as compared with one year ago, but other principal factors were materially higher. The index of manufacturing showed an increase of 25.3 per cent in this comparison. Important changes in this group are an increase of 26.2 per cent in flour production, 22.4 per cent in creamery butter production and 16.6 per cent in the numbers of cigarettes released. A decline of 25 per cent was recorded in the production of newsprint, and 54.5 per cent in factory cheese. Car loadings declined 12.8 per cent.

Industrial Disputes Investigation Act

Seventeen applications for the establishment of Boards of Conciliation and Investigation under the Industrial Disputes Investigation Act were received during the month of February. One board submitted its report; four boards were established and the constitution of one board was completed during the month. Eleven disputes were referred to Industrial Disputes Inquiry Commissioners and reports were received from Commissioners in ten cases. The settlement of four disputes was reported, in each case an agreement having been reached between the parties to the dispute. Five applications were withdrawn during the month and six applications rejected.

Cost of living index declines

The official index of the cost of living at the beginning of February showed a further decline. It was one-fifth of one point lower than at the beginning of January and 1.9 points lower than at the beginning of December, 1942. The decline in February was due mainly to lower prices for certain foods, particularly eggs and oranges, but minor decreases also were recorded in the fuel and clothing groups. At the beginning of February the index on the base period 1935 to 1939 as 100 was 116.9 compared with 117.1 for January and 118.8 for December 1942.

The advance in the index since the outbreak of war was 16 per cent as compared with an advance of 41.3 per cent between July, 1914, and January, 1918, the comparable period during the last war. Between October, 1941, and February, 1943, the period covered since

the establishment of price control, the advance in the index was 1.2 per cent. For the comparable period during the last war, that is, between October, 1916, and February, 1918, the advance was 25.2 per cent.

Staggered hours for war workers ease transportation problem

Working hours of more than 350,000 Canadian workers have been staggered in the government's program to meet unprecedented war demands on public transportation systems, according to information from the Transit Controller of the Department of Munitions and Supply.

With increased employment and a reduction in the use of private automobiles because of gasoline and tire restrictions, public transport facilities are handling roughly twice their peacetime traffic with little, if any, additional equipment.

Figures for January, 1943, in comparison with the same month of 1942, show an increase in public transit traffic in Halifax of 52 per cent. Other cities with large increases are: Sherbrooke, 59 per cent; Quebec, 32 per cent; Montreal, 17 per cent; Ottawa, 29 per cent; Toronto, 30 per cent; Hamilton, 36 per cent; Windsor, 83 per cent; Kingston, 80 per cent; London, 41 per cent; Oshawa, 48 per cent; Peterborough, 53 per cent; Edmonton, 40 per cent; Vancouver, 31 per cent; and Victoria, 37 per cent.

Percentage increases in revenue passengers carried for the entire year of 1942 over the entire year 1939 are as follows: Vancouver, 100 per cent; Edmonton, 80 per cent; Winnipeg, 70 per cent; Fort William, 210 per cent; Windsor, 285 per cent; Toronto, 95 per cent; Hamilton, 130 per cent; Ottawa, 136 per cent; Montreal, 72 per cent; Sherbrooke, 130 per cent; Quebec, 100 per cent; Saint John, 90 per cent; Halifax, 235 per cent.

The wartime industrial transit plan is one of the means being used to meet transportation problems and is rapidly extending through Canadian plants. Under this plan industries participating appoint a plant transit officer who designates employees whose cars will be used, fixes operating schedules and makes plans to ensure cars being used to full capacity.

Drivers in the transit plan are entitled to a special gasoline allowance and will be given identifying windshield stickers with their new gasoline ration licence. They may also qualify for tire service not available to low-category drivers, and are insured against accident to their employee-passengers at a low monthly rate.

Minimum wages for student farm workers A minimum wage of \$25 a month has been fixed for boys who leave school to work on Ontario farms this spring and summer as members of the Farm Labour Force. Experienced boys (those with three months' service) will be paid \$30 a month, and the boys will "live in."

Girls working on fruit farms and living in camps will be paid 25 cents an hour as a minimum, and this rate may be raised if the work done is of more value to the farmer.

A new rule is to the effect that the boys and girls of the Farm Labour Force are to work on fruit farms and mixed farms only, and are not to be used in dairies, cheese factories, canneries or meat packing houses. Last year they were allowed to work on the processing of foods, and many stayed in the cities and took such jobs.

The Ontario Farm Labour Force hopes to enrol 100,000 high school students to work on farms this summer. They will be needed chiefly in the Hamilton-Niagara fruit area. Seventeen government-operated camps are planned for this district to accommodate students who register for farm work. The only stipulation is that students volunteering must stay at their jobs not less than 13 weeks.

An account of Ontario's farm labour program, which is carried on with financial assistance from the Dominion Government, was contained on page 40 of the January LABOUR GAZETTE.

Co-operative purchasing associations in Saskatchewan

A series of eight booklets dealing with various aspects of co-operative purchasing associations in Saskatchewan, has been issued by the Department of Agriculture of that province. The study on which the booklets are based was undertaken jointly by representatives of the Dominion and Saskatchewan Departments of Agriculture.

The purpose and scope of the study is indicated in the introduction to the first booklet: "The purpose of this report is not to deal with the ideals of the co-operative enterprise, except incidentally, but to consider certain economic aspects of the co-operative purchasing form of organization in Saskatchewan. The study has been based on historical and statistical references and a direct investigation of a large number of co-operative trading associations registered in Saskatchewan. In addition certain comparative figures have been obtained for other types of business enterprise

supplying services similar to those given by the co-operatives."

The titles of the series are as follows:—Part I.—Historical and Statistical Analysis of Co-operative Purchasing Associations for the Twenty-five Year Period (1914-1938); Part II.—The Location, The Services Rendered, and the Competitive Merchandising Position of Co-operatives in Saskatchewan in the Year 1938; Part III.—Merchandising Operations and An Analysis of Merchandising Costs for Co-operatives in Saskatchewan in 1938; Part IV.—Co-operative Methods of Financing; Part V.—The Control and the Cost of Customer Credit; Part VI.—Co-operative Management and Membership Relations; Part VII.—Bookkeeping and Accounting Methods for Co-operatives; Part VIII.—Co-operative Case Studies and Current Saskatchewan Co-operative Developments in 1941-42.

Annual Report of Dominion Department of Labour

The report of the Deputy Minister of Labour for the fiscal year ending March 31, 1942, has been issued. In the interests of economy the report has been considerably abbreviated. It contains a review of the work of the Dominion Department of Labour during the year in connection with the administration of the following statutes: Labour Department Act; Conciliation and Labour Act; Industrial Disputes Investigation Act; Government Annuities Act; Employment Offices Co-ordination Act; Technical Education Act; Combines Investigation Act. The report also deals with the Fair Wages Policy of the Government; relief legislation; the Government's training program; labour supply; the International Labour Organization; and the British Columbia Security Commission.

U.S. National War Labour Board completes first year

The United States National War Labour Board recently completed its first year of operations. During that period, the Board considered and decided 514 cases involving about two million five hundred thousand employees. In about two-thirds of the cases the decisions were unanimous, with labour, industry, and public Board members in common agreement upon the correct solution to the particular problems involved. The public members voted with labour in approximately one-half of the remaining one-third of the cases and with industry in the rest of the cases. "Thus", according to a statement by a public member of the Board, "actually labour

and industry were each satisfied and in accord with the decisions reached by the Board in about 83 per cent of last year's cases."

The National War Labour Board is a tripartite twelve-man board composed of an equal number of representatives of industry, labour and the public. It was appointed by President Roosevelt on January 12, 1942, and charged with the duty of carrying out the national war time labour policy that there shall be no strikes or lockouts for the duration of the war. The Board, by executive order, was instructed to finally determine all labour disputes by mediation and voluntary arbitration or by arbitration under rules and procedures established by the Board.

By the President's Economic Stabilization Order of October 3, the Board was further charged with the responsibility of stabilizing all wages in the United States, not only those of workers involved in disputes (L.G., October, 1942, p. 1140).

In carrying out this task, the Board evolved various methods of procedure. One was the so-called "Little Steel" formula in regard to applications for wage adjustments. This formula, based on the nation-wide increase in the cost of living, provided that if any group of workers averaged less than a 15 per cent increase in their average straight-time hourly earnings since January 1, 1941, that group of workers was entitled to a wage adjustment sufficient to bring their rates to a point 15 per cent above the January 1941 level (L.G., November, 1942, p. 1286).

Another formula evolved by the Board dealt with the question of union security. This was the "maintenance of membership" formula, a compromise between the rival claims of unions and management for "open" or "closed" shop contracts. As applied to a typical union contract, the formula provides that after a specified date no existing union members may terminate their employment for the duration of the contract (L.G., July, 1942, p. 812; December, 1942, p. 1372).

A decentralization plan recently announced by the United States National War Labour Board increases the number of agencies empowered to make final decisions on wage and labour dispute cases, and is thus expected to expedite the handling of labour disputes which threaten to hamper the war effort. Under this plan twelve Regional War Labour Boards have been established with full authority to make final decisions in

labour disputes and in voluntary wage and salary adjustments.

Each of the Regional Boards is set up on the same tripartite system of public, employer and labour representatives as the National Board.

Under the new procedure all new cases will automatically go to the Regional Boards, except cases in certain specialized fields including the non-ferrous metals industry, trucking, shipbuilding, and the building trades, in which special commissions have been established. The National Board in Washington will function as a supreme court for labour disputes. It will review appeals, and also reserve the right to review on its own motion decisions made by the Regional Board. It will issue general policy directives, and assume original jurisdiction over cases of national importance.

A further aspect of the decentralization program is the establishment of panels in the major cities of the United States, also set up on a tripartite basis. The function of these panels will be not to mediate but to get at the facts and make recommendations to the Regional Boards for final action.

The following three-step procedure for dispute cases has been worked out by the United States Conciliation Board and the War Labour Board:

1. Mediation efforts by the U.S. Conciliation Service;
2. A hearing before a panel with recommendations to the Regional Board.
3. A decision by the Regional Board.

Any party will have the right, within 10 days after the issuance of a directive order by a Regional Board, to petition to the National Board for a review of the case.

The burden will be on the petitioner to satisfy the National Board in his petition (a) that a novel question is involved of sufficient importance to warrant national action, or (b) that the procedure adopted has been unfair to the petitioner and has resulted in substantial hardship, or (c) that the decision has exceeded the Board's jurisdiction or is manifestly in conflict with established Board policy.

Authority to rule on certain types of voluntary wage and salary adjustment cases, including those involving companies with not more than 100 employees, has been granted to a Regional Wage Stabilization Director, subject to appeal to the Regional Board. Authority over all other types of wage or salary adjustments is conferred upon the Regional War Labour Board.

New procedure for handling labour disputes in United States

Labour Management Committees

Joint Production Organizations Sponsored by Government

Three-Man Interdepartmental Committee Set Up in Ottawa to Stimulate Production in Canadian Plants

THE Dominion Government is officially encouraging and sponsoring the formation of labour-management joint production committees in industrial plants. To carry out this policy, a three-man interdepartmental committee has been set up in Ottawa.

The committee consists of three officials: H. Carl Goldenberg, Director General of Economics, and H. J. Carmichael, Co-ordinator of Production, from the Department of Munitions and Supply; and M. M. Maclean, Director of Industrial Relations, from the Department of Labour. H. Carl Goldenberg will be Chairman.

It will be the task of the newly appointed three-man committee to interest workers and employers throughout the country in establishing joint production committees in industry.

The establishment of these production committees, especially in war industries, has been endorsed both by trade union leaders and representatives of management, and already many such committees have been set up in Canadian plants.

Their primary function is to increase production. They provide a medium through which management may gain access to the ideas of individual men on the job who, by the nature of their position, are frequently able to see possibilities for improving the technique of the particular tasks they perform. The committees consider ideas for improving efficiency and eliminating waste, utilizing the suggestions of individual employees. They may deal with such matters as conservation of materials, tools and equipment; elimination of unnecessary planning or routines; fuller utilization of capacities and skills; protection of personnel and plant; efficient transportation of materials, personnel and products; improvement of designs and use of tools and fixtures; and reduction of absenteeism. It is felt, moreover, that when representatives of labour and of management meet together for the free interchange of opinions in regard to production problems, the spirit of mutual confidence

which can result will in itself have a beneficial effect on morale and on output.

It is considered that wages, hours, conditions of work, and similar matters, which are ordinarily regarded as subjects for determination by collective bargaining procedures, should be excluded from the functions of labour-management committees, as it is not intended that these committees should supersede or interfere with organized trade unions.

Conference Held in Ottawa

On March 11 a conference of representatives of trade unions and of industry was held in Ottawa under the sponsorship of the Government interdepartmental committee. H. Carl Goldenberg, Chairman of the committee, presided.

The conference unanimously endorsed the decision of the Government to foster the establishment of labour-management committees. Representatives of labour and of industry agreed to co-operate fully with the interdepartmental committee in promoting the establishment of labour-management committees on a sound basis.

The basis upon which the committees should be set up was discussed, and consideration was given to the following list of basic principles, prepared by Mr. D. B. Chant of the Department of Labour. It was suggested that these principles would serve as a frame-work within which each industrial concern could develop its own committee.

- (1) Labour representatives should at least equal in number the management representatives and should be bona fide employees below the rank of foreman.
- (2) Labour representatives should be chosen in a democratic manner by secret ballot in a free election by the workers they are to represent. (It was stipulated; however, that in plants where trade unions hold contracts as bargaining agencies, the labour representatives could be appointed by the organization instead of being elected by secret ballot.)

- (3) Representation should be by departments, natural divisions of the plant, or according to some other reasonable arrangement of "constituencies" rather than "at large" from the entire working personnel.
- (4) Powers of committee should be advisory and recommendatory only and not executive. Management should, however, recognize the obligation to examine all committee proposals and recommendations with care and consideration and to give a reasonable explanation in case of non-acceptance.
- (5) The committee of any one plant or company should be separate in all respects from those of any other plant or company.
- (6) There should be no third party in the operation of the committees.
- (7) Wages, hours and conditions of work and similar matters which are ordinarily regarded as subjects for determination by collective bargaining procedures should not be dealt with by the committees.
- (8) Where machinery exists by agreement or by recognized custom or otherwise for the handling of grievances, the committees should not assume that function or interfere with the orderly operation of such machinery.

WORKERS

MANAGEMENT

INCREASED PRODUCTION

General agreement with these principles was expressed by those at the conference,

Scope of Committees

The following were listed as some of the specific problems with which labour-management committees might deal:

- (a) Changing of obsolete practices.
- (b) Conservation of materials, tools and equipment.
- (c) Elimination of waste effort, unnecessary planning or routines.
- (d) Adherence to standard methods.
- (e) Fullest utilization of capacities and skills of personnel.
- (f) Protection of personnel and plant.
- (g) Efficient transportation of materials, personnel and products.
- (h) Improvement of design and use of tools and fixtures.
- (i) Simplification of handling, sorting and moving materials and products.

(j) Promotion of fuller understanding of the common interests and objectives of labour and management.

(k) Reduction of absenteeism from all causes.

(l) Promotion of educational, recreational and welfare activities.

(m) Support of war finance activities.

Mr. Goldenberg, speaking for the interdepartmental committee, said that the committee expects to meet frequently in consultation with representatives of labour and industry.

An advisory body was constituted, made up of the following who were present at the conference: Percy Bengough, Acting President of the Trades and Labour Congress of Canada; Pat Conroy, Secretary-Treasurer, Canadian Congress of Labour; Roma Groulx, General Organizer, Catholic and Canadian Confederation of Labour; Willis George, representing the Canadian Manufacturers' Association; Clark Reilly, representing the Canadian Construction Association; Dr. Walter Couper and D. B. Chant, of the Federal Department of Labour.

Joint Production Committees in Great Britain

THE International Labour Office has recently published a report* on the wartime scheme of joint production consultative and advisory committees in Great Britain. The report was prepared as a basis for discussion of the scheme at the seventh Canadian-American tripartite meeting on labour supply policy, in February, 1943.

The origin of the committees is traced to the experiments in labour-management co-operation during the last war but it is emphasized that the scheme at present operating in Britain "indicates a new conception of the contribution that can be made to the war effort by employers' and workers' representatives meeting together confidently at the plant level". Joint production committees in Britain have not only increased output "through pooling the technical knowledge of management and labour for better plant and work organization" but have improved morale "through better understanding of the problems faced by both sides, and through more adequate appreciation of the urgency and importance of the industrial war effort".

Widespread interest in joint production committees did not develop in Britain until 1941, the report states. In March of that year the Government officially recognized their existence by assigning them certain functions in regard to plant discipline under the Essential Work Orders. In February, 1942, the Minister of Supply signed an agreement with the trade unions concerned to provide for the establishment of joint production committees in Royal Ordnance Factories, and a month later the Engineering and Allied Employers' Federation signed a similar agreement with trade unions in the engineering industry. The committees set up under these agreements, which became a model for other joint production committees organized in Britain, and pit production committees which are a specialized form developed for mines, have already been described in the *LABOUR GAZETTE* (1942, p. 700; Feb., 1943, p. 163).

In the International Labour Office report attention is drawn to the voluntary and advisory nature of the committees and to the careful limitation of their functions to giving advice on production problems so that they do not conflict with existing collective bargaining machinery for regulating wages and working conditions. Stress is laid on their

* "Joint Production Committees in Great Britain", International Labour Office, Studies and Reports, Series A (Industrial Relations) No. 42. Copies at 50 cents each may be obtained from the International Labour Office, Montreal.

firm link with the trade union movement through the requirement that workers' members, though elected by a ballot open to all workers, must be members of a trade union and report to district trade union production committees. The Trades Union Congress has endorsed the use of the committees and urged that they be made compulsory. Employers' organizations and the Government have also promoted establishment of the committees.

The composition, functions and achievements of the committees are described in the report and their relationship to existing plant, district and regional joint machinery for labour

supply and production is indicated. A chart in the appendix illustrates this point.

Other appendices to the report give the text of the agreements providing for joint production committees in the Royal Ordnance Factories and other branches of the engineering industry, and the model constitution for works councils drawn up by the Minister of Labour in 1918. In addition selected items from the agenda of various committees and the minutes of a typical meeting of a committee are published to show the nature of the problems handled.

Australia Establishes Production Committees

THE Australian Government has recently signed an agreement with the Australasian Council of Trade Unions to provide for the establishment of joint production consultative and advisory committees in Government-controlled aircraft and munitions plants. The agreement contains a model constitution for such committees based on the British pattern. The Government intends ultimately to extend the scheme to all war industries.

As in Britain, the joint production committees in Australia are restricted to discussing questions of production and efficiency and are not to deal with matters handled by the normal machinery of collective bargaining. The committees are to consist of an equal number, not exceeding 10, of representatives of workers and employers, with a chairman

appointed by each side to serve alternately. Workers' representatives are to be elected annually by a vote conducted by the trade unions, and as far as possible, each union in each factory is to have at least one representative on the committee. Committees are to meet fortnightly but special meetings may be called to deal with emergencies. Provision is made for separate meetings of employers' and workers' sides to discuss items which they wish put on the agenda. Each side is to appoint a secretary who will jointly prepare the agenda and minutes. Committees are empowered to appoint sub-committees to deal with particular questions and either side may invite experts to attend meetings in a consultative capacity. Workers' representatives are to be paid at their normal wage rate when attending meetings.

Progress in Formation of Committees in United States

AS of January 1, 1943, there were 1,919 labour-management committees in the United States, according to the Office of War Information. These committees represented over 4,000,000 employees, of whom 850,000 were in ship construction, 692,000 in guns and ordnance, 465,000 in iron and steel, and 462,000 in aircraft.

Labour-management committees in the United States have been sponsored by the War Production Board since March, 1942, when Donald M. Nelson, Chairman of the Board, announced a War Production Drive to foster the voluntary formation of such committees in war plants. The functions of the committees were to include morale-building activities and the improvement of plant efficiency. An important aspect was to be the utilization of suggestions of employees through the medium of the committees.

In June a merit award system was established, by which such ideas and suggestions

as are considered to be of more than local usefulness are forwarded to Washington, whence they may be made available to industry throughout the country. Workers whose suggestions prove particularly useful receive citations of merit from the War Production Board, and in some cases such workers have been taken to Washington, presented to the President at the White House, and feted by military and Government officials (L.G., Jan., 1943, p. 7).

In October, a five-man Production Drive Policy Committee was set up, to determine policies under which the joint labour-management committees in war plants can best contribute to increased war production. The committee contains representatives of the American Federation of Labour, the Congress of Industrial Organizations, the National Association of Manufacturers, and the Chamber of Commerce.

Social Security and Reconstruction

Parliamentary Committees Appointed to Study Social Security and Post-War Reconstruction in Canada

THE House of Commons has appointed two select committees to study the problems of post-war reconstruction and of social security. This action was taken as an implementation of undertakings set forth in the speech from the throne at the opening of the session on January 28:—

The immediate object of the united nations is the defeat of the axis powers. Joint planning of operations on a world scale has accompanied preparations for intensive warfare. The united nations also aim at rendering aggression impossible in the future. Their governments, in addition to planning jointly for the prosecution of the war, have already entered into consultation regarding post-war problems. Achievement of their aims requires the establishment of conditions under which all peoples may enjoy equality of opportunity and a sense of security.

Every effort must be made to ensure, after the close of hostilities, the establishment, in useful and remunerative employment, of the men and women in our armed forces and in war industries. My ministers have already begun to explore the international agreements and domestic measures which will help to secure adequate incomes for primary producers and full employment after the war. With your approval, the select committee on reconstruction and reestablishment, appointed at the last session, will be reconstituted.

It is in the general interest that freedom from fear and from want should be the assured possession of all. A nation-wide plan which would provide insurance against the inevitable consequences of major economic and social hazards is essential if this objective is to be attained.

In Canada, a considerable measure of social security has already been provided through federal enactments establishing annuities, unemployment insurance, and pensions for the aged, the blind and for disabled veterans; and through provincial enactments related to accidents, sickness and hospitalization, widows' and mothers' allowances and maternity benefits. There is, however, no approach to a nation-wide plan of social security.

My ministers believe that a comprehensive national scheme of social insurance should be worked out at once which will constitute a charter of social security for the whole of Canada.

The government accordingly proposes to recommend the early appointment of a select committee to examine and report on the most practicable measures of social insurance, and the steps which will be required to ensure

their inclusion in a national plan. Among matters which will be referred to this committee for study and consideration will be the establishment of a national system of health insurance.

Committee on Post-War Reconstruction

On February 25, Hon. Ian Mackenzie, Minister of Pensions and National Health, moved the reconstitution of the committee on reconstruction. The motion was agreed to on March 2.

The committee is to "study and report upon the general problems of reconstruction and re-establishment which may arise at the termination of the present war, and all questions pertaining thereto." It may appoint from among its members subcommittees to deal with specific phases of the problems.

Authority is given to the committee or subcommittees to "call for persons, papers and records, and to examine witnesses under oath."

The membership of the committee is as follows:

Messrs. Authier, Bence, Bertrand (Prescott), Black (Cumberland), Brunelle, Castleden, Dupuis, Eudes, Ferron, Fraser (Northumberland), Gillis, Gray, Harris (Danforth), Hill, Jean, Mackenzie (Vancouver Centre), MacKenzie (Neepawa), MacNicol, McDonald (Pontiac), McKinnon (Kenora-Rainy River), McNiven, Marshall, Martin, Matthews, Mitchell, Nielsen (Mrs.), Poirier, Purdy, Quelch, Ross (Middlesex East), Ross (Calgary East), Sanderson, Turgeon, Tustin, White.

The Chairman of the committee is Mr. J. G. Turgeon.

Committee on Social Security

The motion regarding the appointment of a special committee on national social insurance was made by the Prime Minister, Rt. Hon. W. L. Mackenzie King, on March 3, and agreed to on March 5.

In introducing the motion, the Prime Minister spoke in part as follows:—

"I do not think there is any difference of opinion among the members of the different groups in the house as to the objective to be aimed at. . . .

International Implications of Social Security

"Surely we have realized as the result of two world wars in the last quarter-century that all reforms may pretty much be set at naught so long as there remains this danger of aggression on the part of great powers and the actual existence of war itself. If aggression is to be rendered impossible in the future it is necessary that all countries join together in carrying out some policy which will make for more in the way of co-operation between the different nations and more in the way of equality of opportunity between the peoples of the different nations. . . .

"If low standards of living exist in many parts of the world and high standards in a few parts, international competition, unless regulated effectively, will soon bring the high standards down to the level of the lower standards. That is why in any post-war period an effort must be made on the part of all nations that are seeking to improve their own conditions to realize that the countries of the world are members one of another, and that co-operation and mutual aid between nations will have to replace the system whereby relations between them are governed by force. . . .

Hazards of Industrialized Society

"There are certain hazards which do exist under the industrial organization of society as it has come to be in our time, and which exists not through any fault of employers, not through any fault of employees, but simply from the condition in which organized society finds itself at the present time. . . .

"These hazards are well known. The most common of course is unemployment. Other hazards are those arising out of old age, blindness, sickness and invalidity, the death of the breadwinner, birth and burial, where the funds to meet the obligations that arise out of these cannot be provided for in advance. Unemployment may come at any time, on a small or large scale, through no fault of their own on the part of those affected.

Social Obligations of Industry

"May I interject that any system of social security is based on the theory that all industry is, or ought to be, in the nature of social service; that industry is not merely a means whereby capitalists may increase profits, or workers find the means of gaining a livelihood through wages; but that there exists also the right of the community, which makes possible the carrying on of industry, to expect to have the interest and well-being of the community and its members considered in

the rewards of industry.' In other words, industry exists to serve a social end, as well as to serve the needs of individuals. Under that view men and women are the great asset of the state. The well-being of all the human resources, the men and women who supply the labour, the thought and skill essential for planning and carrying on industry ought to be the first concern of the state. And where the state makes possible the carrying on of industry, they are entitled to have the state see that they are protected against inevitable hazards . . .

Social Security and Private Property

"Social security does not seek necessarily, or, at all, in some cases, to abolish the institution of private property. It seeks rather to ensure that the benefits of private property will be secured to the community at large, and that through an inequitable distribution of wealth the institution of private property shall not be made a means whereby a very few may become increasingly rich and a great many suffer because of the inequalities that exist. Everywhere there are vast inequalities of circumstances and of opportunities. There is no doubt that society as it is organized to-day does enable those who are economically strong to become stronger, and at the same time does have the effect of causing the economically weak in many of the great struggles of life to become weaker; while the wealth of the world has vastly increased, its distribution has become increasingly disproportionate. Community considerations afford opportunities to some, and impose handicaps on others. We see everywhere evidences of the fact that those that have large abundance find it possible to survive all the existing hazards, find it possible to go on increasing their wealth; while those who possess very little of this world's goods are the first to go completely to the wall when a condition arises such as has arisen from time to time through depressions and extensive unemployment. . . .

Need for Correlating Existing Measures

"Why has the government deemed a reference of the matter to a select committee the most essential first step in seeking to deal with so large a measure of social security? The reason is that already in Canada we have a large number of social security measures which have grown up in a more or less haphazard manner. They have to be correlated and coordinated in one plan if progress is to be made on a national scale. They have not been introduced one in relation to the other; they have not been introduced in the

one assembly. They have been introduced at one time in this parliament, at other times in provincial parliaments, but they have never been coordinated into one scheme. It is obvious that where there are social measures of that character, each having the same objective, unless they are correlated there is bound to be a great deal of overlapping and a great deal of additional cost in administration, and certain to be a great deal of confusion. It would seem, therefore, that the first step in moving further in the direction of social security would be to study carefully the existing measures of our own country and then study carefully the existing measures in other countries and the proposals that have been put forth by those who have given special study to the question of social security. . . .

"The committee has been asked not only to give the study which I have suggested, but to report to the house on the most practicable measures of social insurance, the steps which will be required to ensure their inclusion in a national plan."

Functions of Committee

The committee as appointed is instructed:

To examine and report on a national plan of social insurance which will constitute a charter of social security for the whole of Canada, and, to that end,

To examine and study the existing social insurance legislation of the parliament of Canada and of the several provincial legislatures; social insurance policies of other countries; the most practicable measures of social insurance for Canada, including health insurance, and the steps which will be required to effect their inclusion in a national plan; the constitutional and financial adjustments which will be required for the achievement of a nation-wide plan of social security; and other related matters.

Reports on Social Security and Health Insurance

A plan for a unified system of social insurance has been presented to the House of Commons Committee on Social Security by Honourable Ian Mackenzie, Minister of Pensions and National Health.

The plan was prepared by Dr. Leonard C. Marsh of the Advisory Committee on Reconstruction. (This committee is under the chairmanship of Dr. F. Cyril James, Principal of McGill University, and reports directly to the Prime Minister. Its functions were defined on page 168 of the February LABOUR GAZETTE.)

Dr. Marsh's report suggests a scheme of national health insurance, a revision of Canada's present system of unemployment insurance, a revision and extension of the various pensions and compensation systems now in effect in Canada, family allowances, and funeral

The committee may appoint subcommittees from among its members, call for persons, papers and records, and print papers and evidence from day to day.

Its members are as follows: Messrs. Adamson, Blanchette, Bourget, Breithaupt, Bruce, Casselman (Mrs.) (Edmonton East), Claxton, Cleaver, Coté, Diefenbaker, Donnelly, Fauteux, Fulford, Gershaw, Gregory, Hatfield, Howden, Hurtubise, Johnston (Bow River), Kinley, Lalonde, Leclerc, Lockhart, MacInnis, Mackenzie (Vancouver Centre), MacKinnon (Kootenay East), Macmillan, McCann, McGarry, McGregor, McIlraith, Maybank, Mayhew, Mitchell, Picard, Shaw, Slaght, Veniot, Warren, Wood, Wright.

The Chairman of the committee is Hon. Cyrus Macmillan.

Senate Committee

The Senate has also appointed a special committee to deal with post-war conditions. Hon. J. H. King moved, on March 3:

That a special committee be appointed to consider and report upon matters arising out of post-war conditions, particularly those relating to problems of reconstruction and re-establishment and a national scheme of social and health insurance; and that the said committee have authority to send for persons, papers and records.

The motion was agreed to on March 5, when the following 38 members were appointed to the committee:

The Honourable Senators Aseltine, Ballantyne, Beaubien (Montarville), Beaubien (St. Jean Baptiste), Blais, Buchanan, Copp, David, Donnelly, Du Tremblay, Fallis, Farris, Gouin, Haig, Horner, Howard, Hugessen, Jones, King, Lacasse, Lambert, Léger, MacDonald (Cardigan), MacDonald (Richmond-West Cape Breton), MacLennan, McRae, Marshall, Michener, Murdoch, Paterson, Paquet, Roberson, Robicheau, Sinclair, Smith (Victoria-Carleton), Stevenson, White and Wilson.

grants. It aims at providing a basic minimum of economic security for every citizen. The report estimates the cost of such a program at \$1,000,000,000 a year.

A public works program to be undertaken by the government at an expense of a second \$1,000,000,000 is suggested by Dr. Marsh to provide employment during the first year after the war.

Also laid before the Committee by Honourable Ian Mackenzie was a draft bill on health insurance for Canada prepared by an advisory committee on health insurance headed by Dr. J. J. Heagerty.

These two reports, released too late for review this month, will be outlined in the April issue of the LABOUR GAZETTE.

Proposed World Food Plan

Sir John Boyd Orr, British Nutrition Authority, Outlines System for Meeting Essential Food Requirements on International Basis

A PLAN to supply the food needs of the peoples of the United Nations as a starting point toward the world-wide planning that will be required in the post-war reconstruction period, is proposed by Sir John Boyd Orr, famous British authority on nutrition, in an article featuring the current issue of the *International Labour Review*, monthly publication of the International Labour Office.

"The only way to ensure post-war united action," Sir John says, "is to get agreement now on a plan expressed in concrete terms about which there can be no ambiguity—not even any pretense of misunderstanding. The plan must deal with something of equal interest to all nations. It must deal with something so essential for the welfare of all people that every government, whatever its political philosophy may be, will agree to co-operate on a world-wide basis.

"It must be so simple in its broad outlines that it will be understood by the common people. It must be a practical plan which we have the physical means to carry to completion. It must be one which can be applied in its initial stages in the free countries during the war, and in the occupied countries as soon as they are liberated, so that there will be no need to wait for a peace conference for a decision. The development of the plan must arise from a war plan and proceed automatically, unless some nation or group of nations decides to withdraw from co-operation."

A food plan based on human needs, Sir John declares, meets all these conditions.

Objective of Plan

The article points out that standard food requirements for health are now known, and it says that estimates can be made for any country of the amount of commonly used food-stuffs which would be needed to bring the diet of the whole population up to the health standard. A food plan, Sir John says, could therefore be worked out in concrete terms of estimated amounts of the common foods, "and we could plan for a definite and limited objective."

Sir John contends that since nutritional requirements are the same for the people of all races, a food plan based on human needs would be equally applicable to all nations. Moreover, he says, a plan to provide food on the basis of need is practicable since "the food the people need can be produced if governments show anything like the same resolution and energy in providing for the primary needs of the people in peace as they have shown in providing food and armaments in war."

Citing as evidence the recent Canada-United States agricultural production agreement, the article argues that under the stress of war the United Nations have already gone a long way "towards a policy of adjusting the production and distribution of food to meet the nutritional needs of the people." What now must be done, it says, is to extend this policy.

Outline of Plan

To do this, Sir John urges the establishment of national organizations and, in addition, an international organization "to enable the nations to co-operate with each other in regulating food production and to develop their industries and trade on a world basis for their mutual advantage."

The kind of national organization to be set up, Sir John says, would vary in different countries according to their existing political and economic structure, and it should evolve from the existing war food organizations so that there would be no sudden break after the war. For Britain he suggests an organization making use of the existing agricultural marketing boards, which could be run on business lines "without any bureaucratic interference, and in all its activities, except the central control, be subject to the stimulating effect of competition."

In the international field, he proposes the establishment of international agricultural and food commissions "which, while having no power to interfere with national food organizations, could give information and guidance on the best methods of ensuring that the national leaders would have sufficient for the needs of the people." These commissions, he suggests, could "facilitate international trade in food and in the things needed for food production, and could arrange for the necessary long-term credits which would be needed for the first few years to enable the poorer countries to bring the diet of their people up to the health standard."

In view of the "appalling" difficulties of post-war reconstruction, Sir John says, "the only wise course is to go forward one step at a time, doing first the thing we are sure is right." This first step, he says, is to maintain the unity of the nations as the supreme world authority to prevent another war. The next task, he declares, is to provide food and shelter on a health standard. He points out that "shelter", because of varying geographical conditions, is mainly a national problem, but that "food, on the other hand, is an international problem which can only be solved by the co-operation of the nations."

Manpower

Manpower Registration in Canada

Review of Activities Carried on by National Registration Branch of the Department of Labour during 1942

NATIONAL Registration in Canada was carried out to register the potential manpower resources of the population. It took place on August 19, 20 and 21, 1940, during which period all persons residing in Canada of every nationality, sixteen years of age or over, were required to register. A total of 7,862,920 persons registered, consisting of 3,979,680 males and 3,883,240 females.

The registration was originally carried out under the jurisdiction of National War Services, but on March 21, 1942, the registration, together with its records and personnel, were transferred to the Department of Labour by authority of an Order in Council of March 21, 1942 (P.C. 2253).

The information available from the registration was collected before war work had attained any considerable proportion. A great deal of the information obtained regarding occupations and so forth necessarily requires continuous revision. To effect such revision was a difficult problem in view of the fact that the information had been obtained largely through the assistance of temporary voluntary workers, and that the Employment and Selective Service Offices were not operating until some time after registration was effected. Now that these offices are functioning, the flow of information to Manpower Records is much facilitated.

Military Call-up

As registration took place, duplicate cards were made for all those of military age, that is single men and widowers with no dependents between the ages of 19 and 45. These duplicates were sent to the thirteen Divisional Registrars in the various provinces to enable those required for military training to be called.

As registrants attain military age particulars of their registration are forwarded to Divisional Registrars together with information regarding married men within the military age groups.

The Mobilization Section of the registration was transferred to the Department of Labour on December 1, 1942.

A bulletin which has been made available to all Members of Parliament and other interested persons was issued in 1941. This bulletin, entitled "Preliminary Statistical Tabulations", gave a complete statistical picture of the man-power of Canada available for military, industrial and labour purposes.

Later on, another bulletin was issued entitled "Specialized Occupations". This contained lists of tabulations of some 2,200,000 registrants between the ages of 16 and 69 inclusive who had reported that they were skilled in certain specialized occupations.

Registration Activities Currently in Progress

The principal current activities in regard to the National Registration include:—

(1) Registration of individuals who reach 16 years of age and the issuance of certificates of such registration;

(2) Registration of individuals absent from Canada at the time of general registration but who may subsequently return;

(3) Registration of merchant seamen;

(4) Registration of changes of address of registrants, which number approximately 70,000 per month, and are reported either directly by mail or through some 13,000 postmasters who act as Deputy Registrars;

(5) Registering changes of names brought about by legal processes, marriage, divorce, etc.

(6) Noting of reported enlistments of registrants in the Armed Forces, together with reported discharges, retirements and casualties;

(7) Registration of deaths in the civilian population;

(8) Duplication of registration cards of all male persons as they reach the military call-up age of 19, the sorting of these duplicate cards by Mobilization Divisions and the pre-

paration of nominal rolls and shipping of duplicate cards and rolls to the Divisional Registrars;

(9) Acting as clearing house for the Divisional Registrars for information pertaining to individuals in the call-up categories;

(10) The supplying of information to other departments of the Government, to the War Savings Department, the Bank of Canada, to the governments of allied countries and to the International Red Cross;

(11) Exchanging information with United States Selective Service in connection with Canadians in military categories residing in the United States and Americans resident in Canada;

(12) Conducting correspondence relative to the matters mentioned, with the public generally as to registration, the incoming mail approximating fifty to sixty thousand pieces per month.

At the present time the Registration Division is engaged in drawing from its files and duplicating cards of all registered unenlisted married men between the ages of 19 and 41 years inclusive, of whom there are estimated to be approximately a million. These duplicates, as completed, are being divided into age groups and into mobilization divisions, after which nominal rolls of the groups are being prepared. The duplicate cards and the nominal rolls will be forwarded to the various Divisional Registrars from time to time as requested. The first age group material has already gone to the Registrars.

National Selective Service requires that all persons applying for employment must produce a registration certificate. To prevent abuse, arrangements have been made so that provincial liquor commissions or boards may call for registration certificates and endorse them. The privilege of endorsement has also been granted to the Director of Civilian Defence in connection with the distribution of certain air raid precaution equipment.

Temporary Cards for Itinerant Seamen

War conditions have greatly increased the number of itinerant merchant seamen from time to time in the main ports of Canada. Many of these men have to remain in port for extended periods while their old vessels are being repaired or new ones completed. As

many of them wish to obtain temporary employment their registration became a necessity. Because many of the alien and British seamen, other than Canadians, had no fixed address other than the manning pools and would not be soon returning to Canada it was deemed impractical to issue ordinary registration certificates to them. A "special" temporary form of certificate was devised, in April 1942, bearing the registrant's name, temporary address, photograph, physical description, signature and serial number. Since that time these have been issued to alien seamen by the immigration authorities. To British seamen, other than Canadians, they are issued by the directors of the Halifax, Montreal or Vancouver manning pools. Canadian seamen are issued ordinary certificates. Shipping masters at all the ports are authorized and instructed to collect certificates from all seamen shipping from their respective ports and turn them in to the Registration Division in Ottawa.

Statistical Summary of 1942 Activities

During the calendar year ending December 31, 1942, new registrations received numbered 247,613; made up of young persons reaching age 16, of persons returning to Canada after being absent at the time of the registration, and of merchant seamen temporarily residing in Canada. During the same period, 790,428 changes of addresses of registered persons were notified. The National Registration Branch of the Department of Labour also forwarded 149,180 changes of addresses to Divisional Registrars of Mobilization Boards, affecting men subject to the military call-up, and also copied and listed for the Registrars an additional 389,892 registration cards of men born in 1921-1924, for military call-up purposes. In 1942, 97,463 marriages were reported. 201,751 certificates, held by the public, were replaced, where originals had been lost or defaced.

The replacing of lost and defaced certificates is effected by those concerned filling in a form of affidavit which may be obtained at any post office and sworn to before the postmaster who sends it to the Registration Division where, after it is checked, the master card is marked to show that a duplicate has been issued and the duplicate mailed directly to the registrant.

National Selective Service Advisory Board Reconstituted

RECONSTITUTION of the National Selective Service Advisory Board has recently been effected by Order in Council (P.C. 1788, March 5, 1943). The membership has been selected to give representation to organized labour, to employers, to veterans, to farmers, and to Departments of Government interested in manpower problems.

Previously the Board had consisted of the members of the Inter-departmental Committee on Labour Co-ordination and the members of the National War Labour Board, together with other members designated by the Minister of Labour. However, the recent re-organization of the National War Labour Board and the incorporation of National Selective Service into the Department of Labour have made the present change necessary.

The duty of the Board consists of advising "the Director of National Selective Service with reference to the utilization of manpower in the prosecution of the war and the administration and enforcement of these (i.e. National Selective Service Civilian) Regulations".

Mr. A. MacNamara, Director of National Selective Service, will be Chairman of the new Board.

The other members named specifically in the Order in Council are as follows:—

Representing labour: E. Ingles, London, of the International Brotherhood of Electrical Workers; A. R. Mosher, Ottawa, of the Canadian Congress of Labour; Gerard Picard, Quebec City, of the Confederation of Catholic Workers of Canada; J. A. Bell,

Toronto of the Order of Railroad Telegraphers; W. Dunn, Toronto, of the Toronto District Labour Council.

Representing employers: A. Deschamps, Montreal, of the Montreal Builders Exchange; George Hodge, Montreal, of the Canadian Pacific Railway Company; Gilbert Jackson, Toronto, of the Sentinel Securities of Canada Ltd.; Ivor Lewis, Toronto, of the T. Eaton Company Limited; H. Taylor, Toronto, of the Canadian National Carbon Company Limited.

Representing agriculture: P. D. MacArthur, Howick, P.Q.

Representing women: Mrs. Rex Eaton, Assistant Director of National Selective Service.

Representing veterans: J. C. G. Herwig, Ottawa, of the Canadian Legion.

Representing Government Departments: Donald Gordon, Chairman of the Wartime Prices and Trade Board; Dr. G. S. H. Barton, Deputy Minister of Agriculture; Lieut. Col. G. S. Currie, Deputy Minister of National Defence; W. A. Mackintosh, Special Assistant to the Deputy Minister of Finance; H. Carl Goldenberg, Director General of Economics and Statistics, Department of Munitions and Supply; and the Associate Directors of National Selective Service. The Minister of Labour may add members to the Board.

W. J. Couper, Special Assistant to the Deputy Minister, Department of Labour, is named as secretary of the Board.

The previous Inter-departmental Committee on Labour Co-ordination now ceases to exist.

Government Assistance to University Students

DURING the fiscal year ending March 31, 1918 university students received Government assistance to continue their courses of study. Such financial assistance is provided either by the Dominion Government, or by the Dominion and Provincial Governments jointly. Students benefiting are pursuing courses essential to the war effort, whose services are urgently required after graduation (LABOUR GAZETTE, January, 1943, p. 34).

Of the total assisted, 402 students are studying medicine and 84 dentistry; those in these courses given aid must be in the second or a later year in their work. Five hundred and eighty-two engineering students and 226 science students have also been assisted, but engineering and science students are assisted, if they

qualify, during any year of the course. The list shows that those helped in engineering were registered in civil, metallurgical, electrical, chemical or mechanical courses, while in science the registrations were in mathematics, physics or chemistry.

To qualify for financial assistance, students have to have better than average academic standing, be in need of the financial assistance given in order to continue their courses, and must sign an agreement to make their services available, either in the Armed Forces or industry, upon graduation. The intention is to have the graduates available wherever they are most needed. In some cases assistance is given by way of an outright grant, in others as a loan, and in some others as a combination of both.

Arrangements between the Dominion and the Provinces of Prince Edward Island, Nova Scotia, New Brunswick, Quebec, Manitoba, Saskatchewan, Alberta and British Columbia, placed the assistance on a 50-50 basis between the Dominion and the Provinces. In the case of Ontario, as the Province did not contribute, Federal assistance was made in each case as a loan to the student. Although the scheme was aimed primarily at assisting students in medicine, dentistry, engineering and science, a limited amount was made available for students in home economics, agriculture, nursing and teaching in Prince Edward Island, Quebec and the four Western Provinces. Four hundred and thirty-five prospective teachers and 189 in miscellaneous essential courses, were also assisted.

Reports received at Ottawa show that 62 students under the plan failed on their term examinations at Christmas. Most of these students have withdrawn from the universities, under the arrangement covering the assistance.

Special assistance has been given to the universities carrying courses in medicine and dentistry, to accelerate these courses by reducing the summer vacation. Through the Department of Labour, grants of over \$67,550 have been paid to meet additional expenses due to this rearrangement of university programs.

It is anticipated that, up to the end of the fiscal year at March 31, the Dominion and Provinces will jointly have contributed \$200,000 in grants, while the Provinces will have loaned an additional \$40,000 and the Dominion an additional \$180,000.

The total number of students assisted in the several provinces is as follows: Prince Edward Island, 1; Nova Scotia, 105; New Brunswick, 243; Quebec, 472; Ontario, 345; Manitoba, 91; Saskatchewan, 206; Alberta, 191; British Columbia, 264. These figures refer to the province in which the university attended by the student is located, not the province of origin of students receiving assistance.

Determination of types and numbers to be assisted is made on the recommendation of the Wartime Bureau of Technical Personnel of the Department of Labour, while the Bureau also assists the provinces in the selection of individuals to be helped. Moreover, the Bureau is arranging that engineering and science students will be given summer employment in occupations related to their courses. Administration of the financial features of the scheme come under the Training Branch of the Department of Labour. The main estimates presented to the House of Commons recently, include an appropriation of \$400,000 asked by the Labour Department to continue this scheme after April 1.

Committee Appointed to Improve Draft Machinery

MR. Arthur MacNamara, Director of National Selective Service, announced in February the setting up of a three-man committee to examine and perfect the machinery of the military draft offices throughout Canada.

The committee consists of Mr. S. H. McLaren, Chief Treasury Officer of the Unemployment Insurance Commission; Mr. C. J.

Lochnan, Organization Branch, Civil Service Commission; and Mr. Herbert Marshall, Assistant Dominion Statistician.

The three officials have been visiting registration offices to make the necessary increases in staff and to speed up the mobilization machinery.

Military Call-up of Nineteen Year Olds

A RECENT Order in Council has made young men born in 1924 subject to military call-up, but has specified that such men will not be called until they have reached their nineteenth birthday.

Late in 1942 provision had been made requiring men born in 1923 to report for military service on reaching their nineteenth birthday. The effect of this provision expired last December 31, but by designation for military

call-up purposes of men born in 1924, the provision is now in effect once more.

The nineteen year olds will be required to report for medical examination, and will be so notified by the Divisional Registrar of their district Mobilization Board after reaching their nineteenth birthday.

Under another recent order, the date for registration of single men under the military call-up was extended to March 15. Previously the date had been fixed for March 1.

Prosecutions Under National Selective Service Mobilization Regulations

A STATEMENT issued recently by Mr. A. MacNamara, Director of National Selective Service, shows that the several Mobilization Boards across Canada during the month of January were proceeding with 114 prosecutions before the courts, for failure to comply with military call-up regulations.

In 69 of the cases convictions were reported. Penalties imposed varied from one year in jail in one case down to nominal fines of as little as ten dollars in other cases. Where jail sentences were not imposed the men convicted were immediately escorted to a military training camp. Where jail sentences were imposed, men are still liable for military service on release. Forty-one cases were still

pending at January 31. In only 4 instances was the case against the accused dismissed.

By divisions, cases disposed of by the courts during January, or still pending before the courts at the end of the month, were as follows: Halifax, 7 pending; Saint John, 10 pending; Quebec, 12 convictions; Montreal, 26 convictions; Kingston, 1 conviction, 1 pending; Toronto, 6 convictions; London, nil; Port Arthur, 3 convictions; Winnipeg, 13 convictions, 9 pending, 1 case dismissed; Regina, 1 conviction; Edmonton, 3 convictions; Charlottetown, nil; Vancouver, 4 convictions, 14 pending, 3 cases dismissed.

All Divisional Boards had further cases under investigation, on some of which formal charges would be laid later.

Women and the Armed Forces

REFERENCE was made in the February issue of the LABOUR GAZETTE (p. 183) to the announcement of the Minister of Labour, Hon. Humphrey Mitchell, that local Employment and Selective Service Offices across Canada will be equipped to interview girls who are prospects for enlistment with the women's branches of the armed forces. It was pointed out that this action was being taken at the request of the Ministers of National Defence as part of the program for enlisting women.

In furtherance of this program, Mrs. Rex Eaton, Assistant Director of National Selective Service, Women's Division, outlined in two recent addresses the necessity for the project, the set-up for dealing with it, and the avenues open to recruits in the women's divisions of the services.

It was emphasized by Mrs. Eaton that no recruiting would be done from Employment and Selective Service Offices and that these would serve only as a source of information. Pointing to the important part played by women in industrial war production Mrs. Eaton said:

"Thirteen months ago there were approximately 68,000 women in war industries, directly or indirectly. Six months later the numbers had increased to 120,000 and now it is estimated that 225,000 women have joined this great industrial army, the number having trebled in 13 months.

"The women of Canada are to be congratulated and honoured for this response, not only for the numbers who have come forward but also for the high quality of their work.

"Industry, too, deserves a great measure of credit. It is not an easy matter to absorb this large number of women. Every month brings improved welfare conditions in war plants and greater improvements will follow."

In addition to industrial service, women were now being called upon to a greater extent to enlist in the women's divisions of the Armed Forces, and of this sphere of service Mrs. Eaton stated:

"In preparation for the events of the coming months the armed forces have decided to enlarge the women's divisions rapidly. Thousands of men now in uniform are doing work which can be undertaken by women. More and more women in Canada will have to give the most serious consideration to this question of enlistment because of its present importance. Enlistments, so far, have met the more moderate demands and thus many women were released from the necessity of decision about enlistment. Now, at this moment it is the urgent call of Canadian womanhood—a call which gives women grave responsibilities, equal opportunities for service with the Canadian men in practically every phase of the war effort except actual combat . . .

"To all of us war means a sacrifice of freedom, the giving up of our old way of life. When we compare, however, the wonderful freedoms we in Canada still enjoy—can we dare question any sacrifice now asked—as compared with the freedoms lost by women of other lands. Those who enlist in the various fighting forces, however, must sacrifice to a greater extent than women who enter the

essential industries for instance, for they give up the freedom of home life, the privilege of dress, the freedom of privacy and many lesser freedoms dear to the hearts of women, fitting all their days into the routine pattern of army life, yet even this is no more than thousands of their brothers have endured in the past years of war and Canadian women who have responded to the call, do so proudly and gladly, that they may share with our Canadian men, the great comradeship of Service than which there is no higher aim . . .

"Dozens of jobs formerly done by men in the chart rooms at the airports, and coastal stations are now filled by women recruits. In the R.C.A.F. there are over 40 trades in which women may serve. It was the first Canadian women's service to be organized in this war to release men for active duties and the first service to send a contingent of women overseas.

"The C.W.A.C. offers a choice of over 50 trades to women workers. These range all

the way from cooks and canteen workers to electricians and draughtsmen, but the most novel and recent is that of armourer. Pte. Jean Smith of Toronto is the first woman to receive such an appointment. To be an armourer one must be capable of repairing all types of small arms, to be able to strip a gun and rebuild it. Jean Smith worked as a machinist in a factory prior to her enlistment, which gave her a considerable edge in aptitude and training over others for this particular job . . .

"The C.W.A.C. objective is 15,000 recruits by the end of March. . . .

"The W.R.C.N.S. (Wrens) Canada's Women's division of Naval Service, offers opportunities to women in 42 different trades and a chance for unskilled women of good education to train in specialized fields. Glancing over the range of trades in these three services, one sees opportunities for almost every type of work a woman desires."

Compulsory Registration of Nurses

A compulsory registration of graduate nurses is to be taken across Canada, by an order issued recently by Hon. Humphrey Mitchell, Minister of Labour, under the National Selective Service Civilian Regulations. Dates fixed for the registration, which is being taken at the request of the Canadian Nurses' Association, are March 17, 18 and 19.

Details for this compulsory registration have been worked out under Mrs. Rex Eaton, Assistant Director of National Selective Service, in consultation with Miss K. W. Ellis, representing the Canadian Nurses' Association.

It is estimated that there are about 45,000 civilian graduate nurses in Canada, many of whom are not now actively practising, but have withdrawn from the profession at least temporarily. The registration is to be all inclusive—taking in all graduates whether now practising or not. It will include nurses who left the profession through marriage or to take other employment. Nurses serving with the Armed Forces are not included, however, nor are practical nurses or nurses in training to be registered.

It is pointed out that the registration will provide an up-to-date list of all nurses to

meet various wartime needs. With the registration results secured, it will be possible to determine the number of nurses regularly available for civilian service, the additional number who might be depended upon in an emergency, and the number willing to serve as nurses with the Armed Forces. It will also tell whether there are any nurses available here for civilian nursing outside of Canada. (An enquiry on this subject was received recently from Great Britain.)

The Medical Procurement and Assignment Board, now surveying health services in Canada and making an inventory of personnel, had asked the Canadian Nurses' Association for much of the information now to be secured through this Selective Service registration, but the information has not been available before this time.

Nurses will be required to register at an Employment and Selective Service Office, or if more than five miles from a city having such an office, then at a Post Office. The Minister of Labour may authorize registrations to be taken elsewhere, and it is possible that nurses will be allowed to register at hospitals.

Farm Labour Developments in United States

Steps Taken to Increase Agricultural Production and Relieve Labour Shortages

THE *Labour Market Division* of the *Bureau of Program Planning and Review* under the United States Manpower Commission in a recent statement described some of the labour developments in agriculture.

It was indicated that the United States Department of Agriculture has released tentative information on the food production goals for 1943, calling for the highest production of food in the history of the United States. They call for increased production of those crops which are considered essential for the needs of the armed forces and the civilian population of the United States and her Allies: milk, meat, eggs, feed grains, dry beans and peas, poultry, oil crops, long staple cotton, and those varieties of vegetables which have high food values. Decreased plantings are recommended for those crops where the 1942 supply was greater than the actual need or those which are considered less essential to the war effort because of limited food value and high labour requirements. Some of these are short staple cotton, wheat, and the following truck crops: asparagus, artichokes, green peppers, lettuce, egg-plant, watermelons, celery, cauliflower, cucumbers, cantaloupes. Recommended acreages for the production of sugar beets and sugar cane are the same as in 1942.

Six-Point Labour Program

Paul V. McNutt, Chairman of the War Manpower Commission, released a 6-point program, drawn up by the Commission in co-operation with the Department of Agriculture to provide labour for 1943 record agricultural production. The program includes:

1. Full-time continuous employment of mobile groups of experienced farm workers, transported at Government expense from one area to another as the crops mature.
2. Relaxation of legal barriers which now restrict the complete mobility of labour between States.
3. Transfer of experienced farm operators and workers now on sub-standard lands to productive areas of labour demand.
4. Expansion of the United States Employment Service farm placement machinery for direction of farm labour movement and full-scale mobilization of local volunteer groups.
5. Adjustment of farm wages to bring the income of farm workers more nearly into line with those of industrial workers.

6. A farm labour training and management program, now being developed by the Department of Agriculture and the U.S. Office of Education. This will aid farmers to make the most effective use of the smaller number of experienced workers through expert supervision, training, and upgrading.

To encourage farmers to produce the necessary quantities of food, the United States Department of Agriculture announced a policy of price supports for essential war crops.

Manpower Measured in War Units

Because of the Tydings amendment to the Selective Training and Service Act of 1940, the Selective Service System issued a local board release, effective November 17, placing all registrants regularly engaged in agricultural occupations essential to the war effort in class II-C or III-C. This release was revised as of November 30, 1942, to provide a more complete basis for consideration of the occupational classification of registrants engaged in agriculture. It directs local boards:

- (a) To place in Class II-C any registrant who has no grounds for deferment other than his occupation and who is found to be necessary to, and regularly engaged in, an agricultural occupation essential to the war effort; and
- (b) To place in Class III-C any registrant deferred on the grounds of dependency who is found to be necessary and regularly engaged in an agricultural occupation essential to the war effort.

To serve as a guide to local boards of the Selective Service System and local offices of the United States Employment Service, the United States Department of Agriculture has prepared a table listing essential and non-essential farm products. Manpower requirements for the production of essential farm products are measured in terms of war units. For example, 20 hogs make up one war unit. The conversion factor is the percentage that a given product bears to a war unit. The production of essential farm products is determined in terms of war units; for example, one hog equals .05 of a war unit and three hogs equal .15 of a war unit.

The conversion tables will be utilized to determine the number of workers required to

properly staff a farm which is producing essential food products. If a person is responsible for 16 war units of essential farm products, he may be considered a person "necessary to and regularly engaged in an agricultural occupation or endeavour essential to the war effort" according to instructions issued by the Selective Service System.

Wage Adjustments

On November 30 the Office of Economic Stabilization issued an amendment to its previous wage regulations, stating that increases in wages and salaries of agricultural workers are not subject to any of the wage regulations previously issued by the Office of Economic Stabilization. This amendment recognizes that wages paid agricultural labour are generally sub-standard and that a wide disparity exists between agricultural wages and the prevailing wages in other essential war industries. The necessity for exempting agri-

cultural wages from existing wage regulations was recognized as important to the retention and recruitment of agricultural workers. The amendment does not apply to persons engaged in agricultural production earning more than \$2,400 annually. The authority to determine when and where increases in agricultural wages should be made rests with the Secretary of Agriculture.

The number of persons engaged in agricultural activity on November 1 totalled approximately 11 million, a reduction of more than 1 million workers from the previous month, according to the United States Department of Agriculture. While total employment on this date was at approximately the same level as employment on the same day last year, the composition of the labour force was reported to have changed considerably. A larger percentage of farm workers consisted of women, children, and volunteer townspeople. The number of family workers participating in crop activities remained the same as in 1941.

The Importance of Music in Wartime Industry

THE "Importance of Music in Wartime Industry" is the subject of an article by Doron K. Antrim, published in a recent issue of *Etude*, which indicates the successful innovation of a new factor in production.

Analysing the results of a recent survey, it is stated that two years ago, five hundred plants in the United States were using music to increase and speed production and relieve fatigue. To-day, three thousand plants, with five million workers on day and night shifts, are benefiting by this method, and new firms are adding it every day. Phonograph music is played in some plants either at lunch time and at breaks between shifts, or right on the job, while others use pipe and electric organs, or bands, choruses and glee clubs, made up of plant personnel. Where there are noisy machine operations, special amplifiers are provided which cut the music through the "din".

However, it is not only on industrial workers that music is considered beneficial. Mental workers in offices, editorial and drafting rooms also benefit from its use.

Great Britain

Reporting on the results of a survey by the Industrial Health Research Board on the effect of music on workers in Britain, Mr. Antrim states:—

"It is known that production can be boosted from two and three-tenths to eleven and six-tenths per cent, and also that fast music

speeds the worker, while slow music slows him down. The findings in this country bear this out. We know that tempi above normal pulse rate increase pulse, respiration and blood pressure, those below tend to decrease them. Accordingly, music is used to regulate the speed of the worker . . . This principle is applied in the factory. At fatigue hours (11 a.m. and 4 p.m.) livelier pieces are played to prevent the production curve from dipping down as it does ordinarily. At noon and rest periods, relaxing music is played.

"Music also has a pronounced effect in breaking up boredom, a prime breeder of fatigue, and in boosting morale. The English experimenters found that music took the tedium out of a monotonous job, cheered the workers, and made them more anxious to come to work. Largely as a result of this experiment, England has made music mandatory for all defence work."

The director of the British Broadcasting Corporation's program "Music While you Work", which is broadcast to English defence workers, advises:

". . . do not expect the wrong things from music; do not expect it to act as an immediate means of speeding up. It is a tonic like a cup of tea, something to cheer the mind. You will get increased output all right, but it will spread over the work spell as a whole. You will not necessarily get it while the music is being played.

"Do not play unfamiliar tunes; this is definitely disturbing. The workers want something they know. If they hum it at the same time, the better.

"Further, tone-level must be constant. This means that the music must not vary too much between soft and loud. Finally, overstrong accentuation must be avoided, or you will just get a series of pulsating bumps that distract and annoy the worker instead of stimulating him.

"The worker, however, does not work to the rhythm of the music, but carries on his operations quite independently of it. This is why Viennese waltzes, provided there are not too many of them, are often woven quite successfully into the work program of jigs and quicksteps. The modern slow waltz and rhumba, however, are strictly avoided. It has been found that too much of any kind of music induces boredom and irritation."

United States

Experiments carried out in the United States by a professor of the Stevens Institute of Technology, show that music in factories not only stimulates production to a marked degree, but definitely relieves fatigue, thereby reducing the number of accidents, absences, rejects and lateness, and improving the quality of the work.

"Music in industry", the writer declares, "is just a new application of a very old idea. Lightening labour with song goes back for thousands of years. According to one historian, early tribes regulated most of their work by music . . . Quintilian (A.D. 40) reports that every man had his work song. The Greeks had special ones for harvesting, threshing, grinding grain, wine making, spinning, weaving. That sure lift when energy was low was needed then as now. Barge haulers and sailors sang at their work. Negroes built our railroads in the south to harmony. These are a part of our folk song heritage. Down the ages, men sang instinctively to mitigate their toil." But the machine "age" has almost destroyed this ancient, universal custom, and to-day every effort is being made to revive the practice. By sound amplification, the use of music in industry has been made possible, with the splendid results already mentioned.

As early as 1902 industrial bands played in the Crystal Palace, London, England, and the band movement has now spread to this country where there are a number of excellent plant bands, choruses and ensembles.

Australia

The fact that music of the right type increases production to a marked degree, has also been established in Australia, according to a report on "Music in Factories" appearing in a recent issue of the *Australian Worker*. Hundreds of Tasmanian industrial workers time their labour to the strains of music with the results reflected in output figures. A light type of music with soothing effects is considered most helpful, but it is emphasized that it should not be used in factories where there is a great deal of noise, and where a jangle of sound might be created.

In mainland capitals, the idea has for some time been the subject of investigation by the Welfare Division of the Department of Labour and National Service, and the library of the Department at Hobart contains many references to the subject.

Similar to the program broadcast to the workers of Britain by the B.B.C., is that of the Australian Broadcasting Corporation—"Music While You Work"—perhaps the most popular method of providing industrial music. The federal Controller of Programs of the A.B.C. said recently that "a poll among listeners in the Southern States had revealed that light orchestral music is the most popular among people at work."

Contrary to the opinion expressed by experimenters in the United States, Australian officials state: "For skilled workers, with more interesting jobs, it was found that music was a help if not too obtrusive; but for office or executive staff it has been ruled out as a hindrance."

Good Lighting as a Safeguard

In a memorandum issued to plant executives throughout Ontario, the Industrial Accident Prevention Associations suggest that industrialists who are doubtful about the efficiency of their plant lighting should have a survey made.

The memorandum points out that good lighting is a safeguard of both employees and production. Recent investigation in one of Ontario's large production plants, where employees were seriously bothered by headaches, disclosed that lighting facilities were considerably below standards established. In addition to headache and strain suffered by employees, it was found that plant production had dropped.

Elimination of glare is another important item, the memorandum continues. It is possible that there may be sufficient light for a job but glare may cause a worker to make a false move and be injured.

Women in War Industries in the United States

Surveys of Employment and Working Conditions Made by the Women's Bureau of the Department of Labour

SURVEYS of the employment of women and their working conditions in certain war industries were made during 1942 by the Women's Bureau of the United States Department of Labour as a follow-up to its inquiry of 1941 into the actual and prospective employment of women in war industries. The 1942 surveys covered the cannon and small arms, artillery ammunition and aircraft assembly industries.* While these industries are already employing substantial numbers of women, the opinion was expressed that they could absorb many more.

Employment Policies

All the plants studied were willing to employ women although a few had not done so at the time of the survey. Prejudice against the employment of married women was rare and some preferred them on the ground of stability. The occasional employer regarded the employment of near relatives or husbands and wives in the same department as detrimental to shop discipline. The proportion of married women among female employees in different plants ranged from 35 to 70 per cent. One firm reported that about two-thirds of its women workers were responsible wholly or partially for the support of children. Most of the plants did not hire girls under 18 and a few set upper-age limits of 45 to 55. Girls in their late twenties were preferred.

Pre-employment physical examinations were required in all the plants visited and some used mechanical aptitude and other standardized tests to select their employees. Few companies laid down specific education or experience requirements but most gave preference to persons with such qualifications. All war plants require proof of citizenship, fingerprinting and checking of former employment and references.

Hours and Wages

The majority of the women in the plants under study were working 48 hours a week or less, although two aircraft plants employed them for a 54-hour week. States with laws restricting the employment of women to cer-

tain hours usually granted exemptions to war industries or relaxed their laws. Comparatively few women were employed on night shifts but it was felt that the number would increase. A 30-minute lunch period was the rule in most plants, sometimes granted with pay, sometimes without; but several employers gave only 10 or 20 minutes for lunch and expected the workers to eat at their benches. Relatively few plants provided for definite rest breaks of 10 or 15 minutes.

In the aircraft plants where the employment of both men and women was relatively new, the rate for the job was the general rule. In other plants, however, women paid time-rates were receiving lower rates than men despite the pronouncement of the National War Labour Board that "wage rates for women shall be set in accordance with the principle of equal pay for comparable quantity and quality of work on comparable operations". The employment of women had made it necessary for employers to raise or lower benches and machines to reduce weight-lifting, break down operations to segregate the light work from the heavy, place automatic stops on machines to reduce the skill required, hire additional movers, and install lifting devices, etc. It was asserted, however, in the bulletin on the cannon and small arms industries:

These innovations may actually increase production and decrease unit costs, and do not serve as warrant for lower wage rates for participating workers. All-over production costs as well as the physical characteristics of the work as performed by women instead of men must be taken into consideration in contemplating rate changes. Only if there are substantial changes in job content and material increase in total labour costs is there a legitimate reason for proportionate wage adjustments, in the opinion of the National War Labour Board.

Working Conditions

Since most of the plants were new, they were usually adequately lighted and ventilated and well equipped with medical facilities and safety devices. In some there were insufficient sanitary facilities for women and not enough seats for those whose jobs permitted sitting.

Some plants required women to wear uniforms and almost all insisted that women wear close-fitting clothes, low-heeled, closed-toe shoes and head coverings of hairnets, caps or

* Bulletins of the Women's Bureau, United States Department of Labour: No. 191-1—"Women's Employment in Aircraft Assembly Plants in 1942"; No. 192-2—"Women's Employment in Artillery Ammunition Plants, 1942"; No. 192-3—"Employment of Women in the Manufacture of Cannon and Small Arms in 1942".

bandanas. Difficulties were reported in enforcing the rules regarding head coverings. Jewellery was forbidden for persons working on machines, and in explosives plants metal hair-pins and buttons were also prohibited. Women as well as men were required to supply their own hand tools. Where necessary, goggles, eye shields and respirators were supplied by the company.

The importance of adequate food service was stressed. Many of the plants had cafeterias and some supplemented them with food trucks and vending machines for fruit, drinks and soup. It was emphasized that unless food facilities were sufficiently convenient to workers, longer lunch periods must be granted. The need for rest rooms where the workers

could relax was urged and the practice of eating at the work-bench condemned by the Women's Bureau.

Training

Although in most areas pre-employment training was available in National Defence Training Schools and public and private vocational schools, few employers required it and some felt that women were being exploited by fee-charging trade schools. On-the-job training was the rule in most plants but the shortage of supervisors created difficulties. The value of short courses to familiarize women with the machine world and of supplementary part-time courses to prepare them for up-grading was stressed.

Welfare and Health Services in Industry

THE Industrial Welfare Society in Great Britain has published bulletins on "Welfare in Industry" and "Health Services in Industry". This Society, whose Council includes many prominent industrialists, helps its members to keep in touch with recent developments in the field of industrial welfare and gives advice to those who wish to establish or extend welfare schemes.

"Welfare in Industry" is a discussion of the main aspects of welfare and personnel work and of the different forms of organization through which basic requirements may be met. No welfare and personnel policy can succeed, it is pointed out, unless the supervisor is a person who has both the ability to win the confidence of employers and workers and a thorough knowledge of relevant legislation and industrial conditions. Moreover, he must have the status of a member of the executive staff with direct access to the senior management.

Employment policy—recruitment, transfer, promotion and dismissal—should be on a scientific basis if waste and discontent are to be avoided. Workers should be carefully selected and fitted to their jobs, and no worker should be allowed to quit his job without being interviewed by someone other than his immediate shop superior.

The maintenance of good working conditions is emphasized, and lighting, warmth and ventilation, the elimination of noise, washing facilities and sanitary accommodation are discussed in detail. It is stated that the minimum

illumination of 6-foot candles at working level, which is prescribed by the Factories (Standards of Lighting) Regulations (L. G., 1942, p. 678), can be exceeded with advantage even for fairly rough work. Fatigue can be reduced if working posture is improved, suitable facilities for sitting are provided, the optimum hours are worked, rest pauses are organized and music is provided. The provision of good and inexpensive meals, as well as refreshments during rest pauses, is considered to be one of the most vital communal services of the factory. It is also pointed out that the factory welfare service can do much to help the worker outside the factory, as for example in securing comfortable lodging.

"Health Services in Industry" is an up-to-date version of two earlier pamphlets on medical and dental services. It is directed to the small as well as the large firm, and the claim is made that no firm with 200 or more workers should be without the services of a part-time medical officer, though full-time doctors are not normally required in firms of less than 3,000 employees. Various plant medical schemes are outlined applying to firms of different sizes. The following problems are discussed in detail: the inauguration of a works health service, the position and duties of a works medical officer, the relations with outside health services (the panel doctor, local authorities, hospital and convalescent treatment, etc.), health and accident records, ancillary health services such as dental and eye services, and general health and working conditions.

Industrial Disputes and Conciliation

Introduction

THE *Industrial Disputes and Conciliation* section contains monthly articles dealing with Recent Proceedings under the Industrial Disputes Investigation Act, Conciliation Work of the Department of Labour, and Strikes and Lockouts in Canada, Great Britain and other countries.

Recent Proceedings under the Industrial Disputes Investigation Act.—This article gives an account of all applications for Boards of Conciliation and Investigation, and the disposition of these applications. In cases where Boards are established, the *LABOUR GAZETTE* publishes in due course the full text of their reports, as submitted to the Minister of Labour.

Since the outbreak of war and the extension of the Industrial Disputes Investigation Act to cover disputes in war industries, the number of applications for Boards of Conciliation and Investigation has greatly increased.* In recent months the majority of applications for Boards have been referred to Industrial Disputes Inquiry Commissioners for preliminary investigation, to determine whether the circumstances warrant the establishment of a Board. Reports of Commissioners appointed under the Act are summarized in this article.

Industrial disputes which concern wage demands are now administered by the National War Labour Board.

Recent Proceedings under the Industrial Disputes Investigation Act

DURING the month of February, the Minister of Labour received the report of the Board of Conciliation and Investigation established to deal with the dispute between Taylor Electric Manufacturing Company, London, Ont., and its employees, members of Local 517, United Electrical, Radio and Machine Workers of America. The text of the unanimous report of the board will be found at the conclusion of this statement.

Applications Received

Seventeen applications* for the establishment of Boards of Conciliation and Investigation

Conciliation Work of the Department of Labour.—Conciliation proceedings are carried on by the Department of Labour for the most part under the provisions of the Conciliation and Labour Act which empowers the Minister to inquire into the causes and circumstances of a dispute, to take such steps as seem expedient for the purposes of bringing the parties together, and to appoint a conciliator or an arbitrator when requested by the parties concerned. In some disputes occurring in industries coming directly under the Industrial Disputes Investigation Act, namely, mines and public utilities, and war work, preliminary inquiries and mediation by officers of the Department result in the settlement of the matters in dispute without the necessity of the establishment of Boards of Conciliation and Investigation.

Strikes and Lockouts.—The latest information concerning strikes and lockouts in Canada is published month by month in tabular form, with a summary appearing once a year. The summary of strikes and lockouts in Canada and other countries during 1941 appeared in the *LABOUR GAZETTE* for May, 1942.

The latest available information as to strikes and lockouts in Great Britain and other countries appear from month to month.

under the provisions of the Industrial Disputes Investigation Act were received in the Department of Labour during the month of February. These were:

1. From employees of the Steel Company of Canada, Hamilton, Ont., members of Local 1005, United Steelworkers of America. The dispute, which was said by the applicants to directly affect 4,000 employees, concerns the recognition of the union as sole bargaining agent of the employees of the company's Hamilton works. On February 22, Mr. J. P. Nicol, Industrial Relations Officer, Dominion

* By P.C. 5963, the National and Regional War Labour Boards are specifically charged with the duty of adjudicating wage demands. Therefore all applications for the establishment of Boards of Conciliation and Investigation in which wages are the sole cause of the dispute are removed from the ambit of the Industrial Disputes Investigation Act and the applicants are referred to their respective War Labour Board.

Department of Labour, Toronto, was appointed an Industrial Disputes Inquiry Commissioner to investigate the dispute.

2. From employees of the Massey-Harris Company, Limited, Weston, Ont., members of the United Automobile Workers of America. The dispute, which was said by the applicants to directly affect 2,300 workers, concerned union recognition and the negotiation of a collective labour agreement. On February 12, Mr. J. P. Nicol, Industrial Relations Officer, Dominion Department of Labour, Toronto, was appointed an Industrial Disputes Inquiry Commissioner to investigate the dispute.

3. From employees of the Burgess Battery Company, Niagara Falls, Ont., members of the United Gas, Coke and Chemical Workers of America. The dispute, which was said by the applicants to affect 381 employees, concerns union recognition. On February 22, Mr. F. J. Ainsborough, Industrial Relations Officer, Dominion Department of Labour, Toronto, was appointed an Industrial Disputes Inquiry Commissioner to investigate the dispute.

4. From employees of the Niagara, St. Catharines and Toronto Railway, St. Catharines, Ont., members of System Federation No. 11, Canadian National Railways, and Lodge 340, Brotherhood of Railway Carmen of America. The dispute, which was said by the applicants to affect 74 employees directly and 135 indirectly, concerns the negotiation of a collective labour agreement. On February 27, His Honour Judge Ian M. Macdonell, Toronto, was appointed an Industrial Disputes Inquiry Commissioner to investigate the dispute.

5. From employees of the Canadian Car and Foundry Company, Limited, Brantford, Ont., members of Local 397, United Automobile Workers of America. The dispute which was said by the applicants to affect 425 employees directly and 450 indirectly, concerns the negotiation of a collective labour agreement. On February 25, Mr. J. P. Nicol, Industrial Relations Officer, Dominion Department of Labour, Toronto, was authorized as Industrial Disputes Inquiry Commissioner to investigate the dispute. The Commissioner, following his investigation, recommended the establishment of a Board of Conciliation and Investigation.

6. From the employees of the Dominion Glass Company, Limited, Hamilton, Ont., members of Local 3, Canadian Brotherhood of Glass Workers. The dispute, which was said by the applicants to affect 750 workers, concerns union recognition and the negotiation of a collective labour agreement.

7. From the employees of the J. A. M. Taylor Tool Company, Galt, Ont., members of Local 2903, United Steelworkers of America. The dispute, which was said by the applicants to affect 36 employees, concerns the negotiation of a collective labour agreement.

8. From the employees of Babcock-Wilcox and Goldie-McCulloch, Limited, Galt, Ont., members of Local 2859, United Steelworkers of America. The dispute, which was said by the applicants to affect 500 employees, concerns the negotiation of a collective labour agreement. On February 24, Mr. F. J. Ainsborough, Industrial Relations Officer, Dominion Department of Labour, Toronto, was appointed an Industrial Disputes Inquiry Commissioner to investigate the dispute.

9. From employees of the R. McDougall Company, Limited, Galt, Ont., members of Local 2890, United Steelworkers of America. The dispute, which was said by the applicants to affect 175 employees, concerns the negotiation of a collective labour agreement.

10. From the employees of the Shurly-Dietrich-Atkins Company, Limited, Galt, Ont., members of Local 2895, United Steelworkers of America. The dispute, which was said by the applicants to affect 275 employees concerns the negotiation of a collective labour agreement.

11. From employees of the Otis-Fensom Elevator Company, Limited, Galt, Ont., members of Local 515, United Electrical, Radio and Machine Workers of America. The dispute, which was said by the applicants to directly affect 4,000 employees and 1,400 indirectly, concerns the negotiation of a collective labour agreement. On February 23, Mr. J. P. Nicol, Labour Relations Officer, Dominion Department of Labour, Toronto, was appointed an Industrial Disputes Inquiry Commissioner to investigate the dispute.

12. From the employees of the Galt Metal Industries, Limited, Galt, Ont., members of Local 2894, United Steelworkers of America. The dispute, which was said by the applicants to affect 450 employees, concerns the negotiation of a collective labour agreement.

13. From the employees of the Galt Brass Company, Galt, Ont., members of Local 2903, United Steelworkers of America. The dispute, which concerns the negotiation of a collective labour agreement, was said by the applicants to affect 100 employees. On February 18, the application was returned to the employees for revision, and had not been returned at the end of the month.

14. From the employees of the Clark-Ruse Aircraft Company, Limited, Lakeburn, N.B., members of Local 2889, United Steelworkers

of America. The dispute, which was said by the applicants to affect 130 employees directly and approximately 70 indirectly, concerns union recognition and the negotiation of a collective labour agreement.

15. From employees of the Metallic Roofing Company, Limited, Toronto, Ont., members of Local 252, United Automobile Workers of America. The dispute, which was said by the applicants to affect 435 employees, concerns the negotiation of a collective labour agreement.

16. From the employees of the Montreal Cottons, Limited, Valleyfield, P.Q., members of the United Textile Workers of America. The dispute, which was said by the applicants to affect 3,270 employees, concerns the recognition of the union as the sole bargaining agency of employees and the negotiation of a collective labour agreement.

17. From the employees of the Sterling Clothing Company, Limited, Montreal, P.Q., members of the Amalgamated Clothing Workers of America, Montreal Joint Board. The dispute, which was said by the applicants to affect 225 employees directly and 25 indirectly, concerns the alleged violation by the company of its contract with the union.

Boards Established

On February 11, a Board of Conciliation and Investigation was established to deal with a dispute between the Hamilton Bridge Company, Limited, Hamilton, Ont., and its employees, members of Local 2537, United Steelworkers of America (L. G., Jan., 1943, p. 69). Following the receipt of the application for the establishment of a board, Mr. J. S. McCullagh, Industrial Relations Officer, Ottawa, was assigned to investigate the dispute. Efforts to bring about an amicable settlement having failed, the Minister of Labour, on February 11, established a board. At the end of the month, Mr. Lynn B. Spencer, K.C., Welland, Ont., and Mr. Maxwell Sauder, Hamilton, Ont., had been appointed members of the board on the nomination of the employer and employees respectively, and had been requested to confer respecting the selection of a third person on the Board to act as chairman.

On February 13, a Board of Conciliation and Investigation was established to deal with a dispute between Schultz Die Casting Company of Canada, Limited, Wallaceburg, Ont., and its employees, members of Local 251, United Automobile Workers of America. (L. G., Feb., 1943, p. 194.) Following receipt of the application for the establishment of a board, Mr. J. P. Nicol, Industrial Relations Officer, Dom-

inion Department of Labour, Toronto, was appointed an Industrial Disputes Inquiry Commissioner to make an investigation. The Commissioner recommended that the circumstances warranted the establishment of a board. The personnel of the Board is as follows: Honourable Mr. Justice J. G. Gilmasters, Supreme Court of Ontario, Toronto, Ont., chairman, appointed on the joint recommendation of the other two members; Mr. Drummond Wren, Toronto, Ont., appointed on the nomination of the employees and Mr. J. A. McNevin, K.C., Chatham, Ont., appointed on the nomination of the employer.

On February 27, a Board of Conciliation and Investigation was established to deal with a dispute between the F. X. Drolet Company, Limited, Quebec, P.Q., and its employees, members of Local 74, International Moulders and Foundry Workers' Union of North America. (L. G., Feb., 1943, p. 195.) Following the receipt of the application for the establishment of a board, Dr. Percy A. Robert, Special Representative, Department of Labour, was appointed an Industrial Disputes Inquiry Commissioner to investigate the dispute. The Commissioner's recommendation that a board be not established was not concurred in and subsequently a Board of Conciliation and Investigation was established on February 27. Mr. Joseph Matte, Quebec, P.Q., was appointed on the recommendation of the employees. At the end of the month the Department was awaiting the Company's nomination.

On February 11, a Board of Conciliation and Investigation was established to deal with a dispute between Welland-Vale Manufacturing Company, Limited, Hamilton, Ont., and its employees, members of Local 2853, United Steelworkers of America. (L. G., Feb., 1943, p. 195). The parties to the dispute both agreed to submit the dispute to the Board established to deal with the dispute between the Hamilton Bridge Company, Limited, and its employees. At the end of the month, Mr. Maxwell Sauder, Hamilton, Ont., had been appointed on the nomination of the employees and Mr. Lynn B. Spencer, K.C., Welland, Ont., had been appointed on the nomination of the company. The two nominees had been requested to confer respecting the nomination of a person to act as chairman.

Boards Fully Constituted

The constitution of the Board of Conciliation and Investigation established on January 13, to deal with a dispute between Hull Iron and Steel Foundries, Limited, Hull, P.Q., and its employees, members of Local 318, International Moulders and Foundry Workers' Union of North America (L. G., Feb., 1943,

p. 195), was completed during the month of February. The personnel of the board is as follows: His Honour Judge Honore Achim, Hull, P.Q., appointed by the Minister of Labour in the absence of joint recommendation of the other two members of the board; Mr. Drummond Wren, Toronto, Ont., appointed on the recommendation of the employees; and Mr. François Caron, K.C., Hull, P.Q., appointed on the recommendation of the employer.

Other Disputes Referred to Industrial Disputes Inquiry Commissioners

An application for the establishment of a Board of Conciliation and Investigation was received in January from employees of Yarrows Limited, Victoria, B.C. (L. G., Feb., 1943, p. 194). On February 1, Mr. G. R. Currie, Industrial Relations Officer, Dominion Department of Labour, Vancouver, was appointed as Industrial Disputes Inquiry Commissioner to make an investigation of the dispute.

On February 15, Mr. Louis Fine, Chief Conciliation Officer, Ontario Department of Labour, Toronto, Ont., was authorized, as Industrial Disputes Inquiry Commissioner, to make an investigation of the dispute between the Ford Motor Company of Canada, Limited, Windsor, Ont., and its employees, members of Local 240, United Automobile Workers of America. (L. G., Feb., 1943, p. 195.)

Mr. Louis Fine, Chief Conciliation Officer, Ontario Department of Labour, Toronto, Ont., on February 15 was also authorized as Industrial Disputes Inquiry Commissioner to investigate the dispute between the Ford Motor Company of Canada, Limited, and its employees, members of the Ford of Canada Employees Association (L. G., Feb., 1943, p. 195).

Mr. Bernard Rose, K.C., Montreal, was authorized on February 10, as Industrial Disputes Inquiry Commissioner, to make an investigation of the dispute between the Davie Shipbuilding and Repairing Company, Limited, Lauzon, P.Q., and its employees, members of Local No. 3, Canadian Union of Boilermakers and Iron Shipbuilders, Canadian Congress of Labour. (L. G., Feb., 1943, p. 195.)

Other Reports of Industrial Disputes Inquiry Commissioners

On December 8, 1942, Mr. Bernard Rose, K.C., was authorized as Industrial Disputes Inquiry Commissioner to investigate a dispute between the Johnston Woollen Mills, Limited, Waterville, P.Q., and certain of its employees. (L. G., Jan., 1943, p. 70.) A strike involving

75 employees of the company occurred on February 6, and terminated on February 15. Inasmuch as the main issue of the dispute was the remuneration of the employees, a Board of Conciliation and Investigation could not be established; therefore the Commissioner recommended that the application for a board be refused. Accordingly on February 15, the parties to the dispute were advised that a board could not be established.

A report was received during the month from Mr. J. P. Nicol, Industrial Relations Officer, Dominion Department of Labour, Toronto, Ont., who had been appointed an Industrial Disputes Inquiry Commissioner, to investigate a dispute between the Dominion Glass Company, Limited, Wallaceburg, Ont., and its employees, members of the United Automobile Workers of America. (L. G., Jan., 1943, p. 68.) The Commissioner found that the Company's volume of war work only represented a negligible percentage of its total production and recommended that a board be not established. Accordingly, the parties to the dispute were advised that a board would not be established under the Industrial Disputes Investigation Act.

On December 15, Mr. F. J. Ainsborough, Industrial Relations Officer, Dominion Department of Labour, Toronto, Ont., was appointed an Industrial Disputes Inquiry Commissioner, to investigate a dispute between the Aluminum Company of Canada, Limited, Kingston, Ont., and its employees, members of the United Electrical, Radio and Machine Workers of America. (L. G., Jan., 1943, p. 68.) From an examination of union records, the Commissioner found that the applicant union did not represent a majority of the employees of the company, and therefore recommended against the establishment of a Board of Conciliation and Investigation. The Minister of Labour accepted the Commissioner's recommendation and the parties were advised that a board would not be established.

Mr. F. J. Ainsborough, Industrial Relations Officer, Dominion Department of Labour, Toronto, who was appointed an Industrial Disputes Inquiry Commissioner on February 3, to investigate a dispute between the Aluminum Company of Canada, Limited, Kingston, Ontario, and its employees, members of various unions represented by the Joint Committee of A.F. of L. Unions (L. G., Feb., 1943, p. 195) made his report. The Commissioner found on examining the records submitted by these organizations that they did not represent a majority of the employees of the company, and therefore recommended against the establishment of a Board of Conciliation and

Investigation. The Minister of Labour accepted the Commissioner's recommendation and the parties were advised that a board would not be established.

In the dispute between the A. R. Clarke and Company, Toronto, Ont., and its employees, members of Local 280, International Fur and Leather Workers' Union, Mr. F. J. Ainsborough, Industrial Relations Officer, Dominion Department of Labour, Toronto, was appointed on January 18, 1943, an Industrial Disputes Inquiry Commissioner to make an investigation. (L. G., Feb., 1943, p. 194.) A representation vote conducted on February 4 indicated that the applicant union did not represent a majority of the employees and consequently the Commissioner recommended against the establishment of a Board of Conciliation and Investigation. Subsequently the parties to the dispute were advised that a board would not be established.

On January 26, Mr. F. J. Ainsborough, Industrial Relations Officer, Dominion Department of Labour, Toronto, was appointed an Industrial Disputes Inquiry Commissioner to investigate a dispute between the Davis Leather Company, Limited, Newmarket, Ont., and its employees, members of Local 290, International Fur and Leather Workers Union. (L. G., Feb., 1943, p. 194.) Subsequently a representation vote was taken which indicated that the applicant union did not represent a majority of the employees concerned and as a result the Commissioner recommended against the establishment of the board. The applicants were advised that a board would not be established.

Dr. Percy A. Robert, Montreal, was appointed an Industrial Disputes Inquiry Commissioner on January 29, to investigate a dispute between James Hazel and Son, Quebec, P.Q., and its employees, members of Local 74, International Moulders and Foundry Workers' Union. (L. G., Feb., 1943, p. 194.) The Commissioner recommended that as the employees and the company had agreed to make a joint application to the Quebec Regional War Labour Board for a decision on wage rates and cost of living bonus, a Board of Conciliation and Investigation be refused. At the end of the month the applicant union had been requested to withdraw the application for a board, as remuneration and matters pertaining thereto have been removed from the scope of the Industrial Disputes Investigation Act by P.C. 5963, the Wartime Wages Control Order and come within the jurisdiction of the National and Regional War Labour Boards.

Settlements Reached

On March 1, on the request of the applicant union, the application for the establishment of a Board of Conciliation and Investigation (L. G., June, 1942, p. 660) to deal with a dispute between the Dominion Wire, Rope and Cable Company, Limited, Lachine, P.Q., and its employees, members of Lodge 1288, International Association of Machinists, was withdrawn.

The application for the establishment of a Board of Conciliation and Investigation to deal with a dispute between the Anglo-Canadian Wire Rope Company, Limited, Lachine, P. Q., and its employees, members of Lodge 1288, International Association of Machinists (L. G., July, 1942, p. 761) was withdrawn by applicant union on March 1.

On February 6, the Department was advised that an agreement had been signed between the Progressive Engineering Works Company, Limited, Vancouver, and its employees, members of Local 1; Moulders and Foundry Workers' Union, Canadian Congress of Labour, and that the application for a Board of Conciliation and Investigation (L. G., Feb., 1943, p. 194) was accordingly withdrawn, an agreement having been reached between the parties. A summary of the agreement will be found in the section of this issue of the *LABOUR GAZETTE* entitled "Recent Collective Agreements".

The Department was advised on February 12 that the application for the establishment of a Board of Conciliation and Investigation, to deal with the dispute between the Wilson Motor Bodies, Limited, Long Branch, Ont., and its employees, members of Local 253, United Automobile Workers of America (L. G., Feb., 1943, p. 194) was withdrawn, the parties to the dispute having concluded a collective labour agreement.

A summary of the agreement will be found in the section of this issue of the *LABOUR GAZETTE* entitled "Recent Collective Agreements".

Application Withdrawn

On February 16, the Department was advised by the applicant union that it had been established that the employees concerned in a dispute with the Corporation of the City of North Vancouver (L.G., December, 1942, p. 1374) came within the jurisdiction of the Industrial Conciliation and Arbitration Act of the Province of British Columbia and consequently the request for a Board was withdrawn.

Report of Board in Dispute between Taylor Electric Manufacturing Company, London, Ont., and its Employees

On February 5, the Minister of Labour received the report of the Board of Conciliation and Investigation established to deal with a dispute between Taylor Electric Manufacturing Company, London, Ont., and its employees, members of Local 517, United Electrical Radio and Machine Workers of America. (LABOUR GAZETTE, October 1942, page 1122).

The personnel of the board was as follows: His Honour Judge I. M. Macdonell, Toronto, Chairman, appointed on the joint recommendation of the other two members; Prof. Christian Severtz and Mr. J. A. E. Braden, K.C., both of London and appointed on the nomination of the employees and employer respectively.

The unanimous report of the Board follows.

Report of Board

To:

The Honourable HUMPHREY MITCHELL, M.P.,
Minister of Labour,
Ottawa, Ont.

Re: Industrial Disputes Investigation Act and re dispute between Taylor Electric Manufacturing Company, and its employees, members of Local 517 United Electrical Radio and Machine Workers of America.

Sir:

The Board of Conciliation established by you to deal with the above dispute, having completed the work assigned to it, begs to submit its report. The Board is pleased to be able to report that an agreement has been reached between the parties upon all matters in dispute.

Subsequent to the interim report submitted by the Board on November 9, 1942, the members of the Board were appointed an Industrial Disputes Inquiry Commission to investigate certain notices of separation given by the employer to twenty employees who were members of the union. Pursuant to this appointment, the Board reassembled in London on November 16, 1942, and sitting both as a Board of Conciliation and Industrial Disputes Inquiry Commission, heard a brief on behalf of the employees, submitted through counsel, Mr. J. L. Cohen, K.C. On November 27, 1942, a brief in reply was submitted by

Mr. A. H. Murphy, K.C., Counsel for the company. At subsequent sittings, commencing on the 8th December, 1942, evidence in support of the briefs was heard, as well as argument of counsel.

At the conclusion of the hearings, the Board was of opinion that there were still possibilities of a settlement of the dispute. Accordingly, the parties were informed that no report would be submitted for fourteen days. Before the expiration of this period, an offer of settlement was made on behalf of the employer. Subsequently, direct negotiations took place between the parties, and meetings of the board were held to assist in the settlement which finally resulted.

The original memorandum of settlement, signed by Mr. C. R. Sullivan representing the union, and Mr. A. T. Taylor, representing the employer, is forwarded herewith. The board has pleasure in recommending the approval of this settlement.

It will be noted that the parties have agreed to the holding of a vote by the Department of Labour to determine whether the employees desire to be represented by Local 517 United Electrical Radio and Machine Workers of America, or by the Taylor Electric Employees Association. The form of ballot agreed upon by the parties is also submitted herewith. Both parties agree that the date of the vote shall be determined by the Department of Labour, the Board of Conciliation to make such recommendations as to the date of taking the vote as it sees fit. The chairman of the board and Dr. Sivertz are of opinion that the vote should not be taken until thirty days from the date of settlement, namely January 25, 1943. Mr. Braden, however, is of opinion that the vote should be taken forthwith.

All of which is respectfully submitted.

Dated this 3rd day of February, 1943.

(Sgd.) I. M. MACDONELL,
Chairman.

(Sgd.) C. SIVERTZ,
Employees' Nominee.

(Sgd.) J. A. E. BRADEN,
Company's Nominee.

Conciliation Work of the Department of Labour during February, 1943

ABOUT 65 disputes came to the attention of the Industrial Relations Branch of the Department during February and were dealt with by Industrial Relations Officers and, in Ontario, by the additional services of the Conciliation Officers of the province working in co-operation with the Federal Department. In nearly every instance an amicable adjustment of the matters in dispute was secured by the investigating officer. The disputes of peculiar interest or importance are summarized in the statement below which represents a partial review of the activities of the Branch during the month.

Industrial Relations Officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal and Fredericton. The territory of the two officers resident in Vancouver comprises British Columbia and Alberta; two officers stationed in Winnipeg cover the provinces of Saskatchewan and Manitoba and North Western Ontario; three officers resident in Toronto confine their activities to Ontario; two officers in Montreal are assigned to the Province of Quebec and one officer resident in Fredericton, N.B., represents the Department in the Maritime Provinces. The headquarters of the Industrial Relations Branch and the Director of Industrial Relations and staff are situated in Ottawa.

COAL MINERS, AERIAL, ALTA.—On February 1, some 163 employees of Star Mine operated by Rosedale Collieries, Limited, went on strike in an attempt to enforce a demand for the supply of free carbide to the "company men" claiming that the management of Rosedale Mines, operated by the same company, followed this practice in respect to its day-wage employees. The matter was immediately taken up by Departmental officials with the officers of District 18, United Mine Workers of America, and Mr. F. E. Harrison, Western representative, Department of Labour, Vancouver, proceeded to Drumheller in an effort to secure a resumption of work. Efforts at mediation failed and the strikers ignored instructions from the union's District officer to resume work. When on March 10 the employees rejected by a vote of 53 to 44 a proposal from District Headquarters for termination of the strike, Mr. Robert Livett, president of District 18, U.M.W.A. secured from International President John L. Lewis, authority to revoke the charter of the Aerial Local No. 4685. This action was taken and

every employee was then obliged to make application for re-employment and those who were accepted by the Company were restored to membership in the union. Because the union holds a closed shop contract with the Western Canada Bituminous Coal Operators Association, this step meant that those employees who were not reinstated would likely be unable to obtain employment at any mine in Western Canada which was party to an agreement with the U.M.W.A. The local executive was removed from office and the affairs of the Union placed in charge of the District Board member for the area. Work was resumed on February 15, by all employees with the exception of seven men whom the Company refused to re-engage pending full consideration of their case. At the end of the month the Company had reinstated all except the former secretary of the Union and three other men. The Union dropped its demand for free carbide and an agreement was reached to submit certain other matters in dispute to an Independent Chairman.

COAL MINERS, FERNIE, B.C.—Upon joint request from officers of District 18, United Mine Workers of America and the Western Canada Bituminous Coal Operators Association, the Minister of Labour late in January appointed Mr. John Russell of Calgary to act as Independent Chairman to adjudicate a dispute between the Crow's Nest Pass Coal Company, Limited, Fernie, B.C., and its employees. At hearings which commenced on February 18, Mr. Russell was called upon to determine the merits of a claim by the Union that yardage rates should be paid at a place known as No. 4 Left Room driven from a point on the Main Tunnel 7,600 feet from the Portal of the mine. His findings were that the room was driven for the purpose of extracting pillar coal and was not intended to be a Main Haulage Road. Therefore, under the terms of the contract the miners were not entitled to yardage as claimed. The decision was accepted by both parties.

TOOL WORKERS, WESTMOUNT, P.Q.—Following receipt of a joint request, the Minister of Labour nominated Mr. Bernard Rose, K.C., Montreal, to act as Chairman of an Arbitration Committee to deal with a dispute between Defence Industries, Limited, Westmount Tool Works, Westmount, P.Q., and its employees, members of Lodge 1594, International Association of Machinists. The Committee unanimously approved the action of the Company

in transferring an employee from one Department to another and held that a transfer had not caused any prejudice to the man in question or the organization to which he belonged.

AIRCRAFT PARTS WORKERS, BRANTFORD, ONT.—On February 4, a representative of the United Automobile Workers of America brought to the attention of the Department a strike by 66 employees in the metal fittings department of the Verity Plant of Massey Harris Company Limited, Brantford, Ontario. Some of the strikers were members of the U.A.W.A., but that organization had not sanctioned the stoppage. Following the strike, which lasted for a day and a half, Mr. J. P. Nicol, Industrial Relations Officer, Toronto, was assigned to investigate the grievances of the workers. On February 15, Mr. Nicol brought together representatives of the management, a committee of seven from the metal fittings department and a sub-committee of five from the Plant Council. Following a frank discussion, a mutually satisfactory agreement on the matters at issue was reached. Three members of the committee from the metal fittings department were given permission to sit in with three from the Plant Council Committee to study classifications within the Department and to recommend any changes needed to remove injustices. The meeting approved of the production workers classification chart, a copy of which was given to each committee member. The Company agreed to give consideration to improving washroom facilities and the adjustment of other minor matters.

FOUNDRY WORKERS, SACKVILLE, N.B.—On January 30 a group of 43 workers employed by Enterprise Foundry, Limited, Sackville, N.B., went on strike because of unsatisfactory ventilation. The matter had been the subject of discussion on previous occasions but the Company had not implemented an undertaking to install additional ventilators. Mr. H. R. Pettigrove, Industrial Relations Officer, Fredericton, N.B., secured from the Company a promise that this work would be proceeded with at once and the men returned to work on February 2.

METAL WORKERS, OWEN SOUND, ONT.—A strike of 37 men and 20 girls in the employ of the Northern Bolt, Screw and Wire Company, Limited, Owen Sound, Ontario, occurred on February 4. It was caused by the Company's dismissal of the Chairman of the Grievance Committee of the Local Union of the United Steelworkers of America, allegedly for insufficient reasons. Mr. H. Perkins, Industrial Relations Officer, Toronto, visited the plant and held conferences on February 10 and 11.

The Company maintained that the dismissed employee had insulted and assaulted the plant superintendent and that he had caused unrest among the employees by reporting incorrectly to them in regard to negotiations between the Company and the Grievance Committee. The Company had requested the Union to appoint another Chairman of the Grievance Committee but this procedure had been unacceptable. The Union asked for the resignation of the plant superintendent but later withdrew its demand. Finally the Company agreed to reinstate the dismissed employee and work was resumed when the plant reopened on February 15.

METAL WORKERS, HAMILTON, ONT.—On February 8, a field representative of the United Steelworkers of America notified the Department of a strike on that date by employees of the Greening Wire Company, Limited, Hamilton, Ontario, called as a consequence of a reduction in morning and afternoon rest periods by five minutes. It involved about 60 male and 80 female employees. Mr. George Fenwick, Provincial Conciliation Officer, Toronto, arrived on the scene February 9, but was not able to arrange attendance by the managing officers of the Company at a joint conference with employees until the afternoon of February 10. Mr. Fenwick induced the Company tentatively to restore the 15-minute rest period which had been in effect for a year, and arranged that a Committee of employees would be selected to discuss their differences with the management at an early date. Work was resumed by the night shift at 6 p.m., February 10. On February 16 Mr. Fenwick met the elected Committee and representatives of the management. It was settled that the 15-minute rest period would be continued, and a number of grievances were satisfactorily adjusted. The Company asked that the workers form some type of Committee to meet the management from time to time in regard to grievances. The employees agreed to advise the management as to how they intended to select such a Committee and, if any differences of opinion should arise it was intimated that a Department of Labour representative would be prepared to supervise a vote to determine if the workers want to be represented by a Trade Union or by an Employees' Committee.

FOUNDRY WORKERS, WELLAND, ONT.—An allegation that Canadian Foundries and Forgings, Limited, Welland Ontario, was interfering with the organization of its employees into a trade union was received by the Department on February 8, along with a request that an Industrial Disputes Inquiry Commissioner be

appointed to investigate the dismissal of a worker on account of union activity. An investigation by Mr. J. Hutcheon, Provincial Conciliation Officer, Toronto, revealed that union activity did not have any bearing on the Company's action. Later the Company and the U.A.W.-C.I.O. jointly requested that a vote be taken to determine the bargaining agency desired by the employees. The results of the ballot are reported below under "Union Representation Votes".

SHIPYARD WORKERS, LAUZON, P.Q.—A strike of employees of the Davie Shipbuilding and Repairing Company, Limited, Lauzon, P.Q., seemed imminent early in February as a result of resentment towards a proposed schedule of staggered hours worked out by the Associate Transit Controller to relieve serious traffic congestion which was held to be partly responsible for considerable absenteeism and interference with production. On request of the Department Mr. Bernard Rose, K.C., Industrial Disputes Inquiry Commissioner, Montreal, called a conference of Company and Union Officials, the Associate Transit Controller and a representative of Wartime Merchant Shipping, Limited. The employees' representatives maintained that, while the proposals would work to the advantage of shipyard workers residing in Quebec City, St.-Romuald and Levis, they would detrimentally affect the majority of workers who lived in Lauzon. Separate meetings of the workers from Lauzon and the other three points were then arranged at which attempts were made by the Associate Transit Controller and an official of the Canadian Congress of Labour to persuade the employees to accept the changes in hours as essential in order to relieve congestion. The men refused, however, to consent to any change in existing conditions. It was finally agreed not to press the proposed scheme until the conclusion of negotiations for a collective agreement presently being carried on between the Company and the Canadian Union of Boilermakers and Iron Shipbuilders, Local No. 3 (C.C.L.). During the month an extensive investigation into wage rates and employment classifications of the Company was undertaken by Mr. F. LaFortune, Industrial Relations Officer, Ottawa, Ontario.

COAL MINERS, MIDLANDVALE, ALTA.—A threatened strike by 220 employees of the Midland Coal Mining Company, Midlandvale, Alberta, on February 4, was averted by prompt intervention on the part of Mr. F. E. Harrison, Western Representative of the Department of Labour, Vancouver, B.C. The employees gave the Company 24 hours in which to comply with their demands that contract conditions be

observed in connection with wage rates payable where miners "drive through pillar". Mr. Harrison presided at two conferences of Company and Union representatives at which it was agreed that the Company would pay the rates specified in the contract as from February 1, 1943.

ROLLING MILL WORKERS, CALGARY, ALTA.—A dispute arose during February between employees of Calgary Rolling Mill and the Company over the negotiation of an agreement involving recognition of the Rolling Mill Employees' Federal Union, No. 23180 (A.F. of L.) and was satisfactorily settled through mediation by Mr. F. E. Harrison, Western Representative, Department of Labour, Vancouver. There were 110 employees involved. Joint conferences between the parties were arranged by Mr. Harrison and resulted in the signing of a contract on February 24.

COAL MINERS, COALBURN, N.S.—On February 9, the total working force of the Greenwood Mining Company, New Glasgow, N.S., numbering 96, ceased work. The employees are members of the independent Coalburn Miners Union. The strike was precipitated by demands of the miners that the Company agree to alternate the night and day shifts of two employees engaged as haulage engineers. Mr. H. R. Pettigrove, Industrial Relations Officer, Fredericton, N.B., communicated with both parties to the dispute and secured a resumption of work on February 11 pending an investigation. On February 15, Mr. Pettigrove arranged a joint conference at which it was ascertained that the dispute arose after a chain runner joined the army and the Company found it necessary to transfer a haulage engineer to fill his place. Another man became haulage engineer by day, and a 17-year-old chain runner became night haulage engineer. After a month this night man demanded that he be permitted to alternate on the day shift, but the Company refused on the grounds that the day work was much more arduous and required the experience of an older employee. It was finally agreed that the new night haulage engineer would continue night shift work for a period of two months, during which the Company would make other arrangements and then place him on a more suitable job.

COAL MINERS, ALBERTA AND EASTERN BRITISH COLUMBIA.—During the month of February a special survey of labour conditions in the coal mining areas of Alberta and Eastern B.C. was conducted over a period of several weeks by Mr. F. E. Harrison, Western Representative, Department of Labour. His inquiries were directed particularly to conditions obtaining in those mining properties which have signed agreements with District 18, United Mine

Workers of America. The information secured was placed in the hands of the Coal Controller of the Industries Control Board as well as the Minister of Labour and the Director of National Selective Service.

CARPENTERS, PORT ALBERNI, B.C.—On February 15 a group of 139 carpenters employed by Carter-Halls-Aldinger Company, Limited, on a construction project at Port Alberni, B.C., went on strike in an effort to compel one employee who was a member of the Amalgamated Building Workers of Canada to pay dues to the United Brotherhood of Carpenters and Joiners of America. Mr. G. R. Currie, Industrial Relations Officer, Vancouver, communicated with a representative of the United Brotherhood pointing out that the union did not have an agreement covering the Port Alberni project, and that its agreement with the Company through the General Contractors Association of Vancouver did not contain closed shop conditions nor prohibit the employment of members of other unions. Through the Union representative Mr. Currie requested that the striking employees return to work immediately. The Company decided to transfer the employee in question to other employment in order to avoid a controversy, and the carpenters returned to work after a stoppage of a few hours.

SHIPYARD WORKERS, LIVERPOOL, N.S.—Differences between 450 employees, members of five Unions and their employer, Thompson Brothers Machinery Company, Limited, Liverpool, N.S., involving the threat of a strike were amicably adjusted when Mr. H. R. Pettigrove, Industrial Relations Officer, Fredericton, N.B., directed joint conferences with representatives of all parties on February 9 and 10. The Union had been working under unsigned tentative agreements, and demands for Union shop contracts constituted a common factor in each of the disputes. Agreements providing for recognition in each instance of the Union as sole bargaining agent for the employees concerned were consummated between the Company and Local No. 370, International Brotherhood of Boilermakers, Iron Shipbuilders, Welders and Helpers of America and Local No. 392, United Brotherhood of Carpenters and Joiners of America. The Company also undertook to enter into a similar agreement with Local No. 1573 of the International Association of Machinists, but the signing of the contract was delayed pending the approval of an International representative of the Association. With respect to negotiations with Local No. 879, International Brotherhood of Electrical Workers and Local No. 226, United Association of Plumbers and Steamfitters, the Company

contended that these Local unions had not yet reached a degree of organization which would justify it in signing union shop agreements. Further conferences in regard to formal recognition of these local unions were deferred for the time being. The dispute with the Electrical Workers was complicated by objections to a change from eight to nine hours per day proposed by the Company, with time and one-half for overtime beyond eight hours. Mr. Pettigrove arranged that a vote should be taken and that the majority decision would be binding on all employees concerned. The majority of 80 in a total vote of 360 favoured the extension of hours. Classification of certain employees in accordance with a Finding and Direction of the National War Labour Board was a factor in connection with the grievances of the Boilermakers and Carpenters Unions. This matter was adjusted to the satisfaction of all parties.

CONSTRUCTION WORKERS, WINDSOR, N.S.—A dispute between the Fundy Construction Company, Windsor, Nova Scotia, and its employees, dating back to November 24, 1942, and having to do with the refusal of the Company to adjust certain wage rates and agree to recognition of Local No. 1348, United Brotherhood of Carpenters and Joiners of America, came to a head on February 11 when 126 employees threatened to strike four days later unless the Company acceded to their demands. Mr. H. R. Pettigrove, Industrial Relations Officer, Fredericton, N.B., called a joint conference of the parties which averted strike action and resulted in the signing of an agreement on February 17. The agreement provided for recognition of the Union as sole bargaining agent for the employees which it covered, preferential consideration of Union members and, subject to approval by the National War Labour Board, wage rates of 70 cents per hour for carpenters and 80 cents per hour for leading hands.

COAL MINERS, DRUMHELLER, ALTA.—A one-day strike by 175 employees of the Hy-Grade Coal Company, Limited, Drumheller, Alberta, occurred on February 24 when the workers demanded the dismissal of a driver-boss who was alleged to have struck one of the drivers in the course of an altercation. Following intervention by Mr. F. E. Harrison, Western Representative, Department of Labour, the Company transferred the driver-boss to another position and work was resumed.

COAL MINERS, MINTO, N.B.—A strike on February 8 of 12 miners employed by the Minto Coal Company was occasioned by the alleged failure of the Company to furnish a sufficient number of wheelers to keep the

machines in the mine clear. The matter was taken up by the Director of Industrial Relations directly with the Sub-District Board member of the United Mine Workers of America. Negotiations ensued between the Company and Union representatives, as a result of which a rearrangement of the duties of the firm's 12 wheelers, acceptable to the workers, was effected. Work was resumed on February 9. The action of the strikers resulted in the enforced idleness of some 140 other employees.

Union Representation Votes

MUNITIONS INSPECTORS, QUEBEC, P.Q.—By joint consent of the parties, a representation vote was conducted under the supervision of Mr. L. Pepin and Mr. F. LaFortune, Industrial Relations Officers of Montreal and Ottawa respectively, on February 9 and 10, among the employees of the Inspection Board of the United Kingdom and Canada engaged at the Dominion Arsenals in St. Malo and Valcartier, P.Q. The ballot read: "Do you wish to be represented by the International Union of Inspectors of War Supplies of the United Kingdom and Canada, an affiliate of the A.F. of L.?" There were 2,192 employees eligible to vote and the results were as follows: Number of votes cast, 1,767; number voting "Yes", 786; number voting "No", 886; spoiled ballots, 95.

ELECTRICIANS, PICKERING, ONT.—By joint consent, a representation vote was conducted under the supervision of Mr. J. P. Nicol, Industrial Relations Officer, Toronto, on February 17, among employees of the Ajax Plant of Defence Industries, Limited, Pickering, Ontario. The ballot read: "Do you desire Local 874 of the International Brotherhood of Electrical Workers to represent you in dealing with the management of Defence Industries, Limited?" There were 44 eligible to vote and the 40 employees who cast ballots voted unanimously in favour of the Union.

DAIRY WORKERS, WINDSOR, ONT.—Following a request by the Company, a ballot was conducted on February 18, by joint consent of the parties, among employees of the Borden Company, Limited, Walkerside Division, Windsor, Ontario. Out of 94 participating, 64 voted in favour of bargaining collectively with their employer through the Employees-Management Co-operative Plan as against 30 voting in favour of bargaining through the Windsor Milk Drivers and Dairy Workers Union, chartered by the Canadian Congress of Labour.

FOUNDRY WORKERS, WELLAND, ONT.—By joint request made during February, a ballot was conducted on March 1 among employees in two plants of Canadian Foundries and Forgings, Limited, Welland, Ontario. The consolidation of the results of the votes in the two plants was as follows: The number voting in favour of bargaining collectively with the employer through the UAW-CIO was 375 as against 78 in favour of an Independent Shop Committee and 45 voting against any Union or Committee. There were 7 spoiled ballots.

PACKINGHOUSE WORKERS, PETERBORO, ONT.—Following receipt of a joint request, arrangements were made on February 24 and a ballot conducted on March 2 among employees of Canada Packers, Limited, Peterboro, Ontario, by Mr. H. Perkins, Industrial Relations Officer, Toronto. The ballot read as follows: "In your dealings with the management of Canada Packers, Limited, Peterboro, do you prefer to be represented by a Plant Relations Committee or Local 210, United Packinghouse Workers of America?" 45 employees voted for the Plant Relations Committee as against 97 for the Union.

TEXTILE WORKERS, ST. JEROME, P.Q.—On February 23, Mr. L. Pepin, Industrial Relations Officer, Montreal, supervised by joint consent a secret ballot to determine whether the employees of Regent Knitting Mills, Limited, St. Jerome, P.Q., wished to be represented by a negotiating committee of employees or by the United Textile Workers of Canada (T.L.C.C.). Out of a total of 618 eligible, 522 voted in favour of the United Textile Workers of Canada and 49 in favour of an employees' negotiating committee. There were 17 spoiled ballots.

EXPLOSIVES WORKERS, TRANSCONA, MAN.—A vote among employees of Defence Industries, Limited, Transcona Works, was conducted by joint request of the Company and the union, February 16 to 18 under the supervision of Mr. R. H. Hooper, Industrial Relations Officer, Winnipeg, to ascertain whether or not the workers were in favour of having the Winnipeg Powder and High Explosives Workers' Federal Union No. 150 (A.F. of L.) represent them as sole bargaining agency in matters concerning their employment. A total of 2,354 voted out of a total eligible group number 2,546. The result favoured the Union by 1,839 to 486, with 29 spoiled ballots.

AUTOMOTIVE PARTS WORKERS, WINDSOR, ONT.—On December 17 a representation vote was conducted by joint request of the parties, under departmental supervision among the

employees in three plants of the Canadian Motor Lamp Company, Windsor, Ontario, to ascertain if the employees wanted to bargain collectively through a Windsor Local of the UAW-CIO. Subsequently a protest was lodged by the Union against the actions of certain alleged agents of the Company prior to the holding of the ballot. On February 26, officers of the Union withdrew their protest and results of the election were officially released. The consolidated tabulation of votes was as follows:—

Lamp Plant: In favour of the UAW-CIO, 38; against UAW-CIO, 112.

Cartridge Plants: In favour of the UAW-CIO, 144; against UAW-CIO, 456; spoiled ballots, 10.

ABRASIVES WORKERS, BRANTFORD, ONT.—On February 16, Mr. H. Perkins, Industrial Relations Officer, Toronto, on the joint application of the parties, supervised a vote among employees of Canadian Durex Abrasives, Limited, Brantford, Ontario, to determine whether or not they desired to be represented by the UAW-CIO. 80 employees participated in the ballot, of whom 64 voted in favour of the Union and 13 against. There were three spoiled ballots.

Strikes and Lockouts in Canada during February, 1943

WHILE the number of strikes and lockouts reported for the month of February, 1943, was only two less than the previous month, the number of workers involved and the time loss in man working days were both substantially lower. The figures show 32 strikes on record, involving 5,243 workers and a time loss of 24,306 man working days, as compared with 34 strikes in January, with 19,857 workers involved and a time loss of 166,707 days. During February, 1942, there were 16 strikes recorded, involving 2,901 workers, with a time loss of 23,997 days. Two strikes carried over from January, namely, tobacco factory workers at Montreal, P.Q., and glass factory workers at Wallaceburg, Ont., caused about 68 per cent of the time loss during the month under review. The exceptionally large time loss in January was caused by the strikes of steel mill workers in Sault Ste. Marie, Ont., and Sydney and Trenton, N.S.

Five strikes, involving 2,634 workers, were carried over from January and 27 commenced during February. Of these 32 disputes 30 were terminated during the month. Eleven resulted in favour of the workers, seven in favour of the employers, four were compromise settlements, one was partially successful and seven were indefinite in result.

At the end of the month two strikes were recorded as unterminated, namely: glass fac-

tory workers at Wallaceburg, Ont., and metal factory workers at Preston, Ont.

The record does not include minor strikes such as are defined in another paragraph nor does it include strikes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. Such strikes are listed in this paragraph for a period up to one year after removal from the table of current strikes.

The following table gives information for February and January, 1943, and February, 1942:—

Date	Number of strikes	Number of workers involved	Time loss in man working days
*February, 1943.....	32	5,243	24,306
*January, 1943.....	34	19,857	166,707
*February, 1942.....	16	2,901	23,997

* Preliminary figures.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees are not included in the published record unless 10 days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review.

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

STRIKES AND LOCKOUTS IN CANADA DURING FEBRUARY, 1943*

Industry, occupation and locality	Number involved		Time loss in man working days	Particulars†
	Establish- ments	Workers		

(a) Strikes and Lockouts in Progress Prior to February, 1943

MANUFACTURING—				
<i>Tobacco and Liquors—</i>				
Tobacco factory workers, Montreal, P.Q.	1	1,685	8,425	Commenced January 27, 1943; for wage adjustments as provided in agreement; terminated February 6; conciliation (federal and provincial); in favour of workers.
<i>Metal Products—</i>				
Copper refinery workers, Montreal, P.Q.	1	250	500	Commenced January 15, 1943; for increased wages; terminated February 4; conciliation (federal and provincial); partially successful.
Moulders, Sackville, N.B.	1	(a) 43	43	Commenced January 30, 1943; <i>re</i> working conditions; terminated February 1; conciliation (federal); in favour of workers.
<i>Non-Metallic Minerals</i>				
Glass factory workers, Wallaceburg, Ont.	1	(b) 650	8,000	Commenced January 30, 1943; for union recognition and agreement with another union; unternminated.
TRADE—				
Coal truckers, Yorkton, Sask.	1	6	6	Commenced January 30, 1943; for increased tonnage rates; terminated February 1; negotiations; in favour of workers.

(b) Strikes and Lockouts Commencing During February, 1943

LOGGING—				
Teamsters and loaders, Beardmore, Ont.	1	(c) 12	72	Commenced February 2; for increased piece rates; terminated February 8; replacement; in favour of employer.
Skidders, Nipigon, Ont.	1	(f) 20	30	Commenced February 9; for increased piece rates; terminated February 10; negotiations in favour of employer.
Bush labourers, Pine Falls, Man.	1	22	11	Commenced February 16; <i>re</i> meals; terminated February 16; negotiations; in favour of employer.
MINING—				
Coal miners, Aerial, Alta.	1	163	1,950	Commenced February 1; for free carbide for pit lamps; terminated February 13; negotiations; in favour of employer.
Coal miners (wheelers), North Minto, N.B.	1	(d) 12	12	Commenced February 8; for employment of extra wheelers; terminated February 8; negotiations; (change in system of mining to be tried) compromise.
Coal miners, Drumheller, Alta.	1	172	688	Commenced February 8; against failure to serve hot drinks to surfacemen during extremely cold weather; terminated February 11; return of workers; in favour of employer.
Coal miners, Coalburn, N.S.	1	96	135	Commenced February 9; for alternating of night and day shifts of haulage engineers; terminated February 10; conciliation (federal); compromise.
Metal miners, Copper Mountain, B.C.	1	86	86	Commenced February 23; against dismissal of employee; terminated February 23; return of workers pending settlement; indefinite.
Coal miners, Drumheller, Alta.	1	175	175	Commenced February 24; for dismissal of a driver boss; terminated February 24; negotiations; (driver boss resigned) in favour of workers.

Strikes and Lockouts in Great Britain and Other Countries

THE latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month, bringing down to date that given in the May, 1942, issue, in the review of "Strikes and Lockouts in Canada and Other Countries, 1941". The latter included a table summarizing the principal statistics as to strikes and lockouts since 1919, in the various countries for which such figures are available. Statistics given in the annual review and in this article are taken as far as possible from the government publications of the various countries concerned.

Great Britain and Northern Ireland

The British *Ministry of Labour Gazette* publishes statistics dealing with disputes involving stoppages of work and gives some details of the more important ones. An order under the Defence Regulations, effective July 25, 1940, provides for the settlement of disputes and the prevention of strikes and lockouts, as noted in the LABOUR GAZETTE, August, 1940, page 760.

The number of disputes beginning in the year 1942 was 1,281, involving 454,800 workers directly and indirectly, with a total time loss of 1,527,000 working days, as compared with

1,079,000 working days in 1941. Over half the time loss in 1942 occurred in the coal mining industry.

The number of disputes beginning in December was 87, and 7 were still in progress from the previous month, making a total of 94 disputes in progress during the month; 25,300 workers were involved in the disputes in progress during the month and the time loss was 90,000 working days.

Of the 87 disputes beginning in December, 25 arose out of demands for increased wages and 31 over other wage questions; 11 over questions as to employment of particular classes or persons; 18 over other questions as to working arrangements; and 2 were sympathetic strikes. Final settlements were reached in 70 disputes, of which 14 were settled in favour of workers, 35 in favour of employers and 21 resulted in compromises; in 17 other disputes, work was resumed pending negotiations.

United States

The number of strikes beginning in January was 195, involving 90,000 workers in these new strikes. The time loss for all disputes in progress during the month was 450,000 man-working days.

Collective Agreements and Wage Schedules

Recent Collective Agreements

COLLECTIVE agreements received in the Department are outlined in the **LABOUR GAZETTE** from month to month. It is not always possible because of limitation of space to include all agreements received each month. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of the employers and workers are also included. Verbally accepted agreements are so indicated.

Agreements made obligatory under the Collective Agreement Act in Quebec are summarized in a separate article following this.

Manufacturing: Tobacco and Liquors

MONTREAL, QUEBEC.—**W. C. MACDONALD, INCORPORATED, AND THE TOBACCO WORKERS' INTERNATIONAL UNION, LOCAL 235**

Agreement to be in effect from September 29, 1942, to March 31, 1944. (A strike to secure wage adjustments is noted on page 335 of this issue). All employees who are or who later become members of the Union shall remain members for 18 months or until March 31, 1944.

Hours: 10 per day on Tuesday, Wednesday, and Thursday; 9 per day on Monday and Friday, a 48-hour week. Except for watchmen and power plant employees, overtime is payable at time and one-half and all work on Sundays and holidays at double time. Wages: "It is the policy of the Company that its wage scale for similar work under similar conditions shall be at least as high as the wage scale in other tobacco factories in Montreal. . . . The Company agrees to pay and the union agrees to accept the presently existing scale of wage rates during the life of this agreement, including cost-of-living bonus as required by the law from time to time, subject however to such modifications as may be ordered by the Regional War Labour Board upon an application now being made for permission to increase wage rates by five cents per hour."

Provision is also made for one week's vacation to employees with one year's service (subject to the approval of the Regional War Labour Board), seniority rights and for the settlement of disputes.

Manufacturing: Textiles and Clothing

MARYSVILLE, NEW BRUNSWICK.—**CANADIAN COTTONS LIMITED AND THE UNITED TEXTILE WORKERS OF CANADA, LOCAL NO. 16.**

Agreement to be in effect from January 1, 1943, to January 1, 1944, and thereafter from year to year, subject to notice. The Company

recognizes the union as the representative of its membership. All employees who are now members of the union or later become reinstated to good standing in the union shall be expected to maintain such membership during the life of the agreement. New employees must join the union.

Hours (except for tour workers): 9 per day, 5 on Saturdays, a 50-hour week. Overtime is payable at time and one-quarter. Hourly wage rates: for boys and girls, from 18½ cents during first two months to the full rate for the job or a rate in proportion to the work performed after four months. No male employee who is 21 years or over to be paid less than 30 cents per hour. Basic wage rates are to remain as at time the agreement made unless notice of change is given. Provision is also made for seniority rights and for the settlement of disputes.

Manufacturing: Metal Products

LONG BRANCH (TORONTO), ONTARIO.—**WILSON MOTOR BODIES COMPANY LIMITED AND THE INTERNATIONAL UNION, UNITED AUTOMOBILE, AIRCRAFT AND AGRICULTURAL IMPLEMENT WORKERS OF AMERICA, LOCAL 252.**

Agreement reached following the strike reported in the **LABOUR GAZETTE**, February, page 212 and conciliation by an officer of the Department of Labour, as noted on page 327 of this issue. Agreement to be in effect from February 1, 1943, to February 1, 1944, and thereafter from year to year, subject to notice. The Company recognizes the union as the exclusive bargaining agency for the hourly rated employees. Employees are free to join or not to join any union or association. Provision is made for seniority rights and the procedure for the settlement of grievances.

LONG BRANCH (TORONTO), ONTARIO.—**SMALL ARMS LIMITED AND THE UNITED ELECTRICAL, RADIO AND MACHINE WORKERS OF AMERICA, LOCAL 519.**

Agreement to be in effect from February 5, 1943, to February 4, 1944, and thereafter from year to year, subject to notice. The Company recognizes the union.

Hours: standard hours are 8 per day, a 48-hour week, but actual working hours may be changed from time to time by mutual agreement and a 10-hour day, 60-hour week was being worked when the agreement made. Overtime: all time in excess of 8 hours a day, 48 a week, to be paid at time and a half; time and one-half for work on holidays. Wage rates are not to be changed except with the authorization of the National War Labour Board, and both parties agree to confer before either party makes a submission to this Board. An incentive bonus system is in effect. Provision is made for seniority rights and for the settlement of grievances.

OWEN SOUND, ONTARIO.—NORTHERN BOLT, SCREW AND WIRE COMPANY LIMITED AND THE UNITED STEEL WORKERS OF AMERICA.

Agreement reached following strike reported in the *LABOUR GAZETTE*, August, 1942, page 899 and September, page 1012, and conciliation by the Department of Labour. Agreement to be in effect from July 3, 1942, to June 30, 1943, and thereafter subject to notice. The company agrees that all eligible employees become union members and the union agrees that all new employees shall be given a 60-day trial before becoming union members.

Hours: 9 per day, 5 on Saturday, 50-hour week. Overtime is payable at time and one-half. An increase in wages of 5 cents per hour; and a cost-of-living bonus is paid.

CALGARY, ALBERTA.—DOMINION BRIDGE COMPANY, LIMITED, CALGARY ROLLING MILL DEPARTMENT, AND THEIR HOURLY RATED AND THE TURN AND TONNAGE EMPLOYEES OF THE CALGARY ROLLING MILL DEPARTMENT, MEMBERS OF THE FEDERAL UNION, LOCAL 23180.

Agreement reached through conciliation of the Department of Labour, and is to be in effect from February 24, 1943, for the duration of the war, and thereafter, from year to year, subject to 30 days' notice. No discrimination on account of membership or non-membership in any union.

Hours and overtime: for open hearth, 8 per day, 50 per week, with all time in excess of 50 hours payable at time and one-half; for general labour, 9 per day for 5 days and 5 hours on the 6th day; all hours in excess of 50 hours at time and one-half; in the mills, for turn and tonnage men, the system is to start to roll 7 a.m. and finishing charging at 4.15 p.m. for 5 days a week and 7 a.m. to 1.15 p.m. on the sixth day; turn men to receive a full turn for the 6th day's work; work on holidays at double time. Wage rates may only be changed with the authorization of the Regional War Labour Board. The full cost-of-living bonus to be paid. Provision is made for seniority rights and for settlement of disputes.

VANCOUVER, B.C.—PROGRESSIVE ENGINEERING WORKS LIMITED AND THE MOULDERS AND FOUNDRY WORKERS' UNION, LOCAL NO. 1, CANADIAN CONGRESS OF LABOUR.

Agreement reached with the assistance of an Industrial Disputes Inquiry Commissioner, as noted on page 194 of the February issue. Agreement to be in effect from February 1, 1943, to January 31, 1944, and thereafter from year to year, subject to notice. The terms are similar to other agreements made by this local union, as noted in the *LABOUR GAZETTE*, December, 1942, p. 1482.

VANCOUVER, B.C.—CERTAIN FOUNDRIES AND FORGING PLANTS AND THE UNITED STEELWORKERS OF AMERICA, LOCAL 2765 (FORGERS).

Agreement to be in effect from December 4, 1942, in one plant and from January 14, 1943, in the other, both for the duration of the war and wartime contracts. The employers recognize the union as the sole bargaining agency of the employees. (One agreement provides that this recognition be as long as the union holds a majority of the employees.)

Hours: 44 per week; for second shift, a 7½ hour shift with 8 hours' pay; for third shift, 7 hours' work with 8 hours' pay; (8½ hours' pay in one agreement). Overtime is payable at time and one-half for the first four hours and double time thereafter; double time for work on Sundays and holidays.

Hourly wage rates in the first plant: skilled forgers and nut forging machine operators, 25

cents; forging machine operators 80 cents; bolt threaders, forgers' helpers, tapping and burring machine operators, bolt trimmers, pointers, 70 cents; general labourers 65 and 70 cents; head packer 80 cents; packer 70 cents, skilled machinist \$1; machinists' improvers 65 cents; mill-right 80 cents, loaders 75 cents. The cost-of-living bonus at this plant is 60 cents per week with future changes according to regulations of the Dominion Government. The hourly wage rates at the other plant: skilled forgers, 87½ cents; bolt threaders, forgers' helpers, pointers and packer, 60 cents; the cost-of-living bonus is in accordance with the 1941 Order in Council 8253 (amounting to \$4.25 per week when this agreement was made). In the first agreement mentioned, provision is made for seniority rights and the settlement of disputes.

Manufacturing: Non-Metallic Minerals, Chemicals, etc.

JAMES ISLAND, B.C.—A CERTAIN EXPLOSIVES AND CHEMICAL PLANT AND THE CANADIAN CHEMICAL AND EXPLOSIVE WORKERS INDUSTRIAL UNION, FEDERAL UNION NO. 128.

Agreement to be in effect from December 1, 1942, to December 1, 1943, and thereafter from year to year, subject to notice. The Company recognizes the union as the sole bargaining agency for the employees.

Hours: 8 per day, 48 per week. Overtime and all work on each employee's weekly day of rest is payable at time and one-half; work on holidays at time and one-half, unless double time is authorized by the Regional War Labour Board. Hourly wage rates: operators, 65 to 92 cents, varying with department and grade of operator, general helpers 63 to 73 cents; labourers, 60 to 68 cents; Chinese labourer, 50 to 56 cents; machinists 85 to 97 cents; pipefitter and electrician, 72 to 97 cents; welder, 75 to 97 cents. A cost-of-living bonus is paid in accordance with the federal government 1942 Order in Council P.C. 5963. Provision is made for seniority rights and for the settlement of grievances.

Construction: Buildings and Structures

WINDSOR, N.S.—FUNDY CONSTRUCTION COMPANY LIMITED AND UNITED BROTHERHOOD OF CARPENTERS AND JOINERS, LOCAL 1348.

Agreement reached through conciliation by an officer of the Department of Labour. Agreement to be in effect from February 17, 1943, to February 16, 1944. The Union is the sole bargaining agency and union members to have preference of work.

Hours: 8 per day, 48 per week. Hourly wage rate for carpenters, 70 cents, lead carpenters, 80 cents, subject to the approval of the National War Labour Board.

Transportation and Public Utilities: Local and Highway Transportation

VANCOUVER, B.C.—A CERTAIN TRANSFER FIRM AND THE CANADIAN BROTHERHOOD OF RAILWAY EMPLOYEES AND OTHER TRANSPORT WORKERS (TRUCK DRIVERS).

Agreement to be in effect from January 2, 1943, to January 2, 1944, and thereafter from year to year, subject to notice. This agreement is similar to the terms of agreement previously in effect and summarized in the *LABOUR GAZETTE*, February, 1942, p. 232, with the exception of a reduction in weekly hours from 54 to 50 hours.

Collective Agreement Act, Quebec

Recent Proceedings Under the Act

IN Quebec, the Collective Agreement Act provides that where a collective agreement has been entered into by an organization of employees and one or more employers or associations of employers, either side may apply to the provincial Minister of Labour to have the terms of the agreement which concern wages, hours of labour, apprenticeship and certain other conditions made binding throughout the province or within a certain district on all employers and employees in the trade or industry covered by the agreement. Notice of such application is published and thirty days allowed for the filing of objections, after which an Order in Council may be passed granting the application, with or without changes as considered advisable by the Minister. The Order in Council may be amended or revoked in the same manner. Each agreement is administered and enforced by a joint committee of the parties. Further information concerning this legislation is given in the *LABOUR GAZETTE*, January, 1943, page 86. Proceedings under the Act and earlier legislation have been noted in the *LABOUR GAZETTE* monthly since June, 1934.

Recent proceedings under the Act include the extension of an agreement for the sheet metal products manufacturing industry at Montreal, the repeal of the agreement for checkers and coopers (ocean navigation) at Montreal, and the amendment or extension of the period of nine other agreements, all of which are noted below. Requests for the extension of new agreements for the work glove manufacturing industry and the fine glove manufacturing industry, throughout the Province was published in the *Quebec Official Gazette*, February 27. A request for the amendment of the agreement for barbers and hair-dressers at Three Rivers was published in the *Quebec Official Gazette*, February 6; for barbers and hairdressers at St. John and Iberville and at Thetford Mines (Quebec agreement) in the issue of February 20; for bakers at Montreal, in the issue of February 27.

In addition, Orders in Council were published in the *Quebec Official Gazette*, during February, approving or amending the constitution and by-laws of certain parity committees, the levy of assessments by certain other parity committees or amendments to previous Orders in Council in this connection.

Manufacturing: Fur and Leather Products

WORK GLOVE CUTTERS, PROVINCE OF QUEBEC

An Order in Council, dated February 17, and gazetted February 27, extends the term of this agreement (*LABOUR GAZETTE*, March, 1940, p. 282; March, 1941, p. 333, Oct., p. 1314; and Jan., 1943, p. 87) to April 1, 1943.

WORK GLOVE OPERATORS AND BLOCKERS PROVINCE OF QUEBEC

An Order in Council, dated February 17, and gazetted February 27, extends the term of this agreement (*LABOUR GAZETTE*, September, 1940, p. 971; March 1941, p. 333; Oct., p. 1314; January, 1942, p. 110) to April 1, 1943.

FINE GLOVE INDUSTRY, PROVINCE OF QUEBEC

An Order in Council, dated February 17, and gazetted February 27, extends the term of this agreement (*LABOUR GAZETTE*, April, 1941, p. 472; July, p. 854; Oct., p. 1314; Jan., 1942, p. 110) to April 1, 1943.

Manufacturing: Textiles and Clothing

DRESS MANUFACTURING INDUSTRY, PROVINCE OF QUEBEC

An Order in Council, dated February 5, and gazetted February 13, amends the previous Order in Council for this industry (*LABOUR GAZETTE*, Oct., 1940, p. 1075; Nov., p. 1202; March, 1942, p. 353). Overtime work is not permitted after 8 p.m. in shops on a 48-hour week or a 44-hour week of 5 days, and not after 7 p.m. in shops on a 44-hour week of 5½ days. A cost of living bonus is provided for.

Manufacturing: Metal Products

RAILWAY AND TRAMWAY CAR AND BUS MANUFACTURING, MONTREAL

An Order in Council, dated February 12, and gazetted February 20, extends the term of this agreement (*LABOUR GAZETTE*, March, 1940, p. 282; April, p. 390; Jan., 1941, p. 70; April, p. 473; May, p. 593; March, 1942, p. 353) to March 1, 1945.

SHEET METAL PRODUCTS, MONTREAL

An Order in Council, dated February 12, and gazetted February 20, makes obligatory the terms of an agreement between the Builders' Exchange, Inc., of Montreal, acting for certain sheet metal firms and the Sheet Metal Workers' International Association, Local 116.

This agreement applies to the manufacture of sheet metal products, except railroad or aircraft manufacturing companies and except establishments already regulated by a collective agreement under this Act, agreement to be in effect from February 20, 1943, to January 1, 1944. It applies to the Island of Montreal and within 15 miles of it.

Hours: 9 per day, 4 on Saturdays, a 48-hour week. Overtime is payable at time and one-half; double time for work on Sundays and holi-

days. Hourly wage rates: journeymen—sheet metal mechanic 82 cents; welders 70 cents; machinists 70 cents; toolmakers 85 cents; blacksmiths 80 cents; machine operators 65 cents; assemblers and specialists 70 cents; production workers 50 cents; helpers 45 cents; apprentices and boys under 21 to commence at 30 cents with increase of 5 cents each six months; routine inspectors, truck drivers, storekeepers, shipping and receiving 45 cents; female workers 32 to 40 cents. Employees working on night shifts to be paid 5 cents per hour extra. The Regional War Labour Board approved a wage scale with the following maximum hourly wage rates: toolmakers 95 cents; welders, machinists and blacksmiths 90 cents; machine operators 80 cents; production workers and helpers 60 cents; routine inspectors, truck drivers, storekeepers, shipping and receiving 65 cents. A cost of living bonus is provided for. Apprenticeship to be for four years and one apprentice allowed for each two journeymen. Provision is made for the settlement of disputes.

Construction: Buildings and Structures

BUILDING TRADES, HULL

An Order in Council, dated February 12, and gazetted February 20, corrects one of the Orders in Council summarized in the *LABOUR GAZETTE*, February, p. 220 by stipulating that the cost of living bonus of 5 cents per hour is payable only for the normal work week and not for overtime. (Previous Orders in Council for these trades were noted in the *LABOUR GAZETTE*, Sept., 1942, p. 1097 and previous issues as there noted).

Transportation and Public Utilities:

Water Transportation

CHECKERS AND COOPERS (OCEAN NAVIGATION), MONTREAL

An Order in Council, dated February 4, and gazetted February 13, repeals the Order in Council which made this agreement obligatory, and which was summarized in the *LABOUR GAZETTE*, November, 1942, p. 1349.

LONGSHOREMAN (INLAND AND COASTAL NAVIGATION), MONTREAL

An Order in Council, dated February 12, and gazetted February 20, extends the time of this agreement (*LABOUR GAZETTE*, November, 1942, p. 1349, and previous issues as noted therein) to March 31, 1943.

Service: Business and Personal

FUNERAL UNDERTAKERS, MONTREAL

An Order in Council, dated February 17, and gazetted February 20, extends the term of this agreement (*LABOUR GAZETTE*, March, 1942, p. 353, and previous issues as noted therein) to April 22, 1943.

BARBERS AND HAIRDRESSERS, HULL

An Order in Council dated February 19, and gazetted February 27, amends the previous Orders in Council for these trades (*LABOUR GAZETTE*, Oct., 1941, p. 1316; Dec., p. 1573, and Sept., 1942, p. 1098) by shortening by one hour a day (2 hours on Saturday) the hours during which barber shops may be open.

Newfoundland Takes National Registration

THE *Commercial Intelligence Journal*, issued by the Department of Trade and Commerce, in a recent number provided a brief description of the national registration scheme announced by the Commission of the Government in Newfoundland.

Under this registration all persons, male or female, between the ages of 16 and 65 years, except members of the armed forces, were required to register. Persons who were in Newfoundland but were absent from their settlements were registered at their homes by a member of their household.

Unlike the procedure adopted in Canada, Newfoundlanders were not expected to present themselves before a registrar at central points. Instead, deputy registrars secured registration by calling at all the homes in the Island. All persons registering during the registration period waited until a deputy registrar called at their homes, as all cards had to be signed in the presence of the deputy registrar.

Persons not ordinarily resident in Newfoundland, who enter the country during or after the registration period, must within three days attend before a constable or ranger and register. After the registration period, the following persons must attend before a constable or ranger within ten days and

register: (a) persons who attain their sixteenth birthday; (b) persons resident in Newfoundland who return after absence during the registration period, and (c) all persons required to register who have not been registered by December 31, 1942.

After December 31, 1942, persons wishing to leave Newfoundland or to obtain or retain employment must have certificates of registration. Such certificates are issued by deputy registrars upon completion and signing of cards.

The questions asked during the registration were, in general, similar to those used in the Canadian registration. For example, the type of work a person was doing or had done in the past, had to be set forth accurately. Information will be provided as to the extent of manpower available in the country and its distribution throughout the various industries considered essential to the efficient prosecution of the war or the general economic welfare of the country. It was estimated that approximately 200,000 persons in Newfoundland and Labrador would be registered.

It was recognized, also, that the information obtained would be of great value when work of a defence character tapers off and employment must be found for individuals formerly engaged on work of this kind.

War Emergency Training

Statistical Summary for February, 1943, and Review of Progress in 1942

THE total enrolment in all types of projects under the War Emergency Training Program as of February 28 was 20,519 as compared with the previous high point of enrolment of 20,723 on December 1.

A continually smaller number is being enrolled in full-time pre-employment classes. The enrolment in this type of training at the end of February (3,449) is the lowest enrolment shown since the beginning of the program. A peak enrolment of 7,163 was reached in March, 1941. The reduction is due to two causes: (1) a great many companies have reached their peak labour forces and now require only a small number of replacements; (2) there is a greatly reduced number of female applicants for training in spite of the greater opportunities afforded to women trainees.

The number of placements in employment in February (1,558) is the smallest reported since April of 1941. On the other hand, the enrolment of trainees in R.C.A.F. classes is the highest reached by War Emergency Training up to the present, and the same applies to the enrolment of discharged members of the forces undergoing rehabilitation training.

The enrolment in all types of projects for the eleven month period from April 1, 1942, to February 28, 1943, was 103,339 as compared with an enrolment of 57,095 for the corresponding eleven month period in the previous fiscal year.

Training in Industry

The operation of the plant schools continues with successful results. Seventy-six schools have been approved up to the present. Thirteen of these have suspended operations owing to the completion of their training objective, and seven owing to their failure to comply with the conditions required.

The training of supervisors and foremen is still being carried on throughout the country and over 16,000 have completed training in the units of Job Instructor and Job Relations Training. The initial institute of the third unit, Job Methods Training, was held in Toronto on March 29 under the leadership of Mr. Clifton Cox of the Training within Industry Branch, War Manpower Commission, Washington, whose services were loaned by the United States authorities.

Twelve representatives from across the country were trained as institute conductors and they are now instituting similar programs in war industries to train foremen and supervisors in methods of job simplification.

Vocational Training in 1942

The following figures illustrate the growth in 1942 of Canada's War Emergency Training under the Dominion-Provincial Program.

Total enrolment in 1942 was 119,478, of which 23,871 were women. The number of men in training almost doubled, while the number of women was seven times greater than in 1941.

Of the 1942 total, 23,774 were in courses to provide basic training for enlisted R.C.A.F. personnel, either to qualify them as tradesmen or to qualify for entrance to aircrew schools. Of these, 15,316 completed their courses, as compared with 6,334, in 1941.

Full-time industrial classes were attended by 40,353, a gain of 25 per cent over 1941; 30,452 completed their courses and were placed in employment; in 1941 the number was 18,378. More than 40 per cent of the pupils were women, as against 11 per cent in the previous year.

Part-time classes last year served 16,884—eight times the number for the year before.

Two important new developments in the War Emergency Training Program were made during 1942. One was the establishment of plant schools, to give trade instruction within industrial plants; 64 schools of this type were set up, and of the total enrolment of 7,036, students to the number of 4,787 had completed their courses and were engaged at production work by December 31.

The second development involved the setting up of supervision training courses for the instruction of foremen and junior plant supervisors.

Outstanding results were secured by this Supervision Training Division, which aims to help foremen and key employees in war industry. Last year 12,941 were thus helped in classroom lectures and demonstrations to impart their knowledge during working hours to other plant employees.

Soldiers honourably discharged from His Majesty's Forces were enrolled in the Vocational Schools to the number of 875.

Promising boys, sixteen years old and older, and men up to forty-five, who are not qualified to join the Armed Forces are being accepted in the training schools and their transportation and subsistence, as well as tuition, are provided free. Similar opportunity is afforded girls and women within the same age categories.

(1) Trainees in the part-time classes consist largely of Employed Persons who are being given training at the request of Employers in War Production who wish to up-grade their employees.
(2) Includes those graduates who, though actually placed prior to February 1, 1943, were not so reported until after February 1, 1943.
(3) The numbers shown as completed but not reported placed in the province of Quebec (146) includes all unplaced trainees who have completed their courses since the commencement of the War Emergency Training Program in that province.

Meeting of Vocational Training Advisory Council

THE Vocational Training Advisory Council, recently appointed to advise the Minister of Labour upon the operation of trade training and vocational courses throughout Canada, and also upon their assistance to Selective Service and upon rehabilitation of persons discharged from the armed forces held its first meeting in Ottawa on February 22, 23 and 24. (The functions of this Committee, together with its personnel, selected to represent employers, trade unions, war veterans, agriculture, vocational education authorities, and women's organizations, were reviewed in the January issue of the *LABOUR GAZETTE*, page 110).

At the opening session the Minister of Labour, Hon. Humphrey Mitchell, stressed the important part which the Government's trade training plans are playing in building up Canada's rapidly developing wartime economy. The Minister stated that about 200,000 workers have been trained under Government supervision since the beginning of the War Emergency Training Program, and predicted that the emergency vocational training given for immediate war purposes would also be highly serviceable to the workers after the war, by better fitting them to accept skilled employment. The Minister expressed appreciation for the co-operation extended by the Provincial Governments in the Emergency Training Program. "Without their assistance," he said, "it would have been extremely difficult, if not impossible, to have organized the training machinery within such a brief period."

The Chairman of the Council, Dr. G. F. McNally, indicated that the main purpose of the meeting was to take a broad survey and make to the Minister whatever recommendations the Council felt would be helpful in

the administration of the Vocational Training Co-ordination Act.

The Supervisor of Training, Mr. R. F. Thompson, outlined the various types of training at present being carried on, including: (a) training of tradesmen for the armed forces; (b) pre-employment training for war industry in full-time and part-time classes; (c) training in industry through plant schools or part-time classes; (d) training of foremen and supervisors in industry; (e) assistance to certain types of university students; (f) vocational training for members discharged from the armed forces.

No applicants for industrial training are taken into pre-employment schools if they are under 16 years of age or if they come within the age groups liable to be called for compulsory military services, Mr. Thompson said. The expenditures of the training program for the present fiscal year were estimated at \$7,350,000. The average cost (less allowances and equipment) per trainee per day was 99 cents. It was stated that adequate facilities had always been available to meet the demands made on the training program; to supplement the existing vocational schools, special training centres had been opened in many localities.

Appointment of Sub-Committees

The Council appointed four sub-committees which will be regarded as standing committees of the Council, as follows:

Agricultural and Rural Training—E. A. Corbett (Chairman), Miss B. Oxner, Dr. W. V. Longley, N. C. MacKay.

Training for Discharged Persons—F. S. Rutherford (Chairman), Messrs. J. C. Herwig, J. T. E. Gagnon, D. S. Lyons, F. T. Fairey, Mrs. E. D. Hardy.

Apprenticeship and Industrial Training—Dr. Sexton (Chairman), Messrs. A. Begin, E. R. Complin, H. Crombie, N. S. Dowd, D. S. Lyons, J. Pigott.

Assistance to Vocational Schools—Dr. McNally (Chairman), Messrs. Dowd, F. T. Fairey, J. Pigott, F. S. Rutherford, F. H. Sexton.

These four sub-committees, after meeting on the evening of February 23 and the morning of February 24, reported back to the Council. Their reports, which follow, were approved, and the sub-committees were requested to continue their inquiries.

Sub-committee on Assistance to Vocational Schools

In its report this sub-committee made certain recommendations with respect to the sharing of expense of various phases of training between Dominion and Provincial authorities.

Sub-committee on Apprenticeship and Industrial Training

This sub-committee made the following recommendations regarding apprenticeship:—

1. That an attempt be made to secure the passage of apprenticeship acts in those provinces where they do not exist and to secure full activity in the provisions for apprenticeship under existing acts which are not now in full operation. It was the opinion of the Committee that the full benefits of an apprenticeship act would not be secured unless a full-time Director or Supervisor of Apprenticeship is appointed by each Provincial Government to supervise the carrying out of its provisions;

2. That a thorough study be made of apprenticeship programs that are now being carried out in the Dominion and that a further study be made of occupations in general in which apprenticeship is not now practiced with a view to the extension of the number of trades in which apprenticeship programs could be developed for the benefit of both workers and industry;

3. That all efforts should be made to induce young people to enter and continue courses of apprenticeship or vocational training during the period immediately following the cessation of hostilities.

As regards industrial training, the sub-committee recommended the continuance in the post-war period "of industrial training of the same scope and nature as the courses in the War Emergency Training Program and other forms of industrial training."

Sub-committee on Training for Discharged Persons

In approving the procedure to be followed by the Department of Pensions and National

Health and the Department of Labour in providing training for discharged members of the forces, the sub-committee made the following recommendations:

1. The adoption of the proposed procedure for interdepartmental administration.

2. That in co-operation with the provinces the Minister of Labour arrange for the necessary training facilities, using publicly owned centres where such are available and adequate.

3. That definite preference be given members of the forces discharged from the present war in admission to any training centre.

4. That the Minister of Labour approach the Minister of National Defence and the Minister of Munitions and Supply to arrange for the transfer to the Department of Labour after the war of military trade schools and training centres, barracks, parts of industrial plants suitable for use as training centres.

Sub-committee on Agricultural and Rural Trainees

The major recommendations of this sub-committee were:

That short courses, including allowances under the Youth Training Program be organized for the training in farm activities of young women anxious to help in the war effort and at present unemployed, and for older boys and girls in the intermediate and high schools during the summer vacation to fit them for farm work during the harvest season;

That young people from towns and villages be eligible for such courses and that training in rural occupations as well as in agriculture be included;

That, in the post-war period, the setting up of any program of vocational training should make ample provision for training in agriculture and homemaking;

That adequate provision be made for the training of suitable teaching personnel for carrying on the various training programs.

Resolutions of Council

The Council adopted a number of resolutions as follows:

Use of Training Facilities—That use should continue to be made of publicly owned and controlled schools where their facilities are adequate and available, but where such conditions do not exist, use may be made of privately owned schools which are certificated by the Provincial Department of Education.

Student Aid—The Advisory Council approve the procedure under which assistance has been granted to students of proven ability to continue their education at Canadian universities. It recommends that the scheme be continued and it suggests that careful study be given by the council to plans for this form of student assistance on a national scale after the war.

Home Service Training Schools—That Home Service Training Centres be re-established following the cessation of hostilities.

Rehabilitation—Because the effectiveness of post-war training program depends largely upon the efficiency of the instruc-

tional staff, it was recommended that the many skilled teachers, instructors and counsellors from technical, vocational and other schools who are now members of the armed forces be given high priority in the matter of demobilization.

War Emergency Training Conference

FOLLOWING the meeting of the Vocational Training Advisory Council, there was a conference on February 25-26 on War Emergency Training at which were present the Regional Directors of the various provinces together with representatives of National Selective Service, the training sections of the R.C.A.F. and Army, the Department of Pensions and National Health, and the Priorities Branch of the Department of Munitions and Supply.

Dr. G. Fred McNally was appointed Chairman of the Conference. The Minister of Labour addressed the members of the Conference pointing out the growth and development of the program during the past year. He expressed his thanks to the Provincial Governments, the municipalities, the staffs of the Technical Schools, and the Regional Directors, for the co-operation given the Department of Labour in carrying on the program.

Review of the Year

In reviewing the year the Dominion Supervisor pointed out the following main trends:

1. Marked decrease in enrolment in full-time pre-employment classes.
2. Very sharp increase in the number of women enrolled in training.

3. Development of training in industry by means of plant schools, part-time classes and foremanship training.
4. Increased recognition of the program by the R.C.A.F. with the enrolmen in their classes almost double.
5. Greater use of the program by the Navy.
6. Further shrinkage in the enrolment for the Army Tradesmen's Classes and much irregularity in their continuity.
7. The drawing up of a new administrative procedure between National Selective Service and War Emergency Training.
8. Much better working arrangements with the Priorities Branch for obtaining materials and supplies.
9. Continuance of discussions with Department of Pensions and National Health to arrive at procedure to govern relationship between that department and War Emergency Training.

Among the matters discussed by the members of the conference were the following: training allowances; business courses; training in industry; procedure between War Emergency Training and National Selective Service; statistics; labour priorities; R.C.A.F. classes; Army classes; and rehabilitation of discharged persons.

Council for Educational Advance Formed in Britain

The Council for Educational Advance, which is representative of the Trades Union Congress, the Co-operative Union Education Committee, the National Union of Teachers and the Workers' Education Association, was recently established in Great Britain in order that the organizations represented might work together for immediate legislation to provide equality of educational opportunity for all children regardless of their social or economic condition. The chairman is Professor R. H. Tawney. The London Times Educational Supplement states that "the formation of the Council, representing millions of organized workers and co-operators, the teaching pro-

fession and the wide range of bodies affiliated to the W.E.A., is . . . striking evidence of the extent of public interest in educational reform".

The Council's program includes the following points: the raising of the school-leaving age to 15 without exemption by the end of the war, and to 16 not more than three years later; day continuation classes for youths between 16 and 18; prohibition of employment below the school-leaving age, and its control by the education authorities up to the age of 18; free medical services and school meals; and maintenance allowances for children in all post-primary schools.

Activities of the Unemployment Insurance Commission

PROVISION has been made to credit men and women discharged from any of the armed forces of Canada with contributions to the Unemployment Insurance Fund for the period that they were on active service subsequent to July 1, 1941. It is necessary, however, that the discharged person should have completed fifteen weeks in insurable employment within any period of twelve months following discharge. Authority for this action was given in P.C. 7633, October 1, 1941, better known as the "Post Discharge Re-Establishment Order."

This Order in Council was supplemented by P.C. 2602 of April 1, 1942, so as to include: "(1) the Canadian Women's Army Corps, (2) the Royal Canadian Air Force (Women's Division), (3) the Naval, Military or Air Forces of His Majesty other than His Majesty's Canadian forces, provided that with respect to this class that such persons were domiciled in Canada at the time of their enlistment therein in the present war."

Order in Council P.C. 56/6755 of July 1, 1942, authorized the formation of the Women's Royal Canadian Naval Service and provided among other things for the application of the terms of P.C. 2602 to that service.

Local employment offices have been instructed to submit to their respective regional and district offices of the Unemployment Insurance Commission the relevant information respecting ex-service men and women. The latter offices will compute the amount of credit due in all cases of discharged persons who have become established in insurable employment after leaving the forces. The funds necessary for the creation of these credits will be provided by the Department of Pensions and National Health. The additional contributions thus made on behalf of ex-members of the armed forces will place them in the same position as if they had remained in insurable employment and not enlisted at all.

Insurance Coverage for Miners Amended

Section 30 of the contribution regulations under the Unemployment Insurance Act, 1940 (passed by Order in Council P.C. 656 and effective from February 16, 1943), provides that

all persons employed in a mine are insurable, regardless of earnings, unless they are paid a fixed salary which exceeds \$2,000 a year. The regulation applies to persons engaged in actual mining operations, whether underground or surface.

The experience gained during the first fifteen months of collecting contributions indicated that an anomalous situation existed regarding the coverage of miners. Many of them earn approximately \$2,000 a year, but earnings fluctuate considerably, resulting in some miners being not insurable for a period and then insurable. This movement in and out of insurable employment was unsatisfactory from the men's viewpoint as they were building up a record of contributions covering only part of their period of employment, with consequent reduction in the duration of potential benefit.

After consultation with mining associations throughout the country the Commission passed a regulation under Section 14 of the Act. This section gives the Commission power to take remedial action where an anomalous situation exists in that one class of persons is insurable, whereas another performing similar work under the same terms and conditions is excepted.

Insurance Registration

Reports from local offices of the Unemployment Insurance Commission showed that at March 1, 1943, 166,674 employers establishments and 3,643,361 persons were registered. Of the persons registered, 2,890,679 were insurable and 752,682 were uninsurable.

The insurable group consisted of insurable employees of registered firms and unemployed persons whose last employment was insurable. The other group of persons registered included employees of registered firms not coming within the coverage of the Act, and partners and proprietors of these firms. Also forming a part of this group were persons unemployed at date of registration whose last employment was uninsurable and women between the ages of twenty and twenty-four not engaged in insurable employment at the time of the recent registration.

Claims for Benefit

The amount paid in claims for unemployment insurance benefit during the period from February 1, 1942, to January 31, 1943, was \$419,507.76. In this period 28,280 claims were received for adjudication at the nine offices of the Commission, of which 21,015 claims were allowed, 5,677 claims were not allowed, with 1,588 claims pending.

An analysis of the 5,677 claims not allowed by insurance officers reveals the following reasons for non-allowance: 2,016 claims under Section 28 (i) with insufficient contributions; 177 claims under Section 28 (ii) in which 119 applications were not made in the prescribed manner, and 58 of the claimants were not

unemployed; 116 claims under Section 28 (iii) in which 76 claimants were not capable of work and 40 were not available for work; 53 claims under Section 43 (a) for loss of work due to labour dispute; 42 claims under Section 43 (b) (i) for refusal of an offer of work; 42 claims under Section 43 (b) (ii) for neglect of opportunity to work; 1 claim under Section 43 (b) (iii) for failure to carry out written directions; 3,192 claims under Section 43 (c) in which 635 were discharged due to their own misconduct and 2,557 were disqualified for voluntarily leaving without just cause; 6 under Section 43 (d) for being under 16 years of age; 2 under Section 43 (e) for being inmates of prisons, etc.; 30 under Section 43 (f) for being in class "O" contributions.

Appeals and References

During the period from February 1, 1942, to January 31, 1943, there were 468 references and 37 appeals made by claimants, to Courts of Referees. In addition, there were 20 refer-

ences by insurance officers to Courts of Referees. Of the 525 references and appeals, 419 were heard, 59 have not yet been heard, and 47 were withdrawn. The Courts of Referees disallowed 331 claims and allowed 88.

Appeals to Umpire

Six claimants have sought permission from the Chairman of the Courts of Referees to appeal to the Umpire under Section 58 (c) (ii). Four requests to appeal were refused

and 1 was granted. In addition, one other appeal was made by a claimant or association on behalf of the claimant. Of the two appeals reaching the Umpire, 1 has been heard and disallowed and the other has not yet been heard.

The interest column represents the interest received on the due dates of the various Government bonds and includes accrued interest at the time of purchase. This figure does not include the accrued interest earned to January 31st.

Employment and Unemployment

Summary

IN the Employment and Unemployment section of the *LABOUR GAZETTE*, information regarding the employment situation in Canada is based upon reports from the following sources:

The employment situation at the beginning of January, as reported by employers.—The Dominion Bureau of Statistics receives each month reports from firms employing fifteen or more employees. These firms represent practically all industries except agriculture, fishing, hunting and highly specialized business operations.

The Bureau has been receiving these reports for many years; hence, although the figures given show considerably less than the total number of persons employed in Canada, they give a valid picture of the *trend* of employment in Canada over a period of years.

This month's article shows a decrease in employment at the beginning of January, 1943. This decrease was in conformity with the downward movement which invariably occurs at the opening of the year. Although it involved the release of a considerable number of workers, the losses in general were smaller than at that date in any earlier winter in the record of 23 years. The 13,415 establishments furnishing information to the Dominion Bureau of Statistics reported a personnel of 1,839,754. As compared with their staff of 1,867,843 at December 1, there was a reduction of 28,089 employees, or 1.5 per cent. The crude index number of employment (based on the 1926 average as 100), declined from its all-time high of 186.5 in the last report, to 183.7 at the date under review. This compared with 165.8 at January 1, 1942. At the outbreak of war, the index stood at 119.6.

The same employers also submit each month information regarding payrolls, which is incorporated in this article.

The per capita average wage in the Canadian industries submitting returns fell from \$30.06 a week in the last report to \$27.91 at January 1, 1943, a result of shorter working weeks due to the two holidays at Christmas and New Year's. The figure for January 1, 1942, had been \$26.13.

Employment conditions at the end of February as reported by Employment and

Selective Service Offices.—Reports from the Employment and Selective Service Offices of the Unemployment Insurance Commission give a brief survey of the employment situation at the end of February. These reports describe employment conditions in the Maritimes, Quebec, Ontario, the Prairie Provinces, and British Columbia. This article, and the one following, were formerly included in the article, *Activities of the Unemployment Insurance Commission*.

Applications for employment, vacancies and placements, January.—From the Employment and Selective Service Offices of the Unemployment Insurance Commission come reports showing the number of positions reported as vacant across the Dominion, together with the number of applications for employment and the number of placements effected.

During the four-week period, January 1 to 28, reports from the Employment and Selective Service Offices showed increases from December, 1942, and also from January a year ago in the average number of placements recorded daily. All industrial groups, except trade and logging indicated additions over the previous month's total, the largest being in manufacturing and services. As compared with January a year ago, all divisions showed gains, the most exceptional being in manufacturing, with outstanding advances in services, construction, trade and transportation. The marked increase over last year was due to National Selective Service Regulations under which employers seeking workers, and persons desiring employment, must notify Employment and Selective Service Offices. Vacancies during the first four weeks in January, 1943, numbered 200,122. There were 212,849 applications for employment, and 138,351 placements were effected in regular and casual employment.

Unemployment in Trade Unions.—The Department of Labour receives reports from the local trade unions throughout Canada, showing the number of their members who were unemployed during the period under review.

At the beginning of February, 1943, the percentage of unemployment among trade union members stood at 1.5 in comparison with 1.2 per cent in January and 4.3 per

cent in February a year ago. The February percentage was based on returns compiled from 2,276 labour organizations with a total membership of 403,331 persons.

It should be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

Unemployment Insurance Registration.—The registration figures of the Unemployment Insurance Commission provide further data in regard to the employment situation in Canada.

During the 1942 registration conducted by the Commission, employers with insured persons in their employ registered their insured and non-insured employees. This nation-wide manpower inventory covered a large portion

of Canadian wage-earners, but it did not for the most part include employees engaged in employment in agriculture, horticulture, forestry, logging, lumbering, hunting and trapping and a number of other excepted occupations.

The number of persons registered during the period April 1, 1942, to March 1, 1943, was 3,643,361 (see page 350). However, the total of persons registered during this period is greater than the number of persons in registered employment at any one date. For instance, some of the registered persons may subsequently have joined the armed forces, or left their registered employment for other reasons.

Nevertheless, taking into consideration the occupations not covered in the registration, it may be assumed that the figure represents at least a minimum approximation of the number of persons employed in Canada.

The Employment Situation at the Beginning of January, 1943, as Reported by Employers

IN conformity with the invariably downward movement at the opening of the year, industrial employment showed a contraction at January 1, 1943; although this involved the release of a considerable number of workers, the losses in general were smaller than at that date in any earlier winter in the record of 23 years. The 13,415 establishments furnishing information to the Dominion Bureau of Statistics reported a personnel of 1,839,754. As compared with their staff of 1,867,843 at December 1, there was a reduction of 28,089 employees, or 1.5 per cent. The crude index number of employment (1926=100), declined from its all-time high of 186.5 in the last report, to 183.7 at the date under review, as compared with 165.8 at January 1, 1942. Since the curtailment was below normal in extent, the seasonally-adjusted index showed a gain, rising from the previous maximum of 182.1 at December 1, to 190.9 at the beginning of January.

This winter's celebration of the Christmas and New Year's holidays on a Friday resulted in the closing of many businesses for a lengthier period than is usually the case when the anniversaries fall earlier in the week. This prolongation of the holiday season was reflected in a considerable decline in the reported weekly payrolls. These aggregated \$51,349,119, as compared with \$56,147,178 paid on or about December 1. The reduction amounted to 8.6 per cent; that indicated at January 1, 1942, was 6.1 per cent. The per capita weekly average fell from \$30.06 in the last report, to \$27.91 at the beginning of

January. The average at the same date of last year had been \$26.13.

In the 12 months' comparison, the index of employment has shown a gain of 10.8 per cent; despite the substantial decline in salaries and wages at January 1, 1943, the payroll index has risen by 17.5 per cent since the beginning of January, 1942.

Mining, logging and trade afforded more employment at the date under review; the improvement in trade was seasonal, while that in the other two groups was contrary to the usual trend at the time of year. The remaining industrial divisions—manufacturing, communications, transportation, construction and maintenance and services—showed seasonal curtailment, which in most cases was below average in extent. The largest decline took place in construction, from which 24,225 persons were released by the co-operating employers.

The reporting manufacturing establishments laid off 11,333 men and women, a loss of one per cent, which was the smallest percentage reduction at January 1 in the period since 1920. Tobacco, iron and steel, non-ferrous metal and miscellaneous manufactured products afforded more employment, but other divisions showed reduced activity. The greatest contractions in employment were in textile, food, lumber, pulp and paper and chemical plants. In general, the declines in the various industries were less-than-usual for the time of year, and employment in many cases was above its level at January 1, 1942.

Payrolls

Including the data received from financial institutions, the latest survey shows that the number of persons in recorded employment was 1,903,419, as compared with 1,931,819 at the beginning of December. The amounts received as weekly payrolls by these persons were stated as \$53,303,054 paid on or about January 1, and \$58,122,936 paid on or about December 1. The per capita average for the nine main industries, including finance, was \$28.00, as compared with \$30.08 at the beginning of December, and \$26.27 at January 1, 1942.

Table I summarizes the latest statistics of employment and payrolls for the leading industrial groups, the provinces and economic areas and the eight leading industrial cities, and gives comparisons as at December 1 and January 1, 1942.

The index numbers of payrolls are based on the amounts disbursed by the co-operating firms at June 1, 1941, as 100. To facilitate comparisons of the trends of employment and payrolls, the indexes of employment have been converted from their original base, 1926=100, to June 1, 1941, as 100. The report shows that in the period for which data are

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

available, there has been an increase of 20 per cent in the number of persons in recorded employment in the eight leading industrial groups, while the aggregate weekly earnings of these persons are higher by 32 per cent. Including finance, the gain in employment from June 1, 1941, to January 1, 1943, amounted to 19.5 per cent, and that in payrolls, to 31.2 per cent.

Between January 1, 1942, and January 1, 1943, there has been an increase in employment in the eight industries, amounting to 10.8 per cent, accompanied by that of 17.5 per cent in the weekly payrolls. The explanation previously given for the much greater rise in the latter than in employment may again be stated: (1) the growing concentration of workers in the heavy manufacturing industries, where rates of pay are above the average and, in addition, there is a considerable amount of overtime work; (2) the extension of the system of paying a cost-of-living bonus to the majority of workers; the rates at which this allowance has been calculated have been enlarged on more than one occasion since its institution; (3) the progressive upgrading of employees as they gain experience in their work. In certain cases, higher wage-rates have also been awarded. In spite of these main factors reacting favourably upon the earnings of the typical worker, the average weekly pay envelope, as a result of the continued dilution of labour, has not

shown advances commensurate with those in the index of aggregate payrolls. Where the latter has risen to 32 per cent from June 1, 1941, the index of per capita earnings, despite the falling-off resulting from the shut-down over the holidays, has increased by 10.5 per cent since June 1, 1941.

For obvious reasons, the growth in employment and payrolls in manufacturing in the period of observation has greatly exceeded that in the non-manufacturing industries; where the index of employment in the former has risen by 30.7 per cent from June 1, 1941, that of payrolls has advanced by 42.9 per cent. The factors given above as influencing the all-industries' trends operate with greater force in the case of the manufacturing group.

Even more noteworthy than the expansion in the number of workers and the payrolls in manufacturing as a whole in recent months, is that which has taken place in plants producing durable goods, in which the index of employment has risen by 47.4 per cent, and that of payrolls by 59.3 per cent from June 1, 1941, to January 1, 1943. Despite considerable curtailment in the non-durable goods division, the index number of employment in this group was 16.2 per cent above that indicated at June 1, 1941, while the increases in the payrolls amounted to 23.3 per cent.

In regard to the marked variations shown in the average earnings of workers in the different industrial classes, it must be borne

in mind that the sex distribution of such persons is an important factor, frequently associated with variations in the age groups. In general, the female workers tend to belong to the younger age classes, in which the earnings are naturally lower than among those of greater experience. The matter of short-time or over-time may also considerably influence the reported aggregates and averages.

Employment and Payrolls by Industries

Manufacturing.—In accordance with the invariable custom at the beginning of January in this record of 23 years, there was a slackening of activity in manufacturing

establishments at the date under review; the loss was rather larger than that which took place at January 1, 1942, but was otherwise the smallest ever indicated at that date. The 7,510 factories co-operating in the latest survey reported a staff of 1,144,351 men and women, whose weekly salaries and wages, paid at January 1 for services rendered in the last week in December, amounted to \$32,148,395; at December 1, these employers reported a personnel of 1,155,684, and disbursed the sum of \$36,026,395 in weekly payrolls. The per capita average declined from \$31.17 paid on or about December 1, 1942, to \$28.09 at the date under review. At January 1, 1942, the earnings had averaged \$26.32. The falling-off in the wage-payments at Jan-

uary 1, 1943, was greater than at the same date in the year preceding; this was largely due to the fact that, with the Christmas and New Year holidays falling on Friday, many establishments suspended operations from Wednesday or Thursday until Monday, rather than closing only over the holiday.

Reflecting the reduction of 11,333 employees, or one per cent, at January 1, 1943, the index of employment in manufacturing declined from 221.7 in the preceding report, to 219.6 at the date under review; this was the maximum for January. The latest figure was 17.4 per cent higher than that of 187.1 at January 1, 1942; the increase in the payrolls in the year was 24.7 per cent. The greater growth in the wages distributed by the co-operating establishments in the twelve months is dealt with briefly in a subsequent paragraph.

Increased employment was indicated at the beginning of January in iron and steel, tobacco, non-ferrous metal, miscellaneous non-metallic mineral and miscellaneous manufactured products. The trend in the remaining manufacturing divisions was seasonally downward. The greatest curtailment was in tex-

tile, food, lumber, chemical and leather plants, while there were smaller losses in rubber, beverage, electrical apparatus and clay, glass and stone factories. In most cases, the reductions were rather less than average at the opening of January in the experience of the years since 1920.

Based on the weekly salaries and wages disbursed by the reporting employers at June 1, 1941, as 100, the index number of payrolls at January 1, 1943, was 142.9, as compared with 160.1 at the beginning of December, and 114.6 at January 1, 1942. There was thus an increase of 24.7 per cent in the reported payrolls during the 12 months, which accompanied that of 17.4 per cent in the index number of employment. The difference between these two percentages is less than in any recently preceding period of observation; this is explained by the fact that the decline in employment at January 1, 1943, was smaller than that recorded at the same date in 1942, whereas the reduction in the payrolls was greater. The latter, in turn, was due to a considerable extent to the lengthier suspension of operations in many plants over this winter's holiday season, in which Christ-

NOTE.—The relative weight, as given just above, shows the proportion of employees in the indicated area, to the total number of all employees reported in Canada by the firms making returns at the date under review.

mas and New Year's day fell on Friday, rather than on Thursday, as in last winter. The explanation previously given for the disparity in the rates of increase in employment and payrolls may again be stated:—(1) the growing concentration of workers in the more highly-paid heavy industries, together with important amounts of overtime work in these

classes, and (2) the general practice of paying a bonus to meet the increase in the cost of living, under the terms of P.C. 8253 of October 24, 1941. The cost-of-living bonus has shown increases since its institution. The upgrading of workers has also contributed to the greater expansion in the reported payrolls, a factor of increasing importance, which

TABLE IV—INDEX NUMBERS OF EMPLOYMENT BY INDUSTRIES (AVERAGE 1926=100)

Industries	¹ Relative Weight	Jan. 1 1943	Dec. 1 1942	Jan. 1 1942
Manufacturing	62.2	219.6	221.7	187.1
Animal products—edible.....	1.9	178.5	182.4	167.4

¹The relative weight shows the proportion of employees reported in the indicated industry to the total number of employees reported in Canada by the firms making returns at the date under review.

†Revised.

is tending to counteract the effect of the large-scale dilution of labour resulting from the existing stringency.

The extent to which the changing industrial distribution of factory workers has contributed to the relatively larger growth in payrolls than in employment is emphasized by a comparison of the figures for the durable and the non-durable goods groups. Thus, the payroll index in the former at January 1 was 35.9 per cent higher than at January 1, 1942, while that in the non-durable goods division was 11.9 per cent higher; over the same period, the index of employment in the durable goods has risen by 29.2 per cent, while that in the non-durable classes has gained by only 6.2 per cent.

In the period in which statistics of payrolls have been collected, there have been particularly great increases in the amounts disbursed in the chemical, iron and steel, non-ferrous metal, miscellaneous manufactured products, electrical apparatus and beverage industries. The advances in these industries have been associated with important though relatively smaller gains in employment. In practically every case, and notably in the industries just mentioned, the per capita averages in the various branches of manufacturing were substantially higher at January 1, 1943, than at the same date of 1942.

In comparing the figures of per capita averages in the various industries, it must be borne in mind that many factors contribute to the existing differences. Important among these is the sex distribution of workers in the various industries; with this factor is associated that of age, the women workers, in general, tending to belong in the younger age groups, where earnings normally are less than among more experienced employees. The presence or absence of overtime work also affects substantially the per capita average earnings.

Logging.—There were further important additions to the working forces of logging camps. This gain was at variance with the downward movement usually indicated at January 1. Statistics were tabulated from 483 employers with a staff of 74,416, as compared with 70,067 at December 1. The index of employment, at 250.8, was lower than at January 1 in 1941 or 1942, but was otherwise the highest for that date in the record. As compared with 258.6 at January 1, 1942, there was a decline of three per cent in the index of employment; this was accompanied by a rise of 16.6 per cent in the index of payrolls over the 12 months. The salaries and wages reported at the latest date amounted to \$1,590,090, as compared with \$1,476,110 in the preceding report.

The per capita average earnings advanced from \$21.07 at December 1, 1942, to \$21.37 at the date under review; the increase largely results from greater regularity of employment. The January 1, 1942, average had been \$17.76. It must be noted that the figures of aggregate and per capita earnings in logging do not include the value of board and lodging, frequently a part of the remuneration of workers engaged in bush operations. The high labour turnover in many camps is also an important factor in lowering the reported earnings.

Mining.—Improvement was recorded in the extraction of coal and metallic ores, but there was a seasonal decline in quarrying and in other non-metallic mineral mining at January 1. Returns were received from 433 operators with a combined working force of 75,928 persons; this exceeded their December 1 staffs by 157. The latest index in the mining group stood at 162.4, as compared with the revised figure of 162.0 in the month before, and 177.8 at January 1, 1942. The falling-off in the latter comparison was accompanied by a decrease of 7.7 per cent in the index of payrolls. The salaries and wages disbursed at the date under review amounted to \$2,505,198; this was \$209,675 less than the sums distributed by the same employers in the preceding period of observation. Suspension of work over the holidays was chiefly responsible for the lowered earnings. The per capita figure declined from \$35.83 at December 1 to \$32.99 at January 1, as compared with \$32.16 at January 1, 1942.

Communications.—Employment in communications was moderately reduced at the beginning of January, when a staff of 27,575 was reported by the co-operating employers, whose employees at December 1 had numbered 27,775. The loss was rather below normal for the season. The salaries and wages paid at the date under review aggregated \$820,331, as compared with \$815,242 in the preceding report. The per capita average advanced from \$29.35 at December 1, to \$29.75 at the first of January, as compared with \$28.08 at January 1, 1942. The index of employment at the date under review stood at 103.2, slightly higher than that of 100.8 at the beginning of January of last year. The rise in the payroll index over the 12 months was 8.6 per cent.

Transportation.—Seasonal curtailment was noted in transportation at the beginning of January, the 568 co-operating firms and branches having a staff of 135,886, as compared with 137,992 in their last report. Steam railway and local transportation were rather busier, but there was a decline in shipping

and stevedoring. The general loss was less-than-average in the experience of past years. The index was 107.8; this was slightly lower than that of 109.4 in the preceding month, but was 6.6 per cent higher than the January 1, 1942, figure of 101.1.

The payrolls aggregated \$4,904,617, averaging \$36.09 per employee. At December 1, 1942, the sum of \$4,881,158 was disbursed by the same employers, a per capita average of \$35.37. The average at January 1, 1942, had been \$35.52. The index of payrolls at the latest date was 8.4 per cent higher than that at the same date of last year.

Construction and Maintenance.—There were important losses in construction at the first of January, but the percentage decline was below normal. The greatest reduction was in work on the highways, although building and railway construction and maintenance were also slacker. The 1,533 contractors furnishing information reported a personnel of 166,552, 24,225 fewer than at December 1. The weekly salaries and wages paid by these employers totalled \$4,480,270, as compared with \$5,391,881 in the last report. The per capita average declined from \$28.25 at December 1, 1942, to \$26.88 at the beginning of January. The January 1, 1942, figure had been \$23.67.

The latest index of employment in construction was 132.1; this was 5.9 per cent higher than that of 124.7 indicated at the same date of 1942. The accompanying gain in the payroll index was 16.9 per cent.

Services.—The trend in services continued seasonally downward, according to data received from 613 establishments, whose working forces totalled 40,217, as compared with 40,548 at the beginning of December. Most of the loss took place in laundries and dry-cleaning plants. The contraction was of about average proportions for the time of year. The payrolls reported at January 1 aggregated \$727,676, compared with \$739,744 in the preceding period of observation.

During the last 12 months, employment has shown an increase of 7.4 per cent, while the

index of payrolls has risen by 15.9 per cent. The per capita averages were \$18.09 at January 1 and \$18.24 at December 1, 1942, as compared with the January 1, 1942, figure of \$16.73. Attention must again be drawn to the fact that in hotels and restaurants, as in logging, many of those employed receive board and lodging as part of their remuneration; the former division constituted some 61 per cent of the total reported in the service division as a whole at the beginning of December.

Trade.—Seasonal activity on a large scale was indicated in trade at January 1, when the general expansion exceeded the average, based on the experience of past years. Statistics were tabulated from 2,214 retailers and wholesalers employing a personnel of 174,729 men and women, as compared with 169,129 at the beginning of December. The salaries and wages distributed by these firms amounted to \$4,172,542, as compared with \$4,101,775 at December 1. This percentage gain was not equal to that in the number of employees, with the result that the per capita average slightly declined, standing at \$23.88, as compared with \$24.25 in the preceding report; the January 1, 1942, figure had been \$22.96.

The latest index number of employment in trade was 169.9, slightly lower than that of 172.4 at the opening of 1942. The decline of 1.5 per cent in this comparison, however, was accompanied by a gain of 2.2 per cent in the index of payrolls.

Financial Institutions.—Statistics were received from 753 financial institutions, with a combined staff of 63,665, as against 63,976 at December 1. The weekly payrolls reported at the date under review amounted to \$1,953,935, as compared with \$1,975,758 paid on or about December 1. The per capita average was \$30.69, as compared with \$30.88 in the last report, and \$29.86 at January 1, 1942. The index of employment in financial institutions, at 123.3, was higher by 1.6 per cent than at January 1, 1942, while the index number of payrolls was higher by 4.5 per cent.

Employment Conditions at the End of February as Reported by Employment and Selective Service Offices

REPORTS from Employment and Selective Service Offices of the Unemployment Insurance Commission indicate that employment conditions in Canada at the end of February were as follows:

MARITIME PROVINCES

Considerable concern was in evidence in Prince Edward Island with respect to the farm

labour problem. A three-day conference of the Island Branch of the Canadian Federation of Farmers was held late in February, but no solution was offered for meeting the prospective acute shortage of farm workers. In the other Maritime Provinces the problem did not appear to be so urgent and in a few instances farmers and fishermen were being granted

permits to work in the woods. At other points, dairy farm workers were wanted and were difficult to find.

The fishing industry was quiet. Better weather permitted greater activity, at some points, and fish handlers and cutters were in some demand. Preparations were under way for the lobster season.

Work in the woods was well advanced in many portions of the Maritimes, and in such areas some men were being laid off, many of them to return to farms. At other places there was a decided shortage of workers, especially choppers, loaders, and pulpwood cutters. Mild weather was holding up operations at a few centres.

Although production was improving there was a dearth of experienced miners in both the coal and salt mines, and absenteeism was reported to be reducing production in a few mines. Consideration was being given to obtaining skilled miners on leave from the Armed Forces and experienced datal men were being employed in some instances. Operations in one large mine were greatly curtailed owing to the difficulty of getting repairs for machinery.

Most Maritime industries were active. Dehydration of vegetables and potatoes was getting under way at a number of places. Some of the pulp and paper mills were handicapped by lack of water. Saw mills were having a good season, although more labourers were wanted in a number of places. One important wood-working plant was closed temporarily because of lack of material. Aircraft repair plants were busy, but required detail fitters. Textile mills were busy on war orders, a few plants operating 24 hours a day. Some cotton mills required female workers. Foundries and munition plants were working full time. Rolling mills were being held up somewhat by lack of materials and were transferring their workers to other portions of their plants. There was a steady demand for skilled workers in the iron and steel industries. For the most part, however, sufficient semi-skilled workers and labourers were available as required.

Very little construction work was being undertaken on Prince Edward Island, and construction workers there were being sent to Nova Scotia and New Brunswick. Scarcity of building materials was retarding construction operations at some points. Work on defence projects was proceeding fairly well according to schedule. On the whole there was a surplus of carpenters, many of whom were unwilling to be transferred to centres where there were shortages. Railway, boat and bus companies were very busy. There

was a steady demand for all types of railway workers and freight handlers at Halifax and truck drivers were required at a number of centres. Wholesale and retail trade was reported to be fair and sufficient help was available. Female clerks, typists and stenographers were wanted and the demand for domestic help for institutions and private homes exceeds the supply.

QUEBEC

Agricultural operations were showing signs of increasing activity in several communities in Quebec. Although the number of inquiries for farm workers was comparatively small, there were indications that there would be a shortage as the spring season approached. Many of the farm workers who had been employed in the bush during the winter were commencing to return to the farms. Some farmers were reported to be reducing their herds because of lack of experienced help.

In spite of the lateness of the season, there was a continued demand for men to work in the woods, the most acute being in the Gaspé area, where several hundred workers were urgently needed. Heavy snow in the woods was continuing to retard operations and some bush camps were winding up their seasons operations.

Many workers were needed for the asbestos mines in the Eastern Townships, and miners were needed at Lachute and in the gold areas. To meet a shortage of labour in the textile and leather goods industries, some employers were using men part time on shifts. Labour requirements of manufacturers of aircraft were being fairly well supplied but skilled men in practically all trades were needed in a few of the larger centres. Plants engaged in the manufacture of war materials were employing any available surpluses of machinists, tool setters, and allied craftsmen. Foundry moulders were in demand and were difficult to obtain. Shipyards needed marine engine fitters but few were available. Clearance was being used freely to correct any inequalities in the industrial labour market.

Building construction was relatively quiet throughout Quebec. There was some local demand for spray painters, electricians, carpenters and labourers, but for the most part there were plenty of workers in the building trades and some labourers were being transferred out of the Province. However, many men and women were insisting on remaining in their home communities. Road construction was being held up because of bad weather. Traffic on railways was quite heavy.

Draughtsmen and junior chemists were required in one or two of the larger centres.

The demand for stenographers, especially bilingual, greatly exceeded the available supply. Cooks, porters, waitresses, and other hotel and restaurant help were being sought after in several centres and the supply of experienced domestics was quite inadequate.

ONTARIO

Farmers in widely separated portions of Old Ontario were showing increasing concern with regard to the labour supply for the spring and summer months. The number of inquiries for workers was increasing considerably and the supply was already inadequate. Some relief was expected when farm workers were released from temporary employment in industry. Conferences of officials and farmers were being held in some districts to formulate plans to meet the situation. A few farmers claimed that they would have to dispose of some of their livestock if help was not supplied them within a few weeks.

Several lumbering camps had closed for the season and others expected to complete their operations during March. There was still some demand, however, for loggers, teamsters, loaders, and pulpwood cutters, but few workers were interested so late in the season. Army calls and transfers to farming were depleting a number of bush camps.

Men to work in quarries were urgently needed in Western Ontario. There were no local applicants for this work. Underground miners were wanted in the nickel-copper areas, and underground beginners were in demand at the gold mines, but there were not many available.

With but few exceptions, the industries of Ontario were working at or near capacity. There was a slight shortage of workers in the meat-packing, flour milling, and biscuit-making establishments, and bakers' helpers were being sought in some of the larger cities. Preparations were under way for the maple syrup season in Eastern Ontario. Tannery workers and glove makers were wanted and were difficult to obtain. Firms manufacturing army boots were working at capacity. Other boot and shoe factories were enlarging their plants and planning to take on many additional workers. Shoe cutters and operators were already in demand. Aircraft plants and ship-building yards at the head of the Great Lakes were in need of skilled workers. Women were also in demand for aircraft work. The pulp and paper mills were active, but some of them reported having trouble with absenteeism among their workers. They were in need of unskilled labourers. Aircraft plants were stepping up production and skilled and semi-skilled

workers were wanted. Cabinet makers, carpenters, planers, and shapers were in demand by the furniture and other woodworking industries. Textile mills were nearly all busy. One important firm working on army blankets was operating night and day. In some instances, local supplies of labour were sufficient but in others, weavers, menders, knitters, loopers, power sewing-machine operators and other skilled workers, both male and female, were needed and were difficult to secure. At one important centre, the demand for women textile workers was reported to be "desperate".

Moulders, core makers, machinists, tool and die makers, steam hoist operators, stationary engineers, lathe hands, and grinders were needed for the iron and steel industries and for certain plants turning out war materials. Automobile mechanics were wanted in several centres and were difficult to find. In a few areas production was on a slightly reduced scale and some workers, both men and women, were being laid off. In practically every instance these workers were being promptly placed elsewhere. There was a very urgent need for both men and women in the chemical and abrasives industries. Many workers in these plants were being returned to farms. Platers, electricians and pipe-fitters were wanted for shipbuilding and repairs.

With a view to learning the possible ill-effects of long hours and night shifts on the health of workers, the health officers in a leading Western Ontario city were planning to provide X-ray examinations for industrial workers in that community.

With the exception of defence projects, war-time housing and a few important power and industrial undertakings, there was little construction activity. In a few instances, work was being held up because of shortages of materials. The distribution of skilled construction tradesmen needed correction which would probably be provided through clearance orders.

Retail trade appeared to be normal, with a slight trend upwards in some centres. The labour requirements of the transportation companies were restricted mainly to section labourers, maintenance men, and truck drivers. There was a widespread demand for experienced office help, stenographers, typists and laundry workers, waitresses, and sales clerks. Domestics for institutions, hotels, restaurants and private homes were very scarce in practically every urban centre. In many instances the demand for such help was urgent. Comparatively few girls were willing to accept this type of employment.

PRAIRIES

There was little activity on farms in the Prairie Region, although there were signs of an awakening interest in the problem of farm labour for the spring and summer season. Men were being sought for cleaning seed grain and other pre-spring operations. At a few points, dairymen and choremen were needed, but in very few instances was the demand at all urgent. In general, there was a shortage of farm workers which was expected to be relieved somewhat by the return of farm workers engaged in other occupations during the winter. Some inquiries had been made as to the use of Japanese and prisoners of war for farm work.

Very large shipments of fish were arriving at railheads from lakes in Northern Manitoba. The season promised to be a record one in the matter of tonnage.

The logging season was well advanced and in a few instances woodworkers were being laid off, either because operations were nearing completion, or because of deep snow and other unfavourable conditions in the woods. On the other hand, the demand for bush workers continued in most lumbering areas and the supply of workers was inadequate at such points.

The acute coal situation of January and February had been relieved. In two or three cases, strong, physically fit men for underground work were being asked for by coal mine operators but surface labour appeared to be adequate. Certified coal miners were being promptly placed. Some farmers who had been employed in mines for the winter months were returning to farms. There was a steady demand for hardrock miners in Manitoba and Alberta which was being met gradually.

In the main, industries in the Prairie Region were active. Flour mills were working three shifts. Packing and baking establishments were also busy and were taking on workers supplied from local sources. Pulp and paper mills were busy but had sufficient labour. A small number of workers were being transferred from Prairie points to shipbuilding yards on the Pacific Coast and to war industries and textile plants in Ontario. Men called to the Armed Forces were being replaced by girls in the woollens industry. There were vacancies for core makers, moulders, electric welders and motor mechanics in the iron and steel industries of the Calgary area.

With the exception of wartime construction, the building trades were comparatively quiet at most points on the Prairies. Workers were being transferred out from several places to other Prairie points and to the West Coast. Labourers and cooks were needed for high-

way construction in Northern Alberta. Transportation companies required trainmen and were using casual labour for snow removal. The latter was supplied locally where needed.

Teachers were needed in Saskatchewan and there was a fairly general demand for girls to work in hotels, restaurants and private homes. In most instances, the local supplies of such workers were insufficient.

BRITISH COLUMBIA

Spring work on the farms of British Columbia was getting under way. The demand for farm labour was on the increase, but owing to calls for the military services and the extent of off-season employment, it was difficult to measure requirements adequately. In spite of the activities of farm organizations, farmers were slow in reporting their needs for workers.

Logging camps were re-opening following the severe weather of January and February, and many men were returning to work in the woods. Additional experienced woodsmen, especially fallers, buckers and loggers were required. Openings for skilled woodsmen were being filled to some extent by transferring workers from the Prairies. At a few points, work was still held up by bad roads and heavy snow in the woods.

Although the demand for coal miners was being gradually met in some areas, there still remained a shortage. However, possibly the most urgent demand for miners came from mercury, tungsten, gold and hard rock mines, and the supply of workers for both underground and surface work was in most instances quite inadequate.

One cannery in the Okanagan district was operating steadily. Others were closed, as the supply of fruit was exhausted. Shipments of fruits were delayed because of the lack of refrigeration cars.

Sawmills on the lower mainland were operating on a reduced scale because of a shortage of logs, whereas on Vancouver Island there was a shortage of sawmill workers. The mills were gradually recovering from the slowdown caused by severe weather in recent weeks.

Men with mechanical experience and also women in various classifications were needed for work on aircraft and women trainees were being sought for the emergency wartime training plan. There was a serious shortage in the iron and steel industries of skilled machinists, mechanics, moulders and steam engineers holding British Columbia certificates. The demand for men in the smelting industry was urgent. Shipyards required drydock workers, both skilled and semi-skilled, as well as arc welders and ship platers. Upgrading of workers was helping to some extent and female

labour was being used for hull cleaning in Vancouver yards.

Construction work was largely restricted to National Defence projects and highways. Improvement in the weather and the arrival of building materials were overcoming the setbacks of recent weeks. There was a surplus of carpenters but a shortage of builders' labourers on Vancouver Island, whereas the demand for such workers on the mainland was being met by transferring them in from outside points. Labour turnover was increasing since the seven-day notice regulation was rescinded, and also because of men being called for military service. Some skilled men were being taken into the armed forces. Construction work on airports in the Yukon

was being resumed and the demand for carpenters, labourers, truck and tractor drivers and mechanics was increasing. Labour for water transportation was needed on Vancouver Island and mechanics and boat crews were required to prepare for river transportation in the Yukon. Extra gang labourers for the railways were difficult to obtain because of the low wages offered.

Several experienced stenographers, recently married to men on active service, were available for employment on Vancouver Island, but there was a shortage in the supply at several points on the mainland. Cooks and bakers were scarce, and female help for hotels, restaurants and private homes was required for most centres in the Region.

Applications for Employment, Vacancies and Placements, January, 1943

REPORTS received from the Employment and Selective Service Offices during the four-week period January 1st to 28th, 1943, showed a gain in business transacted, both when compared with the preceding month and with the month of January a year ago. Changes from December, 1942, were not outstanding; although except for declines in trade and logging, all industrial groups reported gains, the most noteworthy being in manufacturing and services. In comparison with January, 1942, all divisions showed expansions, the most pronounced being in manufacturing, services, construction and trade.

The accompanying chart shows a trend of employment since January, 1941, as represented by the ratio of vacancies notified and of placements effected for each 100 applications for work registered at the Employment and Selective Service Offices throughout Canada. It will be seen from the graph that the curves of vacancies and placements in relation to applications took downward courses although the levels were much higher than those shown at the end of January last year. The ratio of vacancies to each one hundred applications was 94.0 during the first four weeks of January, 1943, in contrast to 101.2 during December, 1942, and 53.4 during January of the previous year, and the ratio of placements to each one hundred applications was 64.9 for the period under review as compared with 74.2 in December, 1942, and 43.4 for January, 1942.

The average number of vacancies reported daily by employers to the offices throughout Canada during the four weeks January 1st to 28th inclusive was 8,701 as compared with 7,797 during the preceding month and 1,033 during January a year ago. The average number of applications for employment re-

ceived daily by the offices during the period under review was 9,255 in contrast with 7,706 in December, 1942, and with 1,933 during January last year. The average number of placements made daily by the offices during the first four weeks of January, 1943, was 6,016, of which 5,699 were in regular employment and 317 in work of one week's duration or less, as compared with a total daily average of 5,722 during the preceding month. Placements in January a year ago averaged 839 daily, consisting of 548 placements in regular and 291 in casual employment.

During the four weeks January 1st to January 28th the offices referred 200,002 persons to vacancies and effected a total of 138,351 placements. Of these the placements in regular employment were 131,069 of which 90,638 were of males and 40,431 of females, while placements in casual work totalled 7,282. The number of vacancies reported by employers was 135,729 for men and 64,393 for women, a total of 200,122, and applications for work numbered 212,849, of which 142,921 were from men and 69,928 from women.

The following table gives the placements effected by employment offices each year, from January, 1933, to date:—

Year	Placements		
	Regular	Casual	Totals
1933.....	170,576	181,521	352,097
1934.....	223,564	182,527	406,091
1935.....	226,245	127,457	353,802
1936.....	217,931	113,519	331,450
1937.....	275,300	114,236	389,536
1938.....	256,134	126,161	382,295
1939.....	242,962	141,920	384,882
1940.....	320,090	155,016	475,106
1941.....	316,168	191,595	507,763
1942.....	809,983	85,638	895,621
1943 (4 weeks).....	131,069	7,282	138,351

NOVA SCOTIA AND PRINCE EDWARD ISLAND

During the four weeks ending January 28, 1943, the daily average of positions offered through Employment and Selective Service Offices in Nova Scotia and Prince Edward Island was 390, compared with 364 during the month of December, 1942, and 108 in January, 1942. There was also an advance in placements during the four weeks under review, the daily average being 263 in comparison with 238 in December, 1942, and with 104 in January of last year. When comparing placements by industrial divisions with January, 1942, the most important gains were in manufacturing and construction, while improvement of more moderate proportions was recorded in trade, transportation and mining. The only reduction was a moderate decline in services. Placements by industrial divisions during the four weeks ending January 28, were: manufacturing 1,832; construction 1,494; services 1,164; trade 454; transportation 387; logging 292 and mining 237. Placements in regular employment numbered 4,410 of men and 1,500 of women.

NEW BRUNSWICK

Orders received at Employment Offices in New Brunswick during January, 1943, called for an average of 280 workers daily compared with 224 in the preceding month, and with 27 during January, 1942. Placements showed a higher average during the period under review,

198 daily in comparison with 168 in December, and with 21 during January, 1942. Large increases in manufacturing and construction and moderate gains in services, logging, trade and transportation accounted for the advance in placements over January, 1942. Industrial divisions in which the majority of placements were effected included: manufacturing 1,217; construction 1,104; services 905; logging 465 and trade 375. During the four weeks ending January, 28, there were 3,402 men and 972 women placed in regular employment.

QUEBEC

There was an increase in the average number of positions available daily at Employment Offices in the Province of Quebec during January, 1943, their being 2,717, compared with 2,533 in the previous month, and with 110 in the corresponding month of last year. During the period under review, the average number of placements recorded daily was 1,327 in comparison with 1,503 in December, and 38 in January, 1942. The substantial gain in placements over January of last year, was almost entirely due to increases in manufacturing, although construction, services, logging, trade and transportation recorded noteworthy advances. A more moderate improvement was reported in mining and finance. Industries in which employment was found for more than 100 workers included: manufacturing 15,802; construction 4,608; services 3,837; logging

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

Applications——— Vacancies - - - - - Placements—o—o—o—o—o—o

2,001; trade 1,752; transportation 1,562; and mining 473. There were 22,028 men and 7,960 women placed in regular employment.

ONTARIO

The demand for workers on a daily average, as indicated by the orders listed at Employment Offices during the four weeks ending January 28, was 3,303, as compared with 2,965 during the month of December, 1942, and with 431 in January of last year. An increase was reported in placements during the period under review, the daily average being 2,550, compared with 2,289 in the preceding month, and with 375 in January, 1942. The outstanding gain in placements from January, 1942, was due to a marked increase in manufacturing, although services, trade, construction, transportation and logging were considerably higher with somewhat smaller gains in finance and mining. Industries in which most of the placements were effected included: manufacturing 30,289; services 10,592; trade 4,879; construction 4,736; transportation 3,225; logging 3,064; finance 784 and mining 695. Regular placements numbered 37,689 of men and 18,933 of women.

MANITOBA

Employment opportunities, as indicated by orders received at offices in Manitoba during January, 1943, showed a slight decrease when compared with the preceding month but an increase over January, 1942. The daily average was 352 during the four weeks under review, 368 in December and 124 in January, 1942. The average number of placements effected daily was 275 during the period under review, compared with 302 in December, 1942, and 96 during January, 1942. Fairly large increases in manufacturing and services, and smaller advances in trade and transportation accounted for the improvement in placements over January, 1942, while a moderate loss was recorded in logging with a minor decline in agriculture. Placements by industrial divisions included: services 1,898; manufacturing 1,532; trade 840; logging 754; transportation 534 and construction 418. Placements in regular employment numbered 3,481 of men and 2,334 of women.

SASKATCHEWAN

Opportunities for employment at Employment Offices in Saskatchewan during the four weeks ending January 28, numbered 183 daily compared with 180 in December, 1942, and with 49 in January of last year. There was a daily average of 160 placements compared with 198 in December, and 47 in Janu-

ary, 1942. The improvement in placements over the corresponding month of last year, was due to fairly large gains in services, manufacturing and trade, with a more moderate increase in transportation. The only losses occurred in logging and agriculture and were unimportant. Placements by industrial divisions included: services 1,387; manufacturing 791; trade 648; transportation 301; logging 198 and construction 142. There were 2,084 men and 1,333 women in regular employment.

ALBERTA

Positions offered through Employment Offices in Alberta during January, 1943, averaged 396 daily compared with 344 in the previous month, and with 76 during January of last year. Placements, likewise, showed an increase during the four weeks ending January 28, the daily average being 332, as compared with 308 in December, 1942, and with 65 in the corresponding month of last year. Substantial increases in construction and services were mainly responsible for the gain in placements over January, 1942, although fairly large gains occurred in manufacturing, trade and transportation, and there was a moderate advance in mining. Industrial divisions in which the majority of placements were effected included: services 1,892; construction 1,728; manufacturing 986; trade 882; transportation 693; logging 689; mining 398 and agriculture 235. Placements in regular employment numbered 5,177 of men and 2,032 of women.

BRITISH COLUMBIA

Orders listed at Employment Offices in British Columbia during the four weeks ending January 28, called for a daily average of 1,081 workers compared with 819 in December, 1942, and with 106 in January, 1942. There was an improvement in placements during the period under review, the daily average being 911 compared with 717 in the previous month, and with 92 during January of last year. With the exception of agriculture in which a minor loss occurred, all industrial groups participated in the increase in placements over January, 1942, the most pronounced advance being in manufacturing and services, with smaller gains in construction, logging, trade and transportation. In addition, mining and finance recorded moderate increases, while the changes in other groups were small. Placements by industrial groups included: manufacturing 6,129; services 5,668; construction 3,049; logging 1,794; trade 1,746; transportation 1,452 and mining 591. Placements in regular employment numbered 12,367 of men and 5,367 of women.
